This is a list of mythological places which appear in mythological tales, folklore, and varying religious texts.

Egyptian mythology

Name	Description
Aaru	The heavenly paradise often referred to as the Field Of Reeds, is an underworld realm where Osiris rules in ancient Egyptian mythology.
Akhet	An Egyptian hieroglyph that represents the sun rising over a mountain. It is translated as "horizon" or "the place in the sky where the sun rises".[1]
Benben	The mound that arose from the primordial waters Nu upon which the creator deity Atum settled in the creation myth of the Heliopolitan form of ancient Egyptian religion.
Duat	The Underworld and abode of the dead in Ancient Egyptian religion.
The Indestructibles	Two bright stars which, at that time, could always be seen circling the North Pole by ancient Egyptian astronomers.[2]

Land of Manu	Western abode of the sun god Ra.[3]
Nun	The primordial waters from which the Benben arose at the beginning of the universe, also considered to be a god Nu.

Greek mythology

Name	Description
Arcadia	A vision of pastoralism and harmony with nature, derived from the Greek province Arkadia which dates to antiquity.
Asphodel Meadows	The section of the underworld where ordinary souls were sent to live after death.
Atlantis	The legendary (and almost archetypal) lost continent that was supposed to have sunk into the Atlantic Ocean.
Cloud cuckoo land	A perfect city between the clouds in the play The Birds by Aristophanes.
Chryse and Argyre	A pair of legendary islands, located in the Indian Ocean and said to be made of gold (chrysos) and silver (argyros).
Elysium (Elysian Fields)	In Greek mythology, the final resting place of the souls of the heroic and the virtuous.
Fortunate Isles (Islands of the Blessed)	Islands in the Atlantic Ocean, variously treated as a simple geographical location and as a winterless earthly paradise inhabited by the heroes of Greek mythology.
Garden of the Hesperides	The sacred garden of Hera from where the gods got their immortality.
Hyperborea	Home of the Hyperboreans in the far north of Greece or southern Europe.
Laistrygon	Home to a tribe of giant cannibals that Odysseus encountered on his way back home from the Trojan War.
Meropis	A gigantic island created purely as a parody of Plato's Atlantis.
Mount Olympus	"Olympos" was the name of the home of the Twelve Olympian gods of the ancient Greek world.[4]
Nysa	A beautiful valley full of nymphs.
Okeanos	The cosmic river encircling the Earth in Ancient Greek cosmology, also sometimes depicted as one of the Titan gods.
Panchaia (Pangaia)	A group of islands South of the Arabian peninsula inhabited by several tribes and rich with scented oils. Assumed by some to be the birthplace of the Olympian gods.
Tartaros	A pit in the underworld for condemned souls.
Themiskyra	The capital city of the Amazons in Greek mythology.
The Underworld	Comprising the realms of The Elysium Fields, The Asphodel Meadows and Tartarus.

Norse mythology

Name	Description
Alfheim	The Land of elves in Norse mythology.
Asgard	The high placed city of the gods, built by Odin, chief god of the Norse pantheon.
Biarmaland	A geographical area around the White Sea in the northern part of (European) Russia, referred to in Norse sagas.

Fositesland	The kingdom of Forseti, the god of Justice.
Gjöll	A river that separates the living from the dead in Norse mythology.
Hel (heimr)	The underworld in Norse mythology.
Hvergelmir	A major spring in Norse mythology.
Jotunheim	Land of the giants in Norse mythology.[5]
Kvenland	A geographical area referred to in several medieval texts as well as in Norse sagas. The exact location of Kvenland is unknown, though, with several competing theories placing it in either the northern part of the Scandinavian Peninsula or the southwestern part of what is now Finland.
Mímisbrunnr	A well associated with the being Mímir, located beneath the world tree Yggdrasil.
Muspelheim	Land of fire in Norse mythology.
Niflheim	World of cold in Norse mythology.
Niflhel	Cold underworld in Norse mythology.
Norumbega	A legendary settlement in northeastern North America, connected with attempts to demonstrate Viking incursions in New England.
Svartálfaheimr	The land of the Dark Elves in Norse mythology.
Urðarbrunnr	A well in Norse mythology.
Valhalla	(from Old Norse Valhöll "hall of the slain") is a majestic, enormous hall located in Asgard, ruled over by the god Odin.
Vanaheimr	The Land of the Vanir, another tribe of gods, according to Norse legends.
Yggdrasil	An immense and central sacred tree in Norse cosmology.

Polynesian and Māori mythology

Name	Description
Rarohenga	A Māori spirit world for those who favor Papatūānuku The Earth Mother.
Toi O Nga Rangi	The Māori spirit world for those who favor Ranginui The Sky Father. Sometimes known as the Sky World or the Summit Of The Heavens
Ao	The Polynesian realm of light.
Te Po	Polynesian realm of darkness and ancestors.
Hawaiki	A mostly universal belief among Oceanian cultures of a realm where all Polynesians descend, particularly the Māori. Not to be confused with the Islands of Hawaii.
Cape Reinga/Te Rerenga Wairua	Believed by Māori to be the place where spirits are required to journey through to reach the afterlife.

Indian mythology

Name	Description
Amaravati	Capital of Svarga, the abode of the devas, ruled by Indra.[6]
Ayotha Amirtha Gangai	An important river in Ayyavazhi mythology.
Brahmaloka	The abode of Brahma, the Hindu god of creation.
Himavanta	A legendary forest that locates at the hill of the Himalayas.
Jambudvīpa	Name for the terrestrial universe in Hindu, Buddhist, and Jain traditions.
Kailasha	The celestial abode of Shiva.
Ketumati	A pure land belonging to Maitreya within Buddhism.[7]
Kshira Sagara	A divine ocean of milk in Hindu mythology.
Manidvipa	The abode of the supreme goddess in Hinduism.

Mayasabha	A legendary palace located in Indraprastha, as described in Mahabharata
Mount Mandara	A sacred mountain mentioned in the Puranas.
Mount Meru	The sacred five-peaked mountain of Hindu, Jain, and Buddhist cosmology. It is considered to be the center of all the physical, metaphysical, and spiritual universes.
Naraka	A realm resembling Hell in Indian religions where souls are temporarily punished before reincarnation.
Nirvana	The ultimate state of soteriological release (liberation from repeated rebirth) commonly associated with Hinduism, Jainism, and Buddhism.
Patala	The netherworld of Indian religions.
Pialral	A heaven for great achievers of the Mizo Tribes of Northeast India.
Samavasarana	Meeting place of the tirthankaras in Jainism.
Sanzu River	A mythological river in Japanese Buddhism.
Shakadvipa	A land mass west of the Ural Mountains in Hindu mythology.
Shambhala	In Tibetan Buddhist tradition, a kingdom hidden somewhere in the Himalayas; Theosophists regard it as the home on the etheric plane of the governing deity of the earth, Sanat Kumara.
Siddhashila	The place where souls who have escaped the cycle of reincarnation and attained moksha go according to the cosmology of Jainism.
Svarga	The abode of the devas in Hinduism.
Tripura	three cities or fortresses, is described in Hindu mythology as being constructed by the great Asura architect Mayasura
Thuvaraiyam Pathi	In Ayyavazhi mythology, it was a sunken island some 240 km (150 miles) off the south coast of India.
Trāyastriṃśa	An important world of the devas in the Buddhist cosmology.
Urdhvaloka	Seven upper worlds mentioned in the Puranas.
Uttarakuru	Name of a continent (dvipa) in Indian religions.
Vaikuntha	The celestial abode of Vishnu.[8]
Vaitarani	River situated in hell mentioned in the Garuda Purana and various other Hindu religious texts.

Chinese folk mythology

Name	Description
Diyu	The realm of the dead or Hell in Chinese mythology.
Eight Pillars	A concept from Chinese mythology located in the eight cardinal directions, they are a group of eight mountains or pillars which have been thought to hold up the sky.
Feather Mountain	One of many important mythological mountains in Chinese mythology, particularly associated with the Great Flood.
Fusang	A mysterious land to the east in Chinese legends.
Jade Mountain	A mythological mountain in Chinese mythology and the residence of The Queen Mother of the West.[9]
Kunlun Mountain	A place where immortals lived according to Chinese mythology.
Longmen	A legendary waterfall in Chinese mythology.
Mount Buzhou	An ancient Chinese mythological mountain which, according to old texts, lay to the northwest of the Kunlun Mountains, in a location today referred to as the Pamir Mountains.

Mount Penglai	A legendary mountain in Chinese mythology, said to be situated on an island in the Bohai sea, home to Taoist immortals.
Moving Sands	One of the obstacles the fictional version of the monk Xuanzang and companions must cross over on their mission to fetch the Buddhist scriptures from India and return them to Tang China.
Red River	One of the mythological rivers said to flow from Kunlun, a mythological land, with mountainous features.
Shangri-La	A mystical, harmonious valley enclosed in the western end of the Kunlun Mountains, described in the 1933 novel Lost Horizon by English author James Hilton.
Weak River	One of the mythological rivers flowing near Kunlun, home of a Western Paradise.
Shangdu (Xanadu)	The summer capital of Kublai Khan's Yuan empire became a mythological place and a metaphor for splendor and opulence, popularised by the 1816 poem Kubla Khan by Samuel Taylor Coleridge.

Abrahamic mythology

Name	Description
Antillia	An island from an old Iberian legend set during the Muslim conquest of Hispania. The legend says that during this time seven Christian Visigothic bishops, who were fleeing Muslim Conquerors, embarked with their flocks on ships and set sail westwards into the Atlantic Ocean, leading them to an island (Antillia or Isle Of Seven Cities) where they founded seven settlements.
As-Sirāt	The bridge which every human must pass on the Yawm al-Qiyamah ("Day of Resurrection") to enter Paradise according to Islam.
Barzakh	A place separating the living from the hereafter or a phase/"stage" between an individual's death and their resurrection in "the Hereafter".[10][11][12][13][14]
Bethulia	A city whose deliverance by Judith, when besieged by Holofernes, forms the subject of the Book of Judith.
Brig of Dread	A bridge to Purgatory that a dead soul had to cross.
Garden of Eden	A paradise where humans were first created according to Abrahamic religions and resided until cast out for disobeying God.
Gog and Magog	Are mentioned in the Bible and the Quran both as tribes and as their land.
Heaven	In Abrahamic religions, the paradise where good people who have died continue to exist.
Hell	In some Abrahamic religions, a realm in the afterlife in which evil souls are punished after death.
Hitfun	A great dividing river separating the World of Darkness from the World of Light in Mandaean cosmology.[15]
Iram of the Pillars	The lost city mentioned in the Quran.
Jabulqa and Jabulsa	Two cities mentioned in Shi'i hadith.
Kingdom of Prester John	Legendary powerful Christian nation just beyond the Muslim world in medieval romantic literature, first located in South Asia, then Central Asia, then East Africa.
Kolob	An astronomical body (star or planet) said to be near the throne of God in

Mormon cosmology.

Malakut	A proposed invisible realm, featuring in Islamic cosmology.
Matarta	A "station" or "toll house" that is located between the World of Light (alma ḏ-nhūra) from Tibil (Earth) in Mandaean cosmology.
Mount of the Temptation	The legendary location of Jesus Christ's Temptation, traditionally placed at Jebel Quruntul or 'Ushsh el-Ghurab near Jericho in the West Bank
Nbu	The Mandaic name for the planet Mercury.
Pandæmonium	The capital of Hell in John Milton's Paradise Lost.
Piriawis	The sacred life-giving river (yardna) of the World of Light in Mandaean cosmology.
Pleroma	Abode of the holy aeons in Gnosticism.
Scholomance	A legendary school of black magic run by the Devil himself, located in Hermannstadt (now: Sibiu, Romania). Located in the mountains, south of the city Sibiu, near an unnamed lake.
Siniawis	A region in the World of Darkness or underworld.[16]
Yardna	A body of flowing fresh water that is suitable for ritual use as baptismal water in Mandaeism.[17]
Zarahemla	A civilization which was constructed in the ancient Americas, according to Mormon belief.
Zerzura	Saharan city known as the "oasis of little birds" rumored to be full of treasure.

Celtic mythologies

Name	Description
Annwn	The "otherworld" of Welsh mythology.
Avalon	Legendary Island of Apples, believed by some to be the final resting place of King Arthur.
Camelot	The city in which King Arthur reigned.
Cantre'r Gwaelod	A legendary ancient sunken kingdom said to have occupied a tract of fertile land lying between Ramsey Island and Bardsey Island.
Celliwig	The earliest named location for the court of King Arthur.
Brasil or Hy-Brasil	A mythical island to the west of Ireland.
Dinas Affaraon/Ffaraon	Legendary site of King Lludd Llaw Eraint's defeat and binding of two dragons. In Lludd and Llefelys it is claimed to be the original placename of Dinas Emrys.
Emain Ablach	A mythical island paradise in Irish mythology.
Fintan's Grave	A mythological cave on the Irish mountain (now hill) Tul Tuinde[18]
Four Treasures of the Tuatha Dé Danann (Gorias, Finias, Murias, and Falias)	In Irish Mythology the Tuatha Dé Danann get their four magical treasures from four legendary cities: Gorias in the east; Finias, in the south; Murias in the west; and Falias in the north.
Lyonesse	A country in Arthurian legend, which is said to border Cornwall in England.
Mag Mell	A mythical underworld plain in Irish mythology, achievable only through death or glory. Meaning 'plains of joy', Mag Mell was a hedonistic and pleasurable paradise, usually associated with the sea.
Rocabarraigh	A phantom island in Scottish Gaelic mythology.

Tech Duinn	A mythological island to the west of Ireland where souls go after death.
Tír fo Thuinn	A Celtic Otherworld in Irish mythology, a kingdom under the sea.
Tír na nÓg	The Celtic Otherworld in Irish mythology.
Ys	A city located in Brittany, France that was supposedly built below sea level, and demolished when the Devil destroyed the dam protecting it.

Others

Name	Description
Abya Yala	"saved land", is the name used by the Guna people.
Adiri	Afterlife in Kiwai mythology.[19]
Adlivun, Adliparmiut, and Qudlivun	Afterlives in Central Inuit mythology. Adlivun and Adliparmiut are described as lands of misery, whereas Qudlivun is a land of happiness.[20]
Akilineq	Legendary location in Inuit mythology, believed to either be entirely mythical, or possibly Labrador Peninsula, Baffin Island, or even Iceland.
Alatyr	A sacred stone, the "father to all stones", the navel of the earth, containing sacred letters and endowed with healing properties in East Slavic legends.
Alomkik	A place accessible to the Abenaki peoples' mythological protector Pamola, where he holds those who trespass on Maine's Mount Katahdin.
Altjira	A legendary era accessible during dreamtime in many Australian Aboriginal beliefs.
al-Wakwak	Island of tree growing little children.
Axis mundi	The center of the world or the connection between Heaven and Earth in various religions and mythologies.
Aztlán	Legendary original homeland of the Mexica people in Mexica/Aztec mythology.
Bald Mountain	A location in Slavic folk mythology related to witchcraft.
Baltia	An island of amber somewhere in northern Europe.
Biringan city	A mythical city that is said to invisibly lie between Gandara, Tarangnan, and Pagsanghan in Samar province of the Philippines. Biringan means "the black city" or the city of the Unknown in Waray.
Brittia	A mythical island off the coast of Austrasia.
Buyan	A mysterious island with the ability to appear and disappear using tides in Russian mythology.
Chinvat Bridge	The sifting bridge,[21] which separates the world of the living from the world of the dead in Zoroastrianism.
City of the Caesars	A city between a mountain of gold and another of diamonds supposed to be situated in Patagonia.
Cockaigne	In medieval mythology,[which?] it is a land of plenty where want does not exist.
Domdaniel	Cavernous hall at the bottom of the ocean where evil magicians, spirits, and gnomes meet.
El Dorado	Rumored city of gold in South America.[22]
Empire of Kitara	Legendary ancient empire in Western Region, Uganda
Fountain of Youth	A place, detailed in many legends around the world, where one may drink of or bathe in its waters to restore their youth.
Fiddler's Green	In 19th-century English maritime folklore, it was a kind of after-life

for sailors who had served at least fifty years at sea.

Hara Berezaiti	A legendary mountain around which the stars and planets revolve from the ancient Zoroastrian scriptures of the Avesta.
Hubur	A Sumerian term meaning "river", "watercourse" or "netherworld".
Irkalla	The underworld from which there is no return in Babylonian mythology.
Kalunga line	A watery boundary between the world of the living and the dead in religious traditions of the Congo region.
Karshvar	Legendary continents according to Avesta.
Kingdom of Opona	A mythical kingdom in Russian folklore.
Kingdom of Reynes	A country mentioned in the Middle English romance King Horn.
Kingdom of Saguenay	According to the French, an Iroquoian story of a kingdom of blonde men rich in gold and fur that existed in northern Canada prior to French colonization.
Kitezh	A legendary city beneath the waters of Lake Svetloyar.
Kyöpelinvuori	(Finnish for ghosts' mountain), in Finnish mythology, is the place which dead women haunt.
La Canela	Also known as the Valley of Cinnamon, is a legendary location in South America.
La Ciudad Blanca	"The White city", a legendary city of Honduras.
Lake Parime	An enormous lake in northeastern South America, supposedly the site of El Dorado.
Land of Darkness	A mythical land supposedly enshrouded in perpetual darkness.
Lemuria	A hypothetical "lost land" variously located in the Indian and Pacific Oceans.
Lintukoto	In Finnish mythology, a paradise-like place where birds migrate every winter; because it was located near the edge of the sky dome, the sky was very close to the ground and therefore its inhabitants were dwarves.
Lost City of Z	An indigenous city that Col. Percy Harrison Fawcett believed had existed in the jungle of the Mato Grosso state of Brazil.
Lukomorye	An ancient region in Russian lands.
Mahoroba	A far-off land full of bliss and peace, similar to Arcadia.
Mictlan	The afterworld of the Mexica.
Mu	A hypothetical continent that allegedly disappeared at the dawn of human history.
Nibiru	A mythological planet described by the Babylonians.
Onigashima	A mythical island of oni visited by the character Momotarō in Japanese folklore.
Paititi	A legendary Inca lost city or utopian rich land said to lie east of the Andes.
Pohjola	The realm of Louhi in Finnish mythology, literally translated its name means "North".
Quivira and Cíbola	Two of the legendary Seven Cities of Gold supposed by Spanish conquistadors to have existed in the Americas.
Ryūgū-jō	The undersea palace of Ryūjin, the dragon kami of the sea.
Section 37	Paul Bunyan's legendary camp. So large that it took half a day to walk around, with the kitchen itself being two-mile (3.2 km) long with nine cooks and seventy-five flunkies in its early days.[23]

Sierra de la Plata	(Spanish: Silver Mountains), was a legendary treasury of silver that was believed to be located in South America.
Silat Bridge	The Silat Bridge is a bridge in Lalish, Iraq that leads to the most holy Yazidi shrine in Yazidism.
Suddene	A country found in the Middle English romance King Horn.
Summerland	The name given by Theosophists, Wiccans and some earth-based contemporary pagan religions to their conceptualization of an (mostly pastoral) afterlife.
Takama-ga-hara	The dwelling place of the Shinto kami.
Thule	An island somewhere in the belt of Scandinavia, northern Great Britain, Iceland, and Greenland.
Vineta	A mythical city at the southern coast of the Baltic Sea.
Vyraj	A mythical place in Slavic mythology, where "birds fly for the winter and souls go after death".
Westernesse	A country found in the Middle English romance King Horn.
Xibalba	The underworld in Mayan mythology.
Yomi	The land of the dead according to Shinto mythology, as related in the Kojiki.
Yomotsu Hirasaka	A slope or boundary between this world, where the living live, and the other world, where the dead live (Yomi).
Zabag	Former kingdom in Southeast Asia.

The First Mystics: the Eleusinian Mysteries | by Raja ...
"Eleusinian" refers to the ancient Greek Eleusinian Mysteries, secret religious rites held annually at Eleusis, honoring goddesses Demeter and Persephone, focusing on death, rebirth, and the afterlife, symbolized by Persephone's journey to and from the underworld. These popular, secretive ceremonies involved purification, processions, and rituals promising initiates spiritual enlightenment and hope for a better existence beyond death, lasting for centuries before being banned by Christian Roman emperors.
Key Aspects of the Eleusinian Mysteries:
Deities: Centered on Demeter (goddess of agriculture) and her daughter Persephone (Kore), abducted by Hades.
Mythology: Reenacted the myth of Persephone's descent into the underworld and her return, symbolizing loss, search, and reunion, and the cycle of seasons.
Location: Held at the sanctuary in Eleusis, near Athens, along the sacred path (Hiera Hodos).
Participants: Open to all, regardless of age, gender, or status, with the exception of murderers, and included prominent figures like philosophers and poets.
Rituals: Involved purification (bathing), sacrifices, a solemn procession from Athens, fasting, drinking a special beverage (kykeon), and secret rites in the Telesterion (initiation hall).
Secrecy: The precise details of the climax remained secret, with initiates sworn to silence, though it promised a profound, transformative experience.
Legacy: Profoundly influenced Greek and Roman thought, philosophy, and religion, promising initiates freedom from the fear of death.

Scenic Routes to the Past
YouTube

The Eleusinian Mysteries of ancient Greece were not symbolic rituals but biochemical rites of controlled awakening. For nearly two millennia, initiates from across the Mediterranean traveled to Eleusis to drink the kykeon—a potion brewed from barley, mint, and water—believed to induce revelation of the immortal soul. Chemical analysis of surviving grains from the Telesterion suggests the barley was infected with Claviceps purpurea, the same ergot fungus later used to synthesize LSD. Plato, Cicero, and even Roman emperors described the initiation as a direct encounter with death and rebirth, not allegory. Within the temple, under precise darkness and rhythmic chant, initiates were guided through neurochemical, auditory, and visual thresholds designed to dissolve the ego and expose consciousness to the archetypal core. The Mysteries weren't mythology—they were neuroscience conducted in marble halls, their formula erased when Christianity declared the experiment heresy. —Mystic E.B. patr

Eleusinian Mysteries

From Wikipedia, the free encyclopedia

A votive plaque known as the Ninnion Tablet depicting elements of the Eleusinian Mysteries, discovered in the sanctuary at Eleusis (mid-4th century BC)
The Eleusinian Mysteries (Greek: Ἐλευσίνια Μυστήρια, romanized: Eleusínia Mystḗria) were initiations held every year for the cult of Demeter and Persephone based at the Panhellenic Sanctuary of Eleusis in ancient Greece. They are considered the "most famous of the secret religious rites of ancient Greece".[1] Their basis was a Bronze Age agrarian cult,[2] and there is some evidence that they were derived from the religious practices of the Mycenean period.[3][4] The Mysteries represented the myth of the abduction of Persephone from her mother Demeter by the king of the underworld Hades, in a cycle with three phases: the descent (loss), the search, and the ascent, with the main theme being the ascent (ἄνοδος) of Persephone and the reunion with her mother. It was a major festival during the Hellenic era, and later spread to Rome.[5]

The rites, ceremonies, and beliefs were kept secret and consistently preserved from antiquity.[6] For the initiated, the rebirth of Persephone symbolized the eternity of life which flows from generation to generation, and they believed that they would have a reward in the afterlife.[7][8] There are many paintings and pieces of pottery that depict various aspects of the Mysteries. Since the Mysteries involved visions and conjuring of an afterlife, some scholars believe that the power and longevity of the Eleusinian Mysteries, a consistent set of rites, ceremonies and experiences that spanned two millennia, came from psychedelic drugs [disputed – discuss].[9][10] The name of the town, Eleusis, seems to be pre-Greek, and is likely a counterpart with Elysium and the goddess Eileithyia.[11]

Etymology
Eleusinian Mysteries (Greek: Ἐλευσίνια Μυστήρια) was the name of the mysteries of the city Eleusis.

The name of the city Eleusis is Pre-Greek, and may be related with the name of the goddess Eileithyia.[12] Her name Ἐλυσία (Elysia) in Laconia and Messene probably relates her with the month Eleusinios and Eleusis,[13] but this is debated.[14]

The ancient Greek word from which English mystery derives, mystḗrion (μυστήριον), means "mystery or secret rite"[15] and is related with the verb myéō (μυέω), which means "(I) teach, initiate into the mysteries",[16] and the noun mýstēs (μύστης), which means "one initiated".[17] The word mystikós (μυστικός), source of the English mystic, means "connected with the mysteries", or "private, secret" (as in Modern Greek).[18]

Demeter and Persephone
Further information: Demeter

Triptolemus receiving wheat sheaves from Demeter and blessings from Persephone, Great Eleusinian Relief, 5th-century BC relief, National Archaeological Museum of Athens

The Mysteries are related to a myth concerning Demeter, the goddess of agriculture and fertility as recounted in one of the Homeric Hymns (c. 650 BC). According to the hymn, Demeter's daughter Persephone (also referred to as Kore, "maiden") was assigned the task of painting all the flowers of the earth. Before completion, she was seized by Hades, the god of the underworld, who took her to his underworld kingdom. Distraught, Demeter searched high and low for her daughter. Because of her distress, and in an effort to coerce Zeus to allow the return of her daughter, she caused a terrible drought in which the people suffered and starved, depriving the gods of sacrifice and worship. As a result, Zeus relented and allowed Persephone to return to her mother.[19]

According to the myth, during her search Demeter traveled long distances and had many minor adventures along the way. In one she taught the secrets of agriculture to Triptolemus.[20] Finally, by consulting Zeus, Demeter reunited with her daughter and the earth returned to its former verdure and prosperity: the first spring.

Zeus, pressed by the cries of the hungry people and by the other deities who also heard their anguish, forced Hades to return Persephone. However, it was a rule of the Fates that whoever consumed food or drink in the Underworld was doomed to spend eternity there. Before Persephone was released to Hermes, who had been sent to retrieve her, Hades tricked her into eating pomegranate seeds (either six or four according to the telling), which forced her to return to the underworld for some months each year. She was obliged to remain with Hades for six or four months (one month per seed) and lived above ground with her mother for the rest of the year. This left a long period of time when Demeter was unhappy due to Persephone's absence, neglecting to cultivate the earth. When Persephone returned to the surface, Demeter became joyful and cared for the earth again.

In the central foundation document of the mystery, the Homeric Hymn to Demeter line 415, Persephone is said to stay with Hades during winter and return to her mother in the spring of the year: "This was the day [of Persephone's return], at the very beginning of bountiful springtime."[21]

Persephone's rebirth is symbolic of the rebirth of all plant life and the symbol of eternity of life that flows from the generations that spring from each other.[22]

However, a scholar has proposed a different version,[23] according to which the four months during which Persephone is with Hades correspond to the dry Greek summer, a period during which plants are threatened with drought.[24]

Mysteries

Demeter, enthroned and extending her hand in a benediction toward the kneeling Metaneira, who offers the wheat that is a recurring symbol of the mysteries (Varrese Painter, red-figure hydria, c. 340 BC, from Apulia)

The Eleusinian Mysteries are believed to have ancient origins. Some findings in the temple Eleusinion in Attica suggest that their basis was an old agrarian cult.[25] Some practices of the mysteries seem to have been influenced by the religious practices of the Mycenaean period, thus predating the Greek Dark Ages.[3][4] Excavations showed that a private building existed under the Telesterion in the Mycenean period, and it seems that originally the cult of Demeter was private. In the Homeric Hymn is mentioned the palace of the king Keleos.[26]

One line of thought by modern scholars has been that the Mysteries were intended "to elevate man above the human sphere into the divine and to assure his redemption by making him a god and so conferring immortality upon him".[27]

Some scholars argued that the Eleusinian cult was a continuation of a Minoan cult,[28] and that Demeter was a poppy goddess who brought the poppy from Crete to Eleusis.[29][30] Some useful information from the Mycenean period can be taken from the study of the cult of Despoina (the precursor goddess of Persephone) and the cult of Eileithyia, who was the goddess of childbirth. The megaron of Despoina at Lycosura is quite similar to the Telesterion of Eleusis,[31] and Demeter is united with the god Poseidon, bearing a daughter, the unnamable Despoina (the mistress).[32] In the cave of Amnisos at Crete, the goddess Eileithyia is related with the annual birth of the divine child, and she is connected with Enesidaon (The Earth Shaker),[33] who is the chthonic aspect of Poseidon.[34]

At Eleusis inscriptions refer to "the Goddesses" accompanied by the agricultural god Triptolemus (probably son of Ge and Oceanus),[35] and "the God and the Goddess" (Persephone and Plouton) accompanied by Eubuleus who probably led the way back from the underworld.[36] The myth was represented in a cycle with three phases: the "descent", the "search", and the "ascent" (Greek anodos) with contrasted emotions from sorrow to joy which roused the mystae to exultation.

The main theme was the ascent of Persephone and the reunion with her mother Demeter.[37] At the beginning of the feast, the priests filled two special vessels and poured them out, one towards the west and the other towards the east. The people looking both to the sky and the earth shouted in a magical rhyme "rain and conceive". In a ritual, a child was initiated from the hearth (the divine fire). The name pais (child) appears in the Mycenean inscriptions,[38] it was the ritual of the "divine child" who originally was Ploutos. In the Homeric hymn the ritual is connected with the myth of the agricultural god Triptolemus.[39] The goddess of nature survived in the mysteries where the following words were uttered: "Mighty Potnia bore a great son".[3] Potnia (Linear B po-ti-ni-ja : lady or mistress), is a Mycenaean title applied to goddesses,[40] and probably the translation of a similar title of pre-Greek origin.[41]

The high point of the celebration was "an ear of grain cut in silence", which represented the force of the new life. The idea of immortality did not exist in the mysteries at the beginning, but the initiated believed that they would have a better fate in the underworld. Death remained a reality, but at the same time a new beginning like the plant which grows from the buried seed.[4] A depiction from the old palace of Phaistos is very close to the image of the anodos of Persephone. An armless and legless deity grows out of the ground, and her head turns to a large flower.[42]

According to George Mylonas, the lesser mysteries were held "as a rule once a year in the early spring in the month of flowers, the Anthesterion," while "the Greater Mysteries were held once a year and every fourth year they were celebrated with special splendor in what was known as the penteteris.[43] Kerényi concurs with this assessment: "The Lesser Mysteries were held at Agrai in the month of Anthesterion, our February... The initiates were not even admitted to the epopteia [Greater Mysteries] in the same year, but only in September of the following year."[44] This cycle continued for about two millennia. In the Homeric Hymn to Demeter, King Celeus is said to have been one of the first people to learn the secret rites and mysteries of her cult. He was also one of her original priests, along with Diocles, Eumolpos, Polyxeinus, and Triptolemus, Celeus' son, who had supposedly learned agriculture from Demeter.[45]

Under Peisistratos of Athens, the Eleusinian Mysteries became pan-Hellenic, and pilgrims flocked from Greece and beyond to participate. Around 300 BC, the state took over control of the mysteries; they were controlled by two families, the Eumolpidae and the Kerykes. This led to a vast increase in the number of initiates. The only requirements for membership were freedom from "blood guilt",[46] meaning never having committed murder, and not being a "barbarian" (being unable to speak Greek). Men, women, and even slaves were allowed initiation.[47]

Participants

To participate in these mysteries one had to swear a vow of secrecy.

Four categories of people participated in the Eleusinian Mysteries:

Priests, priestesses, and hierophants
Those who had attained épopteia (Greek: ἐποπτεία) (contemplation), who had learned the secrets of the greatest mysteries of Demeter
Those who had already participated at least once – they were eligible for attaining épopteia
Initiates, undergoing the ceremony for the first time

Priesthood

The priesthood officiating at the Eleusinian Mysteries and in the sanctuary was divided into several offices with different tasks.

Six categories of priests officiated in the Eleusinian Mysteries:

Hierophantes – male high priest, an office inherited within the Phileidae or Eumolpidae families.[48]
High Priestess of Demeter or Priestess of Demeter and Kore – an office inherited within the Phileidae or Eumolpidae families.[48]
Dadouchos – men serving as torch bearers, the second-highest male role next to Hierophantes.[48]
Dadouchousa Priestess – a female priestess who assisted the Dadouchos, an office inherited within the Phileidae or Eumolpidae families.[48]
Hierophantides – two married priestesses, one serving Demeter, and the other Persephone.[48]
Panageis ('the holy') or melissae ('bees') – a group of priestesses who lived a life secluded from men.[48]
The offices of Hierophant, High Priestess, and Dadouchousa priestess were all inherited within the Phileidae or Eumolpidae families, and the Hierophant and the High Priestess were of equal rank.[48] It was the task of the High Priestess to impersonate the roles of the goddesses Demeter and Persephone in the enactment during the mysteries, and at Eleusis events were dated by the name of the reigning High Priestess.[48]

Secrets

The outline below is only a capsule summary; much of the concrete information about the Eleusinian Mysteries was never written down. For example, only initiates knew what the kiste, a sacred chest, and the calathus, a lidded basket, contained.

Hippolytus of Rome, one of the Church Fathers writing in the early 3rd century AD, discloses in Refutation of All Heresies that "the Athenians, while initiating people into the Eleusinian rites, likewise display to those who are being admitted to the highest grade at these mysteries, the mighty, and marvellous, and most perfect secret suitable for one initiated into the highest mystic truths: an ear of grain in silence reaped."[49]

Lesser Mysteries

There were two Eleusinian Mysteries, the Greater and the Lesser. According to Thomas Taylor, "the dramatic shows of the Lesser Mysteries occultly signified the miseries of the soul while in subjection to the body, so those of the Greater obscurely intimated, by mystic and splendid visions, the felicity of the soul both here and hereafter, when purified from the defilements of a material nature and constantly elevated to the realities of intellectual [spiritual] vision." According to Plato, "the ultimate design of the Mysteries ... was to lead us back to the principles from which we descended, ... a perfect enjoyment of intellectual [spiritual] good."[50]

The Lesser Mysteries took place in the month of Anthesterion – the eighth month of the Attic calendar, falling in mid winter around February or March – under the direction of Athens' archon basileus. In order to qualify for initiation, participants would sacrifice a piglet[citation needed] to Demeter and Persephone, and then ritually purify themselves in the river Illisos. Upon completion of the Lesser Mysteries, participants were deemed mystai (initiates) worthy of witnessing the Greater Mysteries.

Greater Mysteries

For among the many excellent and indeed divine institutions which your Athens has brought forth and contributed to human life, none, in my opinion, is better than those mysteries. For by their means we have been brought out of our barbarous and savage mode of life and educated and refined to a state of civilization; and as the rites are called "initiations," so in very truth we have learned from them the beginnings of life, and have gained the power not only to live happily, but also to die with a better hope.

Cicero, Laws II, xiv, 36

The Greater Mysteries took place in Boedromion – the third month of the Attic calendar, falling in late summer around September or October – and lasted ten days.

The first act (on the 14th of Boedromion) was the bringing of the sacred objects from Eleusis to the Eleusinion, a temple at the base of the Acropolis of Athens.

On the 15th of Boedromion, a day called the Gathering (Agyrmos), the priests (hierophantes, those who show the sacred ones) declared the start of the rites (prorrhesis), and carried out the sacrifice (hiereía deúro, hither the victims).

The seawards initiates (halade mystai) started out in Athens on 16th Boedromion with the celebrants washing themselves in the sea at Phaleron.

On the 17th, the participants began the Epidauria, a festival for Asklepios named after his main sanctuary at Epidauros. This "festival within a festival" celebrated the healer's arrival at Athens with his daughter Hygieia, and consisted of a procession leading to the Eleusinion, during which the mystai apparently stayed at home, a great sacrifice, and an all-night feast (pannykhís).[51]

The procession to Eleusis began at Kerameikos (the Athenian cemetery) on the 18th, and from there the people walked to Eleusis, along the Sacred Way (Ἱερὰ Ὁδός, Hierá Hodós), swinging branches called bacchoi.[52] At a certain spot along the way, they shouted obscenities in commemoration of Iambe (or Baubo), an old woman who, by cracking dirty jokes, had made Demeter smile as she mourned the loss of her daughter. The procession also shouted "Íakch', O Íakche!", possibly an epithet for Dionysus, or a separate deity Iacchus, son of Persephone or Demeter.[53]

Upon reaching Eleusis, there was an all-night vigil (pannychis) according to Mylonas[54] and Kerényi.[55] perhaps commemorating Demeter's search for Persephone. At some point, initiates had a special drink (kykeon), of barley and pennyroyal, which has led to speculation about its chemicals perhaps having psychotropic effects from ergot (a fungus that grows on barley, containing psychedelic alkaloids similar to LSD). Discovery of fragments of ergot in a temple dedicated to the two Eleusinian goddesses excavated at the Mas Castellar site (Girona, Spain) provided legitimacy for this theory. Ergot fragments were found inside a vase and within the dental calculus (plaque) of a 25-year-old man, providing evidence of ergot being consumed (Juan-Stresserras, 2002). This finding seems to support the hypothesis of ergot as an ingredient of the Eleusinian kykeon.

Inside the Telesterion

Initiation to Eleusinian Mysteries. c. 100–50 BC; relief, Louvre museum (Paris, France)
On the 19th of Boedromion, initiates entered a great hall called Telesterion; in the center stood the Palace (Anaktoron), built of ruins dating back to the Mycenaean Age,[46] which only the hierophants could enter, where sacred objects were stored. Before mystai could enter the Telesterion, they would recite, "I have fasted, I have drunk the kykeon, I have taken from the kiste (box) and after working it have put it back in the calathus (open basket).[56]

It is widely supposed that the rites inside the Telesterion comprised three elements:

dromena (things done), a dramatic reenactment of the Demeter/Persephone myth
deiknumena (things shown), displayed sacred objects, in which the hierophant played an essential role
legomena (things said), commentaries that accompanied the deiknumena[57]
Combined, these three elements were known as the aporrheta (unrepeatables); the penalty for divulging them was death.

Athenagoras of Athens, Cicero, and other ancient writers cite that it was for this crime (among others) that Diagoras was condemned to death in Athens;[58][59] the tragic playwright Aeschylus was allegedly tried for revealing secrets of the mysteries in some of his plays, but was acquitted.[60] The ban on divulging the core ritual of the mysteries was thus absolute, which is probably why almost nothing is known about what transpired there.

Climax

As to the climax of the mysteries, there are two modern theories.

Some hold that the priests were the ones to reveal the visions of the holy night, consisting of a fire that represented the possibility of life after death, and various sacred objects. Others hold this explanation to be insufficient to account for the power and longevity of the mysteries, and that the experiences must have been internal and mediated by a powerful psychoactive ingredient contained in the kykeon drink (see Entheogenic theories below). Although this hypothesis continues to receive attention, it was not well received by classicists[61] .

Following this section of the Mysteries was an all-night feast (Pannychis)[62] accompanied by dancing and merriment. This portion of the festivities was open to the public.[63] The dances took place in the Rarian Field, rumored to be the first spot where grain grew. A bull sacrifice also took place late that night or early the next morning. That day (22nd Boedromion), the initiates honoured the dead by pouring libations from special vessels.

On the 23rd of Boedromion, the mysteries ended and everyone returned home.[64]

Demise

In 170 AD, the Temple of Demeter was sacked by the Sarmatians but was rebuilt by Marcus Aurelius. Aurelius was then allowed to become the only lay person ever to enter the anaktoron. As Christianity gained in popularity in the 4th and 5th centuries, Eleusis's prestige began to fade. The last pagan emperor of Rome, Julian, reigned from 361 to 363 after about fifty years of Christian rule. Julian attempted to restore the Eleusinian Mysteries and was the last emperor to be initiated into them.[65] The closing of the Eleusinian Mysteries in 392 AD by the emperor Theodosius I is reported by Eunapius, a historian and biographer of the Greek philosophers. Eunapius had been initiated by the last legitimate Hierophant, who had been commissioned by the emperor Julian to restore the Mysteries, which had by then fallen into decay. According to Eunapius, the last Hierophant was a usurper, "the man from Thespiae who held the rank of Father in the mysteries of Mithras". According to Eunapius, in 396, during his raiding campaign in Attica, the king of the Goths Alaric I[66] looted the remains of the shrines.[67][68][69][70][71][72]

According to historian Hans Kloft, despite the destruction of the Eleusinian Mysteries, elements of the cult survived in the Greek countryside. There, local peasants and shepherds partially transferred Demeter's rites and religious duties onto Saint Demetrius of Thessaloniki, who gradually became the local patron of agriculture and "heir" to the pagan mother goddess.[73]

In art, literature, and culture

The Eleusinian Mysteries Hydria, showing the reunion of Demeter and Persephone at the start of each spring

There are many paintings and pieces of pottery that depict various aspects of the Mysteries. The Eleusinian Relief, from the late 5th century BC, displayed in the National Archaeological Museum of Athens is a representative example. Triptolemus is depicted receiving seeds from Demeter and teaching mankind how to work the fields to grow crops, with Persephone holding her hand over his head to protect him.[74] Vases and other works of relief sculpture, from the 4th, 5th and 6th centuries BC, depict Triptolemus holding an ear of corn, sitting on a winged throne or chariot, surrounded by Persephone and Demeter with pine torches. The monumental Protoattic amphora from the middle of the 7th century BC, with the depiction of Medusa's beheading by Perseus and the blinding of Polyphemos by Odysseus and his companions on its neck, is kept in the Archaeological Museum of Eleusis which is located inside the archaeological site of Eleusis.

The Ninnion Tablet, found in the same museum, depicts Demeter, followed by Persephone and Iacchus, and then the procession of initiates. Then, Demeter is sitting on the kiste inside the Telesterion, with Persephone holding a torch and introducing the initiates. The initiates each hold a bacchoi. The second row of initiates were led by Iakchos, a priest who held torches for the ceremonies. He is standing near the omphalos while an unknown female (probably a priestess of Demeter) sat nearby on the kiste, holding a scepter and a vessel filled with kykeon. Pannychis is also represented.

The Myth of Er, part of Plato's Republic, is thought to be a representation of the teaching of the Eleusinian Mysteries. Er, after being killed in battle and brought to the underworld, is reincarnated without drinking from the River Lethe. He retains his memories and tells the living about his experience in the underworld. He no longer has a fear of death.[75]

In Shakespeare's Mystery Play: A Study of The Tempest, Colin Still argued that The Tempest was an allegory for initiation into the Eleusinian Mysteries.[76] Though widely rejected, this interpretation was supported by Michael Srigley in Images of Regeneration.[77]

Carl Gustav Jung (1875–1961) borrowed terms and interpretations from the late 19th and early 20th century classical scholarship in German and French as a source of metaphors for his reframing of psychoanalytic treatment into a spiritualistic ritual of initiation and rebirth. The Eleusinian mysteries, particularly the qualities of the Kore, figured prominently in his writings.[78]

Dimitris Lyacos in the second book of the Poena Damni trilogy With the People from the Bridge, a contemporary, avant-garde play focusing on the return of the dead and the revenant legend combines elements from the Eleusinian mysteries as well as early Christian tradition in order to convey a view of collective salvation. The text uses the pomegranate symbol in order to hint at the residence of the dead in the underworld and their periodical return to the world of the living.[79]

Octavio Vazquez's symphonic poem Eleusis draws on the Eleusinian Mysteries and on other Western esoteric traditions.[80] Commissioned by the Sociedad General de Autores y Editores and the RTVE Symphony Orchestra, it was premiered in 2015 by the RTVE Orchestra and conductor Adrian Leaper at the Teatro Monumental in Madrid.

Entheogenic theories

Numerous scholars have proposed that the power of the Eleusinian Mysteries came from the kykeon's functioning as an entheogen, or psychedelic agent.[9] The use of potions or philtres for magical or religious purposes was relatively common in Greece and the ancient world.[81] The initiates, sensitized by their fast and prepared by preceding ceremonies (see set and setting), may have been propelled by the effects of a powerful psychoactive potion into revelatory mind states with profound spiritual and intellectual ramifications.[82] In opposition to this idea, skeptical scholars note the lack of any solid evidence and stress the collective rather than individual character of initiation into the Mysteries.[83]

Many psychoactive agents have been proposed as the significant element of kykeon, though without consensus or conclusive evidence. These include the ergot species Claviceps paspali,[9] a fungal parasite of paspalum, which contains the alkaloids ergotamine, a precursor to LSD, and ergonovine.[82][84] However, modern attempts to prepare a kykeon using ergot-parasitized barley have yielded inconclusive results, though Alexander Shulgin and Ann Shulgin describe ergonovine and LSA to be known to produce LSD-like effects.[85][86]

Discovery of fragments of ergot (fungi containing LSD-like psychedelic alkaloids) in a temple dedicated to the two Eleusinian Goddesses excavated at the Mas Castellar site (Girona, Spain) provided some legitimacy for this theory. Ergot fragments were found inside a vase and within the dental calculus of a 25-year-old man, providing evidence of ergot being consumed. This finding seems to support the hypothesis of ergot as an ingredient of the Eleusinian kykeon.[87]

Psychoactive mushrooms are another candidate. Scholars such as Robert Graves and Terence McKenna, speculated that the mysteries were focused around a variety of Psilocybe.[88] Other entheogenic fungi, such as Amanita muscaria, have also been suggested.[89] A recent hypothesis suggests that the ancient Egyptians cultivated Psilocybe cubensis on barley and associated it with the deity Osiris.[90]

Another candidate for the psychoactive drug is an opioid derived from the poppy. The cult of the goddess Demeter may have brought the poppy from Crete to Eleusis; it is certain that opium was produced in Crete.[91]

Another theory is that the psychoactive agent in kykeon is DMT, which occurs in many wild plants of the Mediterranean, including Phalaris and/or Acacia.[92] To be active orally (like in ayahuasca) it must be combined with a monoamine oxidase inhibitor such as Syrian rue (Peganum harmala), which grows throughout the Mediterranean.

Alternatively, J. Nigro Sansonese (1994), using the mythography supplied by Mylonas, hypothesizes that the Mysteries of Eleusis were a series of practical initiations into trance involving proprioception of the human nervous system induced by breath control (similar to samyama in yoga).[93] Sansonese speculates that the kisté, a box holding sacred objects opened by the hierophant, is actually an esoteric reference to the initiate's skull, within which is seen a sacred light and are heard sacred sounds, but only after instruction in trance practice. Similarly, the seed-filled chambers of a pomegranate, a fruit associated with the founding of the cult, esoterically describe proprioception of the initiate's heart during trance.

Notable participants

Aeschylus (525/524–456/455 BC)[citation needed]
Plato (428/427 or 424/423–348/347 BC)

Augustus (63 BC–AD 14)
Plutarch (c. AD 46–after 119)[75]
Hadrian (76–138)
Antinous (c. 111–130)
Marcus Aurelius (121–180)
Commodus (161–192)
Gallienus (c. 218–268)[94]
Julian (331–363)

Iacchus (Iakchos) has been considered the divine name of the mystic Bacchus at Athens and Eleusis, derived from the boisterous festive song named for him, called Iacchus, and sung during the procession – or the personification of the ritual cry "Íakhe". See Smith, Iacchus; Aristophanes, Frogs 316 ff, 5th or 4th century BC; Plutarch, Life of Alcibiades 34. 3; Herodotus, Histories, 8. 65. 4; Arrian, Anabasis Alexandri, ii. 16; Virgil, Georgics, i. 166; and Plutarch, Themistocles, 15.

AI Overview
Orphism and Mithraism were ancient Mediterranean mystery cults focused on salvation, initiation, and a dualistic view of humanity (spirit vs. body), with Orphism tied to the mythical poet Orpheus, emphasizing reincarnation and purification through Dionysian rites, while Mithraism centered on the god Mithras, featuring elaborate seven-grade initiations, symbolic rituals like the bull-slaying (tauroctony), and a cosmic, astrological focus. Both offered esoteric knowledge, secret rites, and the promise of a better afterlife for initiates, sharing themes of cosmic cycles, death, and rebirth, often using complex symbolism.

Orphism
Founder/Figure: The legendary poet Orpheus, a shamanistic figure who journeyed to the underworld.
Core Beliefs: Dualistic nature of humans (divine soul, earthly body), reincarnation (transmigration of souls), purification to escape the cycle of rebirth, and an afterlife with gods/heroes.
Practices: Ascetic lifestyle, secret rituals, use of Orphic hymns, initiation into Dionysian mysteries, and belief in a divine spark within humans.
Key Deities: Dionysus, Persephone, Phanes (bringer of light).
(Mithraic Mysteries)
Deity: , a god of contracts, friendship, and cosmic order, originating from Persian roots.
Practices: Secret rites in underground temples (mithraea).
Initiation: A hierarchical system with seven grades (Raven, Bridegroom, Soldier, Lion, Persian, Sun-runner, Father), each associated with a planet and specific symbols/rituals.
Central Myth: slaying the bull (), a pivotal act of cosmic creation and salvation.
Themes: Cosmic cycles, the Sun, loyalty, brotherhood, and salvific death.
Connections & Contrasts
Shared Themes: Both provided secret knowledge, initiation, and a path to spiritual liberation, appealing to those seeking meaning beyond mainstream Greco-Roman religion.
Symbolism: Both used complex, often overlapping symbols (bull-slaying, cosmic figures like the in Orphism).
Focus: Orphism was more focused on the soul's journey and reincarnation, while Mithraism emphasized cosmic order, community, and a distinct set of initiatory grades and myths.

From Wikipedia, the free encyclopedia
For the offshoot of Cubism, see Orphism (art).

Orphic mosaics were found in many late-Roman villas.
Orphism is the name given to a set of religious beliefs and practices[1] originating in the ancient Greek and Hellenistic world, associated with literature ascribed to the mythical poet Orpheus, who descended into the Greek underworld and returned. Orphism has been described as a reform of the earlier Dionysian religion, involving a re-interpretation or re-reading of the myth of Dionysus and a re-ordering of Hesiod's Theogony, based in part on pre-Socratic philosophy.[2]

The suffering and death of the god Dionysus at the hands of the Titans has been considered the central myth of Orphism. According to this myth, the infant Dionysus is killed, torn apart, and consumed by the Titans. In retribution, Zeus strikes the Titans with a thunderbolt, turning them to ash. From these ashes, humanity is born. In Orphic belief, this myth describes humanity as having a dual nature: body (Ancient Greek: σῶμα, romanized: sôma), inherited from the Titans, and a divine spark or soul (Ancient Greek: ψυχή, romanized: psukhḗ), inherited from Dionysus.[3] In order to achieve salvation from the Titanic, material existence, one had to be initiated into the Dionysian mysteries and undergo teletē, a ritual purification and reliving of the suffering and death of the god.[4] The uninitiated (Ancient Greek: ἀμύητος, romanized: amúētos), they believed, would be reincarnated indefinitely.[5]

History
Orphism is named after the legendary poet-hero Orpheus, who was said to have originated the Mysteries of Dionysus.[6] However, Orpheus was more closely associated with Apollo than to Dionysus in the earliest sources and iconography. According to some versions of his mythos, he was the son of Apollo, and during his last days, he shunned the worship of other gods and devoted himself to Apollo alone.[7]

Origins

Nymphs Finding the Head of Orpheus (1900) by John William Waterhouse
Poetry containing distinctly Orphic beliefs has been traced back to the 6th century BC or at least 5th century BC, and graffiti of the 5th century BC apparently refers to "Orphics".[8][9][10] The Derveni papyrus allows Orphic mythology to be dated to the end of the 5th century BC,[11] and it is probably even older.[12] Orphic views and practices are attested as by Herodotus, Euripides, and Plato. Plato refers to "Orpheus-initiators" (Ὀρφεοτελεσταί), and associated rites, although how far "Orphic" literature in general

related to these rites is not certain.[13]

Relationship to Pythagoreanism

Orphic views and practices have parallels to elements of Pythagoreanism, and various traditions hold that the Pythagoreans or Pythagoras himself authored early Orphic works; alternately, later philosophers believed that Pythagoras was an initiate of Orphism. The extent to which one movement may have influenced the other remains controversial.[14] Some scholars maintain that Orphism and Pythagoreanism began as separate traditions which later became confused and conflated due to a few similarities. Others argue that the two traditions share a common origin and can even be considered a single entity, termed "Orphico-Pythagoreanism."[15]

The belief that Pythagoreanism was a subset or direct descendant of Orphic religion existed by late antiquity, when Neoplatonist philosophers took the Orphic origin of Pythagorean teachings at face value. Proclus wrote:

> all that Orpheus transmitted through secret discourses connected to the mysteries, Pythagoras learnt thoroughly when he completed the initiation at Libethra in Thrace, and Aglaophamus, the initiator, revealed to him the wisdom about the gods that Orpheus acquired from his mother Calliope.[16]

In the fifteenth century, the Neoplatonic Greek scholar Constantine Lascaris (who found the poem Argonautica Orphica) considered a Pythagorean Orpheus.[17] Bertrand Russell (1947) noted:

> The Orphics were an ascetic sect; wine, to them, was only a symbol, as, later, in the Christian sacrament. The intoxication that they sought was that of "enthusiasm," of union with the god. They believed themselves, in this way, to acquire mystic knowledge not obtainable by ordinary means. This mystical element entered into Greek philosophy with Pythagoras, who was a reformer of Orphism as Orpheus was a reformer of the religion of Dionysus. From Pythagoras Orphic elements entered into the philosophy of Plato, and from Plato into most later philosophy that was in any degree religious.[18]

Study of early Orphic and Pythagorean sources, however, is more ambiguous concerning their relationship, and authors writing closer to Pythagoras' own lifetime never mentioned his supposed initiation into Orphism, and in general regarded Orpheus himself as a mythological figure.[15] Despite this, even these authors of the 5th and 4th centuries BC noted a strong similarity between the two doctrines. In fact, some claimed that rather than being an initiate of Orphism, Pythagoras was actually the original author of the first Orphic texts. Specifically, Ion of Chios claimed that Pythagoras authored poetry which he attributed to the mythical Orpheus, and Epigenes, in his On Works Attributed to Orpheus, attributed the authorship of several influential Orphic poems to notable early Pythagoreans, including Cercops.[15] According to Cicero, Aristotle also claimed that Orpheus never existed, and that the Pythagoreans ascribed some Orphic poems to Cercon (see Cercops).[19]

Belief in metempsychosis was common to both currents, although it also seems to contain differences. Where the Orphics taught about a cycle of grievous embodiments that could be escaped through their rites, Pythagoras seemed to teach about an eternal, neutral metempsychosis against which personal actions would be irrelevant.[20]

The Neoplatonists regarded the theology of Orpheus, carried forward through Pythagoreanism, as the core of the original Greek religious tradition. Proclus, an influential neoplatonic philosopher, one of the last major classical philosophers of late antiquity, says

> "For all the Grecian theology is the progeny of the mystic tradition of Orpheus; Pythagoras first of all learning from Aglaophemus the rites of the Gods, but Plato in the second place receiving an all-perfect science of the divinities from the Pythagoric and Orphic writings."
> (trans. Thomas Taylor, 1816)[21]

Orphic literature

Nymphs Listening to the Songs of Orpheus (1853) by Charles Jalabert
A number of Greek religious poems in hexameters were attributed to Orpheus, though only a few such works are extant. Lost Orphic poems, which may date back as far as the sixth century BC, survive only in papyrus fragments or in quotations.[22]

Theogonies

The Orphic theogonies are works which present accounts of the origin of the gods, much like the Theogony of Hesiod. These theogonies are symbolically similar to Near Eastern models.

The main story has it that Zagreus, Dionysus' previous incarnation, is the son of Zeus and Persephone. Zeus names the child as his successor, which angers his wife Hera. She instigates the Titans to murder the child. Zagreus is then tricked with a mirror and children's toys by the Titans, who shred him to pieces and consume him. Athena saves the heart and tells Zeus of the crime, who in turn hurls a thunderbolt on the Titans. The resulting soot, from which sinful mankind is born, contains the bodies of the Titans and Zagreus. The soul of man (the Dionysus part) is therefore divine, but the body (the Titan part) holds the soul in bondage. Thus, it was declared that the soul returns to a host ten times, bound to the wheel of rebirth. Following the punishment, the dismembered limbs of Zagreus were cautiously collected by Apollo who buried them in his sacred land Delphi.

There are two Orphic stories of the rebirth of Dionysus: in one it is the heart of Dionysus that is implanted into the thigh of Zeus; in the other Zeus has impregnated the mortal woman Semele, resulting in Dionysus's literal rebirth. Many of these details differ from accounts in the classical authors. Damascius says that Apollo "gathers him (Dionysus) together and brings him back up".

The main difference seems to be in the primordial succession:[23]

In the Eudemian Theogony (5th century BC),[24] the first being to exist is Night (Nyx).[25]
In the Rhapsodic Theogony, it starts with Chronos ('Unageing Time', different from Kronos, Zeus' father) who gives birth to Ether and Chaos, and then lays the egg from which Phanes/Protogonos arises.
In the Hieronyman Theogony, the egg arises from soil (more specifically 'the matter out of which earth was coagulated') and water, and it is 'Unageing Time' Kronos which arises from it, and gives birth to Ether, Chaos and Erebus. Then Kronos lays a new egg in Chaos, from which arises Protogonos.
In the Derveni Theogony, the Night lays the egg from which Protogonos arises, he then give birth to Ouranos & Gaia, which give birth to Kronos, himself father of Zeus who end up swallowing the primordial egg of Protogonos and recreating the Universe in the process.
But there are other differences, notably in the treatment of Dionysos:[23]

In the Rhapsodic Theogony, Dionysos is dismembered and cooked by the Titans before Zeus struck them with lightning (mankind then arises from the soot, and Dionysos is resurrected from his preserved heart).
The Derveni Papyrus being fragmentary, the story stops without having mentioned him.
The Hieronyman Theogony does not include Dionysos being eaten by the Titans, as both sources for the work (Damascius and Athenagoras) do not mention it, despite the latter describing the war on the Titans.
In later centuries, these versions underwent a development where Apollo's act of burying became responsible for the reincarnation of Dionysus, thus giving Apollo the title Dionysiodotes (bestower of Dionysus).[26] Apollo plays an important part in the dismemberment myth because he represents the reverting of Encosmic Soul towards unification.[27][28]

Jacob Bryant's Orphic Egg (1774) with Ananke
In Orphic theogonies, the Orphic Egg is a cosmic egg from which hatched the primordial hermaphroditic deity Phanes/Protogonus (variously equated also with Zeus, Pan, Metis, Eros, Erikepaios and Bromius), who in turn created the other gods.[29] The egg is often depicted with the serpent-like creature, Ananke, wound about it. Phanes is the golden winged primordial being who was hatched from the shining cosmic egg that was the source of the universe.

Derveni papyrus
Main article: Derveni papyrus
The Derveni papyrus, found in Derveni, Macedonia (Greece), in 1962, contains a philosophical treatise that is an allegorical commentary on an Orphic poem in hexameters, a theogony concerning the birth of the gods, produced in the circle of the philosopher Anaxagoras, written in the second half of the fifth century BC. Fragments of

the poem are quoted making it "the most important new piece of evidence about Greek philosophy and religion to come to light since the Renaissance".[30] The papyrus dates to around 340 BC, during the reign of Philip II of Macedon, making it Europe's oldest surviving manuscript.

Gold tablets

See also: Totenpass

Gold orphic tablet and case found in Petelia, southern Italy (British Museum)[31]
Surviving written fragments show a number of beliefs about the afterlife similar to those in the "Orphic" mythology about Dionysus' death and resurrection. Bone tablets found in Olbia (5th century BC) carry short and enigmatic inscriptions like: "Life. Death. Life. Truth. Dio(nysus). Orphics." The function of these bone tablets is unknown.[32]

Gold-leaf tablets found in graves from Thurii, Hipponium, Thessaly and Crete (4th century BC and after) give instructions to the dead. Although these thin tablets are often highly fragmentary, collectively they present a shared scenario of the passage into the afterlife. When the deceased arrives in the underworld, he is expected to confront obstacles. He must take care not to drink of Lethe ("Forgetfulness"), but of the pool of Mnemosyne ("Memory"). He is provided with formulaic expressions with which to present himself to the guardians of the afterlife. As said in the Petelia tablet:

I am a son of Earth and starry sky. I am parched with thirst and am dying; but quickly grant me cold water from the Lake of Memory to drink.[33]

Other gold leaves offer instructions for addressing the rulers of the underworld:

Now you have died and now you have come into being, O thrice happy one, on this same day. Tell Persephone that the Bacchic One himself released you.[34]

Extant works

The Orphic Hymns are 87 hexametric poems of a shorter length composed in the Roman Imperial age.

The Orphic Argonautica (Ancient Greek: Ὀρφέως Ἀργοναυτικά) is a Greek epic poem dating from the 4th century CE of unknown authorship.[35] It is narrated in the first person in the name of Orpheus and tells the story of Jason and the Argonauts. The narrative is basically similar to that in other versions of the story, such as the Argonautica of Apollonius Rhodius, on which it is probably based. The main differences are the emphasis on the role of Orpheus and a more mythological, less realistic technique of narration. In the Argonautica Orphica, unlike in Apollonius Rhodius, it is claimed that the Argo was the first ship ever built.

Mithraic)

AI Overview
Mithraism - World History Encyclopedia
Mithraic refers to the secret Roman mystery cult of Mithras, a deity linked to light, contracts, and order, popular among soldiers, merchants, and slaves from the 1st to 4th centuries AD, known for its seven-tiered initiation, underground temples (Mithraea), and iconic imagery of Mithras slaying a bull (tauroctony). As a secretive religion with few written records, knowledge comes mainly from archaeology, showing its rise, popularity with Roman soldiers, rituals like communal meals, and eventual decline under Christian pressure.

Key Aspects of Mithraism
Deity: Mithras, an Indo-Iranian god associated with contracts, truth, and light, later syncretized with the Roman sun god Sol Invictus.
Practices: Involved secret initiation rites, communal meals, and a seven-grade system (Raven, Bridegroom, Soldier, Lion, Persian, Sun-Runner, Father) linked to planets.
Temples: Met in windowless, underground temples called mithraea, often built to resemble caves, decorated with art.
Iconography: The central image is the tauroctony, Mithras sacrificing a bull, surrounded by symbolic animals like a dog, snake, and scorpion, often with torchbearers Cautes and Cautopates.

Followers: Popular with Roman soldiers, merchants, and slaves, offering camaraderie and a path to spiritual enlightenment.
Origins & Decline: Originated in the Roman world (late 1st century CE) with unclear links to Persian traditions; declined in the 4th century with the rise of Christianity.
Mithraic vs. Persian Mithra
While sharing a name and some concepts (light, oaths), the Roman Mithras and Persian Mithra (from Zoroastrianism) are distinct, with the Roman version being a unique, secretive cult developed within the Roman Empire.
Legacy
Mithraism left behind numerous archaeological sites (Mithraea) across the Roman Empire, providing rich evidence for its practices, despite the lack of internal texts.

What people are saying
What came first? Christianity or Mithraism?
Popular comment · 2/ When it comes to the 'parallels', we have something of a problem. The idea that there are a number of impressive parallels between Mithraism and Christianity is, at best, overstated and, at worst, simply made up. When people talk about parallels like resurrection, virgin birth, or December 25, they project later Christian ideas onto minimal Mithraic material. Roman Mithraism had no narrative scripture, for example. It had no mythic biography of Mithras beyond a set of ritual scenes, like the birth from a stone, the bull killing, and the banquet with Sol. None of this matches Christian theology in any meaningful way beyond coincidence. Some Christian texts, like those of Justin Martyr, place Jesus' birth in a cave near Bethlehem. Mithras is shown emerging from a rock. Some people treat both as 'cave births', but the similarity is superficial. Mithras is not born of a woman, for instance, and so this is claimed as 'virgin birth in a cave'. Mithras and Sol share a banquet after the bull killing, and early Christians hold communal meals. That is as far as that comparison goes. Ritual feasting is common across all sorts of religions. There is no direct evidence that links this post bull killing feast to December 25 (or any particular date, come to that), and the link there largely comes from the association with Sol Invictus on that date. This date is essentially the winter solstice and marks the 'return' of the sun and hence the 'rebirth' of light. Jesus

is associated with being the 'light of the world', and rebirth, and so those two stories line up nicely. However, mid-winter is also a perfectly natural point in the calendar for people to celebrate, particularly as it marks a vital part in the natural cycle of all things. The only association with Mithras and this date is Mithras' dining with Sol. Nothing directly links Mithras to this date. Mithraism, like many Roman cults, encouraged virtues such as loyalty, truth, and discipline, as does Christianity. However, these are generic Greco-Roman ethical themes, not evidence of borrowing or deliberately shared ideology. Really, that's as far as any obvious parallels go, and further similarities are mostly much later constructs without much in the way of direct evidence. The Christ as Myth theory doesn't appear until well into the 18th Century, and it is only then that similarities between Mithras and Jesus start to be put forward as an idea that one is based on the other. Justin Martyr (him again!) suggests that the 'demonic' ceremonies carried out by the followers of Mithras were deliberately mocking the Christian Mass, and so it is possible that there was some overlap between such ceremonies. But, if this is true, it would suggest, particularly given the depth of archaeological evidence that wasn't available to excitable chaps in the 18th and 19th centuries, that Mithraism stole from Christianity, not the other way around. As with all such things, if one skims the surface of details looking for similarities, one can find things that match. But in doing so, one must also take into account all the things that do not match. Christianity has texts that tell a story about Jesus, whereas Mithraism has no such scriptures. It has rituals and a few fixed scenes in art, certainly, but there is no comparable mythic narrative. Mithras does not die, and subsequently, he does not rise again. There is no passion sequence, one of the fundamental cores of the Christian claim. Christianity is a religion with universal reach that is based on salvation. Mithraism is not about salvation from sin and is not universal. Instead, it is an exclusive initiation cult for small groups of men. As such, those men must undergo a series of graded initiation ceremonies, and Christianity has no such ladder. Christianity is monotheistic with a high moral God, whereas Mithras sits inside Roman polytheism. He interacts with Sol, for example, as an equal, not as a supreme power. The question wasn't really about similarities between the two religions, so to avoid wandering off on one of my usual rambles through the mazes of ancient religious symbology, I'll leave it there. But it is safe to say that Christianity predates the existence of the 'Mithraic Mysteries' in their Roman context, and they really don't appear to have much to do with each other at all.

Mithras and Mithraism: San Clemente, Ostia Antica, and London
Oct 19, 2025

Agnes Crawford · Substack
Rome-based architectural history guide

1) Hundreds of years before Jesus, according to the Mithraic religion, three Wise Men of Persia came to visit the baby savior-god Mithra, bring him gifts of gold, myrrh and frankincense. 2) Mithra was born on December 25 as told in the “Great Religions of the World”, page 330;“It was the winter solstice celebrated by ancients as the birthday of Mithraism’s sun god”. 3) According to Mithraism, before Mithra died on a cross, he celebrated a “Last Supper with his twelve disciples, who represented the twelve signs of the zodiac. 4) After the death of Mithra, his body was laid to rest in a rock tomb. 5) Mithra had a celibate priesthood. 6) Mithra ascended into heaven during the spring (Passover) equinox (the time when the sun crosses the equator making night and day of equal length) As you can now see, Christianity derived many of its essential elements from the ancient religion of Mithraism. Mithraism became intertwined with the cult of Jesus to form what is known today as “Christia

Barberini Mitraeum was discovered by accident in 1936, during some construction work near Palazzo Barberini in the heart of Rome - Italy. Until then, the sanctuary had remained hidden under layers of more recent construction, preserving its extraordinary frescoes and original structure intact. The archaeologists were confronted with a perfectly recognizable room: a rectangular underground hall, with a barrel vault and two long masonry benches on either side, typical of mithraea. But it was the back wall that left everyone speechless: an exceptional pictorial cycle, among the most complete in Mithraism, dominated by the scene of tauroctonia - the ritual sacrifice of the bull by Mithras. Subsequent studies have confirmed that the mithraeum was carved out of a 2nd-century AD building, but its transformation into a place of Mithraic worship dates back to the 3rd century AD. This means that the sanctuary was active precisely during the heyday of the cult of Mithras in Rome. The Barber

"Across the ancient world, long before Christianity, the story of a dying-and-rising god was already encoded into the mythic fabric of humanity. The earliest form of this archetype appears in the “Green Man”—the spirit of vegetation, death, and rebirth who rises each spring and descends each winter. He was humanity’s first Jesus: a symbolic being whose resurrection was woven into the cycles of nature. The Green Man represented the eternal pattern of life renewing itself, a cosmic truth expressed thousands of years before the Gospels were written. His face carved into stone—leaves growing from his mouth—was the first proclamation that divinity dies, resurrects, and

returns. The cycle of Christ exists first as the cycle of the earth. From this primordial archetype evolved the figure of Mithras, the solar savior of the Roman world. Born from a virgin-like rock on December 25th, surrounded by shepherds, Mithras was a god of light who conquered darkness. His mythology was solar in every se

Kundalini & magick adept

By the early fourth century, Rome was exhausted. Its gods had become state property, its empire divided between rival Caesars, and its people spiritually fragmented. In the legions, merchants' guilds, and secret fraternities, a rival faith already thrived—Mithraism. The cult of Mithras, born from Persian-Zoroastrian fire worship and refined through Roman militarism, had temples under every major garrison from Britain to Syria. Its initiates shared sacred meals, marked their foreheads, believed in divine judgment, and honored the birth of their god on December 25th. The soldiers of the empire were already half-converted—only the names differed. When Constantine rose to power, he inherited a world where Mithras and Christ coexisted in the same barracks. His "vision of the cross" before the Battle of the Milvian Bridge in 312 CE was not a mystical revelation—it was the most brilliant political maneuver in imperial history. By merging the symbols of the sun cult with the theology of the C

The Mithraic tauroctony—the scene of Mithras slaying the bull—was never about sacrifice or blood. It was a star map. Every element in the image corresponds to constellations: the bull is Taurus, the scorpion is Scorpius, the dog Canis, the serpent Hydra, the raven Corvus. Mithras himself stands where Perseus occupies the sky. The entire composition captures the moment when the sun's position shifted out of the Age of Taurus (c. 4000–2000 BCE) into Aries, a real astronomical precession event. To initiates, this wasn't mythology—it was cosmic governance: the belief that power belongs to those who understand the cycles of the heavens and align earthly rule to celestial timing. The underground Mithraea weren't temples—they were planetaria, lit by controlled apertures and oil lamps to recreate the night sky on stone. What looked like a secret cult of Roman soldiers was actually a network of astronomical schools hiding in plain sight. Mithras wasn't worshiped. He was studied. —Mystic E.B. p

Mithras killing the bull (c. 150 CE; Louvre-Lens)

Rock-born Mithras and Mithraic artifacts (Baths of Diocletian, Rome)

Mithraism, also known as the Mithraic mysteries or the Cult of Mithras, was a Roman mystery religion focused on the god Mithras. Although inspired by Iranian worship of the Zoroastrian divinity (yazata) Mithra, the Roman Mithras was linked to a new and distinctive imagery, and the degree of continuity between Persian and Greco-Roman practice remains debatable.[a] The mysteries were popular among the Imperial Roman army from the 1st to the 4th century AD.[2]

Worshippers of Mithras had a complex system of seven grades of initiation and communal ritual meals. Initiates called themselves syndexioi, those "united by the handshake".[b] They met in dedicated mithraea (singular mithraeum), underground temples that survive in large numbers. The cult appears to have had its centre in Rome,[3] and was popular throughout the western half of the empire, as far south as Roman Africa and Numidia, as far east as Roman Dacia, as far north as Roman Britain,[4](pp 26–27) and to a lesser extent in Roman Syria in the east.[3]

Mithraism is viewed as a rival of early Christianity.[5](p 147) In the 4th century, Mithraists faced persecution from Christians, and the religion was subsequently suppressed and eliminated in the Roman Empire by the end of the century.[6]

Numerous archaeological finds, including meeting places, monuments, and artifacts, have contributed to modern knowledge about Mithraism throughout the Roman Empire.[c] The iconic scenes of Mithras show him being born from a rock, slaughtering a bull, and sharing a banquet with the god Sol (the Sun). About 420 sites have yielded materials related to the cult. Among the items found are about 1000 inscriptions, 700 examples of the bull-killing scene (tauroctony), and about 400 other monuments.[4](p xxi) It has been estimated that there would have been at least 680 mithraea in the city of Rome.[8][full citation needed] No written narratives or theology from the religion survive; limited information can be derived from the inscriptions and brief or passing references in Greek and Latin literature. Interpretation of the physical evidence remains problematic and contested.[d]

Name

The term "Mithraism" is a modern convention. Writers of the Roman era referred to it by phrases such as "Mithraic mysteries", "mysteries of Mithras" or "mysteries of the Persians".[1][e] Modern sources sometimes refer to the Roman religion as Roman

Mithraism or Western Mithraism to distinguish it from Persian worship of Mithra.[1][f]

Etymology

Main article: Mithras (name)

Bas-relief of the tauroctony of the mysteries, Metz, France

The name Mithras (Latin, equivalent to Greek Μίθρας[11]) is a form of Mithra, the name of an old, pre-Zoroastrian, and, later on, Zoroastrian, god[g][h] – a relationship understood by Mithraic scholars since the days of Franz Cumont.[i] An early example of the Greek form of the name is in a 4th century BCE work by Xenophon, the Cyropaedia, which is a biography of the Persian king Cyrus the Great.[13]

The exact form of a Latin or classical Greek word varies due to the grammatical process of inflection. There is archaeological evidence that in Latin worshippers wrote the nominative form of the god's name as "Mithras". Porphyry's Greek text De Abstinentia (Περὶ ἀποχῆς ἐμψύχων), has a reference to the now-lost histories of the Mithraic mysteries by Euboulus and Pallas, the wording of which suggests that these authors treated the name "Mithra" as an indeclinable foreign word.[j]

Related deity-names in other languages include:

Vedic Sanskrit Mitra, "friend, friendship", as the name of a god praised in the Rigveda.[15][16][k][17]

In Sanskrit, mitra is an unusual name of the sun god, mostly known as "Surya" or "Aditya", however.[18]

the form mi-it-ra-, found in an inscribed peace treaty between the Hittites and the kingdom of Mitanni, from about 1400 BCE.[l] between the king of the Hittites, Subbiluliuma, and the king of Mitanni, Mativaza. ... It is the earliest evidence of Mithras in Asia Minor.[18][19]

Iranian Mithra and Sanskrit Mitra are believed to come from the Indo-Iranian word mitrás, meaning "contract, agreement, covenant".[20]

Modern historians have different conceptions about whether these names refer to the same god or not. John R. Hinnells has written of Mitra / Mithra / Mithras as a single deity, worshipped in several different religions.[21] On the other hand, David Ulansey considers the bull-slaying Mithras to be a new god who began to be worshipped in the 1st century BCE, and to whom an old name was applied.[m]

Mary Boyce, an academic researcher on ancient Iranian religions, writes that even though Roman Mithraism seems to have had less Iranian content than ancient Romans or modern historians used to think, nonetheless "as the name Mithras alone shows, this content was of some importance".[n]

Iconography

Relief of Mithras as bull-slayer from Neuenheim near Heidelberg, framed by scenes from Mithras' life
Much about the cult of Mithras is only known from reliefs and sculptures. There have been many attempts to interpret this material.

Mithras-worship in the Roman Empire was characterized by images of the god slaughtering a bull. Other images of Mithras are found in the Roman temples, for instance Mithras banqueting with Sol, and depictions of the birth of Mithras from a rock. But the image of bull-slaying (tauroctony) is always in the central niche.[9](p 6) Textual sources for a reconstruction of the theology behind this iconography are very rare.[o] (See section Interpretations of the bull-slaying scene below.)

The practice of depicting the god slaying a bull seems to be specific to Roman Mithraism. According to David Ulansey, this is "perhaps the most important example" of evident difference between Iranian and Roman traditions: "... there is no evidence that the Iranian god Mithra ever had anything to do with killing a bull."[9](p 8)

Bull-slaying scene
See also: Tauroctony
In every mithraeum the centerpiece was a representation of Mithras killing a sacred bull, an act called the tauroctony.[p][q] The image may be a relief, or free-standing, and side details may be present or omitted. The centre-piece is Mithras clothed in Anatolian costume and wearing a Phrygian cap; who is kneeling on the exhausted bull, holding it by the nostrils[4](p 77) with his left hand, and stabbing it with his right. As he does so, he looks over his shoulder towards the figure of Sol. A dog and a snake reach up towards the blood. A scorpion seizes the bull's genitals. A raven is flying around or is sitting on the bull. One or three ears of wheat are seen coming out from the bull's tail, sometimes from the wound. The bull was often white. The god is sitting on the bull in an unnatural way with his right leg constraining the bull's hoof and the left leg is bent and resting on the bull's back or flank.[r] The two torch-bearers on either side are dressed like Mithras: Cautes with his torch pointing up, and Cautopates with his torch pointing down.[4](p 98–99)[24] Sometimes Cautes and Cautopates carry shepherds' crooks instead of torches.[25]

A Roman tauroctony relief from Aquileia (c. 175 CE; Kunsthistorisches Museum, Vienna)
The event takes place in a cavern, into which Mithras has carried the bull, after having hunted it, ridden it and overwhelmed its strength.[4](p 74) Sometimes the cavern is surrounded by a circle, on which the twelve signs of the zodiac appear. Outside the cavern, top left, is Sol the sun, with his flaming crown, often driving a quadriga. A ray of light often reaches down to touch Mithras. At the top right is Luna, with her crescent moon, who may be depicted driving a biga.[26]

In some depictions, the central tauroctony is framed by a series of subsidiary scenes to the left, top and right, illustrating events in the Mithras narrative; Mithras being born from the rock, the water miracle, the hunting and riding of the bull, meeting Sol who kneels to him, shaking hands with Sol and sharing a meal of bull-parts with him, and ascending to the heavens in a chariot.[26] In some instances, as is the case in the stucco icon at Santa Prisca Mithraeum in Rome, the god is shown heroically nude.[s] Some of these reliefs were constructed so that they could be turned on an axis. On the reverse was another, more elaborate feasting scene. This indicates that the bull killing scene was used in the first part of the celebration, then the relief was turned, and the second scene was used in the second part of the celebration.[28] Besides the main cult icon, a number of mithraea had several secondary tauroctonies, and some small portable versions, probably meant for private devotion, have also been found.[29]

Banquet

The second most important scene after the tauroctony in Mithraic art is the so-called banquet scene.[30](pp 286–287) The banquet scene features Mithras and Sol Invictus banqueting on the hide of the slaughtered bull.[30](pp 286–287) On the specific banquet scene on the Fiano Romano relief, one of the torchbearers points a caduceus towards the base of an altar, where flames appear to spring up. Robert Turcan has argued that since the caduceus is an attribute of Mercury, and in mythology Mercury is depicted as a psychopomp, the eliciting of flames in this scene is referring to the dispatch of human souls and expressing the Mithraic doctrine on this matter.[31] Turcan also connects this event to the tauroctony: The blood of the slain bull has soaked the ground at the base of the altar, and from the blood the souls are elicited in flames by the caduceus.[31]

Birth from a rock

Mithras rising from the rock (National Museum of Romanian History)

Mithras born from the rock (c. 186 CE; Baths of Diocletian)

Mithras is depicted as being born from a rock. He is often shown as emerging from a rock, already in his youth, with a dagger in one hand and a torch in the other. He is nude, standing with his legs together, and is wearing a Phrygian cap.[32]

In some variations, he is shown coming out of the rock as a child, and in one holds a globe in one hand; sometimes a thunderbolt is seen. There are also depictions in which flames are shooting from the rock and also from Mithras' cap. One statue had its base perforated so that it could serve as a fountain, and the base of another has the mask of a water god. Sometimes Mithras also has other weapons such as bows and arrows, and there are also animals such as dogs, serpents, dolphins, eagles, other birds, lions, crocodiles, lobsters and snails around. On some reliefs, there is a bearded figure identified as the water god Oceanus, and on some there are the gods of the four winds. In these reliefs, the four elements could be invoked together. Sometimes Victoria, Luna, Sol, and Saturn also seem to play a role. Saturn in particular is often seen handing over the dagger or short sword to Mithras, used later in the tauroctony.[32]

In some depictions, Cautes and Cautopates are also present; sometimes they are depicted as shepherds.[33]

On some occasions, an amphora is seen, and a few instances show variations like an egg birth or a tree birth. Some interpretations show that the birth of Mithras was celebrated by lighting torches or candles.[32][34]

Lion-headed figure

Main article: Arimanius

Lion-headed figure from the Sidon Mithraeum (500 CE; CIMRM[35] 78 & 79; Louvre)
One of the most characteristic and poorly-understood features of the Mysteries is the naked lion-headed figure often found in Mithraic temples, named by the modern scholars with descriptive terms such as leontocephaline (lion-headed) or leontocephalus (lion-head).

His body is a naked man's, entwined by a serpent (or two serpents, like a caduceus), with the snake's head often resting on the lion's head. The lion's mouth is often open. He is usually represented as having four wings, two keys (sometimes a single key), and a sceptre in his hand. Sometimes the figure is standing on a globe inscribed with a diagonal cross. On the figure from the Ostia Antica Mithraeum (left, CIMRM[35] 312), the four wings carry the symbols of the four seasons, and a thunderbolt is engraved on his chest. At the base of the statue are the hammer and tongs of Vulcan and Mercury's cock and wand (caduceus). A rare variation of the same figure is also found with a human head and a lion's head emerging from its chest.[36][37]

Although animal-headed figures are prevalent in contemporary Egyptian and Gnostic mythological representations, no exact parallel to the Mithraic leontocephaline figure has been found.[36]

Based on dedicatory inscriptions for altars, the name of the figure is conjectured to be Arimanius, a Latinized form of the name Ahriman[t] – perplexingly, a demonic figure in the Zoroastrian pantheon. Arimanius is known from inscriptions to have been a god in the Mithraic cult as seen, for example, in images from the Corpus Inscriptionum et Monumentorum Religionis Mithriacae (CIMRM[35]) such as CIMRM[35] 222 from Ostia, CIMRM 369 from Rome, and CIMRM[35] 1773 and 1775 from Pannonia.[38]

Some scholars identify the lion-man as Aion, or Zurvan, or Cronus, or Chronos, while others assert that it is a version of the Zoroastrian Ahriman or the more benign Vedic Aryaman.[u] Although the exact identity of the lion-headed figure is debated by scholars, it is largely agreed that the god is associated with time and seasonal change.[40](p 94)

Rituals and worship

According to M.J. Vermaseren and C.C. van Essen, the Mithraic New Year and the birthday of Mithras was on 25 December.[v][w] Beck disagreed strongly.[43](p 299, note 12) Clauss states: "The Mithraic Mysteries had no public ceremonies of its own. The festival of Natalis Invicti, held on 25 December, was a general festival of the Sun, and by no means specific to the Mysteries of Mithras."[44]

Mithraic initiates were required to swear an oath of secrecy and dedication.[45]

Mithras was thought to be a "warrior hero" similar to Greek heroes.[46]

Mithraic catechism

Apparently, some grade rituals involved the recital of a catechism, wherein the initiate was asked a series of questions pertaining to the initiation symbolism and had to reply with specific answers. An example of such a catechism, apparently pertaining to the Leo grade, was discovered in a fragmentary Egyptian papyrus (Papyrus Berolinensis 21196), [45][47] and reads:

Verso
[...] He will say: 'Where [...]?'
'[...] is he at a loss there?' Say: '[...]'
[...] Say: 'Night'. He will say: 'Where [...]?'
[...] Say: 'All things [...]'
'[...] are you called?' Say: 'Because of the summery [...]'
[...] having become [...] he/it has the fiery ones
'[...] did you receive?' Say: 'In a pit'. He will say: 'Where is your [...]?'
'[...] [in the] Leonteion.' He will say: 'Will you gird [...]?'
'[...] death'. He will say: 'Why, having girded yourself, [...]?'
[...] this [has?] four tassels.
Recto
Very sharp and [...]
[...] much. He will say: '[...]?'

Say: 'Drink and food'. He will say: '[...]?'
[...] in the seven-[...]

Mithraic relief with original colors (reconstitution), c. 140–160 CE; from Argentoratum. Strasbourg Archaeological Museum.

Almost no Mithraic scripture or first-hand account of its rituals survives;[o] with the exception of the aforementioned oath and catechism, and the document known as the Mithras Liturgy, from 4th century Egypt, whose status as a Mithraist text has been questioned by scholars including Franz Cumont.[x][48] The walls of mithraea were commonly whitewashed, and where this survives, it tends to carry extensive repositories of graffiti; and these, together with inscriptions on Mithraic monuments, form the main source for Mithraic texts.[49]

Feasting

The archaeology of numerous mithraea indicates that most rituals were associated with feasting – as eating utensils and food residues are often found. These tend to include both animal bones and also very large quantities of fruit residues.[4](p 115) The presence of large numbers of cherry-stones in particular would tend to confirm mid-summer (late June, early July) as a season especially associated with Mithraic festivities. The Virunum album, in the form of an inscribed bronze plaque, records a Mithraic festival of commemoration as taking place on 26 June 184. Beck argues that religious celebrations on this date are indicative of special significance being given to the summer solstice; but this time of the year coincides with ancient recognition of the solar maximum at midsummer, when iconographically identical holidays such as Fors Fortuna (ancient Rome), Saint John's Eve, and Jāņi (Lithuania) are also observed.

For their feasts, Mithraic initiates reclined on stone benches arranged along the longer sides of the mithraeum – typically there might be room for 15 to 30 diners, but very rarely many more than 40 men.[4](p 43) Counterpart dining rooms, or triclinia, were to be found above ground in the precincts of almost any temple or religious sanctuary in the Roman empire, and such rooms were commonly used for their regular feasts by Roman 'clubs', or collegia. Mithraic feasts probably performed a very similar function for Mithraists as the collegia did for those entitled to join them; indeed, since qualification for Roman collegia tended to be restricted to particular families, localities or traditional trades, Mithraism may have functioned in part as providing clubs for the unclubbed.[50] The size of the mithraeum is not necessarily an indication of the size of the congregation.[27](pp 12,36)

Altars, iconography, and suspected doctrinal diversity

Each mithraeum had several altars at the further end, underneath the representation of the tauroctony, and also commonly contained considerable numbers of subsidiary altars, both in the main mithraeum chamber and in the ante-chamber or narthex.[4](p 49) These altars, which are of the standard Roman pattern, each carry a named dedicatory inscription from a particular initiate, who dedicated the altar to Mithras "in fulfillment of his vow", in gratitude for favours received.

Burned residues of animal entrails are commonly found on the main altars, indicating regular sacrificial use, though mithraea do not commonly appear to have been provided with facilities for ritual slaughter of sacrificial animals (a highly specialised function in Roman religion), and it may be presumed that a mithraeum would have made arrangements for this service to be provided for them in co-operation with the professional victimarius[51](p 568) of the civic cult. Prayers were addressed to the Sun three times a day, and Sunday was especially sacred.[52]

It is doubtful whether Mithraism had a monolithic and internally consistent doctrine.[y] It may have varied from location to location.[30](p 16) The iconography is relatively coherent.[26] It had no predominant sanctuary or cultic centre; and, although each mithraeum had its own officers and functionaries, there was no central supervisory authority. In some mithraea, such as that at Dura Europos, wall paintings depict prophets carrying scrolls,[54] but no named Mithraic sages are known, nor does any reference give the title of any Mithraic scripture or teaching. It is known that initiates could transfer with their grades from one Mithraeum to another.[4](p 139)

Mithraeum

See also: Mithraeum

A mithraeum found in the ruins of Ostia Antica, Italy

Temples of Mithras are sunk below ground, windowless, and very distinctive. In cities, the basement of an apartment block might be converted; elsewhere they might be excavated and vaulted over, or converted from a natural cave. Mithraic temples are common in the empire; although unevenly distributed, with considerable numbers found in Rome, Ostia, Numidia, Dalmatia, Britain and along the Rhine/Danube frontier, while being somewhat less common in Greece, Egypt, and Syria.[4](pp 26–27) According to Walter Burkert, the secret character of Mithraic rituals meant that Mithraism could only be practiced within a Mithraeum.[55] Some new finds at Tienen show evidence of large-scale feasting and suggest that the mystery religion may not have been as secretive as was generally believed.[z]

For the most part, mithraea tend to be small, externally undistinguished, and cheaply constructed; the cult generally preferring to create a new centre rather than expand an existing one. The mithraeum represented the cave to which Mithras carried and then killed the bull; and where stone vaulting could not be afforded, the effect would be imitated with lath and plaster. They are commonly located close to springs or streams; fresh water appears to have been required for some Mithraic rituals, and a basin is often incorporated into the structure.[4](p 73) There is usually a narthex or ante-chamber at the entrance, and often other ancillary rooms for storage and the preparation of food. The extant mithraea present us with actual physical remains of the architectural structures of the sacred spaces of the Mithraic cult. Mithraeum is a modern coinage and mithraists referred to their sacred structures as speleum or antrum (cave), crypta (underground hallway or corridor), fanum (sacred or holy place), or even templum (a temple or a sacred space).[aa]

In their basic form, mithraea were entirely different from the temples and shrines of other cults. In the standard pattern of Roman religious precincts, the temple building functioned as a house for the god, who was intended to be able to view, through the opened doors and columnar portico, sacrificial worship being offered on an altar set in an open courtyard – potentially accessible not only to initiates of the cult, but also to colitores or non-initiated worshippers.[51](p 493) Mithraea were the antithesis of this.[51](p 355)

Degrees of initiation

In the Suda under the entry Mithras, it states that "No one was permitted to be initiated into them (the mysteries of Mithras), until he should show himself holy and steadfast by undergoing several graduated tests."[56] Gregory Nazianzen refers to the "tests in the mysteries of Mithras".[57]

There were seven grades of initiation into Mithraism, which are listed by St. Jerome.[58] Manfred Clauss states that the number of grades, seven, must be connected to the planets. A mosaic in the Mithraeum of Felicissimus, Ostia Antica depicts these grades, with symbolic emblems that are connected either to the grades or are symbols of the planets. The grades also have an inscription beside them commending each grade into the protection of the different planetary gods.[4]: 132–133 In ascending order of importance, the initiatory grades were:[4](p 133–138)

Grade	Name	Symbols	Planet or tutelary deity	Ostia Antica Felicissimus' mithraeum symbol mosaic
1st	Corax, Corux, or Corvex (raven or crow)	Raven, beaker, caduceus	Mercury	
2nd	Nymphus, Nymphobus (bridegroom)	Lamp, hand bell, veil, circlet or diadem	Venus	
3rd	Miles (soldier)	Pouch, helmet, lance, drum, belt, breastplate	Mars	
4th	Leo (lion)	Batillum, sistrum, laurel wreath, thunderbolt	Jupiter	
5th	Perses (Persian)	Hooked sword, Phrygian cap, sickle, lunar crescent, stars, sling, pouch	Luna	

6th	Heliodromus (sun-runner)	Torch, images of Helios, radiate crown, whip, robes	Sol
7th	Pater (father)	Patera, mitre, shepherd's staff, garnet or ruby ring, chasuble or cape, elaborate jewel-encrusted robes with metallic threads	Saturn

Elsewhere, as at Dura-Europos, Mithraic graffiti survive giving membership lists, in which initiates of a mithraeum are named with their Mithraic grades. At Virunum, the membership list or album sacratorum was maintained as an inscribed plaque, updated year by year as new members were initiated. By cross-referencing these lists it is possible to track some initiates from one mithraeum to another; and also speculatively to identify Mithraic initiates with persons on other contemporary lists such as military service rolls and lists of devotees of non-Mithraic religious sanctuaries. Names of initiates are also found in the dedication inscriptions of altars and other cult objects.

Clauss noted in 1990 that overall, only about 14% of Mithraic names inscribed before 250 CE identify the initiate's grade – and hence questioned the traditional view that all initiates belonged to one of the seven grades.[59] Clauss argues that the grades represented a distinct class of priests, sacerdotes. Gordon maintains the former theory of Merkelbach and others, especially noting such examples as Dura where all names are associated with a Mithraic grade. Some scholars maintain that practice may have differed over time, or from one Mithraeum to another.

The highest grade, pater, is by far the most common one found on dedications and inscriptions – and it would appear not to have been unusual for a mithraeum to have several men with this grade. The form pater patrum (father of fathers) is often found, which appears to indicate the pater with primary status. There are several examples of persons, commonly those of higher social status, joining a mithraeum with the status pater – especially in Rome during the 'pagan revival' of the 4th century. It has been suggested that some mithraea may have awarded honorary pater status to sympathetic dignitaries.[60]

The initiate into each grade appears to have been required to undertake a specific ordeal or test,[4](p 103) involving exposure to heat, cold or threatened peril. An 'ordeal pit', dating to the early 3rd century, has been identified in the mithraeum at Carrawburgh. Accounts of the cruelty of the emperor Commodus describes his amusing himself by enacting Mithraic initiation ordeals in homicidal form. By the later 3rd century, the enacted trials appear to have been abated in rigor, as 'ordeal pits' were floored over.

Admission into the community was completed with a handshake with the pater, just as Mithras and Sol shook hands. The initiates were thus referred to as syndexioi (those united by the handshake). The term is used in an inscription by Proficentius[b] and derided by Firmicus Maternus in De errore profanarum religionum,[61] a 4th century Christian work attacking paganism.[62] In ancient Iran, taking the right hand was the traditional way of concluding a treaty or signifying some solemn understanding between two parties.[63]

Ritual re-enactments

Reconstruction of a mithraeum with a mosaic depicting the grades of initiation
Activities of the most prominent deities in Mithraic scenes, Sol and Mithras, were imitated in rituals by the two most senior officers in the cult's hierarchy, the Pater and the Heliodromus.[30](p 288–289) The initiates held a sacramental banquet, replicating the feast of Mithras and Sol.[30](p 288–289)

Reliefs on a cup found in Mainz[64][65] appear to depict a Mithraic initiation. On the cup, the initiate is depicted as being led into a location where a Pater would be seated in the guise of Mithras with a drawn bow. Accompanying the initiate is a mystagogue, who explains the symbolism and theology to the initiate. The Rite is thought to re-enact what has come to be called the 'Water Miracle', in which Mithras fires a bolt into a rock, and from the rock now spouts water.

Roger Beck has hypothesized a third processional Mithraic ritual, based on the Mainz cup and Porphyrys. This scene, called 'Procession of the Sun-Runner', shows the Heliodromus escorted by two figures representing Cautes and Cautopates (see below) and preceded by an initiate of the grade Miles leading a ritual enactment of the solar journey around the mithraeum, which was intended to represent the cosmos.[66]

Consequently, it has been argued that most Mithraic rituals involved a re-enactment by the initiates of episodes in the Mithras narrative,[4](pp 62–101) a narrative whose main elements were: birth from the rock, striking water from stone with an arrow shot, the killing of the bull, Sol's submission to Mithras, Mithras and Sol feasting on the bull, the ascent of Mithras to heaven in a chariot. A noticeable feature of this narrative (and of its regular depiction in surviving sets of relief carvings) is the absence of female personages (the sole exception being Luna watching the tauroctony in the upper corner opposite Helios, and the presumable presence of Venus as patroness of the nymphus grade).[4](p 33)

Membership

Another dedication to Mithras by legionaries of Legio II Herculia has been excavated at Sitifis (modern Setif in Algeria), so the unit or a subunit must have been transferred at

least once.
Only male names appear in surviving inscribed membership lists. Historians including Cumont and Richard Gordon have concluded that the cult was for men only.[ab][ac]

The ancient scholar Porphyry refers to female initiates in Mithraic rites.[ad] The early 20th-century historian A.S. Geden wrote that this may be due to a misunderstanding.[2] According to Geden, while the participation of women in the ritual was not unknown in the Eastern cults, the predominant military influence in Mithraism makes it unlikely in this instance.[2] It has recently been suggested by David Jonathan that "Women were involved with Mithraic groups in at least some locations of the empire."[69](p 121)

Soldiers were strongly represented amongst Mithraists, and also merchants, customs officials and minor bureaucrats. Few, if any, initiates came from leading aristocratic or senatorial families until the 'pagan revival' of the mid-4th century; but there were always considerable numbers of freedmen and slaves.[4](p 39)

Ethics

Clauss suggests that a statement by Porphyry, that people initiated into the Lion grade must keep their hands pure from everything that brings pain and harm and is impure, means that moral demands were made upon members of congregations.[ae]

A passage in the Caesares of Julian the Apostate refers to "commandments of Mithras".[af] Tertullian, in his treatise "On the Military Crown" records that Mithraists in the army were officially excused from wearing celebratory coronets on the basis of the Mithraic initiation ritual that included refusing a proffered crown, because "their only crown was Mithras".[70]

History and development

Mithras before the Roman Mysteries

Mithras-Helios (right), with solar rays and in Iranian dress,[71] with Antiochus I of Commagene (Mt. Nemrut, 1st century BCE)

4th-century relief of the investiture of Sasanian king Ardashir II. Mithra stands on a lotus flower on the left holding a barsom.[71]

According to the archaeologist Maarten Vermaseren, evidence from Commagene from the 1st century BCE demonstrates the "reverence paid to Mithras" but does not refer to "the mysteries".[ag] In the colossal statuary erected by King Antiochus I (69–34 BCE) at Mount Nemrut, Mithras is shown beardless, wearing a Phrygian cap[3][73] (or the similar headdress – a Persian tiara), in Iranian (Parthian) clothing,[71] and was originally seated on a throne alongside other deities and the king himself.[74] On the back of the thrones there is an inscription in Greek, which includes the compound name Apollo-Mithras-Helios in the genitive case (Ἀπόλλωνος Μίθρου Ἡλίου).[75] Vermaseren also reports about a Mithras cult in Fayum in the 3rd century BCE.[39](p 467) R.D. Barnett has argued that the royal seal of King Saussatar of the Mitanni from c. 1450 BCE depicts a tauroctonous Mithras.[ah]

Beginnings of Roman Mithraism

The origins and spread of the Mysteries have been intensely debated among scholars and there are radically differing views on these issues.[76] According to Clauss, mysteries of Mithras were not practiced until the 1st century CE.[4] According to Ulansey, the earliest evidence for the Mithraic mysteries places their appearance in the middle of the 1st century BCE: The historian Plutarch says that in 67 BCE the pirates of Cilicia (a province on the southeastern coast of Asia Minor, that provided sea access to adjacent Commagene) were practicing "secret rites" of Mithras.[ai] According to C.M. Daniels,[78] whether any of this relates to the origins of the mysteries is unclear.[aj] The unique underground temples or mithraea appear suddenly in the archaeology in the last quarter of the 1st century CE.[79](p 118)

Earliest archaeology

Inscriptions and monuments related to the Mithraic Mysteries are catalogued in a two volume work by Maarten J. Vermaseren, the Corpus Inscriptionum et Monumentorum Religionis Mithriacae (or CIMRM).[35] The earliest monument showing Mithras slaying the bull is thought to be CIMRM 593, found in Rome. There is no date, but the inscription tells us that it was dedicated by a certain Alcimus, steward of T. Claudius Livianus. Vermaseren and Gordon believe that this Livianus is a certain Livianus who was commander of the Praetorian guard in 101 CE, which would give an earliest date of 98–99 CE.[80]

Votive altar from Alba Iulia in present-day Romania, dedicated to Invicto Mythrae in fulfillment of a vow (votum)

Five small terracotta plaques of a figure holding a knife over a bull have been excavated near Kerch in the Crimea, dated by Beskow and Clauss to the second half of the 1st century BCE,[ak] and by Beck to 50 BCE – 50 CE. These may be the earliest tauroctonies, if they are accepted to be a depiction of Mithras.[al]

The bull-slaying figure wears a Phrygian cap, but is described by Beck and Beskow as otherwise unlike standard depictions of the tauroctony. Another reason for not connecting these artifacts with the Mithraic Mysteries is that the first of these plaques was found in a woman's tomb.[am]

An altar or block from near SS. Pietro e Marcellino on the Esquiline in Rome was inscribed with a bilingual inscription by an Imperial freedman named T. Flavius Hyginus, probably between 80 and 100 CE. It is dedicated to Sol Invictus Mithras.[an]

CIMRM[35] 2268 is a broken base or altar from Novae/Steklen in Moesia Inferior, dated 100 CE, showing Cautes and Cautopates.

Other early archaeology includes the Greek inscription from Venosia by Sagaris actor probably from 100–150 CE; the Sidon cippus dedicated by Theodotus priest of Mithras to Asclepius, 140–141 CE; and the earliest military inscription, by C. Sacidius Barbarus, centurion of XV Apollinaris, from the bank of the Danube at Carnuntum, probably before 114 CE.[14](p 150)

According to C.M. Daniels,[78] the Carnuntum inscription is the earliest Mithraic dedication from the Danube region, which along with Italy is one of the two regions where Mithraism first struck root.[ao] The earliest dateable mithraeum outside Rome dates from 148 CE.[ap] The Mithraeum at Caesarea Maritima is the only one in Palestine and the date is inferred.[aq]

Earliest cult locations
According to Roger Beck, the attested locations of the Roman cult in the earliest phase (c. 80–120 CE) are as follows:[30](pp 34–35)

Mithraea datable from pottery

Nida/Heddernheim III (Germania Sup.)
Mogontiacum (Germania Sup.)
Pons Aeni (Noricum)
Caesarea Maritima (Judaea)
Datable dedications

Nida/Heddernheim I (Germania Sup.) (CIMRM[35] 1091, 1092, & 1098)
Carnuntum III (Pannonia Sup.) (CIMRM[35] 1718)
Novae (Moesia Inf.) (CIMRM[35] 2268 & 2269)
Oescus (Moesia Inf.) (CIMRM 2250)
Rome (CIMRM[35] 362, 593, & 594)
Classical literature about Mithras and the Mysteries

Mithras and the Bull: This fresco from the mithraeum at Marino, Italy (third century) shows the tauroctony and the celestial lining of Mithras' cape.
According to Boyce, the earliest literary references to the mysteries are by the Latin poet Statius, about 80 CE, and Plutarch (c. 100 CE).[22][ar]

Statius
The Thebaid (c. 80 CE[9](p 29)) an epic poem by Statius, pictures Mithras in a cave, wrestling with something that has horns.[85] The context is a prayer to the god Phoebus.[86] The cave is described as persei, which in this context is usually translated Persian. According to the translator J.H. Mozley it literally means Persean, referring to Perses, the son of Perseus and Andromeda,[9](p 29) this Perses being the ancestor of the Persians according to Greek legend.[9](pp 27–29)

Justin Martyr
Writing in approximately 145 CE, the early Christian apologist Justin Martyr charges the

cult of Mithras with imitating the Christian communion,

Which the wicked devils have imitated in the mysteries of Mithras, commanding the same things to be done. For, that bread and a cup of water are placed, with certain incantations, in the mystic rites of one who is being initiated, you either know or can learn.[87]

Plutarch

The Greek biographer Plutarch (46–127 CE) says that "secret mysteries ... of Mithras" were practiced by the pirates of Cilicia, the coastal province in the southeast of Anatolia, who were active in the 1st century BCE: "They likewise offered strange sacrifices; those of Olympus I mean; and they celebrated certain secret mysteries, among which those of Mithras continue to this day, being originally instituted by them."[88] He mentions that the pirates were especially active during the Mithridatic wars (between the Roman Republic and King Mithridates VI of Pontus) in which they supported the king.[88] The association between Mithridates and the pirates is also mentioned by the ancient historian Appian.[89] The 4th century commentary on Vergil by Servius says that Pompey settled some of these pirates in Calabria in southern Italy.[90]

Dio Cassius

The historian Dio Cassius (2nd to 3rd century CE) tells how the name of Mithras was spoken during the state visit to Rome of Tiridates I of Armenia, during the reign of Nero. (Tiridates was the son of Vonones II of Parthia, and his coronation by Nero in 66 CE confirmed the end of a war between Parthia and Rome.) Dio Cassius writes that Tiridates, as he was about to receive his crown, told the Roman emperor that he revered him "as Mithras".[91] Roger Beck thinks it possible that this episode contributed to the emergence of Mithraism as a popular religion in Rome.[as]

Porphyry

Mosaic (1st century CE) depicting Mithras emerging from his cave and flanked by Cautes and Cautopates (Walters Art Museum)

The philosopher Porphyry (3rd–4th century CE) gives an account of the origins of the Mysteries in his work De antro nympharum (The Cave of the Nymphs).[93] Citing Eubulus as his source, Porphyry writes that the original temple of Mithras was a natural cave, containing fountains, which Zoroaster found in the mountains of Persia. To Zoroaster, this cave was an image of the whole world, so he consecrated it to Mithras, the creator of the world. Later in the same work, Porphyry links Mithras and the bull with planets and star-signs: Mithras himself is associated with the sign of Aries and the planet Mars, while the bull is associated with Venus.[at]

Porphyry is writing close to the demise of the cult, and Robert Turcan has challenged the idea that Porphyry's statements about Mithraism are accurate. His case is that far from representing what Mithraists believed, they are merely representations by the Neoplatonists of what it suited them in the late 4th century to read into the mysteries.[94] Merkelbach & Beck believed Porphyry's work "is in fact thoroughly coloured with the doctrines of the Mysteries".[43](p 308 note 37) Beck holds that classical scholars have neglected Porphyry's evidence and have taken an unnecessarily skeptical view of Porphyry.[95] According to Beck, Porphyry's De antro is the only clear text from antiquity which tells us about the intent of the Mithraic mysteries and how that intent was realized.[au] David Ulansey finds it important that Porphyry "confirms ... that astral conceptions played an important role in Mithraism."[9](p 18)

Mithras Liturgy

In later antiquity, the Greek name of Mithras (Μίθρας) occurs in the text known as the "Mithras Liturgy", a part of the Paris Greek Magical Papyrus[97] here Mithras is given the epithet "the great god", and is identified with the sun god Helios.[99][100] There have been different views among scholars as to whether this text is an expression of Mithraism as such. Franz Cumont argued that it is not;[101](p 12) Marvin Meyer thinks it is;[98](pp 180–182) while Hans Dieter Betz sees it as a synthesis of Greek, Egyptian, and Mithraic traditions.[101][102]

Modern debate on origin

Cumont's hypothesis: from Persian state religion

Augustan-era intaglio depicting a tauroctony (Walters Art Museum)

4th-century relief of the investiture of the Sasanian king Ardashir II. Mithra stands on a lotus flower on the left holding a barsom.[103]

Scholarship on Mithras begins with Franz Cumont, who published a two volume collection of source texts and images of monuments in French in 1894–1900, Textes et monuments figurés relatifs aux mystères de Mithra [French: Texts and Illustrated Monuments Relating to the Mysteries of Mithra].[104] An English translation of part of this work was published in 1903, with the title The Mysteries of Mithra.[105] Cumont's hypothesis, as the author summarizes it in the first 32 pages of his book, was that the Roman religion was "the Roman form of Mazdaism",[43](p 298) the Persian state religion, disseminated from the East. He identified the ancient Aryan deity who appears in Persian literature as Mithras with the Hindu god Mitra of the Vedic hymns.[106] According to Cumont, the god Mithra came to Rome "accompanied by a large representation of the Mazdean Pantheon."[107] Cumont considers that while the tradition "underwent some modification in the Occident ... the alterations that it suffered were largely superficial."[108]

Criticisms and reassessments of Cumont

Cumont's theories came in for severe criticism from John R. Hinnells and R.L. Gordon at the First International Congress of Mithraic Studies held in 1971.[av] John Hinnells was unwilling to reject entirely the idea of Iranian origin,[109] but wrote: "we must now conclude that his reconstruction simply will not stand. It receives no support from the Iranian material and is in fact in conflict with the ideas of that tradition as they are represented in the extant texts. Above all, it is a theoretical reconstruction which does not accord with the actual Roman iconography."[aw] He discussed Cumont's reconstruction of the bull-slaying scene and stated "that the portrayal of Mithras given by Cumont is not merely unsupported by Iranian texts but is actually in serious conflict with known Iranian theology."[ax] Another paper by R.L. Gordon argued that Cumont severely distorted the available evidence by forcing the material to conform to his predetermined model of Zoroastrian origins. Gordon suggested that the theory of Persian origins was completely invalid and that the Mithraic mysteries in the West were an entirely new creation.[111]

A similar view has been expressed by Luther H. Martin: "Apart from the name of the god himself, in other words, Mithraism seems to have developed largely in and is, therefore, best understood from the context of Roman culture."[112](p xiv)

According to Hopfe, "All theories of the origin of Mithraism acknowledge a connection, however vague, to the Mithra/Mitra figure of ancient Aryan religion."[17] Reporting on the Second International Congress of Mithraic Studies, 1975, Ugo Bianchi says that although he welcomes "the tendency to question in historical terms the relations between Eastern and Western Mithraism", it "should not mean obliterating what was clear to the Romans themselves, that Mithras was a 'Persian' (in wider perspective: an Indo-Iranian) god."[113]

Boyce wrote, "no satisfactory evidence has yet been adduced to show that, before Zoroaster, the concept of a supreme god existed among the Iranians, or that among them Mithra – or any other divinity – ever enjoyed a separate cult of his or her own outside either their ancient or their Zoroastrian pantheons."[114] She also said that although recent studies have minimized the Iranizing aspects of the self-consciously Persian religion "at least in the form which it attained under the Roman Empire", the name Mithras is enough to show "that this aspect is of some importance." She also says that "the Persian affiliation of the Mysteries is acknowledged in the earliest literary references to them."[22]

Beck tells us that since the 1970s scholars have generally rejected Cumont, but adds that recent theories about how Zoroastrianism was during the period BCE now make some new form of Cumont's east–west transfer possible.[ay] He says that

... an indubitable residuum of things Persian in the Mysteries and a better knowledge of what constituted actual Mazdaism have allowed modern scholars to postulate for Roman Mithraism a continuing Iranian theology. This indeed is the main line of Mithraic scholarship, the Cumontian model which subsequent scholars accept, modify, or reject. For the transmission of Iranian doctrine from East to West, Cumont postulated a plausible, if hypothetical, intermediary: the Magusaeans of the Iranian diaspora in Anatolia. More problematic – and never properly addressed by Cumont or his successors – is how real-life Roman Mithraists subsequently maintained a quite complex and sophisticated Iranian theology behind an occidental facade. Other than the images at Dura of the two 'magi' with scrolls, there is no direct and explicit evidence for the carriers of such doctrines. ... Up to a point, Cumont's Iranian paradigm, especially in

Turcan's modified form, is certainly plausible.[115][116][117]

He also says that "the old Cumontian model of formation in, and diffusion from, Anatolia ... is by no means dead – nor should it be."[118]

Modern theories

Bas-relief depicting the tauroctony. Mithras is depicted looking to Sol Invictus as he slays the bull. Sol and Luna appear at the top of the relief.

Beck theorizes that the cult was created in Rome, by a single founder who had some knowledge of both Greek and Oriental religion, but suggests that some of the ideas used may have passed through the Hellenistic kingdoms. He observes that "Mithras – moreover, a Mithras who was identified with the Greek Sun god Helios" was among the gods of the syncretic Greco-Armenian-Iranian royal cult at Nemrut, founded by Antiochus I of Commagene in the mid 1st century BCE.[119] While proposing the theory, Beck says that his scenario may be regarded as Cumontian in two ways. Firstly, because it looks again at Anatolia and Anatolians, and more importantly, because it hews back to the methodology first used by Cumont.[120]

Merkelbach suggests that its mysteries were essentially created by a particular person or persons[121] and created in a specific place, the city of Rome, by someone from an eastern province or border state who knew the Iranian myths in detail, which he wove into his new grades of initiation; but that he must have been Greek and Greek-speaking because he incorporated elements of Greek Platonism into it. The myths, he suggests, were probably created in the milieu of the imperial bureaucracy, and for its members.[122] Clauss tends to agree. Beck calls this "the most likely scenario" and states "Until now, Mithraism has generally been treated as if it somehow evolved Topsy-like from its Iranian precursor – a most implausible scenario once it is stated explicitly."[43](pp 304, 306)

Mitraic ritual in the Mithraeum of Sutri, officiated by Giuseppe Barbera, Pontefix Maximus of the Roman religious organisation Pietas Comunità Gentile

Archaeologist Lewis M. Hopfe notes that there are only three mithraea in Roman Syria, in contrast to further west. He writes: "Archaeology indicates that Roman Mithraism had its epicenter in Rome ... the fully developed religion known as Mithraism seems to have begun in Rome and been carried to Syria by soldiers and merchants."[az]

Taking a different view from other modern scholars, Ulansey argues that the Mithraic mysteries began in the Greco-Roman world as a religious response to the discovery by the Greek astronomer Hipparchus of the astronomical phenomenon of the precession of the equinoxes – a discovery that amounted to discovering that the entire cosmos was moving in a hitherto unknown way. This new cosmic motion, he suggests, was seen by the founders of Mithraism as indicating the existence of a powerful new god capable of shifting the cosmic spheres and thereby controlling the universe.[9](pp 77 ff)

A. D. H. Bivar, L. A. Campbell, and G. Widengren have variously argued that Roman Mithraism represents a continuation of some form of Iranian Mithra worship.[123] More recently, Parvaneh Pourshariati has made similar claims.[124]

According to Antonia Tripolitis, Roman Mithraism originated in Vedic India and picked up many features of the cultures which it encountered in its westward journey.[ba]

Sol Invictus from the Archaeological Museum of Milan (Museo archeologico)

Later history

The first important expansion of the mysteries in the Empire seems to have happened quite quickly, late in the reign of Antoninus Pius (b. 121 CE, d. 161 CE) and under Marcus Aurelius. By this time all the key elements of the mysteries were in place.[bb]

Mithraism reached the apogee of its popularity during the 2nd and 3rd centuries, spreading at an "astonishing" rate at the same period when the worship of Sol Invictus was incorporated into the state-sponsored cults.[43](p 299)[bc] At this period a certain Pallas devoted a monograph to Mithras, and a little later Euboulus wrote a History of Mithras, although both works are now lost.[127] According to the 4th century Historia Augusta, the emperor Commodus participated in its mysteries[128] but it never became one of the state cults.[bd]

The historian Jacob Burckhardt writes:

Mithras is the guide of souls which he leads from the earthly life into which they had fallen back up to the light from which they issued ... It was not only from the religions and the wisdom of Orientals and Egyptians, even less from Christianity, that the notion that life on earth was merely a transition to a higher life was derived by the Romans. Their own anguish and the awareness of senescence made it plain enough that earthly existence was all hardship and bitterness. Mithras-worship became one, and perhaps the most significant, of the religions of redemption in declining paganism.[129]

Persecution and Christianization

The religion and its followers faced persecution in the 4th century from Christianization, and Mithraism came to an end at some point between its last decade and the 5th century. Ulansey states that "Mithraism declined with the rise to power of Christianity, until the beginning of the fifth century, when Christianity became strong enough to exterminate by force rival religions such as Mithraism."[be] According to Speidel, Christians fought fiercely with this feared enemy and suppressed it during the late 4th century. Mithraic sanctuaries were destroyed and religion was no longer a matter of personal choice.[bf][bg] According to L.H. Martin, Roman Mithraism came to an end with the anti-pagan decrees of the Christian emperor Theodosius during the last decade of the 4th century.[bh]

Clauss states that inscriptions show Mithras as one of the cults listed on inscriptions by Roman senators who had not converted to Christianity, as part of the "pagan revival" among the elite in the second half of the 4th century.[bi] Beck states that "Quite early in the [fourth] century the religion was as good as dead throughout the empire."[43](p 299) Archaeological evidence indicates the continuance of the cult of Mithras up until the end of the 4th century. In particular, large numbers of votive coins deposited by worshippers have been recovered at the Mithraeum at Pons Sarravi (Sarrebourg) in Gallia Belgica, in a series that runs from Gallienus (r. 253–268) to Theodosius I (r. 379–395). These were scattered over the floor when the mithraeum was destroyed, as Christians apparently regarded the coins as polluted; therefore, providing reliable dates for the functioning of the mithraeum up until near the end of the century.[4](pp 31–32)

Franz Cumont states that Mithraism may have survived in certain remote cantons of the Alps and Vosges into the 5th century.[133] According to Mark Humphries, the deliberate concealment of Mithraic cult objects in some areas suggests that precautions were being taken against Christian attacks. In areas like the Rhine frontier, barbarian invasions may have also played a role in the end of Mithraism.[134]

At some of the mithraeums that have been found below churches, such as the Santa Prisca Mithraeum and the San Clemente Mithraeum, the ground plan of the church above was made in a way to symbolize Christianity's domination of Mithraism.[135] The cult disappeared earlier than that of Isis. Isis was still remembered in the Middle Ages as a pagan deity, but Mithras was already forgotten in late antiquity.[4](p 171)

Interpretations of the bull-slaying scene

Unusual tauroctony at the Brukenthal National Museum

According to Cumont, the imagery of the tauroctony was a Graeco-Roman representation of an event in Zoroastrian cosmogony described in a 9th-century Zoroastrian text, the Bundahishn. In this text the evil spirit Ahriman (not Mithra) slays the primordial creature Gavaevodata, which is represented as a bovine.[bj] Cumont held that a version of the myth must have existed in which Mithras, not Ahriman, killed the bovine. But according to Hinnells, no such variant of the myth is known, and that this is merely speculation: "In no known Iranian text [either Zoroastrian or otherwise] does Mithra slay a bull."[137](p 291)

David Ulansey finds astronomical evidence from the mithraeum itself.[138] He reminds us that the Platonic writer Porphyry wrote in the 3rd century CE that the cave-like temple Mithraea depicted "an image of the world"[bk] and that Zoroaster consecrated a cave resembling the world fabricated by Mithras.[bl] The ceiling of the Caesarea Maritima Mithraeum retains traces of blue paint, which may mean the ceiling was painted to depict the sky and the stars.[140]

Beck has given the following celestial composition of the Tauroctony:[141]

Component of Tauroctony	Celestial counterpart
Bull	Taurus
Sol	Sun
Luna	Moon
Dog	Canis Minor, Canis Major
Snake	Hydra, Serpens, Draco
Raven	Corvus
Scorpion	Scorpius
Wheat's ear (on bull's tail)	Spica
Twins Cautes and Cautopates	Gemini
Lion	Leo
Crater	Crater
Cave	Universe

Several celestial identities for the Tauroctonous Mithras (TM) himself have been proposed. Beck summarizes them in the table below.[142]

Scholar	Identifies tauroctonous Mithras (TM) as[142]
Bausani, A. (1979)	TM associated with Leo, in that the tauroctony is a type of the ancient lion–bull (Leo–Taurus) combat motif.
Beck, R.L. (1994)	TM = Sun in Leo
Insler, S. (1978)	[tauroctony = heliacal setting of Taurus]
Jacobs, B. (1999)	[tauroctony = heliacal setting of Taurus]
North, J.D. (1990)	TM = Betelgeuse (Alpha Orionis) setting, TM knife = Triangulum setting, TM cloak = Capella (Alpha Aurigae) setting.
Rutgers, A.J. (1970)	TM = Sun, Bull = Moon
Sandelin, K.-G. (1988)	TM = Auriga
Speidel, M.P. (1980)	TM = Orion
Ulansey, D. (1989)	TM = Perseus
Weiss, M. (1994, 1998)	TM = the Night Sky

Sol and Mithras banqueting with Luna and the twin divinities Cautes and Cautopates, his attendants (side B of a double-sided Roman marble relief, 2nd or 3rd century CE)

Ulansey has proposed that Mithras seems to have been derived from the constellation of Perseus, which is positioned just above Taurus in the night sky. He sees iconographic and mythological parallels between the two figures: both are young heroes, carry a dagger, and wear a Phrygian cap. He also mentions the similarity of the image of Perseus killing the Gorgon and the tauroctony, both figures being associated with caverns and both having connections to Persia as further evidence.[9](pp 25–39)

Michael Speidel associates Mithras with the constellation of Orion because of the proximity to Taurus, and the consistent nature of the depiction of the figure as having wide shoulders, a garment flared at the hem, and narrowed at the waist with a belt, thus taking on the form of the constellation.[132]

In opposition to the theories above, which link Mithras to specific constellations, Jelbert suggests that the deity represented the Milky Way.[143] Jelbert argues that within the tauroctony image, Mithras' body is analogous to the path of the Milky Way that bridges Taurus and Scorpius, and that this bifurcated section mirrors the shape, scale and position of the deity relative to the other characters in the scene. The notion of Mithras as the Milky Way would have resonated with his status as god of light and lord of genesis, suggests Jelbert, due to the luminosity of this celestial feature, as well as the location of the traditional soul gates at Taurus-Gemini and Scorpius- Sagittarius, portals once believed to represent the points of entry for the soul at birth and death respectively.

Beck has criticized Speidel and Ulansey of adherence to a literal cartographic logic, describing their theories as a "will-o'-the-wisp" that "lured them down a false trail".[30] He argues that a literal reading of the tauroctony as a star chart raises two major problems: it is difficult to find a constellation counterpart for Mithras himself (despite efforts by Speidel and Ulansey) and that, unlike in a star chart, each feature of the tauroctony might have more than a single counterpart. Rather than seeing Mithras as a constellation, Beck argues that Mithras is the prime traveller on the celestial stage (represented by the other symbols of the scene), the Unconquered Sun moving through the constellations.[30] But again, Meyer holds that the Mithras Liturgy reflects the world of Mithraism and may be a confirmation for Ulansey's theory of Mithras being held responsible for the precession of equinoxes.[bm]

Peter Chrisp posits that the killing was of a "sacred bull" and that the "act [was] believed" to create the universe's life force and maintain it.[145]

Comparable belief systems

Main article: Mithraism in comparison with other belief systems

Mithraic altar depicting Cautes riding a bull (Sibiu/Hermannstadt, Romania)
The cult of Mithras was part of the syncretic nature of ancient Roman religion. Almost all Mithraea contain statues dedicated to gods of other cults, and it is common to find inscriptions dedicated to Mithras in other sanctuaries, especially those of Jupiter Dolichenus.[4](p 158) Mithraism was not an alternative to Rome's other traditional religions, but was one of many forms of religious practice, and many Mithraic initiates can also be found participating in the civic religion, and as initiates of other mystery cults.[146]

Christianity

See also: Mithraism in comparison with other belief systems § Mithraism and Christianity
Early Christian apologists noted similarities between Mithraic and Christian rituals, but nonetheless took an extremely negative view of Mithraism: they interpreted Mithraic rituals as evil copies of Christian ones.[147][148] For instance, Tertullian wrote that as a prelude to the Mithraic initiation ceremony, the initiate was given a ritual bath and at the end of the ceremony, received a mark on the forehead. This mark on the forehead may

have likely been the Latin letter, "M", which stood for the name of their messianic god-king Mithras. Tertullian also described these rites as a diabolical counterfeit of the baptism and chrismation of Christians.[149] Justin Martyr contrasted Mithraic initiation communion with the Eucharist:[150]

Wherefore also the evil demons in mimicry have handed down that the same thing should be done in the Mysteries of Mithras. For that bread and a cup of water are in these mysteries set before the initiate with certain speeches you either know or can learn.[151]

Ernest Renan suggested in 1882 that, under different circumstances, Mithraism might have risen to the prominence of modern-day Christianity. Renan wrote: "If the growth of Christianity had been arrested by some mortal malady, the world would have been Mithraic".[152][bn] This theory has since been contested. Leonard Boyle wrote in 1987 that "too much ... has been made of the 'threat' of Mithraism to Christianity",[154] pointing out that there are only fifty known mithraea in the entire city of Rome. J.A. Ezquerra holds that since the two religions did not share similar aims, there was never any real threat of Mithraism taking over the Roman world.[bo] Mithraism had backing from the Roman aristocracy during a time when their conservative values were seen as under attack during the rising tides of Christianity.[156]

According to Mary Boyce, Mithraism was a potent enemy for Christianity in the West, though she is sceptical about its hold in the East.[bp][158][159] F. Coarelli (1979) has tabulated forty actual or possible Mithraea and estimated that Rome would have had "not less than 680–690" mithraea.[8][bq] L.M. Hopfe states that more than 400 Mithraic sites have been found. These sites are spread all over the Roman empire from places as far as Dura-Europos in the east, and England in the west. He, too, says that Mithraism may have been a rival of Christianity.[br] David Ulansey thinks Renan's statement "somewhat exaggerated",[bs] but does consider Mithraism "one of Christianity's major competitors in the Roman Empire".[bs]

Footnotes

"The term "Mithraism" is of course a modern coinage: In antiquity the cult was known as "the mysteries of Mithras"; alternatively, as "the mysteries of the Persians". ... The Mithraists, who were manifestly not Persians in any ethnic sense, thought of themselves as cultic "Persians". ... the ancient Roman Mithraists themselves were convinced that their cult was founded by none other than Zoroaster, who "dedicated to Mithras, the creator and father of all, a cave in the mountains bordering Persia", an idyllic setting "abounding in flowers and springs of water"."(Porphyry, On the Cave of the Nymphs, 6)[1]

"That the hand-shaken might make their vows joyfully forever". — Clauss (2000).[4](p 42)

"We know a good deal about them because archaeology has disinterred many meeting places together with numerous artifacts and representations of the cult myth, mostly in the form of relief sculpture" — Beck (2011).[7]

... in the absence of any ancient explanations of its meaning, Mithraic iconography has proven to be exceptionally difficult to decipher. — Ulansey (1991)[9](p 3)

"After this, Celsus, desiring to exhibit his learning in his treatise against us, quotes also certain Persian mysteries, where he says: 'These things are obscurely hinted at in the accounts of the Persians, and especially in the mysteries of Mithras, which are celebrated among them ...' "

Chapter 24: "After the instance borrowed from the Mithraic mysteries, Celsus declares that he who would investigate the Christian mysteries, along with the aforesaid Persian, will, on comparing the two together, and on unveiling the rites of the Christians, see in this way the difference between them".[10]

"For most of the twentieth century, the major problem addressed by scholarship on both Roman Mithraism and the Iranian god Mithra was the question of continuity."[1]

It is therefore highly likely that it was in the context of Mithridates' alliance with the Cilician pirates that there arose the synchretistic link between Perseus and Mithra which led to the name Mithras (a Greek form of the name Mithra) being given to the god of the new cult. — D. Ulansey (1991)[9](p 90)

... Mithra is the next most important deity and may even have occupied a position of near equality with Ahura Mazde. He was associated with the Sun, and in time the name Mithra became a common word for "Sun". Mithra functioned preeminently in the ethical sphere; he was the god of the covenant, who oversaw all solemn agreements that people made among themselves ... In later times Mithra gave his name to Mithraism, a mystery religion.[12]

Cumont's ... argument was straightforward and may be summarized succinctly: The name of the god of the cult, Mithras, is the Latin (and Greek) form of the name of an ancient Iranian god, Mithra; in addition, the Romans believed that their cult was connected with Persia (as the Romans called Iran); therefore we may assume that Roman Mithraism is nothing other than the Iranian cult of Mithra transplanted into the Roman Empire. — D. Ulansey (1991)[9](p 8)

Quoting from Gordon:[14](p 160) "The usual western nominative form of Mithras' name in the mysteries ended in -s, as we can see from the one authentic dedication in the nominative, recut over a dedication to Sarapis (463, Terme de Caracalla), and from occasional grammatical errors such as deo inviato Metras (1443). But it is probable that Euboulus and Pallas, at least, used the name 'Mithra' as an indeclinable [foreign word] (ap. Porphyry, De abstinentia II.56 and IV.16)."[14]

India's sacred literature refers to him since the hymns of the Rig Veda. But it was in Iran where Mithras rose to the greatest prominence: Rebounding after the reforms of Zarathustra, Mithras became one of the great gods of the Achaemenian emperors and to this very day he is worshipped in India and Iran by Parsees and Zarathustrians.[16]

The name Mithras comes from a root mei- (which implies the idea of exchange), accompanied by an instrumental suffix. It was therefore a means of exchange, the 'contract' which rules human relations and is the basis of social life. In Sanskrit, mitra means 'friend' or 'friendship', like mihr in Persian. In Zend, mithra means precisely the 'contract', which eventually became deified, following the same procedure as Venus, the 'charm' for the Romans. We find him invoked with Varuna in an agreement concluded circa

... the intimate alliance between the pirates and Mithridates Eupator, named after Mithra and mythically descended from Perseus, led to the pirates adopting the name Mithras for the new god. — D. Ulansey (1991)[9](p 94)

"The theory that the complex iconography of the characteristic monuments (of which the oldest belong to the second century A.C.) could be interpreted by direct reference to Iranian religion is now widely rejected; and recent studies have tended greatly to reduce what appears to be the actual Iranian content of this "self consciously 'Persian' religion", at least in the form which it attained under the Roman empire. Nevertheless, as the name Mithras alone shows, this content was of some importance; and the Persian affiliation of the Mysteries is acknowledged in the earliest literary reference to them.[22]

... we possess virtually no theological statements either by Mithraists themselves or by other writers. — Clauss (2000)[4](p xxi)

English tauroctony is an adaption of the Greek word tauroktónos (ταυροκτόνος, "bull killing").

"Although the iconography of the cult varied a great deal from temple to temple, there is one element of the cult's iconography which was present in essentially the same form in every mithraeum and which, moreover, was clearly of the utmost importance to the cult's ideology; namely the so-called tauroctony, or bull-slaying scene, in which the god Mithras, accompanied by a series of other figures, is depicted in the act of killing the bull." — D. Ulansey (1991)[9](p 6)

"The god's right leg, appearing on the left as one faces the tauroctony, is nearly always straight as it pins the bull's hoof to the ground, while his left leg, which is usually resting on the back or flank of the bull, is bent at the knee with his foot often partially obscured beneath the folds of his tunic. Anyone familiar with the cult's iconography will immediately recognize this awkward and possibly unnatural posture as a typical or even essential aspect of the tauroctony. The remarkable consistency of this particular feature is underscored by comparison with the subtle variability of others ..." — Z. Mazur (c. 2011)[23]

The figure of Mithras himself is usually attired in an oriental costume of Phrygian cap, tunica manicata (a long-sleeved tunic), anaxyrides (eastern style trousers), and a cape, though in some cases, he is depicted heroically nude or even, in a unique example from Ostia, in what seems to be a Greek chiton. Like the general trend in Graeco-Roman art, most if not all tauroctony scenes, regardless of the medium they were executed in, were painted, and the different items of Mithras' clothing was usually colored in either blue or red, often, as in the painting at Marino, with most of the costume in red with only the inside of the cape being blue and star-speckled. The bull was often white, sometimes wearing the dorsuale, the Roman sacrificial band in reds or browns, while the torchbearers could be depicted in a variety of colors with reds and greens being the most common. — Bjørnebye (2007).[27]:chapter: The Mithraic icon in fourth century Rome: The composition of the Mithraic cult icon

Note, however, that no inscription naming Arimanius has been found engraved on a lion-headed figure. All of the dedications to the name Arimanius are inscribed on altars without figures.[citation needed]

According to some, the lion man is Aion (Zurvan, or Kronos); according to others, Ahriman.[39](p 467 ff)

One should bear in mind that the Mithraic New Year began on Natalis Invicti, the birthday of their invincible god, i.e., December 25th, when the new light ... appears from the vault of heaven. — Vermaseren & van Essen (1965)[41]

"For a time, coins and other monuments continued to link Christian doctrines with the worship of the Sun, to which Constantine had been addicted previously. But even when this phase came to an end, Roman paganism continued to exert other, permanent influences, great and small. ... The ecclesiastical calendar retains numerous remnants of pre-Christian festivals — notably Christmas, which blends elements including both the feast of the Saturnalia and the birthday of Mithra."[42]

The original editor of the text, Albrecht Dieterich, claimed that it recorded an authentic Mithraic ritual, but this claim was rejected by Cumont, who felt that the references to Mithras in the text were merely the result of an extravagant syncretism evident in magical traditions. Until recently, most scholars followed Cumont in refusing to see any authentic Mithraic doctrine in the Mithras Liturgy. — D. Ulansey (1991)[9](p 105)

"Nevertheless, the fact that Porphyry and / or his sources would have had no scruples about adapting or even inventing Mithraic data to suit their arguments does not necessarily mean that they actually did so. It is far more likely that Mithraic doctrine (in the weak sense of the term!) really was what the philosophers said it was ... there are no insuperable discrepancies between Mithraic practice and theory as attested in Porphyry and Mithraic practice and theory as archaeology has allowed us to recover them. Even if there were major discrepancies, they would matter only in the context of the old model of an internally consistent and monolithic Mithraic doctrine.[53](p 87)

The discovery of a large quantity of tableware as well as animal remains in a pit outside the newly excavated mithraeum at Tienen, Belgium, has also attracted new attention to the topic of Mithraic processions and large-scale feasts, begging a re-examination of the secrecy of the cult and its visibility in local society ... provides evidence for large-scale, semi-public feasts outside of the mithraeum itself, suggesting that each mithraeum might have had a far larger following than its relative size would imply. — Bjørnebye (2007).[27](pp 12,36)

The extant mithraea present us with actual physical remains of the architectural structures of the sacred spaces of the Mithraic cult. While the Mithraists themselves never used the word mithraeum as far as we know, but preferred words like speleum or antrum (cave), crypta (underground hallway or corridor), fanum (sacred or holy place), or even templum (a temple or a sacred space), the word mithraeum is the common appellation in Mithraic scholarship and is used throughout this study. — Bjørnebye

(2007).[27]:chapter: The mithraea as buildings

Whilst the majority of the Oriental cults accorded to women a considerable role in their churches, and sometimes even a preponderating one, finding in them ardent supporters of the faith, Mithra forbade their participation in his Mysteries and so deprived himself of the incalculable assistance of these propagandists. The rude discipline of the order did not permit them to take the degrees in the sacred cohorts, and, as among the Mazdeans of the Orient, they occupied only a secondary place in the society of the faithful. Among the hundreds of inscriptions that have come down to us, not one mentions either a priestess, a woman initiate, or even a donatress.[67]

... Moreover, not a single woman is listed: The repeated attempts to show that women might belong to the cult are wishful thinking (Piccottini, 1994).[68]

Porphyry moreover seems to be the only writer who makes reference to women initiates into the service and rites of Mithra, and his allusion is perhaps due to a misunderstanding.... The participation of women in the ritual was not unknown in the Eastern cults, but the predominant military influence in Mithraism seems to render it unlikely in this instance.[2]

"Justin's charge does at least make clear that Mithraic commandments did exist."[4](pp 144–145)

Hermes addresses Julian:

"As for you ... I have granted you to know Mithras the Father. Keep his commandments, thus securing for yourself an anchor-cable and safe mooring all through your life, and, when you must leave the world, having every confidence that the god who guides you will be kindly disposed." — Clauss (2000).[4](p 144) citing Caesares (336c in the translation of W.C. Wright).

Other early evidence of the first decades BCE refers only to the reverence paid to Mithras without mentioning the mysteries: examples which may be quoted are the tomb inscriptions of King Antiochus I of Commagene at Nemrud Dagh, and of his father Mithridates at Arsameia on the Orontes. Both the kings had erected on vast terraces a number of colossal statues seated on thrones to the honour of their ancestral gods. At Nemrud we find in their midst King Antiochus (69–34 BCE) and in the inscription Mithras is mentioned ... — Vermaseren (1963)[72]

"I ... see these figures or some of them in the impression of the remarkable royal seal of King Saussatar of Mitanni (c. 1450 BCE great-great-grandfather of Kurtiwaza), the only royal Mitannian seal that we possess ... Mithra-tauroctonos, characteristically kneeling on the bull to despatch it. We can even see also the dog and snake ... below him are twin figures, one marked by a star, each fighting lions ... below a winged disc between lions and ravens, stands a winged, human-headed lion, ..."[39](pp 467–468)

"Our earliest evidence for the Mithraic mysteries places their appearance in the middle of the 1st century BCE: The historian Plutarch says that in 67 BCE a large band of pirates based in Cilicia (a province on the southeastern coast of Asia Minor) were practicing "secret rites of Mithras". The earliest physical remains of the cult date from around the end of the 1st century CE, and Mithraism reached its height of popularity in the third century."[77]

"Traditionally there are two geographical regions where Mithraism first struck root in the Roman empire: Italy and the Danube. Italy I propose to omit, as the subject needs considerable discussion, and the introduction of the cult there, as witnessed by its early dedicators, seems not to have been military. Before we turn to the Danube, however, there is one early event (rather than geographical location) which should perhaps be mentioned briefly in passing. This is the supposed arrival of the cult in Italy as a result of Pompey the Great's defeat of the Cilician pirates, who practised 'strange sacrifices of their own ... and celebrated certain secret rites, amongst which those of Mithra continue to the present time, having been first instituted by them'.

Suffice it to say that there is neither archaeological nor allied evidence for the arrival of Mithraism in the West at that time, nor is there any ancient literary reference, either contemporary or later. If anything, Plutarch's mention carefully omits making the point that the cult was introduced into Italy at that time or by the pirates."[78](p 250)

"Another possible piece of evidence is offered by five terracotta plaques with a tauroctone, found in Crimea and taken into the records of Mithraic monuments by Cumont and Vermaseren. If they are Mithraic, they are certainly the oldest known representations of Mithras tauroctone; the somewhat varying dates given by Russian archaeologists will set the beginning of the 1st century CE as a terminus ad quem, which is also said to have been confirmed by the stratigraphic conditions."[81](p 14) Note 20 cites the book as Blawatsky & Kolchelenko (1966).[82]

... the area [the Crimea] is of interest mainly because of the terracotta plaques from Kerch (five, of which two are in CIMRM[35] as numbers 11 and 12): These show a bull-killing figure and their probable date (second half of 1st century BCE to first half of 1st century CE) would make them the earliest tauroctonies – if it is Mithras that they portray. Their iconography is significantly different from that of the standard tauroctony (e.g. in the Attis-like exposure of the god's genitals).[83]

"The plaques are typical Bosporan terracottas ... At the same time it must be admitted that the plaques have some strange features which make it debatable if this is really Mithra(s). Most striking is the fact that his genitals are visible as they are in the iconography of Attis, which is accentuated by a high anaxyrides. Instead of the tunic and flowing cloak he wears a kind of jacket, buttoned over the breast with only one button, perhaps the attempt of a not so skillful artist to depict a cloak. The bull is small and has a hump and the tauroctone does not plunge his knife into the flank of the bull but holds it lifted. The nudity gives it the character of a fertility god and if we want to connect it directly with the Mithraic mysteries it is indeed embarrassing that the first one of these plaques was found in a woman's tomb."[81](p 15)

"He is grasping one of the bull's horns with his left hand, and wrenching back its head; the right arm is raised to deliver the death-blow. So far, this god must be Mithras. But in sharp contrast with the usual representations [of Mithras], he is dressed in a jacket-like garment, fastened at the chest with a brooch, which leaves his genitals exposed – the iconography typical of Attis."[4](p 156)

CIMRM[35] 362 a, b = el I, VI 732 = Moretti, IGUR I 179:

SOLI | INVICTO MITHRAE | T . FLAVIUS AUG. LIB. HYGINUS | EPHEBIANUS | D.D." but the Greek title is just "Helioi Mithrai" (῾Ηλιωι Μιθραι). The name "FLAVIUS" for an imperial freedman dates it between 70–136 CE. The Greek section refers to a pater of the cult named Lollius Rufus, evidence of the existence of the rank system at this early date.[14]

"The considerable movement [of civil servants and military] throughout the empire was of great importance to Mithraism, and even with the very fragmentary and inadequate evidence that we have it is clear that the movement of troops was a major factor in the spread of the cult. Traditionally there are two geographical regions where Mithraism first struck root: Italy and the Danube. Italy I propose to omit, as the subject needs considerable discussion, and the introduction of the cult there, as witnessed by its early dedicators, seems not to have been military. Before we turn to the Danube, however, there is one early event (rather than geographical location) which should perhaps be mentioned briefly in passing. This is the supposed arrival of the cult in Italy as a result of Pompey the Great's defeat of Cilician pirates, who practiced 'strange sacrifices of their own ... and celebrated certain secret rites, amongst which those of Mithras continue to the present time, have been first instituted by them'." (ref. Plutarch, Pompey 24–25) Suffice it to say that there is neither archaeological nor allied evidence for the arrival of Mithraism in the west at that time, nor is there any ancient literary reference, either contemporary or later. If anything, Plutarch's mention carefully omits making the point that the cult was introduced into Italy at that time or by the pirates. Turning to the Danube, the earliest dedication from that region is an altar to 'Mitrhe' [sic] set up by C. Sacidus Barbarus, a centurion of XV Appolinaris, stationed at the time at Carnuntum in Pannonia (Deutsches-Altenburg, Austria). The movements of this legion are particularly informative." The article then goes on to say that XV Appolinaris was originally based at Carnuntum, but between 62–71 CE transferred to the east, first in the Armenian campaign, and then to put down the Jewish uprising. Then 71–86 back in Carnuntum, then 86–105 intermittently in the Dacian wars, then 105–114 back in Carnuntum, and finally moved to Cappadocia in 114.[78]

The first dateable Mithraeum outside Italy is from Böckingen on the Neckar, where a centurion of the legion VIII Augustus dedicated two altars, one to Mithras and the other (dated 148) to Apollo.[78](p 263)

"At present this is the only Mithraeum known in Roman Palestine."[84](p 154) "It is difficult to assign an exact date to the founding of the Caesarea Maritima Mithraeum. No dedicatory plaques have been discovered that might aid in the dating. The lamps found with the taurectone medallion are from the end of the first century to the late 3rd century CE. Other pottery and coins from the vault are also from this era. Therefore, it is speculated that this Mithraeum developed toward the end of the 1st century and remained active until the late 3rd century. This matches the dates assigned to the Dura-Europos and the Sidon Mithraea."[84](p 153)

... the Persian affiliation of the Mysteries is acknowledged in the earliest literary reference to them. This is by the Latin poet Statius: Writing about 80 CE, he described Mithras as one who "twists the unruly horns beneath the rocks of a Persian cave". Only a little later (c. 100 CE) Plutarch attributed an Anatolian origin to the mysteries, for according to him the Cilician pirates whom Pompey defeated in 67 BCE. "celebrated certain secret rites, amongst which those of Mithras continue to the present time, having been first instituted by them".[22](pp 468–469)

In the Cumontian scenario this episode cannot mark the definitive moment of transfer, for Mithraism in that scenario was already established in Rome, albeit on a scale too small to have left any trace in the historical or archaeological record. Nevertheless, it could have been a spur to Mithraism's emergence on to the larger stage of popular appeal.[92]

"Hence, a place near to the equinoctial circle was assigned to Mithra as an appropriate seat. And on this account he bears the sword of Aries, which is a martial sign. He is likewise carried in the Bull, which is the sign of Venus. For Mithra. as well as the Bull, is the Demiurgus and lord of generation." — Porphyry[93]

[Porphyry's] De antro 6 is actually the sole explicit testimony from antiquity as to the intent of Mithraism's mysteries and the means by which that intent was realized. Porphyry, moreover, was an intelligent and well-placed theoretician of contemporary religion, with access to predecessors' studies, now lost.[96]

In the course of the First International Congress, two scholars in particular presented devastating critiques of Cumont's Iranian hypothesis ... One, John Hinnells, was the organizer of the conference ... Of more importance in the long run, however, was the even more radical paper presented by R.L. Gordon ... — Ulansey (1991)[9](p 10)

"Since Cumont's reconstruction of the theology underlying the reliefs in terms of the Zoroastrian myth of creation depends upon the symbolic expression of the conflict of good and evil, we must now conclude that his reconstruction simply will not stand. It receives no support from the Iranian material and is in fact in conflict with the ideas of that tradition as they are represented in the extant texts. Above all, it is a theoretical reconstruction which does not accord with the actual Roman iconography. What, then, do the reliefs depict? And how can we proceed in any study of Mithraism? I would accept with R. Gordon that Mithraic scholars must in future start with the Roman evidence, not by outlining Zoroastrian myths and then making the Roman iconography fit that scheme. ... Unless we discover Euboulus' history of Mithraism we are never likely to have conclusive proof for any theory. Perhaps all that can be hoped for is a theory which is in accordance with the evidence and commends itself by (mere) plausibility."[110](pp 303–304)

"Indeed, one can go further and say that the portrayal of Mithras given by Cumont is not merely unsupported by Iranian texts but is actually in serious conflict with known Iranian theology. Cumont reconstructs a primordial life of the god on earth, but such a concept is unthinkable in terms of known, specifically Zoroastrian, Iranian thought where the gods never, and apparently never could, live on earth. To interpret Roman Mithraism in terms of Zoroastrian thought and to argue for an earthly life of the god is to combine irreconcilables. If it is believed that Mithras had a primordial life on earth, then the concept of the god has changed so fundamentally that the Iranian background has become virtually irrelevant."[110](p 292)

"Since the 1970s scholars of western Mithraism have generally agreed that Cumont's master narrative of east-west transfer is unsustainable"; although he adds that "recent trends in the scholarship on Iranian religion, by modifying the picture of that religion prior to the birth of the western mysteries, now render a revised Cumontian scenario of east-west transfer and continuities now viable."[40]

"Beyond these three Mithraea [in Syria and Palestine], there are only a handful of objects from Syria that may be identified with Mithraism. Archaeological evidence of Mithraism in Syria is therefore in marked contrast to the abundance of Mithraea and materials that have been located in the rest of the Roman Empire. Both the frequency and the quality of Mithraic materials is greater in the rest of the empire. Even on the western frontier in Britain, archaeology has produced rich Mithraic materials, such as those found at Walbrook.

If one accepts Cumont's theory that Mithraism began in Iran, moved west through Babylon to Asia Minor, and then to Rome, one would expect that the cult left its traces in those locations. Instead, archaeology indicates that Roman Mithraism had its epicenter in Rome. Wherever its ultimate place of origin may have been, the fully developed religion known as Mithraism seems to have begun in Rome and been carried to Syria by soldiers and merchants. None of the Mithraic materials or temples in Roman Syria except the Commagene sculpture bears any date earlier than the late first or early second century. [footnote in cited text: 30. Mithras, identified with a Phrygian cap and the nimbus about his head, is depicted in colossal statuary erected by King Antiochus I of Commagene, 69–34 BCE. (see Vermaseren, CIMRM[35] 1.53–56). There are no other literary or archaeological evidences to indicate that the religion of Mithras as it was known among the Romans in the second to fourth centuries AD was practiced in Commagene]. While little can be proved from silence, it seems that the relative lack of archaeological evidence from Roman Syria would argue against the traditional theories for the origins of Mithraism."[3]

It originated in Vedic, India, migrated to Persia by way of Babylon, and then westward through the Hellenized East, and finally across the length and breadth of the Hellenistic-Roman world. On its westward journey, it incorporated many of the features of the cultures in which it found itself.[125]

"The first important expansion of the mysteries in the Empire seems to have occurred relatively rapidly late in the reign of Antoninus Pius and under Marcus Aurelius (9). By that date, it is clear, the mysteries were fully institutionalised and capable of relatively stereotyped self-reproduction through the medium of an agreed, and highly complex, symbolic system reduced in iconography and architecture to a readable set of 'signs'. Yet we have good reason to believe that the establishment of at least some of those signs is to be dated at least as early as the Flavian period or in the very earliest years of the second century. Beyond that we cannot go ..."[126](pp150–151)

"... the astonishing spread of the cult in the later 2nd and early 3rd centuries AD ... This extraordinary expansion, documented by the archaeological monuments ..."[4](p 25)

"The cult of Mithras never became one of those supported by the state with public funds, and was never admitted to the official list of festivals celebrated by the state and army – at any rate as far as the latter is known to us from the Feriale Duranum, the religious calendar of the units at Dura-Europos in Coele Syria;" [where there was a Mithraeum] "the same is true of all the other mystery cults too." He adds that at the individual level, various individuals did hold roles both in the state cults and the priesthood of Mithras.[4](p 24)

"Mithraism declined with the rise to power of Christianity, until the beginning of the fifth century, when Christianity became strong enough to exterminate by force rival religions such as Mithraism."[130]

"As a mystery religion it engulfed the Roman empire during the first four centuries of our era. Mithraic sanctuaries are found from Roman Arabia to Britain, from the Danube to the Sahara, wherever the Roman soldier went. Christian apologetics fiercely fought the cult they feared., and during the late 4th century CE, as a victim of the Judaeo-Christian spirit of intolerance, Roman Mithraism was suppressed, its sanctuaries destroyed together with the last vestiges of religious freedom in the empire."[131]

Michael Speidel, who specializes in military history, associates Mithras with Orion.[132]

The cult was vigorously opposed by Christian polemicists, especially by Justin and Tertullian, because of perceived similarities between it and early Christianity. And with the anti-pagan decrees of the Christian emperor Theodosius during the final decade of the fourth century, Mithraism disappeared from the history of religions as a viable religious practice.[6]

"Mithras also found a place in the 'pagan revival' that occurred, particularly in the western empire, in the latter half of the 4th century CE. For a brief period, especially in Rome, the cult enjoyed, along with others, a last efflorescence, for which we have evidence from among the highest circles of the senatorial order. One of these senators was Rufius Caeionius Sabinus, who in 377 CE dedicated an altar" to a long list of gods that includes Mithras.[4](pp 29–30)

"19. He let loose Greed, Needfulness, [Pestilence,] Disease, Hunger, Illness, Vice and Lethargy on the body of Gav' and Gayomard. 20. Before his coming to the 'Gav', Ohrmazd gave the healing Cannabis, which is what one calls 'banj', to the' Gav' to eat, and rubbed it before her eyes, so that her discomfort, owing to smiting, [sin] and injury, might decrease; she immediately became feeble and ill, her milk dried up, and she passed away."[136]

10: "Since, however, a cavern is an image and symbol of the world ..."[139]

2: "For, as Eubulus says, Zoroaster was the first who consecrated in the neighbouring mountains of Persia, a spontaneously produced cave, florid, and having fountains, in honour of Mithra, the maker and father of all things; 12: a cave, according to Zoroaster, bearing a resemblance of the world, which was fabricated by Mithra. But the things contained in the cavern being arranged according to commensurate intervals, were symbols of the mundane elements and climates."[93]

... The Mithras Liturgy reflects the world of Mithraism, but precisely how it relates to other expressions of the mysteries of Mithras is unclear. ... With the leg of the bull, interpreted astronomically, the Mithraic god, or Mithras, turns the sphere of heaven around, and if the text suggests that Mithras "moves heaven and turns it back (antistrephousa)," Mithras may be responsible for the astronomical precession of the equinoxes, the progressive change in the earth's orientation in space caused by a wobble in the earth's rotation (so Ulansey).[144]

"I sometimes permit myself to say that, if Christianity had not carried the day, Mithraicism would have become the religion of the world. It had its mysterious meetings: its chapels, which bore a strong resemblance to little churches. It forged a very lasting bond of brotherhood between its initiates: it had a Eucharist, a Supper ..." — Renan (2004)[153]

"Many people have erroneously supposed that all religions have a sort of universalist tendency or ambition. In the case of Mithraism, such an ambition has often been taken for granted and linked to a no less questionable assumption, that there was a rivalry between Mithras and Christ for imperial favour. ... If Christianity had failed, the Roman empire would never have become Mithraist."[155]

"Mithraism proselytized energetically to the west, and for a time presented a formidable challenge to Christianity; but it is not yet known how far, or how effectively, it penetrated eastward. A Mithraeum has been uncovered at the Parthian fortress-town of Dura-Europos on the Euphrates; but Zoroastrianism itself may well have been a barrier to its spread into Iran proper."[157]

A useful topographic survey, with map, by F. Coarelli (1979) lists 40 actual or possible mithraea (the latter inferred from find-spots, with the sensible proviso that a mithraeum will not necessarily correspond to every find). Principally from comparisons of size and population with Ostia, Coarelli calculates that there will have been in Rome "not less than 680–690" mithraea in all ... .[8]

Today more than four hundred locations of Mithraic worship have been identified in every area of the Roman Empire. Mithraea have been found as far west as Britain and as far east as Dura-Europas. Between the second and fourth centuries C.E. Mithraism may have vied with Christianity for domination of the Roman world.[5](p 147)

... the study of Mithraism is also of great important for our understanding of what Arnold Toynbee has called the 'Crucible of Christianity', the cultural matrix in which the Christian religion came to birth out of the civilization of the ancient Mediterranean. For Mithraism was one of Christianity's major competitors in the Roman Empire ... No doubt Renan's statement is somewhat exaggerated. — D. Ulansey (1991)[9](pp 3–4)

Beck, Roger (2006). The Religion of the Mithras cult in the Roman empire. Great Britain: Oxford University Press. pp. 48–50. ISBN 978-0-19-814089-4.

Edwell, Peter. "Roger Beck, The Religion of the Mithras Cult in the Roman Empire: Mysteries of the Unconquered Sun. Reviewed by Peter Edwell, Macquarie University, Sydney". Archived from the original on 10 August 2011. Retrieved 14 June 2011. The study of the ancient mystery cult of Mithraism has been heavily influenced over the last century by the pioneering work of Franz Cumont followed by that of M. J. Vermaseren. Ever since Cumont's volumes first appeared in the 1890s, his ideas on Mithraism have been influential, particularly with regard to the quest for Mithraic doctrine. His emphasis on the Iranian features of the cult is now less influential with the Iranising influences generally played down in scholarship over the last thirty years. While the long shadow cast by Cumont is sometimes susceptible to exaggeration, recent research such as that of Robert Turcan demonstrates that Cumont's influence is still strong.

Belayche, Nicole. "Religious Actors in Daily Life: Practices and Related Beliefs". In Jörg Rüpke (ed.). A Companion to Roman Religion. p. 291. Cumont, who still stands as an authoritative scholar for historians of religions, analyzed the diffusion of "oriental religions" as filling a psychological gap and satisfying new spiritualistic needs (1929: 24–40).

Beck, Roger. "On Becoming a Mithraist New Evidence for the Propagation of the Mysteries". In Leif E. Vaage; et al. (eds.). Religious Rivalries in the Early Roman Empire and the Rise of Christianity. p. 182. The old Cumontian model of formation in, and diffusion from, Anatolia (see Cumont 1956a, 11–32; cf. pp. 33–84 on propagation in the West) is by no means dead – nor should it be. On the role of the army in the spread of Mithraism, see Daniels 1975.

Beck, Roger (2002). "Mithraism". Encyclopædia Iranica. Costa Mesa: Mazda Pub. Archived from the original on 20 May 2020. Retrieved 28 October 2007. Mithras – moreover, a Mithras who was identified with the Greek Sun god Helios – was one of the deities of the syncretic Graeco-Iranian royal cult founded by Antiochus I (q.v.), king of the small but prosperous buffer state of Commagene (q.v.) in the mid 1st century BCE.

Beck, Roger. "The mysteries of Mithras: A new account of their genesis" (PDF). Retrieved 23 March 2011. ... It may properly be called a 'Cumontian scenario' for two reasons: First, because it looks again to Anatolia and Anatolians; Secondly, and more importantly, because it hews to the methodological line first set by Cumont.

Beck, R., 2002: "Discontinuity's weaker form of argument postulates re-invention among and for the denizens of the Roman empire (or certain sections thereof), but re-invention by a person or persons of some familiarity with Iranian religion in a form current on its western margins in the first century CE. Merkelbach (1984: pp. 75–77), expanding on a suggestion of M. P. Nilsson, proposes such a founder from eastern Anatolia, working in court circles in Rome. So does Beck (1998), with special focus on the dynasty of Commagene (see above). Jakobs 1999 proposes a similar scenario."

AI Overview

The "Marcian bible" refers to the scripture collection compiled by the early Christian teacher Marcion of Sinope in the 2nd century CE, which was likely the first attempt to create a definitive Christian canon. It consisted of an abridged version of the Gospel of Luke and ten of Paul's epistles, with all other books, including the entire Hebrew Bible, rejected. This canon was central to his theology, which argued the God of the Old Testament was a lesser, wrathful deity, distinct from the benevolent God of Jesus revealed in the Gospels.

Structure and content

The Gospel: Marcion's version was a significantly altered form of the Gospel of Luke, which he called "the Gospel of the Lord". It began with Jesus's descent into Capernaum and omitted verses he saw as Jewish influences, such as Jesus's birth narrative and his references to the creator God.

Pauline epistles: His canon also included ten of the apostle Paul's letters. Marcion removed passages from Paul's writings that he believed connected to the Jewish God or the Old Testament.

Rejection of the Old Testament: A core tenet of his belief was that the God of the Old Testament (the creator deity, or Demiurge) was a different, inferior god to the loving Father revealed by Jesus. As such, he rejected the Hebrew Bible entirely and did not include it in his canon.

Impact and legacy

Prompted other canons: Marcion's effort is widely seen as the catalyst for other Christian groups to compile their own authoritative canons in response.

Rejection by orthodoxy: His views were deemed heretical by the emerging orthodox church, and he was excommunicated. His canon was a major point of contention and was rejected by those who affirmed the unity of the God of the Old and New Testaments.

Not to be confused with Marcianists.
Marcionism was an early Christian dualistic belief system originating with the teachings of Marcion of Sinope in Rome around 144.[1] Marcion was an early Christian theologian,[2] evangelist,[2] and an important figure in early Christianity.[2][3] He was the son of a bishop of Sinope in Pontus. About the middle of the 2nd century (140–155) he traveled to Rome, where he joined the Syrian gnostic Cerdo.[4]

Marcion preached that the benevolent God of the Gospel who sent Jesus into the world as the savior was the true Supreme Being, different and opposed to the malevolent deity, the Demiurge or creator deity, identified with Yahweh in the Hebrew Bible.[2][3][5] He considered himself a follower of Paul the Apostle, whom he believed to have been the only true apostle of Jesus.[2][3]

Marcion's canon, possibly the first Christian biblical canon ever compiled, consisted of eleven books: the Gospel of Marcion, which was a shorter version of the Gospel of Luke, and ten Pauline epistles.[2][3][6] Marcion's canon rejected the entire Old Testament, along with all other epistles and gospels of what would become the 27-book canon of the New Testament, which during his life had yet to be compiled.[2][3][7][8]

Marcionism was denounced by its opponents as heresy and written against by the Church Fathers – notably by Tertullian in his five-book treatise Adversus Marcionem (Against Marcion), in about 208.[2][3] Marcion's writings are lost, though they were widely read and numerous manuscripts must have existed.[2][3] Even so, many scholars say it is possible to reconstruct and deduce a large part of ancient Marcionism through what later critics, especially Tertullian, said concerning Marcion.[2][3][9]

History
Main article: Marcion of Sinope

According to Tertullian and other writers of early proto-orthodox Christianity, the movement known as Marcionism began with the teachings and excommunication of Marcion around 144. Marcion was reportedly a wealthy shipowner, the son of a bishop of Sinope of Pontus, Anatolia. He arrived in Rome c. 140, soon after the Bar Kokhba revolt. The organization continued for some centuries later outside the Byzantine Empire in areas which later would be dominated by Manichaeism, particularly as the Sasanian Empire.[citation needed]

Schism within Marcionism

By the reign of emperor Commodus (180–192), Marcionism was divided into various opinions with various leaders; among whom was Apelles, whom Rhodo describes as "priding himself on his manner of life and his age, acknowledges one principle, but says that the prophecies are from an opposing principle, being led to this view by the responses of a maiden by name Philumene, who was possessed by a demon". However, "others, among whom were Potitus and Basilicus, held to two principles, as did Marcion himself. Others consider that there are not only two, but three natures. Of these, Syneros was the leader and chief."[10]

In the early 3rd century, a splinter group of Marcionites was established by Prepon the Syrian, who claimed the existence of an intermediate spiritual entity between the good and evil gods.[11]

Teachings

Marcion of Sinope depicted with the Apostle John

The premise of Marcionism is that the ministry of Jesus is incompatible with the actions of God in the Old Testament. Focusing on the Pauline traditions, Marcion felt that all other conceptions of the Gospel, and especially any association with Israelite religion, was opposed to, and a backsliding from, the truth. He further regarded the arguments of Paul regarding Law and Gospel, wrath and grace, works and faith, flesh and spirit, sin and righteousness, death and life, as the essence of religious truth. He ascribed these aspects and characteristics as two principles, the righteous and wrathful God of the Old Testament, who is at the same time identical with the creator of the world, and a second God of the Gospel who is only love and mercy.[12]

Marcionites held that the God of the Hebrew Bible was inconsistent, jealous, wrathful and genocidal, and that the material world he created was defective, a place of suffering; the God who made such a world is a bungling or malicious demiurge.

In the God of the [Old Testament] he saw a being whose character was stern justice, and therefore anger, contentiousness and unmercifulness. The law which rules nature and man appeared to him to accord with the characteristics of this God and the kind of law revealed by him, and this God is the creator and lord of the world (κοσμοκράτωρ [English transliteration: kosmokrator/cosmocrator]). As the law which governs the world is inflexible and yet, on the other hand, full of contradictions, just and again brutal, and as the law of the Old Testament exhibits the same features, so the God of creation was to Marcion a being who united in himself the whole gradations of attributes from justice to malevolence, from obstinacy to inconsistency."[13]

In Marcionite belief, Jesus was not a Jewish Messiah, but a spiritual entity that was sent by the Monad to reveal the truth about existence, thus allowing humanity to escape the earthly trap of the demiurge. Marcion called God 'the Stranger God', or 'the Alien God' in some translations, as this deity had not had any previous interactions with the world, and was wholly unknown. See also the Unknown God of Hellenism and the Areopagus sermon.

Various popular sources count Marcion among the Gnostics. The Oxford Dictionary of the Christian Church (3rd ed.) puts it, "it is clear that he would have had little sympathy with their mythological speculations" (p. 1034). In 1911 Henry Wace stated:

A modern divine would turn away from the dreams of Valentinianism in silent contempt; but he could not refuse to discuss the question raised by Marcion, whether there is such opposition between different parts of what he regards as the word of God, that all cannot come from the same author.

A primary difference between Marcionites and Gnostics was that the Gnostics based their theology on secret wisdom (as, for example, Valentinius who claimed to receive the secret wisdom from Theudas who received it directly from Paul) of which they claimed to be in possession. In contrast, Marcion based his theology on the contents of the Letters of Paul and the recorded sayings of Jesus—in other words, an argument from scripture, with Marcion defining what was and was not scripture. Also, the Christology of the Marcionites is thought to have been primarily Docetic, denying the human nature of Jesus. This may have been due to the Marcionites' unwillingness to believe that Jesus was the son of both God the Father and the demiurge. Scholars of Early Christianity disagree on whether to classify Marcion as a Gnostic: Adolf von Harnack does not classify Marcion as a Gnostic,[14] whereas G. R. S. Mead does.[15] Harnack argued that Marcion was not a Gnostic in the strict sense because Marcion rejected elaborate creation myths, and did not claim to have special revelation or secret knowledge. Mead claimed Marcionism makes certain points of contact with Gnosticism in its view that the creator of the material world is not the true deity, rejection of materialism and affirmation of a transcendent, purely good spiritual realm in opposition to the evil physical realm, the belief the "True" God sent Jesus to save humanity, the central role of Jesus in revealing the requirements of salvation, the belief Paul had a special place in the transmission of this "wisdom", and its docetism. According to the 1911 Encyclopædia Britannica article on Marcion:[16]

It was no mere school for the learned, disclosed no mysteries for the privileged, but sought to lay the foundation of the Christian community on the pure gospel, the authentic institutes of Christ. The pure gospel, however, Marcion found to be everywhere more or less corrupted and mutilated in the Christian circles of his time. His undertaking thus resolved itself into a reformation of Christendom. This reformation was to deliver Christendom from false Jewish doctrines by restoring the Pauline conception of the gospel, Paul being, according to Marcion, the only apostle who had rightly understood the new message of salvation as delivered by Christ. In Marcion's own view, therefore, the founding of his church—to which he was first driven by opposition—amounts to a reformation of Christendom through a return to the gospel of Christ and to Paul; nothing was to be accepted beyond that. This of itself shows that it is a mistake to reckon Marcion among the Gnostics. A dualist he certainly was, but he was not a Gnostic.

Marcionism shows the influence of Hellenistic philosophy on Christianity and presents a moral critique of the Old Testament from the standpoint of Platonism. According to Harnack, the sect may have led other Christians to introduce a formal statement of beliefs into their liturgy (see Creed) and to formulate a canon of authoritative Scripture of their own, thus eventually producing the current canon of the New Testament.

As for the main question, however, whether he knew of, or assumes the existence of, a written New Testament of the Church in any sense whatever, in this case an affirmatory answer is most improbable, because if this were so he would have been compelled to make a direct attack upon the New Testament of the Church, and if such an attack had been made we should have heard of it from Tertullian. Marcion, on the contrary, treats the Catholic Church as one that 'follows the Testament of the Creator-God,' and directs the full force of his attack against this Testament and against the falsification of the Gospel and of the Pauline Epistles. His polemic would necessarily have been much less simple if he had been opposed to a Church which, by possessing a New Testament side by side with the Old Testament, had ipso facto placed the latter under the shelter of the former. In fact Marcion’s position towards the Catholic Church is intelligible, in the full force of its simplicity, only under the supposition that the Church had not yet in her hand any 'litera scripta Novi Testamenti.'[17]

Marcion is believed to have imposed a severe morality on his followers, some of whom suffered in the persecution. In particular, he refused to re-admit those who recanted their faith under Roman persecution; see also lapsi.

Marcionite canon

See also: Development of the New Testament canon § Marcion of Sinope

Marcion teaching. Mart Sander (mixed media, 2014)

Tertullian claimed Marcion was the first to separate the New Testament from the Old Testament.[18] Marcion is said to have gathered scriptures from Jewish tradition, and juxtaposed these against the sayings and teachings of Jesus in a work entitled the Antithesis.[19] Besides the Antithesis, the Testament of the Marcionites was also composed of a Gospel of Christ which was Marcion's version of Luke, and that the Marcionites attributed to Paul, that was different in a number of ways from the version that is now regarded as canonical.[20] It seems to have lacked all prophecies of Christ's coming, as well as the Infancy account, the baptism, and the verses were more terse in general. It also included ten of the Pauline epistles, in the following order: Galatians, 1 Corinthians, 2 Corinthians, Romans, 1 Thessalonians, 2 Thessalonians, Laodiceans, Colossians, Philemon, Philippians.[21]

Marcion of Sinope

Marcion's Apostolikon did not include the Pastoral epistles or the Epistle to the Hebrews. According to the Muratorian canon, it included a Marcionite pseudo-Paul's epistle to the Alexandrians and an epistle to the Laodiceans.[22] The contents of this Marcionite Epistle to the Laodiceans are unknown. Some scholars equate it with the Epistle to the Ephesians, because the latter originally did not contain the words 'in Ephesus', and because it is the only non-pastoral Pauline epistle missing from the Marcionite canon, suggesting Laodiceans was simply Ephesians under another name.[23] The Epistle to the Alexandrians is not known from any other source; Marcion himself appears to have never mentioned it.

In bringing together these texts, Marcion redacted what is perhaps the first New Testament canon on record, which he called the Gospel and the Apostolikon, which reflects his belief in the writings of Jesus and the apostle Paul respectively. An English language reconstruction of the content of the Evangelion and Apostolikon attested in Patristic sources was published by Jason David BeDuhn in 2013.[24]

The Prologues to the Pauline Epistles (which are not a part of the text, but short introductory sentences as one might find in modern study Bibles[25]), found in several older Latin codices, are now widely believed to have been written by Marcion or one of his followers. Harnack makes the following claim:[26]

We have indeed long known that Marcionite readings found their way into the ecclesiastical text of the Pauline Epistles, but now for seven years we have known that Churches actually accepted the Marcionite prefaces to the Pauline Epistles! De Bruyne has made one of the finest discoveries of later days in proving that those prefaces, which we read first in Codex Fuldensis and then in numbers of later manuscripts, are Marcionite, and that the Churches had not noticed the cloven hoof.

Conversely, several early Latin codices contain Anti-Marcionite Prologues to the Gospels.

Reaction to Marcion by early Christians

According to a remark by Origen (Commentary on the Gospel of Matthew 15.3), Marcion "prohibited allegorical interpretations of the scripture". Tertullian disputed this in his treatise against Marcion.[citation needed]

Tertullian, along with Epiphanius of Salamis, also charged that Marcion set aside the gospels of Matthew, Mark and John, and used Luke alone. Tertullian cited Luke 6:43–45 ("a good tree does not produce bad fruit")[27] and Luke 5:36–38 ("nobody tears a piece from a new garment to patch an old garment or puts new wine in old wineskins"),[28] in theorizing that Marcion set about to recover the authentic teachings of Jesus. Irenaeus claimed,

[Marcion's] salvation will be the attainment only of those souls which had learned his doctrine; while the body, as having been taken from the earth, is incapable of sharing in salvation.[29]

Tertullian also attacked this view in De Carne Christi.[citation needed]

Polycarp, according to Irenaus in his work, Adversus Haereses, had an encounter with Marcion:

And Polycarp himself replied to Marcion, who met him on one occasion, and said, "Dost thou know me?" "I do know thee, the first-born of Satan."

Hippolytus reported that Marcion's phantasmal (and Docetist) Christ was "revealed as a man, though not a man", and did not really die on the cross.[30] However, Ernest Evans, in editing this work, observes:

This may not have been Marcion's own belief. It was certainly that of Hermogenes (cf. Tertullian, Adversus Hermogenem) and probably other gnostics and Marcionites, who held that the intractability of this matter explains the world's many imperfections.[page needed]

Islamic accounts

The Arabic name for Marcionism, marqiyūniyya, is attested to by several historical sources of the Islamic Golden Age which appear to reveal that a meager Marcionite community continued to exist in the Near East into the tenth century. For example, the Thomas of Margā, abbot of the Eastern Syriac monastery of Beth ʿAvē, states that, at the end of the eighth century, the metropolitan bishop of Gēlān and Daylam, Šuḇḥālišoʿ, travelled into the remote parts of his see, preaching "among the pagans, Marcionites and Manichaeans."[31] In a similar way, the tenth-century Muslim bibliographer Ibn al-Nadim goes so far as to claim that the Marcionites are "numerous in Khurāsān" and that there "they practice openly, like the Manichaeans."[32] Although information about the Khorasanite Marcionites is not related in any other historical source, ibn al-Nadīm nevertheless also quotes a "reliable informant" (thiqa), "whom he says had seen Marcionite books and who reported that their script resembled that of the Manichaeans."[33][34]

Those medieval Muslim writers who specialized in the study of foreign religions often presented Marcionite theology accurately. For example, al-Masʿūdī (d. 956) states that the Marcionites taught "two principles, good and evil, and justice is a third (principle) between the two,"[35] which, according to de Blois, are explicit references to the Marcionite belief in "the good god, evil matter, and the just god."[34] In the majority of cases, the Islamic references to Marcionism are references to what has been termed "Neo-Marcionism," a sub-branch of the sect that seems to have lived in Khorasan in the tenth century.[34] The classical Muslim thinkers rejected all types of Marcionite theology as deviations from the truth, and some thinkers, such as ibn al-Malāḥimī (d. c. 1050) wrote polemics against them as others did against Nicene Christianity.[34] This did not, however, prevent many of the same thinkers from studying the Marcionites from an anthropological or sociological point of view, as is evident from Ibn al-Malāḥimī's extended reference to the customs of the Marcionites.[34]

Further scholarship

In Lost Christianities, Bart Ehrman contrasts the Marcionites with the Ebionites as polar ends of a spectrum with regard to the Old Testament.[36] Ehrman acknowledges that many of Marcion's ideas are very close to what is currently known as "Gnosticism", especially his rejection of the Jewish God, his rejection of the Old Testament, and his rejection of the material world, and his elevation of Paul as the primary apostle. There were early Christian groups, such as the Ebionites, which did not accept Paul's writings as a part of their canon. Ehrman asserts that Marcion likely "hated Jews and everything Jewish".[37] This claim, however, is unsupported by other contemporary historians.

Robert M. Price considers the Pauline canon a single collection of epistles despite the problem which is caused by a lack of knowledge as to how they were collected, when they were collected, who collected them and sent copies of them to the various churches.[38] Price has investigated several historical scenarios and reached the conclusion that Marcion was the first person in recorded history who is known to have collected Paul's writings and sent copies of them to various churches together as a canon. He summarizes,

But the first collector of the Pauline Epistles had been Marcion. No one else we know of would be a good candidate, certainly not the essentially fictive Luke, Timothy, and Onesimus. And Marcion, as Burkitt and Bauer show, fills the bill perfectly.[39]

David Trobisch argues that the evidence which is revealed by comparison of the oldest manuscripts of Paul’s letters proves that several epistles had previously been assembled as an anthology which was published separate from the New Testament, and as a whole, this anthology was then incorporated into the New Testament. Trobisch also argues that Paul was the assembler of his own letters for publication.[40]

Tantric & Siddha Magick

Forums
More
Tools
AI Overview
Tantric & Siddha Magick involves advanced yogic/spiritual practices from Indian traditions (Tantra, Nath Yoga) aimed at achieving divine union, liberation, and occult powers (siddhis), often through intense focus on energy (Kundalini), rituals (like shava sadhana on corpses), breathwork, mantras, and transmutation of vital fluids for immortality/deification, distinguishing itself from Western magic by its deep spiritual context and goal of moksha (liberation) or jivanmukti (living liberation).
Tantra & Siddha Roots
Tantra: A broad spiritual path focusing on using the material world (including the body, senses, and rituals) as a vehicle for spiritual realization, seeking bliss (bhoga) and mystical powers (siddhi).
Siddha Tradition (Nath Yogis): Masters (Siddhas) who achieve supernatural abilities (siddhis) through rigorous yoga, aiming for eternal life and godhood by transforming bodily energies, with Gorakhnath as a key figure.
Key Practices & Concepts
Siddhis (Occult Powers): Supernatural feats (like flight, invisibility, mind-reading) attained through advanced practice, culminating in immortality.
Kundalini Yoga: Awakening dormant spiritual energy (Kundalini) to rise through chakras, leading to higher states of consciousness.
Rituals (Sadhana): Intense practices, sometimes extreme, like Shava Sadhana (meditating on a corpse) to conquer fear, master death, and gain control over spirits/energies.
Transmutation: Converting sexual fluids into potent elixirs for longevity and spiritual power, a core Nath Siddha practice.
Panchamakara: The Five "M"s (wine, meat, fish, grains, ritual intercourse) used symbolically or literally in some left-hand (Vamachara) Tantric rites for spiritual transformation.
Goal
Liberation (Moksha): The ultimate aim, breaking free from the cycle of rebirth (samsara) and realizing one's true divine nature.
Deification: Becoming god-like, achieving immortality, or attaining divine consciousness.
Distinction from Western Magic
While both use ritual and focus on hidden forces, Tantric/Siddha magick is deeply embedded in Dharmic philosophies (Hinduism/Yoga), emphasizing inner transformation and liberation, whereas Western esotericism often focuses more on manifesting external results or personal power.

What is Tantra
Tantra is the way. The way of personal refinement and the way the universe is created, expands and the way it will be dissolved. It is all tantra. If our body is the yantra, a vehicle that runs on fuel of prana then Tantra is the inner working or mechanism. The knowledge of how the web of the cosmos is weaved is Tantra. The subtle aspect of how the mind works, how intelligence, memory and emotions shape us. How human beings come together to organize their society for example, democracy is all tantra also. The manner in which the mechanical workings of the human body is, the flow of blood, the flow of air, the postures is also Tantra. Tantra is also the flow of rivers and ocean and the dynamic nature and movements of the planets and the stars. Tantra is the way of matter and energies of the universe.

The first Tantrik of the cosmos is Shiva. He revealed the Tantra to his Shakti, his consort. This formed the basis and crux of all the Tantra knowledge we have amidst us. The manner in which Shiva revealed Tantra to his Shakti in form of conversation, gave rise to the whole system of Agama-Nigama. Agama where Shiva reveals and Shakti listens. Nigama where Shakti asks and understands Tantra from Shiva. All Tantra is Shiva - Shakti Tantra. This later gave rise to Shaiva Tantra and Shakta Tantra. Shakta Tantra then later also branched into Saura Tantra, Ganapatya Tantra, Vaishnava Tantra and others.

Shaiva Tantra is the journey back to the source of all manifestations, while Shakta Tantra through its diverse vidyas, upa vidyas, maha vidyas, parma vidyas and others expresses the beauty of manifestation through diverse lenses and iridescent colors.

Tantra reveals the objective sides of the universal self as tattvas or cosmic principles and it also reveals the wisdom of subjective side of the universal self through contemplation practices of visualisation, practices of cosmic sounds, and other mystical practices that uncovers the sheaths of Kalaa, Vidya, Raaga, Kaala and Niyati which veils the Shiva or universal self.

Tantra has two webs of expansion. One is the creation of an external universe from the Hiranyagarbha or ekarnava and the final dissolution into it. The second is the internal journey - creation of the individual self from the cosmic self and the final dissolution or merger into the cosmic self. These two journeys, the outside journey in the macrocosm and the inner journey in the microcosm have the same nature. This is the inner principle of resonance. This is Tantra.

Physically, our bodies contain the same minerals and matter that the stars are made of.

The content of the vast universe is in us as well. And not just in physical matter but in the subtle energetic levels as well. From the tiniest quantum particle to the vastest of the galaxies, the energy of the universe that is ever transforming itself into diverse forms and other kinds of energies, have similar play in our body and mind as well. Siddhas realized these energies in various Mahavidyas. There is an implicit harmony in the universe even if one finds it chaotic or random. Similar harmony exists in our body and mind. When this harmony is disturbed or the balance is shaken, then that gives rise to diseases of body and mind.

Tantra is the refined lifestyle where the limited identity discovers the cosmic nature of its being and artfully expresses it. Tantra can enable radical changes to transform oneself at energetic, emotional and physical level. The arts of Tantra is the way of Siddhas through which one can realize one's true nature and achieve cosmic awareness. This allows the divine to manifest in oneself.

Tantra is a path from the limited individual self to unlimited cosmic self. Siddha Tantra offers ways to expression life in fullness through diverse artforms. To manifest the creativity latent inside through wisdom and transcendental acts.

Tantra is the expressway to rapid evolution. Sometimes it requires one to challenge the religious, cultural and political norms of society. It has challenged traditional models of womanhood by revealing the sacred feminine and its implicit violent and erotic power. Tantra teaches a way of fearlessness. The ways of Tantra has created lofty personalities of great men and women. It has transformed the lives of kings and socially marginalized as well. By shattering the society's conditioning of mind, Tantra transcends the ego-led emotions of fear and aversion and instead nurtures a non-discriminating attitude and acceptance of diverse ways and even taboos.

Tantra gives unfettered access to improve the quality of life in manifestation as well as the path of liberation. It promises longevity and invulnerability in the world. Tantra is also a double edged sword. One can easily be seduced by the power of manifestation one gains from the Tantra practices. This may cause one to get lost in the worldly indulgences. Therefore the ways of Siddhas are needed. It gives the art of Tantra through which one can balance the worldly material gains as well as the spiritual dimensions of life.

Siddha Tantra Arts sees these energies that drive the atoms as no different than the energies that drive our desires. Siddha Tantra Arts trains the mind to open itself by transforming all pleasures into transcendental experiences. Intense awareness of being, where body and mind are present in the activities that triggers sublime nature of one's being. This is the state of Siddha where one enjoys the happiness and joys that the material world offers blissfully , at the same time remains free from the attachments and delusions that one often sees in hedonistic or materialistic people.

A

Our days are shaped by the motion of our desires. We are driven by our desires from the moment we wake up to the time we fall asleep. Even in dreams. Our senses want to grasp more of its sensory objects. Eyes want to see interesting shapes, colors, forms. Ears want to hear pleasing sounds. Nose actively tries to sniff good and bad odors. Tongue seeks exciting new tastes and our sense of touch wants contact. Siddhas recognize the mind as another sense or Indriya which feeds on ideas and thoughts. Mind is a sense that receives inputs from other senses. It is the desire of mind that drives one to pursue anything be it academics, sports, business, arts or even spiritual pursuits. One can even say that without desire, life is no different than death!

It is often assumed that if desires are fulfilled, it will bring happiness. But by the time a desire is satisfied, another takes its place. So in the quest of happiness through fulfillment of desires, one goes from one desire to the next. Thus the cycle continues. From the rat race of commuting to success, to the next great thing in life. This is the nature of Sansara or the world.

Many see the futility in all this and face existential moments. These surface as mid life crises, addictions to overcome the futility of it all, or even turns a person to spiritual pursuits. But such a spiritual pursuit results in shunning away the desires and in effect blocking the very existence or nature. This path of utmost denial is not a complete manifestation but a necessary step for many to evolve.

Unlike religious doctrines, Siddha Tantra does not believe in shunning the desires in this manner. Tantra sees the powerful energies flamed by our desires as vibrant potency and artfully channelizes it for spiritual evolution. Siddha Tantra Arts shows how every experience, no matter good, bad, ugly, religious or irreligious, all experiences can be transformed into the path of fulfillment. Desires are inseparable from life.

Many people have conflicts in their minds about experiencing pleasures and doing spiritual or religious practices. They assume that religion implies renouncing desires or shunning pleasures of life. Negating pleasures, desires, spontaneity and shunning freedom of expression is not their idea of religion. Religion appears as a mode of suppression for them. Religion is then battled off as mere superstition.

Because of quick results, tantra practices have become very common. Instead of shunning desires, tantra uses the desires as one uses ghee in fire. But desires can be double edged swords. If not carefully channelled with the right set of intentions, it can even lead a person astray. So tantra is considered a dangerous path as well.

To have a complete manifestation of life's creative expressions, one must become free from these conditionings. It is these conditionings of mind that are at the root of suffering. When one is free from these conditionings then one can experience the wholeness of the being. Tantra is a path to free the mind from the conditioning that limits its understanding of the true nature of being.

Tantra is for everybody. Knowingly or unknowingly one is performing Tantra expressions. It is about realizing it and refining it that separates an unconscious zombie from a cosmic person.

What is Cunning Craft and who are Cunning Folk? | by Crystal ...

Witchcraft, Folk Magic, and Cunning Arts refer to various traditional practices involving magic, healing, and divination, often seen in historical European and American contexts, where "Cunning Folk" (wise men/women) used charms, remedies, and rituals for practical good, distinct from the malevolent "witches" of popular lore, though authorities often conflated them; these traditions blend spiritual belief, natural knowledge, and community help, focusing on tangible results like healing, finding love, or protection, contrasting with modern Wicca/Paganism but sharing roots in older, earth-based magic.

Core Concepts

Cunning Folk (Wise Ones): Community figures (often elders, midwives, healers) known for "cunning" or secret knowledge, providing charms, remedies, and spells for protection, healing, finding lost items, or ensuring love/luck, according to sources like Wikipedia and Art Of The Root.

Folk Magic: Practical, often localized magic rooted in cultural traditions, using everyday objects (herbs, stones, water) and rituals, common in Appalachian and other traditions, notes Smithsonian Center for Folklife and Cultural Heritage.

Witchcraft: Historically, often a negative label for those accused of harmful magic or diabolism, distinct from the benevolent work of cunning folk, though Puritan writers tried to merge the concepts, writes wildhunt.org and YouTube.

Key Characteristics

Practical Focus: Aims for tangible results (healing, love, fortune), not just spiritual enlightenment, explain wildhunt.org and YouTube.

Community-Based: Often provided services (like love spells or cures) within their villages, says HistoryExtra.

Syncretic: Blends indigenous beliefs with European practices, seen in American Appalachian magic, note Smithsonian Center for Folklife and Cultural Heritage and Wikipedia.

Modern Relevance

These historical practices are explored in art (like Stanford University) and contemporary paganism, connecting to the desire for meaning and agency, say Stanford University and wildhunt.org.

They contrast with modern witchcraft (Wicca, etc.) but share roots, offering a window into pre-scientific approaches to life's challenges, according to Medium.

Witches & Witchcraft | My Jewish Learning
Witchcraft refers to the practice of magic or supernatural powers, historically associated with causing harm (maleficium) and often linked to evil spirits or the Devil, leading to accusations and witch hunts, but today also encompasses modern, nature-based spiritual paths like Wicca, which use magic for healing, guidance, and personal growth, emphasizing benevolent intent, reverence for nature, and individual spiritual paths.
Historical & Traditional Views
Harmful Magic: In many cultures, witchcraft was seen as using occult powers to bring misfortune to others, often stemming from social tensions or disputes.
Religious Connection: The medieval Church linked witchcraft to heresy, apostasy, and pacts with the Devil, leading to severe persecution.
Accusations as Social Control: Accusations served as a cultural tool to punish non-conformity, with the accused often targeted due to jealousy or community conflicts, not actual malicious magic.
Modern & Contemporary Views (Wicca & Neo-Paganism)
Nature-Based Spirituality: Modern witchcraft (like Wicca) is a spiritual path focused on reverence for the Earth, natural cycles, and deities (often a God and Goddess).
Benevolent Magic: Practices focus on beneficial magic for healing, guidance, divination, and self-improvement, rejecting the idea of harming others due to principles like karma (the "threefold law").
Personal & Diverse: Practices vary widely, involving rituals, herbs, crystals, and tools like wands, with emphasis on personal energy, self-honoring, and unique paths.

Key Distinctions
Intent: Traditional witchcraft (in accusation) was seen as evil and harmful; modern witchcraft is largely benevolent.
Belief System: Modern witchcraft is a religion or spirituality, distinct from historical beliefs about witches communing with demons.
Practice: Modern practitioners engage in personal spiritual development, unlike the fearful stereotypes.

Witchcraft is the use of magic by a person called a witch. Traditionally, "witchcraft" means the use of magic to inflict supernatural harm or misfortune on others, and this remains the most common and widespread meaning.[1] Though the idea of witchcraft is largely imaginary, it has nevertheless served in many cultures as a way to explain the presence of evil.[2] The belief in witches has been found throughout history in a great number of societies worldwide. Most of these societies have used protective magic or counter-magic against witchcraft, and have shunned, banished, imprisoned, physically punished or killed alleged witches. Anthropologists use the term "witchcraft" for similar beliefs about harmful occult practices in different cultures, and these societies often use the term when speaking in English.[3][4][5]

Belief in witchcraft as malevolent magic is attested from ancient Mesopotamia, and in Europe, belief in witches traces back to classical antiquity. In medieval and early modern Europe, accused witches were usually women[6] who were believed to have secretly used black magic (maleficium) against their own community. Usually, accusations of witchcraft were made by neighbors of accused witches, and followed from social tensions. Witches were sometimes said to have communed with demons or with the Devil, though such accusations were mainly made against perceived opponents of the Church.[7] It was thought witchcraft could be thwarted by white magic, provided by 'cunning folk' or 'wise people'. Suspected witches were often prosecuted and punished, if found guilty or simply believed to be guilty. European witch-hunts and witch trials in the early modern period led to tens of thousands of executions. While magical healers and midwives were sometimes accused of witchcraft,[8][4][9][10] they made up a minority of those accused. European belief in witchcraft gradually dwindled during and after the Age of Enlightenment.

Many indigenous belief systems that include the concept of witchcraft likewise define witches as malevolent, and seek healers (such as medicine people and witch doctors) to ward off and undo bewitchment.[11][12] Some African and Melanesian peoples believe witches are driven by an evil spirit or substance inside them. Modern witch-hunting takes place in parts of Africa and Asia.

Since the 1930s, followers of certain kinds of modern paganism identify as witches and redefine the term "witchcraft" as part of their neopagan beliefs and practices.[13][14][15] Other neo-pagans avoid the term due to its negative connotations.[16]

Concept

The Witches by Hans Baldung (woodcut), 1508

The most common meaning of "witchcraft" worldwide is the use of harmful magic.[17] Belief in malevolent magic and the concept of witchcraft has lasted throughout recorded history and has been found in cultures worldwide, regardless of development.[3][18] Most societies have feared an ability by some individuals to cause supernatural harm and misfortune to others. This may come from mankind's tendency "to want to assign occurrences of remarkable good or bad luck to agency, either human or superhuman".[19] Historians and anthropologists see the concept of "witchcraft" as one of the ways humans have tried to explain strange misfortune.[19][20] Some cultures have feared witchcraft much less than others because they tend to have other explanations for strange misfortune.[19] For example, the Gaels of Ireland and the Scottish Highlands historically held a strong belief in fairy folk, who could cause supernatural harm, and witch-hunting was very rare in these regions compared to other regions of the British Isles.[21]

Historian Ronald Hutton outlined five key characteristics ascribed to witches and witchcraft by most cultures that believe in this concept: the use of magic to cause harm or misfortune to others; it was used by the witch against their own community; powers of witchcraft were believed to have been acquired through inheritance or initiation; it was seen as immoral and often thought to involve communion with evil beings; and witchcraft could be thwarted by defensive magic, persuasion, intimidation or physical punishment of the alleged witch.[17]

A common belief worldwide is that witches use objects, words, and gestures to cause supernatural harm, or that they simply have an innate power to do so. Hutton notes that both kinds of practitioners are often believed to exist in the same culture and that the two often overlap, in that someone with an inborn power could wield that power through material objects.[22]

One of the most influential works on witchcraft and concepts of magic was E. E. Evans-Pritchard's Witchcraft, Oracles and Magic Among the Azande, a study of Azande witchcraft beliefs published in 1937. This provided definitions for witchcraft which became a convention in anthropology.[20] However, some researchers argue that the general adoption of Evans-Pritchard's definitions constrained discussion of witchcraft beliefs, and even broader discussion of magic and religion, in ways that his work does not support.[23] Evans-Pritchard reserved the term "witchcraft" for the actions of those who inflict harm by their inborn power and used "sorcery" for those who needed tools to do so.[24] Historians found these definitions difficult to apply to European witchcraft, where witches were believed to use physical techniques, as well as some who were believed to cause harm by thought alone.[25][26] The distinction "has now largely been abandoned, although some anthropologists still sometimes find it relevant to the particular societies with which they are concerned".[22]

While most cultures believe witchcraft to be something willful, some Indigenous peoples in Africa and Melanesia believe witches have a substance or an evil spirit in their bodies that drives them to do harm.[22] Such substances may be believed to act on their own while the witch is sleeping or unaware.[23] The Dobu people believe women work harmful magic in their sleep while men work it while awake.[27] Further, in cultures where substances within the body are believed to grant supernatural powers, the substance may be good, bad, or morally neutral.[28][29] Hutton draws a distinction between those who unwittingly cast the evil eye and those who deliberately do so, describing only the latter as witches.[19]

The universal or cross-cultural validity of the terms "witch" and "witchcraft" are debated.[20] Hutton states:

[Malevolent magic] is, however, only one current usage of the word. In fact, Anglo-American senses of it now take at least four different forms, although the one discussed above seems still to be the most widespread and frequent. The others define the witch figure as any person who uses magic ... or as the practitioner of nature-based Pagan religion; or as a symbol of independent female authority and resistance to male domination. All have validity in the present.[19]

According to the United Nations Special Rapporteur on Extrajudicial, Summary or Arbitrary Executions there is "difficulty of defining 'witches' and 'witchcraft' across cultures—terms that, quite apart from their connotations in popular culture, may include an array of traditional or faith healing practices".[30]

Anthropologist Fiona Bowie notes that the terms "witchcraft" and "witch" are used differently by scholars and the general public in at least four ways.[20] Neopagan writer Isaac Bonewits proposed dividing witches into even more distinct types including, but not limited to: Neopagan, Feminist, Neogothic, Neoclassical, Classical, Family Traditions, Immigrant Traditions, and Ethnic.[31]

Etymology

Further information: Witch (word)

The word "witchcraft" is over a thousand years old: Old English formed the compound wiccecræft from wicce ('witch') and cræft ('craft').[32] The masculine form was wicca ('male sorcerer').[33]

According to the Oxford English Dictionary, wicce and wicca were probably derived from the Old English verb wiccian, meaning 'to practice witchcraft'.[34] Wiccian has a cognate in Middle Low German wicken (attested from the 13th century). The further etymology of this word is problematic. It has no clear cognates in other Germanic languages outside of English and Low German, and there are numerous possibilities for the Indo-European root from which it may have derived.

Another Old English word for 'witch' was hægtes or hægtesse, which became the modern English word "hag" and is linked to the word "hex". In most other Germanic languages, their word for 'witch' comes from the same root as these; for example German Hexe and Dutch heks.[35]

In colloquial modern English, the word witch is particularly used for women.[36] A male practitioner of magic or witchcraft is more commonly called a 'wizard', or sometimes, 'warlock'. When the word witch is used to refer to a member of a neo-pagan tradition or religion (such as Wicca), it can refer to a person of any gender.[37]

Beliefs about practices

Preparation for the Witches' Sabbath by David Teniers the Younger. It shows a witch brewing a potion overlooked by her familiar spirit or a demon; items on the floor for casting a spell; and another witch reading from a grimoire while anointing the buttocks of a young witch about to fly upon an inverted besom.
Witches are commonly believed to cast curses; a spell or set of magical words and gestures intended to inflict supernatural harm.[38] Cursing could also involve inscribing runes or sigils on an object to give that object magical powers; burning or binding a wax or clay image (a poppet) of a person to affect them magically; or using herbs, animal parts and other substances to make potions or poisons.[39][40][41][22] Witchcraft has been blamed for many kinds of misfortune. In Europe, by far the most common kind of harm attributed to witchcraft was illness or death suffered by adults, their children, or their animals. "Certain ailments, like impotence in men, infertility in women, and lack of milk in cows, were particularly associated with witchcraft". Illnesses that were poorly understood were more likely to be blamed on witchcraft. Edward Bever writes: "Witchcraft was particularly likely to be suspected when a disease came on unusually swiftly, lingered unusually long, could not be diagnosed clearly, or presented some other unusual symptoms".[42]

A common belief in cultures worldwide is that witches tend to use something from their target's body to work magic against them; for example hair, nail clippings, clothing, or bodily waste.[22] Such beliefs are found in Europe, Africa, South Asia, Polynesia, Melanesia, and North America.[22] Another widespread belief among Indigenous peoples in Africa and North America is that witches cause harm by introducing cursed magical objects into their victim's body; such as small bones or ashes.[22] James George Frazer described this kind of magic as imitative.[a]

In some cultures, witches are believed to use human body parts in magic,[22] and they are commonly believed to murder children for this purpose. In Europe, "cases in which women did undoubtedly kill their children, because of what today would be called postpartum psychosis, were often interpreted as yielding to diabolical temptation".[44]

Witches are believed to work in secret, sometimes alone and sometimes with other witches. Hutton writes: "Across most of the world, witches have been thought to gather at night, when normal humans are inactive, and also at their most vulnerable in sleep".[22] In most cultures, witches at these gatherings are thought to transgress social norms by engaging in cannibalism, incest and open nudity.[22]

Witches around the world commonly have associations with animals.[45] Rodney Needham identified this as a defining feature of the witch archetype.[46] In some parts of the world, it is believed witches can shapeshift into animals,[47] or that the witch's spirit travels apart from their body and takes an animal form, an activity often associated with shamanism.[47] Another widespread belief is that witches have an animal helper.[47] In English these are often called "familiars", and meant an evil spirit or demon that had taken an animal form.[47] As researchers examined traditions in other regions, they widened the term to servant spirit-animals which are described as a part of the witch's own soul.[48]

Necromancy is the practice of conjuring the spirits of the dead for divination or prophecy, although the term has also been applied to raising the dead for other purposes. The biblical Witch of Endor performed it (1 Samuel 28th chapter), and it is among the witchcraft practices condemned by Ælfric of Eynsham:[49][50][51] "Witches still go to cross-roads and to heathen burials with their delusive magic and call to the devil; and he comes to them in the likeness of the man that is buried there, as if he arises from death."[52]

J.D. Krige argues that belief in witchcraft also serves various functions. One such function, he notes, is psychological: it enables people to account for failures not as a result of any fault of their own but due to the doings of others or other external malevolent forces. In this way, people can "compensate for their inadequacy and continue to feel that they are masters of their own fate".[53]

Witchcraft and folk healers
Main article: Cunning folk

Diorama of a cunning woman or wise woman in the Museum of Witchcraft and Magic
Most societies that have believed in harmful or black magic have also believed in helpful or white magic.[54] Where belief in harmful magic is common, it is typically forbidden by law as well as hated and feared by the general populace, while helpful or apotropaic (protective) magic is tolerated or accepted by the population, even if the orthodox establishment opposes it.[55]

In these societies, practitioners of helpful magic provide (or provided) services such as breaking the effects of witchcraft, healing, divination, finding lost or stolen goods, and love magic.[56] In Britain, and some other parts of Europe, they were commonly known as 'cunning folk' or 'wise people'.[56] Alan Macfarlane wrote that while cunning folk is the usual name, some are also known as 'blessers' or 'wizards', but might also be known as 'white', 'good', or 'unbinding witches'.[57] Historian Owen Davies says the term "white witch" was rarely used before the 20th century.[58] Ronald Hutton uses the general term "service magicians".[56] Often these people were involved in identifying alleged witches.[54]

Such helpful magic-workers "were normally contrasted with the witch who practiced maleficium—that is, magic used for harmful ends".[59] In the early years of the European witch hunts "the cunning folk were widely tolerated by church, state and general populace".[59] Some of the more hostile churchmen and secular authorities tried to smear folk-healers and magic-workers by falsely branding them 'witches' and associating them with harmful 'witchcraft',[56] but generally the masses did not accept this and continued to make use of their services.[60] The English MP and skeptic Reginald Scot sought to disprove magic and witchcraft altogether, writing in The Discoverie of Witchcraft (1584), "At this day, it is indifferent to say in the English tongue, 'she is a witch' or 'she is a wise woman'".[61] Historian Keith Thomas adds "Nevertheless, it is possible to isolate that kind of 'witchcraft' which involved the employment (or presumed employment) of some occult means of doing harm to other people in a way which was generally disapproved of. In this sense the belief in witchcraft can be defined as the attribution of misfortune to occult human agency".[4]

Emma Wilby says folk magicians in Europe were viewed ambivalently by communities, and were considered as capable of harming as of healing,[62] which could lead to their being accused as malevolent witches. She suggests some English "witches" convicted of consorting with demons may have been cunning folk whose supposed fairy familiars had been demonised.[63]

Hutton says that magical healers "were sometimes denounced as witches, but seem to have made up a minority of the accused in any area studied".[54] Likewise, Davies says "relatively few cunning-folk were prosecuted under secular statutes for witchcraft" and were dealt with more leniently than alleged witches. The Constitutio Criminalis Carolina (1532) of the Holy Roman Empire, and the Danish Witchcraft Act of 1617, stated that workers of folk magic should be dealt with differently from witches.[64] It was suggested by Richard Horsley that 'diviner-healers' (devins-guerisseurs) made up a significant proportion of those tried for witchcraft in France and Switzerland, but more recent surveys conclude that they made up less than 2% of the accused.[65] However, Éva Pócs says that half the accused witches in Hungary seem to have been healers,[66] and Kathleen Stokker says the "vast majority" of Norway's accused witches were folk healers.[67]

Witch-hunts and thwarting witchcraft

A witch bottle, used as counter-magic against witchcraft

Societies that believe (or believed) in witchcraft may also believe that it can be thwarted in various ways. One common way is to use protective magic or counter-magic, often with the help of magical healers such as cunning folk or witch-doctors.[54] This includes performing rituals, reciting charms, or the use of talismans, amulets, anti-witch marks, witch bottles, witch balls, and burying objects such as horse skulls inside the walls of buildings.[68] Another believed cure for bewitchment is to persuade or force the alleged witch to lift their spell.[54] Often, people have attempted to thwart the witchcraft by physically punishing the alleged witch, such as by banishing, wounding, torturing or killing them. Hutton wrote that "In most societies, however, a formal and legal remedy was preferred to this sort of private action", whereby the alleged witch would be prosecuted and then formally punished if found guilty.[54]

Accusations of witchcraft

The torture used against accused witches, 1577

Throughout the world, accusations of witchcraft are often linked to social and economic tensions. Females are most often accused, especially in more male-dominated societies like 16th-century America.[69] However, in some cultures it was mostly males, such as in 17th-century Iceland.[70] In many societies, accusations are directed mainly against the elderly, but in others age is not a factor, and in some cultures it is mainly adolescents who are accused.[71]

Éva Pócs writes that reasons for accusations of witchcraft fall into four general categories. The first three of which were proposed by Richard Kieckhefer, and the fourth added by Christina Larner:[72]

- A person was caught in the act of positive or negative sorcery
- A well-meaning sorcerer or healer lost their clients' or the authorities' trust
- A person did nothing more than gain the enmity of their neighbors
- A person was reputed to be a witch and surrounded with an aura of witch-beliefs or occultism.

Modern witch-hunts

Main articles: Witch-hunt, Witch trials in the early modern period, and Modern witch-hunts

Witch-hunts, scapegoating, and the shunning or murder of suspected witches still occurs.[73] Many cultures worldwide continue to have a belief in the concept of "witchcraft" or malevolent magic.[74]

Apart from extrajudicial violence, state-sanctioned execution also occurs in some jurisdictions. For instance, in Saudi Arabia practicing witchcraft and sorcery is a crime punishable by death and the country has executed people for this crime as recently as 2014.[75][76][77]

Witchcraft-related violence is often discussed as a serious issue in the broader context of violence against women.[78][79][80][81][82] In Tanzania, an estimated 500 older women are murdered each year following accusations of witchcraft or accusations of being a witch, according to a 2014 World Health Organization report.[83]

Children who live in some regions of the world, such as parts of Africa, are also vulnerable to violence stemming from witchcraft accusations.[84][85][86][87] Such incidents have also occurred in immigrant communities in Britain, including the much publicized case of the murder of Victoria Climbié.[88][89]

Religious perspectives

Ancient Mesopotamian religion

A clay tablet from the Maqlû, outlining an ancient Akkadian anti-witchcraft ritual
Main article: Witchcraft in the Middle East
Magic was an important part of ancient Mesopotamian religion and society, which distinguished between 'good' (helpful) and 'bad' (harmful) rites.[90] In ancient Mesopotamia, practitioners mainly used counter-magic against witchcraft (kišpū[91]); the law codes also prescribed the death penalty for those found guilty of witchcraft.[90] According to Tzvi Abusch, ancient Mesopotamian ideas about witches and witchcraft shifted over time, and the early stages were "comparable to the archaic shamanistic stage of European witchcraft".[92] In this early stage, witches were not necessarily considered evil, but took 'white' and 'black' forms, could help others using magic and medical knowledge, generally lived in rural areas, and sometimes exhibited ecstatic behavior.[92]

In ancient Mesopotamia, a witch (m. kaššāpu, f. kaššāptu, from kašāpu ['to bewitch'][91]) was "usually regarded as an anti-social and illegitimate practitioner of destructive magic ... whose activities were motivated by malice and evil intent and who was opposed by the ašipu, an exorcist or incantation-priest".[92] These ašipu were predominantly male representatives of the state religion, whose main role was to work magic against harmful supernatural forces such as demons.[92] The stereotypical witch mentioned in the sources tended to be those of low status who were weak or otherwise marginalized, including women, foreigners, actors, and peddlers.[90]

The Code of Hammurabi (18th century BCE) allowed someone accused of harmful magic-practice to undergo trial by ordeal—by jumping into a holy river. If they drowned, they were deemed guilty, and the accuser inherited the guilty person's estate. If they survived, the accuser's estate was handed over instead.[90]

The Maqlû ("burning") is an ancient Akkadian text written early in the first millennium BCE, which sets out a Mesopotamian anti-witchcraft ritual.[93] This lengthy ritual includes invoking various gods, burning an effigy of the witch, then dousing and disposing of the remains.[94]

Abrahamic religions
The historical development of witchcraft in the Middle East shows a multi-stage process shaped by culture, spirituality, and societal norms. Ancient witchcraft in the Middle East

intertwined mysticism with nature through rituals and incantations aligned with local beliefs. The position of magic among ancient Jews and within Judaism was complex, with some forms accepted as mysticism and others disapproved of as heresy.[95][96] The medieval Middle East experienced shifting perceptions of witchcraft under Islamic and Christian influences, sometimes revered for healing and other times condemned as heresy.

Jewish

See also: Witchcraft and divination in the Hebrew Bible

Jewish attitudes toward witchcraft were rooted in its association with idolatry and necromancy, and some rabbis even practiced forms of magic themselves.[97][98] References to witchcraft in the Hebrew Bible highlighted strong condemnations rooted in the "abomination" of magical practices. Christianity later similarly condemned witchcraft, considering it an abomination and using select verses to justify witch hunting during the early modern period.

Christian

Illustration by Martin van Maële of a Witches' Sabbath and Black Mass overseen by a horned Devil, in the 1911 edition of La Sorcière, by Jules Michelet

Main article: Christian views on magic

Historically, the Christian concept of witchcraft derives from Old Testament laws against it. In medieval and early-modern Europe, many Christians believed in magic. As opposed to the helpful magic of the cunning folk, witchcraft was seen as evil and associated with Satan and devil worship. This often resulted in deaths, torture and scapegoating (casting blame for misfortune),[99][100] and many years of large-scale witch trials and witch hunts, especially in Protestant Europe, before largely ending during the Age of Enlightenment. Christian views are diverse, ranging from intense belief and opposition (especially by Christian fundamentalists) to non-belief. During the Age of Colonialism, many cultures were exposed to the Western world via colonialism, usually accompanied by intensive Christian missionary activity (see Christianization). In these cultures, beliefs about witchcraft were partly influenced by the prevailing Western concepts of the time.

In Christianity, sorcery came to be associated with heresy and apostasy and was viewed as evil. Among Catholics, Protestants, and the secular leadership of late-medieval/early-modern Europe, fears about witchcraft rose to a fever pitch and sometimes led to large-scale witch hunts. The fifteenth century saw a dramatic rise in awareness and terror of witchcraft. Tens of thousands of people were executed, and others were imprisoned, tortured, banished, and had lands and possessions confiscated. The majority of those accused were women, though in some regions the majority were men.[101][102]:23 In Scots, the word warlock came to be used as the male equivalent of witch (which can be male or female, but is used predominantly for females).[103][104]

The Malleus Maleficarum (Hammer of the Witches) was a witch-hunting manual written in 1486 by German monk-inquisitors Heinrich Kramer and Jacob Sprenger. It was used by both Catholics and Protestants[105] for several hundred years, outlining how to identify a witch, what makes a woman more likely than a man to be a witch, how to put a witch on trial, and how to punish a witch. The book defines a witch as evil and typically female. It became the handbook for secular courts throughout Europe, but was not used by the Inquisition, which even cautioned against relying on it.[106] It was the most sold book in Europe for over 100 years (after the Christian Bible).[107]

Islamic

Main article: Islam and magic

Islamic perspectives on magic encompass a wide range of practices,[108] with belief in black magic and the evil eye coexisting alongside strict prohibitions against its practice.[109] The Quran acknowledges the existence of magic and seeks protection from its harm. Islam's stance is against the practice of magic, considering it forbidden, and emphasizes miracles rather than magic or witchcraft.[110] The historical continuity of witchcraft in the Middle East underlines the complex interaction between spiritual beliefs and societal norms across different cultures and epochs.

Modern paganism

The sorceress Ceridwen of Welsh mythology is considered a Goddess in Modern paganism and Wicca.[111]

Main articles: Neopagan witchcraft and Semitic neopaganism

During the 20th century, interest in witchcraft rose in English-speaking and European countries. From the 1920s, Margaret Murray popularized the 'witch-cult hypothesis': the idea that those persecuted as 'witches' in early modern Europe were followers of a benevolent pagan religion that had survived the Christianization of Europe. This has been discredited by further historical research.[112][113][114][115][116]

From the 1930s, occult neopagan groups began to emerge who called their religion a kind of 'witchcraft'. They were initiatory secret societies inspired by Murray's 'witch cult' theory, ceremonial magic, Aleister Crowley's Thelema, and historical paganism.[117][118][119] The biggest religious movement to emerge from this is Wicca. Today, some Wiccans and members of related traditions self-identify as "witches" and use the term "witchcraft" for their magico-religious beliefs and practices, primarily in Western anglophone countries.[13]

Regional perspectives

Prevalence of belief in witchcraft by country[120]

Socio-demographic correlates of witchcraft beliefs[120]

A 2022 study found that belief in witchcraft, as in the use of malevolent magic or powers, is still widespread in some parts of the world. It found that belief in witchcraft varied from

9% of people in some countries to 90% in others, and was linked to cultural and socioeconomic factors. Stronger belief in witchcraft correlated with poorer economic development, weak institutions, lower levels of education, lower life expectancy, lower life satisfaction, and high religiosity.[121][120]

It contrasted two hypotheses about future changes in witchcraft belief:[120]

witchcraft beliefs should decline "in the process of development due to improved security and health, lower exposure to shocks, spread of education and scientific approach to explaining life events" according to standard modernization theory
"some aspects of development, namely rising inequality, globalization, technological change, and migration, may instead revive witchcraft beliefs by disrupting established social order" according to literature largely inspired by observations from Sub-Saharan Africa.

Africa

Main article: Witchcraft in Africa

African witchcraft encompasses various beliefs and practices. These beliefs often play a significant role in shaping social dynamics and can influence how communities address challenges and seek spiritual assistance. Much of what "witchcraft" represents in Africa has been susceptible to misunderstandings and confusion, due to a tendency among western scholars to approach the subject through a comparative lens vis-a-vis European witchcraft.[122] For example, the Maka people of Cameroon believe in an occult force known as djambe, that dwells inside a person. It is often translated as "witchcraft" or "sorcery", but it has a broader meaning that encompasses supernatural harm, healing and shapeshifting; this highlights the problem of using European terms for African concepts.[123]

While some 19th–20th century European colonialists tried to stamp out witch-hunting in Africa by introducing laws banning accusations of witchcraft, some former African colonies introduced laws banning witchcraft after they gained independence. This has produced an environment that encourages persecution of suspected witches.[124]

In the Central African Republic, hundreds of people are convicted of witchcraft yearly, with reports of violence against accused women.[125] The Democratic Republic of the Congo witnessed a disturbing trend of child witchcraft accusations in Kinshasa, leading to abuse and exorcisms supervised by self-styled pastors.[126] In Ghana, there are several "witch camps", where women accused of witchcraft can seek refuge, though the government plans to close them.[127]

In west Kenya, there have been cases of accused witches being burned to death in their homes by mobs.[128] Malawi faces a similar issue of child witchcraft accusations, with traditional healers and some Christian counterparts involved in exorcisms, causing abandonment and abuse of children.[129] In Nigeria, Pentecostal pastors have intertwined Christianity with witchcraft beliefs for profit, leading to the torture and killing of accused children.[130] Sierra Leone's Mende people see witchcraft convictions as beneficial, as the accused receive support and care from the community.[131]

Lastly, in Zulu culture, healers known as sangomas protect people from witchcraft and evil spirits through divination, rituals and mediumship.[132] However, concerns arise regarding the training and authenticity of some sangomas.

In parts of Africa, beliefs about illness being caused by witchcraft continue to fuel suspicion of modern medicine, with serious healthcare consequences. HIV/AIDS[133] and Ebola[134] are two examples of often-lethal infectious disease epidemics whose medical care and containment has been severely hampered by regional beliefs in witchcraft. Other severe medical conditions whose treatment is hampered in this way include tuberculosis, leprosy, epilepsy and the common severe bacterial Buruli ulcer.[135][136]

Americas

North America

Main article: Witchcraft in North America

North America hosts a diverse array of beliefs about witchcraft, some of which have evolved through interactions between cultures.[137][138]

Native American peoples such as the Cherokee,[139] Hopi,[140] the Navajo[5] among others,[141] believed in malevolent "witch" figures who could harm their communities by supernatural means; this was often punished harshly, including by execution.[142] In these communities, medicine people were healers and protectors against witchcraft.[139][140]

The term "witchcraft" arrived with European colonists, along with European views on witchcraft.[137] This term would be adopted by many Indigenous communities for their own beliefs about harmful magic and harmful supernatural powers. Witch hunts took place among Christian European settlers in colonial America and the United States, most infamously the Salem witch trials in Massachusetts. These trials led to the execution of numerous individuals accused of practicing witchcraft. Despite changes in laws and perspectives over time, accusations of witchcraft persisted into the 19th century in some regions, such as Tennessee, where prosecutions occurred as late as 1833.

Some North American witchcraft beliefs were influenced by beliefs about witchcraft in Latin America, and by African witchcraft beliefs through the slave trade.[143][144][138] Native American cultures adopted the term for their own witchcraft beliefs.[145] Neopagan witchcraft practices such as Wicca then emerged in the mid-20th century.[137][138]

Latin America

Main article: Witchcraft in Latin America

Witchcraft beliefs in Latin America are influenced by Spanish Catholic, Indigenous, and

African beliefs. In Colonial Mexico, the Mexican Inquisition showed little concern for witchcraft; the Spanish Inquisitors treated witchcraft accusations as a "religious problem that could be resolved through confession and absolution". Anthropologist Ruth Behar writes that Mexican Inquisition cases "hint at a fascinating conjecture of sexuality, witchcraft, and religion, in which Spanish, indigenous, and African cultures converged".[146] There are cases where European women and Indigenous women were accused of collaborating to work "love magic" or "sexual witchcraft" against men in colonial Mexico.[147] According to anthropology professor Laura Lewis, "witchcraft" in colonial Mexico represented an "affirmation of hegemony" for women and especially Indigenous women over their white male counterparts in the casta system.[148]

Belief in witchcraft is a constant in the history of colonial Brazil, for example the several denunciations and confessions given to the Congregation for the Doctrine of the Faith of Bahia (1591–1593), Pernambuco and Paraíba (1593–1595).[149]

Brujería, often called a Latin American form of witchcraft, is a syncretic Afro-Caribbean tradition that combines Indigenous religious and magical practices from the Caribbean, together with Catholicism, and European witchcraft.[150] The tradition and terminology is considered to encompass both helpful and harmful practices.[151] A male practitioner is called a brujo, a female practitioner, a bruja.[151] Healers may be further distinguished by the terms kurioso or kuradó, a man or woman who performs trabou chikí ("little works") and trabou grandi ("large treatments") to promote or restore health, bring fortune or misfortune, deal with unrequited love, and more serious concerns. Sorcery usually involves reference to an entity referred to as the almasola or homber chiki.[152]

Asia

Main article: Asian witchcraft

Okabe – The cat witch, by Utagawa Kuniyoshi

East Asia

In Chinese culture, the practice of Gong Tau involves black magic for purposes such as revenge and financial assistance.[citation needed] Japanese folklore features witch figures who employ foxes as familiars. Korean history includes instances of individuals being condemned for using spells. The Philippines has its own tradition of Philippine witches, distinct from Western portrayals, with their practices often countered by indigenous Philippine shamans.[citation needed]

Middle East

Main article: Witchcraft in the Middle East

Witchcraft beliefs in the Middle East have a long history, and magic was a part of the ancient cultures and religions of the region.[153]

In ancient Mesopotamia (Sumeria, Assyria, Babylonia), a witch (m. kaššāpu, f. kaššāptu) was "usually regarded as an anti-social and illegitimate practitioner of destructive magic ... motivated by malice and evil intent".[92] Ancient Mesopotamian societies mainly used counter-magic against witchcraft (kišpū), but the law codes also prescribed the death penalty for those found guilty of witchcraft.[90]

For the ancient Hittites, magic could only be sanctioned by the state, and accusations of witchcraft were often used to control political enemies.[154]

As the ancient Hebrews focused on their worship on Yahweh, Judaism clearly distinguished between forms of magic and mystical practices which were accepted, and those which were viewed as forbidden or heretical, and thus "witchcraft".[155]

In the medieval Middle East, under Islamic and Christian influences, witchcraft's perception fluctuated between healing and heresy, revered by some and condemned by others.[citation needed] In the present day diverse witchcraft communities have emerged.[citation needed]

Europe
Main article: European witchcraft
Ancient Roman world
Main article: European witchcraft § Antiquity

Caius Furius Cressinus Accused of Sorcery, Jean-Pierre Saint-Ours, 1792
European belief in witchcraft can be traced back to classical antiquity, when concepts of magic and religion were closely related. During the pagan era of ancient Rome, there were laws against harmful magic.[156] According to Pliny, the 5th century BCE laws of the Twelve Tables laid down penalties for uttering harmful incantations and for stealing the fruitfulness of someone else's crops by magic.[156] The only recorded trial involving this law was that of Gaius Furius Cresimus.[156]

The Classical Latin word veneficium meant both poisoning and causing harm by magic (such as magic potions), although ancient people would not have distinguished between the two.[157] In 331 BCE, a deadly epidemic hit Rome and at least 170 women were executed for causing it by veneficium. In 184–180 BCE, another epidemic hit Italy, and about 5,000 were executed for veneficium.[157] If the reports are accurate, writes Hutton, "then the Republican Romans hunted witches on a scale unknown anywhere else in the ancient world".[157]

Under the Lex Cornelia de sicariis et veneficis of 81 BCE, killing by veneficium carried the death penalty. During the early Imperial era, the Lex Cornelia began to be used more broadly against other kinds of magic,[157] including sacrifices made for evil purposes. The magicians were to be burnt at the stake.[156]

Witch characters—women who work powerful evil magic—appear in ancient Roman literature from the first century BCE onward. They are typically hags who chant harmful incantations; make poisonous potions from herbs and the body parts of animals and humans; sacrifice children; raise the dead; can control the natural world; can shapeshift themselves and others into animals; and invoke underworld deities and spirits. They include Lucan's Erichtho, Horace's Canidia, Ovid's Dipsas, and Apuleius's Meroe.[157]

Early modern and contemporary Europe

By the early modern period, major witch hunts and witch trials began to take place in Europe, partly fueled by religious tensions, societal anxieties, and economic upheaval. One influential text was the Malleus Maleficarum, a 1486 treatise that provided a framework for identifying, prosecuting, and punishing witches. Witches were typically seen as people who caused harm or misfortune through black magic, and were sometimes believed to have made a pact with the Devil.[158] Usually, accusations of witchcraft were made by neighbors and followed from social tensions. Accusations were often made against marginalized individuals, women, the elderly, and those who did not conform to societal norms. Women made accusations as often as men. The common people believed that magical healers (called 'cunning folk' or 'wise people') could undo bewitchment. Hutton says that magical healers were sometimes denounced as witches themselves, "but seem to have made up a minority of the accused in any area studied".[54] The witch-craze reached its peak between the 16th and 17th centuries, resulting in the execution of tens of thousands of people. This dark period of history reflects the confluence of superstition, fear, and authority, as well as the societal tendency to find scapegoats for complex problems. A feminist interpretation of the witch trials is that misogynist views led to the association of women and malevolent witchcraft.[158]

During the 16th century and mid 18th century Scotland had 4000-6000 prosecutions against accused witches, a much higher rate then the European average.[159][160]

Russia also experienced its own iteration of witchcraft trials during the 17th century. Witches were often accused of sorcery and engaging in supernatural activities, leading to their excommunication and execution. The blending of ecclesiastical and secular jurisdictions in Russia's approach to witchcraft trials highlighted the intertwined nature of religious and political power during that time. As the 17th century progressed, the fear of witches shifted from mere superstition to a tool for political manipulation, with accusations used to target individuals who posed threats to the ruling elite.[161]

Since the 1940s, neopagan witchcraft movements have emerged in Europe, seeking to revive and reinterpret ancient pagan and mystical practices. Wicca, pioneered by Gerald Gardner, is the most influential. Drawing inspiration from ceremonial magic, historical paganism, and the now-discredited witch-cult theory, Wicca emphasizes a connection to nature, the divine, and personal growth. Similarly, Stregheria in Italy reflects a desire to reconnect with the country's pagan past. Many of these neopagans self-identify as "witches". Neopagan witchcraft in Europe encompasses a wide range of traditions.[citation needed]

Oceania

[icon]

Beliefs in witchcraft and sorcery are widespread across Oceania, where traditional spiritual systems often coexist with introduced religions such as Christianity. In many societies, witchcraft serves as an explanation for illness, death, or misfortune, and may be associated with social tensions or unresolved conflicts.

In the Cook Islands, the Māori term for black magic is purepure.[162] Practitioners known as ta‘unga historically served as priests, healers, and spiritual advisors. They were believed to possess sacred knowledge and were responsible for conducting rituals, healing the sick, and maintaining spiritual balance within the community.[163]

In Papua New Guinea, belief in witchcraft—often referred to locally as sanguma—remains deeply ingrained in many communities, particularly in the Highlands region. Sorcery is commonly blamed for unexplained deaths, illness, crop failure, or other misfortunes. It is estimated that 50 to 150 people are killed each year in the country as a result of witchcraft accusations.[164] In 2008, reports indicated that more than fifty individuals were killed in two Highlands provinces alone for allegedly practicing sorcery.[165] Victims are often women, and attacks may involve torture, public shaming, or execution. Although the government repealed the Sorcery Act in 2013, which previously allowed sorcery as a defense in murder cases, enforcement of protective laws remains inconsistent, and community-led violence continues.

In Milne Bay Province, including the Samarai Islands, witchcraft beliefs persist, but violence against the accused is significantly lower compared to the Highlands. Anthropological research suggests that local interpretations of witchcraft in these areas are less associated with malevolence and more integrated into broader spiritual and cultural practices. This has been linked to greater social standing for women and fewer gender-based witchcraft accusations.[166]

Other parts of Oceania, including Fiji, Tonga, and Samoa, also maintain traditions involving spiritual power and magical influence. In Fiji, for example, concepts such as valavala vakalou (spiritual acts) and traditional healing practices are still recognized in some rural areas. However, the influence of Christianity and formal legal systems has reduced the prevalence of witchcraft-related violence. In many Pacific Island societies today, witchcraft is viewed through a cultural or religious lens rather than a criminal one, and cases involving supernatural claims are more likely to be addressed through customary dispute resolution or church-based mediation.

Witches in art and literature

Further information: Witch (archetype) § In art and literature, and List of fictional witches

Albrecht Dürer c. 1500: Witch riding backwards on a goat

Witches have a long history of being depicted in art, although most of their earliest artistic depictions seem to originate in Early Modern Europe, particularly the Medieval and Renaissance periods. Many scholars attribute their manifestation in art as inspired by texts such as Canon Episcopi, a demonology-centered work of literature, and Malleus Maleficarum, a "witch-craze" manual published in 1487, by Heinrich Kramer and Jacob Sprenger.[167] Witches in fiction span a wide array of characterizations. They are typically, but not always, female, and generally depicted as either villains or heroines.[168]

Notes

"If we analyze the principles of thought on which magic is based, they will probably be found to resolve themselves into two: first, that like produces like, or that an effect resembles its cause; and, second, that things which have once been in contact with each other continue to act on each other at a distance after the physical contact has been severed. The former principle may be called the Law of Similarity, the latter the Law of Contact or Contagion. From the first of these principles, namely the Law of Similarity, the magician infers that he can produce any effect he desires merely by imitating it: from the second he infers that whatever he does to a material object will affect equally the person with whom the object was once in contact, whether it formed part of his body or not."[43]

Russell, Jeffrey Burton; Lewis, Ioan M. (2023). "Witchcraft". Encyclopedia Britannica. Archived from the original on 28 June 2023. Retrieved 28 July 2023. Although defined differently in disparate historical and cultural contexts, witchcraft has often been seen, especially in the West, as the work of crones who meet secretly at night, indulge in cannibalism and orgiastic rites with the Devil, or Satan, and perform black magic. Witchcraft thus defined exists more in the imagination of contemporaries than in any objective reality. Yet this stereotype has a long history and has constituted for many cultures a viable explanation of evil in the world.

Grell, Ole Peter; Scribner, Robert W. (2002). Tolerance and Intolerance in the European Reformation. Cambridge University Press. p. 45. Not all the stereotypes created by elites were capable of popular reception [...] The most interesting example concerns cunning folk, whom secular and religious authorities consistently sought to associate with negative stereotypes of superstition or witchcraft. This proved no deterrent to their activities or to the positive evaluation in the popular mind of what they had to offer.

Supernatural healing of the sort practiced by Inger Roed and Lisbet Nypan, known as signeri, played a role in the vast majority of Norway's 263 documented witch trials. In trial after trial, accused 'witches' came forward and freely testified about their healing methods, telling about the salves they made and the bønner (prayers) they read over them to enhance their potency.

folk magick

AI Overview

Folk magic is practical, community-based spiritual work using simple, accessible methods like herbs, stones, prayers, and charms to solve everyday problems like healing, luck, finding things, or protection, rooted in local traditions (like Appalachian "granny magic," Hoodoo, or European "cunning folk") often blending indigenous knowledge with Christian or other beliefs, focusing on natural connections rather than formal doctrine. It’s about personal intention, intuition, and using what's at hand, forming the foundation for many modern witchcraft and pagan practices.

Key Characteristics

Practicality: Solves immediate needs (healing, love, luck, protection).
Accessibility: Uses common, natural items like plants, water, rocks, and household objects.
Cultural Roots: Draws from specific regional traditions (e.g., Appalachian, Hoodoo, Celtic).
Intuitive: Relies heavily on personal connection and intent, often passed down through families.
Syncretism: Blends indigenous, European, and African beliefs (e.g., Native plants with Christian prayers).

Examples of Practices & Traditions

Cunning Folk: European practitioners offering healing, divination, and protection.
Hoodoo/Conjure: African American tradition using roots, herbs, and spiritual practices.
Appalachian/Granny Magic: Blends Native American, European, and African traditions using local plants.
Kitchen Witchery: Magic focused on the home and hearth.

Folk Magic vs. Other Systems

Simpler Tools: Less emphasis on elaborate rituals, wands, or specific degrees, focusing on necessity and nature.

Foundation: Provides historical context and methods that inform modern witchcraft, Wicca, and Paganism.

The term “Folk magic” has a kind of hokey/disparaging/ silly air about it but it’s the best way to describe things like Kuji, especially as practiced by the common folk in the Edo era. Started as Taoist, got Shinto added to it, was initially used to forge invisible armor around yourself or waylay your enemies, before gradually becoming simplified until it evolved into a kind of cleansing magic to perform before writing spells or making talismans.

“Drawing on her heritage, Fahrun (@rueskitchen) shares her experiences with folk magic, as well as how she has adapted her practices because of necessity, availability, and accessibility. For example, she has aphantasia, meaning she cannot, or struggles to, picture things in her head, and visualization is a large part of folk magic. To make it easier for herself and others, she suggests writing it down in great detail, creating a vision board, or creating art about it. The author informs readers about useful objects and ingredients, explains how to identify and ward off the evil eye, and shares numerous other rituals. Her book also provides insight into building relationships with spirits and seeing the world in an enchanted way. It is easy to follow and understand, and it is also a practice that can be passed from person to person. This book is a guide, not an end-all, be-all directive on how to practice folk magic. Living Folk Magic is for anyone who is getting into or is curious abo

European folklore is rich in stories of witches flying, shapeshifting, and journeying to mythic realms   These folk tales are interwoven with the magical art of spirit flight, also

known as hedge-riding, hedge-crossing, or trance journeying. While traveling through the Otherworld in spirit form, witches can visit various realms to receive guidance from deities and other guides, meet and work with familiar spirits, hold meaningful rituals such as initiations, and acquire hidden knowledge of sigils, incantations, charms, and spells. In my self-guided course **Into the Otherworld**, you will explore the folklore and history of this magical art through a series of audio lessons, as well as practice spirit flight through four guided journeys. Details and registration through the link on my page @magebymoonlight. Begin any time you feel the call of the Otherworld . . . .

Folk magic, witchcraft, whats the difference ?

InFolk Magic, Animism, folk, Folk Practices11 CommentsRead Time16 mins

I get asked “what is a Folk Practitioner or what is folk magic?” on many occasions. I also get asked “what is the difference between what you do and what a witch does?”, “Is it witchcraft?”, “Are you religious?”, “Do you worship a lord and lady or speak to the de’il?”, “Do you follow the immanent and emanant mysteries of your gods?” and finally “Do you worship nature? Do you bang your drums and dance around?”

This is no fault of anyone. Folk practices have been adopted in a lot of modern magico-religious approaches. This has caused a lot of confusion when discussing what folk magic practitioners do based on Scottish cultural traditions do and how it differs from

Wicca, Traditional Witchcraft, shamanism, Druidry etc. In my mind, the difference is really rather big. I'm writing this as a "kind of" FAQ to help explore some of the differences and why they are important and to maybe help those who don't know. It's by no means exhaustive and I invite comment on these ideas from others.

First off, folk magic are practices of the people – the folk. Folk practices as you may imagine are very old. Very old and adaptable. Very much like people and their culture. Scottish folk practices have their roots far back in an older way of life. Scottish community and folk practices developed over time from the melting pot of Gaelic, Norse, Pictish, Angles, Norman and Saxon influences. All of these different influences had, and still do have, an impact on what folks did on a day to day basis. I have written about how Scottish tradition has been appropriated by pagan, druidic and witchcraft in another couple of posts. A story about it here and a more in depth examination of it here which provides some deeper context to what is to follow.

Whats also important to note is folk magic belong to all people. Each person had their way of interacting with the unseen world. Be it bakers, dairy workers, cloth makers, blacksmiths, fishermen, candle makers, brewers, cooks, domestic servants, any job you can imagine had a way of interacting with the otherworld. This is important to remember as folk magic is for everyone There were, and are, different ways for different people and everyone had a relationship with the other folk- the good folk and the animistic world view- for different reasons. This varied by person to person, village to village and district to district – so there was never only one version of it. This is different to some of the more authodoxisms in the occult and witchcraft communties. Yes, we did have specialist like the guid wife or the Fairy Dr etc, (some of these were disabled people) but they weren't as many. We also had folk magic practitioners like charmers who maybe were good at a certain thing but not the whole thing. So if anyone is telling you folk magic isn't for you politely tell them to fuck off.

Alexander Carmichael - the writer of the Carmina Gadelica and collector of scottish folk magic charms
Alexander Carmichael – the writer of the Carmina Gadelica
We are very lucky to find that a lot of this information has been preserved in literal format by folks such as Alexander Carmichael, Marion McNeil, Bates and Reginald Scott and others. Though this isn't without its own form of appropriation and harm. There is a huge collection of information that discusses seasonal practices, songs, prayers, festivals, celebrations and day to day things people believed in and carried out. One beautiful example of folk practice are the songs (known as a rann's) sung to plants before picking them, on awakening, reaping, seed sowing, sleeping etc.

So, how is this not Wicca, Traditional Witchcraft or Druidry et al? First off these are newer traditions druidry created from the antiquarian revival in the 1800's Wicca from the 1900's, traditional witchcraft from about the same time. All these worldviews have a tendency to be accompanied by a set of "beliefs" defined by their creators. Some witches are religious such as in Wicca with the Lord and lady. Others, such as Trad witches may involve the Gnostic mystery's of lucifer or honour a spirit such as the Bucca and look at the seasonal wheel as different representations of this figure and involve themselves in the immanent and emanant mysteries. Druids believe in a variety of ideas but most experience a pantheon of gods and goddesses. All of these different traditions do borrow from Scottish folk magic and merge it into their systems in some way or another but again they are appropriating and borrowing from a devastated culture due to English imperialism and recreation it to suit there own understanding.

A most important fact

In our animistic culture – before the reformation witches were people who stole and used a community for their own ends. Scottish Folk practitioners disregarded witches and viewed them as evil. Think about it, in animistic cultures, like Scotland pre colonialism, folk worked together in community to provide for one another and had a collective way of life with no idea of private ownership. Any individual using magic to extract from that community, to feed their own egoistic, needs and not that of a collective good would have been a real issue to them. Our Scottish ancestors for this very reason would be greatly insulted by this appropriation and conflation of their way of life to that of a Witch. You can see this being born out in the witchcraft trials of the 16th century. The use of the word witch is a term given to our folk practices by imperial and religious abrahamic elites – seeking to demonise the people who practiced old beliefs and ways seen as popish. The ruling class demonising the working class in essence. Taking our way of life and turning it into something diabolic. The spirits they didn't want to assimilate, for example in holy wells and Lochs they turned into the devil himself or some other evil entity.

The defining difference in folk magic and witchcraft

The defining difference is folk practices aren't religiously based. Folk practitioners don't necessarily follow any god/goddess or they can, in fact, follow any religion such as Christianity, Catholicism, Islam etc. You don't need a particular set of "beliefs" or "faith" to be a folk practitioner. Folk magic approaches are syncretised with and can be developed from older and newer religious ideas we have. They were preserved in some ways though Christianised in surviving literature. In Scotland, the saints replaced local spirits of wells and hills and Christian/Catholic teachings were used to call on saintly figures whilst people maintained a belief in the fairy folks at the same time. At the same time spirits the church didn't like became known as folk de'ils or the folk devil. To me, it is an example of how the folk belief in animism ran alongside other religious ideas. Also a lot of our folk tales we draw from are stories of an aristocracy (theres a reason why we call the good folk the gentry) and the Tuatha De Dannan are all "royal" to a certain degree. – these aren't the stories of servants and farmers. Interestingly in our working class folk stories we have a lot of examples of where the spirit is more accessible and in the wild than these larger aristocratic tales where the spirit is part of the gentry and elite worship. However, in our folk magic spells we still call on these mighty names with barbarous words. However, exploring the class structure in witchcraft and folk magic helps put the folk back into folk lore and folk magic but this is a story for another day.

In my view, (and this should be acknowledged as my own lens of understanding as it now stands) Scottish folk practices link to animism. To Scottish folk practitioners, everything has a spirit. To me, this is consistently demonstrated by the collected information and the tales we have of the Daoine Síth (the good folk) that still prevail. Honouring these spirits and building relationships with them is the concern of folk magic practitioners like myself. I'd argue this equity conciseness or reciprocity or sacred hospitality should be the number one core belief of folk magic practitioners in Scotland linking it to solely Gaelic concepts like dùthchas.

We honour "otherworld folk" from our local area and maybe work with such ideas of the Slaugh or the host of the dead. Once the relationship is developed or suitable "pacts" engineered, these spirits then choose to help in the ever so practical work of folk magic. This relational way of working also extends to the local land and plants that inhabit it. You seek the aid of the plant "spirit" by showing it respect and singing them particular songs etc. It is hoped by asking them to help it makes the herbal medicine or charm stronger. This means the power of this doesn't sit within you as an all might powerhouse but in the relationships you build and the community you have. There is less hierarchy in animism than in pantheons and ititss funny to me how folk strive to turn everyone and everything into a god or goddess or deity level event.

Scottish folk magic and how it works

Scottish folk magic practitioners believe in the "otherworld" a place where their ancestors and "others" like the síth/sidhe and plant spirits inhabit. This otherworld isn't very far away, it's like it's just out of step with our own world. It's easily accessed at the liminal times such as dawn, dusk, midnight, Bealtainn and Samhuinn, and places such as fog, door steps, thresholds, on hills, near bogs and water and many other ways such as divination and techniques such as second sight etc. There is no veil in Scottish folk magic – the veil doesn't get thin. This is a victorian idea.

Gaelic Plague Charm scottish folk magic and witchcraft
Gaelic Plague Charm
Folk magic spells are created from plant leaves and roots, stones, water and lots of different things. For example, stones being used for healing, cloths tied to sacred wells for healing, wool spun and tied to people to effect a change, young children passed through Holy stones, Holy stones used as ways of seeing the other world, writing phrases, Rowan wood crosses, and red thread etc. The list of these charms is endless. They are as varied as the folk who use them.

Another characteristic of Scottish folk magic and practices is the lack of elaborate rituals, specific tools, times of day and clothing needed to get access to the practice. It's all pretty much straight forward and common sense stuff requiring no special gear. Over time, you may acquire some objects that start to hold special meaning but these are totally up to yourself; your spirits and your preferred way of working. Folk practices are an everyday occurrence and nothing requiring more work than a pointed finger or to circumambulate something three times can be very effective. Wicca and other magical traditions use ceremonial magic techniques such as circle building, invoking and evoking various deities etc and most operate a grade system or have priests and priestesses or a magister or what have you. Folk practices don't have this elaboration or the same hierarchy – those who did this as a full time profession were either born or given the gift through trauma. I also find ceremonial magic when viewed through the lens of colonialism and through a folk magic perspective spiritually violent. That however, is more writing for another day.

Scottish folk magic and ancestry

Scottish folk magic also has its base in ancestry. A lot of Scottish people know their ancestry really well. Some can even trace their ancestry back to the Tuatha De Dannan and the Milesians etc. Ancestors are the only "outside help" called upon by some folk practitioners and this is clearly demonstrated in the ways Scottish folk construct their ranns (meaning runes or charms). In the construction of the rann someone's actions are always emulated. The phrase "as so and so healed this let me heal this" is very common and this structure is repeated in other ways. This is typical of Scottish Folk magic. Sometimes the "so and so" may be replaced with a figure linked to the thinking of the folk practitioner so here we get figures like Mary, St Michael or Thor other named spirits popping up.

Though there are many types of Scottish folk practitioner. Scottish Folk practices were carried out by everyone daily to some extent. Most folks had access to folk magic (piseógs) it was an everyday technology, I suppose a bit like having a phone these days everyone knew a little bit of something. Folk had to take their own "safety" from the machinations of witches and the Síth into their own hands. Today we might call them superstitions but these are commonly held beliefs we still have to this day. Crossing fingers and knocking on wood to help avert a bad outcome or offer protection are commonplace for good reason. If things got tricky, they would call in a specialists (like a wise woman or men or fairy doctor). Outside of the everyday occurrence of these activities, you have those who might also be healers, midwives, lykewakers or death midwives, spae-wives (fortune tellers), folk herbalists, diviners, fairy doctors, those with the second (or second hand sight) etc along with their everyday roles in the community. It's important to note not all folk practitioners would do these activities. Not all folk practitioners would be herbalists and diviners and spae-wives but maybe have a particular skill in a particular area; with limited skill in one form of divination as a way to contact the spirits.

Casting lots - Divination Scottish folk magic and witchcraft

Casting lots – Divination

Folk practitioners, would mostly divine through augury, lots and/or omens to see what is affecting those who came to see them. For example, the presenting issue was of "hill, water or kirk". The clients who came to see them might have been "elf-shot" or otherwise affected by the síth or the malificarum of Witchcraft. Witches, to the folks on pre modern Scotland and to folk practitioners, were evil and responsible for a lot of harm. Before the reformation and the witchcraft trials Witches were seen as monstrous things, but through the reformation folk practices like folk Catholicism came aligned with malificarum and, what I think, we get the conflation we have today. If witches or the Síth had caused the malady, or the folk practitioner was unable to effect a cure, they might suggest they go and see the wise woman or man or the area priest and the folk practitioner would pass them on, one of the first referral systems. This is because not all folk practitioners have the ability to manage illnesses that have their roots in the “doings” of the otherworld and in the evil of witchcraft. They might also refer them to the town priest for similar issues if the problem was one of faith.

In brief, a folk practitioner might hold one of these roles in their community and use folk magic ranns and spells to effect change for your community. You don’t necessarily need to see “spirits” or into the otherworld, divine, use herbs, “cross” over into the otherworld, have an attending familiar and the nine yards of things at all. We all have different gifts and abilities. Some though who make this a full-time career will be able to and these would be the gifted minority (and a rare minority at that) who would be termed, fear/bean feasa – wise man or woman.

Folk magic and gifted specialists as compared to witchcraft

The only practitioners who have the ability to work with the sidhe and those inflicted by “elf-shot” were the wise people and fairy doctors and this was a profession they would undertake full-time but also along side their “day jobs” I guess. These people are few and far between and their gifts are given to them by their relationship with the good folk. The importance of the reciprocity or you may have heard me call it Equity consciousness cannot be understand. The good folk can also take their gifts away easily, sometimes quite dramatically such as removing an eye etc. Normally this may happen if the wise man or woman charged for using their gifts or for displeasing the good folk in another way. These good folk and the associated tales of figures who helped the wise man or woman, I think, represent the archetypical familiar stereotype we hear so much about in witchcraft circles these days. But as you can see the relationship is very different when looked through the eyes of Scottish folk practice. In Scottish folk practice, the sith is the one in power and control and the work is done in relationship with them. In Ceremonial Magic and some forms of witchcraft, the Witch holds the yoke over the spirit. Also to be a ceremonial magician you also need a strong faith in the Christian gods, and again I think a form of spiritual violence when used to command and threaten spirits in the way it’s laid out.

Who you are as a folk practitioner is really decided by the community a folk practitioner lives in. In witchcraft its through initiation of self or in a coven. I have written about this before and you can find the link here. But to summarise morality wasn’t a question in folk magic. Folk practitioners would “work with both hands” to use a modern term i.e. they did what was needed to be done in support of the community they helped and supported. Also, let’s bear in mind right and wrong are a of privilege of the wealthy and privileged in society. Sometimes people just had to do what they had to do to survive day to day. Following on from the older traditions people’s reputations were earned. It’s not my place to name myself “keeper of the stones” or “wise man” or any other bombastic title. My title, and what reputation I have, is decided by my community.

I hope that this short discussion has been helpful to define some of the differences between these ideas. It’s reassuring for me to see these approaches are being incorporated into contemporary life and practice. People are starting to once again re-explore their own roots and history. They are starting to become interested in exploring stereotypes of older times and reigniting relationships with the communities and the lands around them through foraging and herbalism. So who knows? It might mean that your local mechanic is a “car whisperer” and has an uncanny knack or “kenning” what is wrong with your car. Your Lollipop lady a gifted folk herbalist able to offer minor cures to those who pass her by , maybe your Local Policeman is divining the location of your stolen goods and people are putting up protective charms in their houses to protect themselves from threats both real and imagined from this world and the other.

would you say a “kitchen witch” could be a Folk Magic practitioner???…..as a young child Mom would tell me go play with the fairies…and to look for them under the violets and lily-of-the- valley’s…her and my aunts used herbs to cure me…we use our finger instead of a wand….we had our superstitions etc…still do….I was cursed as a baby…and my Mom took the Hex off of me….you get the picture…Mom and my Aunts called it Blowing the Fire….not Witch Craft…..I grew up in a Pennsylvania Dutch Home…..it was different and fun…..now at 60 I look back and smile….and when I had to put a name on it ….so wicca friends would understand I used Kitchen Witch……and I always was called a Witch…just never had to be Politically correct in this day and age….Thank You…I so enjoyed this writing,,,,,

Hey Joanie,

Any person can use folk magic, any religion too, it’s the idea behind its simple and accessible. In interest, folk magic became the “low magic” of witchcraft just as ceremonial and grimoire magic became the “high magic” of witchcraft and Wicca. What a lovely term “blowing the fire” why did they use this particular word and do yo know where it came from it’s very evocative. Im glad you like the post its great to get feedback from folks who have read it

Hello! Very informative and well written article, much appreciated. May I point out one tiny error though? You say that folk magic practitioners can practice any religion, such as Christianity or Catholicism. Catholicism IS Christian. It isn’t a “religion”, it’s a Christian denomination like Anglicanism or Methodism.

Reply
Yes good point Kai, It all comes from a similar stream of religiousness. We call Catholcism the “old religion” in Scotland and to be there has always been more difference in the tradition than similarities but yes, thanks for pointing that out most helpful!

Thank you for an informative post discussing the difference in great detail! I’m just in

confusion though. I had an awakening recently that I am a Green witch (work with botany, flowers, herbology, nature, Earth, stones and essential oils etc.) so I find it hard to understand how this type of witch and spiritual practice is different from that of folk magic. It seems very similar. I also love using crystals. I do believe all nature, animals and the Earth has a spirit so I get upset when I see a tree get cut down because I feel it's pain and screams. I'm an animal lover. I highly respect nature and Mother Earth, but I'm also Buddhist however and I believe in general spiritual beliefs outside of it too, like The Divine Spirits, Spirit Guides, Angels/Archangels and acknowledge and respect all other main religion Gods. I also have a love and fascination with fairies, woodland creatures, fae, any mythological creatures from any culture. I am in fact very complex, but I think it's having these many beliefs and interests that maybe I'm just a very versatile green witch and soul?

This describes to the letter what I and my Grannies do here in Appalachia! We are not high priestesses and can be found in church on occasion. Also, the word witch is never ever mentioned. Thank you for putting into words what I could not!

The Cunning Craft: A Tortuous Path of the Wise Art — Crossed ...
"Cunning Arts" refers to historical and modern practices of folk magic, healing, and esoteric knowledge, often associated with "Cunning Folk" who used spells, remedies, and wisdom from both divine and darker sources, distinct from formal witchcraft but overlapping with occult philosophy, encompassing traditions of divination, herbalism, and cunning trickery found in European folklore and contemporary magical practice, explored in books like The Cunning Craft. It can also refer to specific modern shops, book titles, or even concepts in ancient texts like the Kama Sutra.

In folklore and history
Cunning Folk: Traditionally wise healers, diviners, and charm-workers in Britain and Europe, using practical magic for protection and cures, distinct from demon-focused witchcraft.
Historical Context: Early modern art and culture often depicted these figures as threats, but their practices involved folk charms, herbalism, and occult knowledge.
"Cunning" meaning: In older usage (like the Bible), "cunning" often meant "wise" or "skillful," not just deceitful, notes the International Standard Bible Encyclopedia and Collins Dictionary.
In modern occultism and literature
The Cunning Craft: A book by Nicholaj de Mattos Frisvold exploring these traditions, linking them to figures like Picatrix and Giordano Bruno, and embracing both healing and darker aspects.
Contemporary Practice: Modern practitioners, like those running The Cunning Arts Etsy shop, create magical tools from traditional woods, supporting animal rescue.
Academic Study: Scholars examine "Cunning Arts" as a historical concept, analyzing its link to sorcery, witchcraft, and secret knowledge.
In other contexts
Plato's Hippias Minor: Interpreted by some as an early exploration of "art as a form of wrongdoing" or cunning, notes Books & Books and Wikipedia.
Ancient Texts: In some traditions, "cunning arts" can refer to forms of deception or trickery, as found in texts like the Kama Sutra.
Cunning Folk: Witchcraft, Magic, and Occult Knowledge
Event Details: Cunning Folk considers magical practice, practitioners, and their persecution in early modern European artwork and ...

Cunning folk, also known as folk healers or wise folk, were practitioners of folk medicine, helpful folk magic and divination in Europe from the Middle Ages until the 20th century. Their practices were known as the cunning craft. Their services also included thwarting witchcraft. Although some cunning folk were denounced as witches themselves, they made up a minority of those accused,[1] and the common people generally made a distinction between the two. The name 'cunning folk' originally referred to folk-healers and magic-workers in Britain, but the name is now applied as an umbrella term for similar people in other parts of Europe.[2][3]

European names

Names given to folk-healers and magic-workers in Europe include:

the Danish kloge folk ("wise folk")[2]
the Dutch toverdokters ("magic-doctors") or duivelbanners ("devil-banners")
the Finnish and Karelian tietäjät ("knowers")
the French devins-guérisseurs ("soothsayer-healers") and leveurs de sorts ("curse-lifters")
the German Hexenmeister ("witch masters") or Kräuterhexen ("herb witches")
the Irish bean feasa ("woman of knowledge"), banfháidh or fáidhbhean ("seeress")[4]
the Italian fattucchiere ("fixers"), guaritori ("healers"), benandanti ("good walkers") or Segnatori ("signers").
the Portuguese curandeiros/as, benzedeiros/as ("blessers") or mulheres de virtude ("women of virtue")
the Russian znakhar,[5] znatkiy,[6] vedun,[7] vedma[8](k[9]) ("knower", "witch(er)")
the Slavic vedmaki ("warlocks")
the Spanish curanderos ("healers")
the Swedish klok gumma ("wise old woman") or klok gubbe ("wise old man")[10][11][12][13][14]
the Ukrainian znahar ("someone, who knows")[15]
the Welsh dynion hysbys (from Welsh, meaning "cunning men")
Scandinavia

The Swedish cunning woman Gertrud Ahlgren of Gotland (1782–1874), drawing by Pehr Arvid Säve 1870
In Scandinavia, the klok gumma ("wise woman") or klok gubbe ("wise man"), and collectively De kloka ("The Wise ones"), as they were known in Swedish, were usually elder members of the community who acted as folk healers and midwives as well as using folk magic such as magic rhymes.[16] In Denmark, they were called klog mand ("wise man") and klog kone ("wise woman") and collectively as kloge folk ("wise folk").[17]

Many Norwegian[18] and Danish[18][19] practitioners of folk magic and medicine would have a copy of the "Svartebok" (or "black book"), a tome that, according to some, was written by Cyprianus, that is, the Saint of Necromancers, Cyprian of Antioch, and to others to have been the Sixth and Seventh books of the Bible (or "Books of Moses" as the Pentateuch is known in Denmark and Norway) that were left out of the official Old Testament by the learned so that the common folk would not learn the knowledge held within the text.[18] A formulary found in a "black book" recovered from a farm near Elverum contains many formulas such as one for a toothache that commands the user of the charm to write the words "Agerin, Nagerin, Vagerin, Jagerin, Ipagerin, Sipia" on a piece of paper using a new pen, cut the paper into three small pieces, place the first piece onto the tooth in the evening and in the morning spit the piece into the fire. This should then be repeated with the other pieces.[20] Another charm used for helping a woman who is having a difficult labour says to take two white lily roots and give them to the mother to eat.[20]

There is an old idea that it was "Klok gumma" who often fell victim to the Witch Trials in the 17th century, but this does not appear to be true. However, some "wise women" and "wise men" were punished, not for witchcraft but often under the indictment point of "superstition" (Swedish: Vidskepelse).[16] In the 1670s, the wise man Johan Eriksson of Knutby was sentenced to seven gauntlet for "superstition", and again in the 1680s to nine.[16] Per Ericsson of Dalarna, who read the diseases in wine, was punished both in 1720 and 1726.[16] Brita Biörn of Gotland said in court that she learned to heal the sick when she spent some time in the underworld, and she was sentenced to prison terms in both 1722 and 1737.[16] The punishment of Sweden's "cunning folk" only seemed to have the opposite effect. Ericsson said that his clients had been coming in greater numbers after the rulings against him, and that he would be forced to hide if he was to obey the court and refrain from his practice, and in the Biörn case, the vicar complained that people from throughout the country came to seek her help, and relied on her as a god after her first sentence.[16] The sentences, in reality, had the effect of good advertising, and Brita's daughter and granddaughter's daughter were also healing women.[16]

There are many examples of well-known "cunning folk" who were known far beyond their village boundaries, such as Ingeborg i Mjärhult in the 18th century and Kisamor and Gota-Lena in the 19th century. In the 16th century, Brigitta Andersdotter was often hired by Queen Margaret Leijonhufvud. In Norway some women such as Mor Sæther (1793–1851), Anna Brandfjeld (1810–1905) and Valborg Valland (1821–1903) achieved national fame, unusual for women of the time.[21]

The customs persisted well into the 20th century, until the medical doctor became more accessible to the public.[11][12] In the 19th century, every neighbourhood in Norway had at least one folk-healer.[21] Such beliefs in folk-medicine, magic, and the use of "black books" were taken by migrants to the Americas. However, many beliefs died out in Norwegian-American communities around the 1920s with many not having knowledge of the subject or of the "black book". Knowledge of these beliefs did last longer in Norway, even if they were not commonly believed in by Norwegians.[18]

Britain

Main article: Cunning folk in Britain

Diorama of a cunning woman in the Museum of Witchcraft and Magic

The term "cunning man" or "cunning woman" was mostly used in England and Wales[22] from the early modern era onwards. They were also called "wizards", "wise men", "wise women", "conjurers"[22] or in Welsh "dyn(es) hysbys" (knowing man or woman).[23] In Cornwall they were sometimes called "pellars", which some etymologists suggest originated from the term "expellers", referring to the practice of expelling evil spirits.[22] The term "white witch" was rarely used before the 20th century,[24] as a "witch" generally referred to an evil person.[25]

In the Middle Ages, those who worked magic in Anglo-Saxon England were referred to by several names.[26] Some of the spells and charms that had been used in Anglo-Saxon paganism continued to be used following Christianization. Historian Owen Davies noted, "although some such pre-Christian magic continued, to label it pagan is to misrepresent the people who used it and the context in which it was used."[27]

Some Christian clergy and secular authorities tried to smear the cunning folk by falsely branding them 'witches' and associating them with harmful 'witchcraft'.[28] However, there was no widespread persecution of them, largely because most common people firmly distinguished between the two: witches were seen as being harmful, and cunning folk as helpful.[29][30]

In the 15th and 16th centuries, there had been no attempt to ban the cunning craft, although private lawsuits had been brought against some cunning folk by clients who felt that they had been cheated out of their money. Under the Witchcraft Act 1541, a person could be executed for using magic or conjuration to harm others, to cast a love spell, or to find treasure.[31] This law was repealed no later than 1547, which Davies believes was due to those in power changing their opinion: they thought that either the death penalty was too harsh, or that magic was a moral issue that should be dealt with by the church rather than the state.[32]

For the following few decades, the magical practices of the cunning folk remained legal. In 1563, another law was passed against "Conjurations, Enchantments and Witchcrafts". This law was not as harsh as its predecessor, with the death penalty being reserved for those who were believed to have murdered someone by magical means.[33] This law had little effect on the cunning folk, as "the attention and focus of the courts shifted away from the activities of cunning-folk and towards the maleficium of supposed witches".[34] It was unusual for a cunning man or woman to be accused of witchcraft; in the county of Essex for instance, four hundred people had been put on trial for witchcraft, but only four of those were cunning folk.[35]

The Enlightenment saw a change in attitudes, especially amongst the educated elite. The 'Witchcraft Act 1735' repealed earlier laws against witchcraft. Unlike those laws, it did not accept the existence of magic or witches. Instead, anyone who claimed to use magic was to be punished as a swindler and could be imprisoned for one year.[36]

Germany

The belief in cunning folk and the use of "white magic" to be used for healing and as protection against "black magic" was once widespread in Germany;[37][38] however, during the early modern period such practices gradually became less accepted by the authorities, partly because the belief in "white magic" was viewed by the church authorities to be contrary to Biblical teachings and partly due to the loss of revenues for certain groups such as barber-surgeons and physicians, as was the case in Rothenburg ob der Tauber in which periodical action was taken against users of "white magic". The usual punishment was banishment rather than execution as was common for others convicted of witchcraft and the use of "black magic" [37]

In Germany practitioners of folk-magic were almost always female; however, by contrast the Hexenmeister (also a term for a warlock) or Hexenfinder[39] who hunted witches and "neutralised" them on behalf of society was always male.[40]

Ireland

Look up bean feasa in Wiktionary, the free dictionary.
In Ireland, names for the cunning folk in Irish include bean feasa ("wise woman"); banfháidh or fáidhbhean ("seeress");[41] or fear feasa ("wise man"). As in other countries, they provided services of magical healing, folk medicine, divination, and finding lost and stolen property.[42] It was believed they could cure illnesses in both humans and livestock that were caused by fairies or witches.[42] Their charms included a short rhyme or prayer referencing Jesus, Mary, or the saints. This was paired with a repetitive motion or ritual, and an object.[42] They also performed funeral tasks like preparing a body for a wake and keening over the body.[41] Gearoid Ó Crualaoich wrote that the bean feasa was also "an oracular authority for her community regarding the meaning and significance of experiences they fail to understand".[41][43] Biddy Early (1798–1872) was a famous Irish cunning-woman.[44][45]

Italy

The names used for cunning-folk in Italy vary from region to region, although such names include praticos (wise people), guaritori (healers), fattucchiere (fixers), donne che aiutano (women who help) and mago, maga or maghiardzha (sorcerers). At times, they were sometimes called streghe (witches), although usually only "behind their backs or by those who either are sceptical of their powers or believe they deal in black magic."[46] Unlike in other parts of Europe, such as Britain, the cunning profession survived the 20th century and into the early 21st, allowing Italian-American sociologist Sabina Magliocco to make a brief study of them (2009).[47]

As in the rest of Europe, the primary role of the Italian cunning-folk was apparently in healing, both through the use of herbs and through spiritual healing. The former required knowledge about various plants and herbs on the behalf of the cunning-person, although the spiritual healing was believed to come from an inner power, known as la forza (power), la virtù (virtue) or il Segno (the sign).[48] Such healing was often in the form of removing the malocchio, or evil eye, which had cursed someone.[49]

Italian cunning craft was, and continued to remain rooted in the country's Roman Catholicism, which is evident from the use of charms and prayers, which often call upon the aid of saints.[50] Such magical practitioners also widely believed that they dealt with spirit beings, both benevolent (who would aid them) and malevolent (whom they would have to combat). The latter included the unquiet dead as well as supernatural witches who were believed to cause harm to people, whilst the former included ancestors, the helpful dead and saints, who could help defeat these malevolent entities.[51] Magical tools were also utilised by Italian cunning-folk, and whilst these varied between both regions and practitioners, these commonly include fiber ropes or cords to bind, knives or scissors to cut away illness, and mirrors and weapons to reflect or scare away malevolent spirits.[52]

In Italy, the folk-healing tradition known as Segnature is practised by rural segnatori and segnatrici, who employ ritual gestures - “signs” - alongside secret prayers to cure illness, remove curses such as the malocchio (evil eye), and influence natural phenomena. Drawing on oral transmission within families and community networks, Segnature exemplifies an enduring vernacular healing system rooted in pre-Christian animism but syncretised with Catholic symbolism. In her 2024 monograph Italian Witchcraft and Shamanism: The Tradition of Segnature, Indigenous and Trans-cultural Shamanic Traditions in Italy, Dr Angela Puca presents extensive ethnographic research demonstrating how these practices constitute a living form of indigenous Italian shamanism—systematised through gestures, verbal formulas, and initiation, and are experiencing renewed visibility through social media and contemporary spiritual frameworks. This positions Segnature as a coherent strand within Italy's cunning folk tradition, bridging folk Catholicism, ancestral healing, and modern esoteric sensibilities.[53][54]

Eastern Europe

Main article: Zagovory

Zagovory—the use of verbal incantations—arose from Slavic pagan prayers and incantations, whether spoken, whispered or sung. These incantations have been traditionally accompanied by associated rituals, some of which are, or were, physically demanding and strenuous. One example calls for the zagovory practitioner to have either a full set of teeth, or a knife as a symbolic substitute for teeth that were missing.[55]

The traditions survived into the Christian era, largely through a process of syncretism and Christianization of the traditional rites, in which images of, and lore about, Jesus were added to the existing traditions. For instance, a healing would now be done in the name of Jesus, citing a story from the Bible.[56][57]

Societal concern about the practice of witchcraft centered on whether someone was using incantations or rites to cause harm.[58] In one case of suspected witchcraft, investigators found a locked box containing something bundled in a kerchief and three paper packets, wrapped and tied, containing crushed grasses.[58] People in Russian and Ukrainian societies usually shunned those said to be witches, unless they felt they needed help against supernatural forces. Impotence, stomach pains, barrenness, hernias, abscesses, epileptic seizures, and convulsions were all attributed to evil (or witchcraft).[59] In Russia, three quarters of those accused of witchcraft were men.[58]

American

North and South America have had their own variants of these, which had taken on aspects of African and Native culture. While most of Latin America also uses Curandero/

Curandera, Appalachia had the Mountain Witches,[60] possibly taking their name from an attempt to label similar practices amongst the Amish as Witchcraft to persecute German immigrants in Appalachia in the 1700s. The Amish practitioners are generally referred to as Braucherei, and the concept is known to them as Pow-wow.[61] The Creole also have their own, Traiteurs.[62] Among the Gullah-Geechee of the Carolinas is a folk healing tradition within the Hoodoo religion known as rootwork that is a combination of African, Native and European beliefs. Such folk healers there are known as Conjure Doctors or Root Doctors. Archaeological discoveries also show folk magic being practiced amongst the English colonists, with archaeological discoveries of magical talismans such as Witch Bottles,[63] the tradition appearing to have continued up to, at least, the Civil War. All of the above traditional forms of folk magic practitioners continued within their respective communities into the 20th century, with many practices still alive and well.

Nāga

A nāga couple, featured as a Chennakeshava Temple relief

Devanagari	नाग
Venerated in	Hinduism, Buddhism
Abode	Patala
Texts	Mahabharata, Puranas

In various Asian religious traditions, the Nāgas (Sanskrit: नाग, romanized: Nāga)[1] are a divine, or semi-divine, race of half-human, half-serpent beings that reside in the netherworld (Patala), and can occasionally take human or part-human form, or are so depicted in art. Furthermore, nāgas are also known as dragons and water spirits. A female nāga is called a Nagini (Hindi: Nagin). According to legend, they are the children of the sage Kashyapa and Kadru. Rituals devoted to these supernatural beings have been taking place throughout South Asia for at least 2,000 years.[2] They are principally depicted in three forms: as entirely human with snakes on the heads and necks, as common serpents, or as half-human, half-snake beings in Hinduism and Buddhism.

Nagaraja is the title given to the king of the nāgas.[3] Narratives of these beings hold cultural significance in the mythological traditions of many South Asian and Southeast Asian cultures, and within Hinduism and Buddhism. Communities such as the Nagavamshi, Khmer and Sri Lankan Tamils claim descent from this race.

Etymology

Wikispecies has information related to Naja naja.
In Sanskrit, a nāgá (नाग) is a snake, most often depicted by the Indian cobra (Naja naja). A synonym for nāgá is phaṇin (फणिन्). There are several words for "snake" in general, and one of the very commonly used ones is sarpá (सर्प). Sometimes the word nāgá is also used generically to mean "snake".[4] The word is cognate with English 'snake', Germanic: *snēk-a-, Proto-IE: *(s)nēg-o- (with s-mobile).[5]

Alternatively, an Indo-European etymology as a "hairless, naked animal"—cognate to English "naked"—would explain that the Sanskrit word nāga can also mean "cloud", "mountain" or "elephant".[6]

Hinduism

Patanjali as Śeṣa.
Nāgas, as a serpent-shaped group of deities that often take form as cobras, are prominent in Hindu iconography, throughout Hindu texts (especially in the first book of the Mahābhārata) and in local folk traditions of worship.[7] In some regions of the Himalaya, nāgas are regarded as the divine rulers of the region — for example, in Kullu Valley, in Berinag and in the valley of the Pindar River, which is believed to be ruled by the ninefold Naiṇī Devī. Both in the Nilamata Purana of Kashmir and in the Swayambhu Purana of Kathmandu, the respective region begins its history as a lake, populated by nāgas, which is later drained.[8]

Ancient Sanskrit texts such as the Mahabharata, the Ramayana, and the Puranas describe the nāgas as a powerful, splendid and proud semi-divine species that can assume their physical form either as human (often with a halo of cobra hoods behind their head), as a partially human serpent, or as a whole serpent. Their domain is in the enchanted underworld, the underground realm filled with gems, gold and other earthly treasures called Naga-loka or Patala-loka. They are also often associated with bodies of waters—including rivers, lakes, seas, and wells—and are guardians of treasure.[9] Their power and venom make them potentially dangerous to humans. However, in Hindu mythology, they often take the role of benevolent protagonists: in the Samudra Manthana, Vasuki, a nagaraja who abides on Shiva's neck, became the churning rope for churning of the Ocean of Milk.[10] Their eternal archrival is the Garuḍa, the legendary semi-divine bird-like deity.[11]

Vishnu is originally portrayed in the form sheltered by Sheshanāga or reclining on Shesha, but the iconography has been extended to other deities as well. The serpent is a common feature in Ganesha iconography, and appears in many forms: around the neck,[12] use as a sacred thread (Sanskrit: yajñopavīta)[13] wrapped around the stomach as a belt, held in a hand, coiled at the ankles, or as a throne.[14] Shiva is often shown garlanded with a snake.[15] Maehle (2006: p. 297) states that "Patanjali is thought to be a manifestation of the serpent of eternity".

Folk traditions

In South India, termite hills are believed to be the dwelling place of female nagammas,[16][17][18] whereas Himalayan Nags and Naginis, such as Naiṇī Devī of Pindar Valley, are worshipped as underworld beings protecting water resources and the wellbeing of village and valley.[19][20]

Literature

See also: Shesha, Vasuki, and Manasa

The Mahabharata epic is the first text that introduces nāgas; it describes them in detail and narrates their stories.[21] The cosmic snake Shesha, the nagarajas (nāga kings) Vasuki, Takshaka, Airavata and Karkotaka, and the princess Ulupi, are all depicted in the Mahabharata.

The Brahma Purana describes the reign of Adishesha as the king of the serpents in Patala:[22]

> During the night the light of the moon is not utilised for its coolness but only for illumination.
>
> Since that passes away is not taken notice of by the nāgas who enjoy with gaiety the foodstuffs and the edibles they consume and the great beverages they drink. Nor are Danujas and others aware of it.
>
> O brahmins, the forests, rivers, lakes, and lotus ponds, the cooing of the cuckoo and other sweet birds, the pleasing skies, the unguents and the continuous notes and sounds of musical instruments such as the lute, flute and Mṛdaṅga drums, O brahmins—all these and other beautiful things are enjoyed by virtue of their good luck by Dānavas, Daityas and Nāgas residing in Pātāla. The Tāmasī form of Viṣṇu, named Śeṣa is beneath the lower regions.
>
> Daityas and Dānavas are not capable of recounting his good qualities. He is honoured by Devas and celestial sages. He is spoken of as Ananta. He has a thousand hoods and he is clearly bedecked in Svastika ornaments devoid of impurities. He illuminates all quarters by thousand jewels on his hoods.
>
> —Brahma Purana, Chapter 19

The Kamba Ramayana describes the role of Vasuki in the Samudra Manthana:[23]

> The devas and the asuras decided to get Amṛta (Ambrosia—the celestial honey of immortalily) by churning the sea of milk. The Devas went to bring Mandara-mountain, to

be used as the churning rod. Their attempt was futile. The asuras made a trial with the same result. The Bhūtagaṇas (Guards) of Śiva also made a vain attempt. On the instruction of Viṣṇu, Garuḍa went and brought the mountain as easily as an eagle takes away a frog. Now Vāsuki should be brought. The Devas and Gandharvas failed in that attempt also. Garuḍa who was haughty of his strength and speed, went to the city of the nāgas (serpents) and requested Vāsuki to come to the sea of Milk. Vāsuki replied that if the matter was so urgent he had no objection for being carried to that place. He took the middle part of Vāsuki in his beak and flew up higher and higher and reached beyond the horizon. Still the lower half of Vāsuki was lying on the ground. So he took Vāsuki in his beak as folded in two. Still the result was the same. Garuḍa became aware of the impossibility of carrying Vāsuki and returned, ashamed and disappointed. Viṣṇu rebuked him for his arrogance. After this, Śiva stretched his hand to Pātāla. Vāsuki became a small bangle on that hand. Thus Vāsuki was brought to the shore of the sea of Milk.

—Kambar, Ramayana, Yuddha Kanda
The Devi Bhagavata Purana describes the legend of Manasa:[24]

Manasā is the mind-born daughter of Maharṣi Kaśyapa; hence she is named Manasā; or it may be She who plays with the mind is Manasā. Or it may be She who meditates on God with her mind and gets rapture in Her meditation of God is named Manasā. She finds pleasure in Her Own Self, the great devotee of Viṣṇu, a Siddha Yoginī. For three Yugas She worshipped Śrī Kṛṣṇa and then She became a Siddha Yoginī. Śrī Kṛṣṇa, the Lord of the Gopīs, seeing the body of Manasā lean and thin due to austerities, or seeing her worn out like the Muni Jarat Kāru called her by the name of Jarat Kāru. Hence Her name has come also to be Jarat Kāru. Kṛṣṇa, the Ocean of Mercy, gave her out of kindness, Her desired boon; She worshipped Him and Śrī Kṛṣṇa also worshipped Her. Devī Manasā is known in the Heavens, in the abode of the Nāgas (serpents), in earth, in Brahmāloka, in all the worlds as of very fair colour, beautiful and charming. She is named Jagad Gaurī as she is of a very fair colour in the world. Her other name is Śaivī and she is the disciple of Śiva. She is named Vaiṣṇavī as she is greatly devoted to Viṣṇu. She saved the Nāgas in the Snake Sacrifice performed by Pariksit, she is named Nageśvarī and Nāga Bhaginī and She is capable to destroy the effects of poison. She is called Viṣahari. She got the Siddha yoga from Mahādeva; hence She is named Siddha Yoginī

—Devi Bhagavata Purana, Chapter 47
Buddhism

Mucalinda sheltering Gautama Buddha (Buddha in Naga Prok attitude) at Wat Phra That Doi Suthep in Chiang Mai, Thailand.
As in Hinduism, the Buddhist nāga generally has sometimes been portrayed as a human being with a snake or dragon extending over his head.[25] One nāga, in human form, attempted to become a monk, and when telling it that such ordination was impossible, the Buddha told it how to ensure that it would be reborn a human, and so

able to become a monk.[26]

The nāgas are believed to both live on Nagaloka, among the other minor deities and in various parts of the human-inhabited earth. Some of them are water-dwellers, living in streams or the ocean; others are earth-dwellers, living in caverns.

The nāgas are the followers of Virūpākṣa (Pāli: Virūpakkha), one of the Four Heavenly Kings who guards the western direction. They act as guards upon Mount Sumeru, protecting the dēvas of Trāyastriṃśa from attacks by the asuras.

Among the notable nāgas of Buddhist tradition is Mucalinda, nagaraja and protector of the Buddha. In the Vinaya Sutra (I, 3), shortly after his enlightenment, the Buddha is meditating in a forest when a great storm arises, but graciously, King Mucalinda gives shelter to the Buddha from the storm by covering the Buddha's head with his seven snake heads.[27] Then the king takes the form of a young Brahmin and renders the Buddha homage.[27]

In the Vajrayāna and Mahāsiddha traditions,[28] nāgas in their half-human form are depicted holding a nāgas-jewel, kumbhas of amrita, or a terma that had been elementally encoded by adepts. In Tibetan Buddhism, nāgas are known as klu or klu-mo and they are associated with water and cleanliness, as they live in oceans, rivers, lakes, and springs, and do not want their environments to be disturbed or polluted.[29]

The two chief disciples of the Buddha, Sariputta and Moggallāna are both referred to as Mahānāga or "Great nāga".[30] Some of the most important figures in Buddhist history symbolize nāgas in their names such as Dignāga, Nāgāsēna, and, although other etymons are assigned to his name, Nāgārjuna.

Literature

Nāga at the steps of a building in the Wat Phra Kaew in Bangkok.
The Nāga Saṃyutta of the Pali Canon consists of suttas specifically devoted to explaining nature of the nāgas.

In the "Devadatta" chapter of the Lotus Sutra, the daughter of the dragon king, an eight year old longnü (龍女, nāgakanyā), after listening to Mañjuśrī preach the Lotus Sutra, transforms into a male Bodhisattva and immediately reaches full enlightenment.[31][32][33] Some say this tale appears to reinforce the viewpoint prevalent in Mahayana scriptures that a male body is required for Buddhahood, even if a being is so advanced in realization that they can magically transform their body at will and demonstrate the emptiness of the physical form itself.[34] However, many schools of Buddhism and classical, seminal Chinese exegeses interpret the story to repudiate this viewpoint, stating the story demonstrates that women can attain Buddhahood in their current form.[31]

According to tradition, the Prajñapāramita sutras had been given by the Buddha to a great nāga who guarded them in the sea, and were conferred upon Nāgārjuna later.[35][36]

In Tibetan Buddhist literature, nāgas are portrayed as guardians or owners of submerged treasure, which can be mere wealth or supernatural, "spiritual" treasures.[29]

Other traditions

In Thailand and Java, the nāga is a wealthy underworld deity. For Malay sailors, nāgas are a type of dragon with many heads. In Laos they are beaked water serpents.[citation needed] In Tibet, they are said to be found in waterways and underground locations, and are susceptible to the suffering caused by human carelessness towards the natural environment.

Sri Lanka

A granite nagaraja guardstone from Sri Lanka.

The Naga people were believed to be an ancient tribe and origins of Sri Lanka.[37][38][note 1] According to V. Kanakasabhai, the Oliyar, Parathavar, Maravar, and Eyinar, who were widespread across South India and North-East Sri Lanka, are all Naga tribes.[41] There are references to them in several ancient texts such as Mahavamsa, Manimekalai, and also in other Sanskrit and Pali literature. They are generally represented as a class of superhumans taking the form of serpents who inhabit a subterranean world. Texts such as Manimekalai represent them as persons in human form.[42][note 2]

Cambodia

Nāga statue front of Angkor Wat in Siem Reap province.

Cambodian seven-headed nāga at the Royal Palace in Phnom Penh.

Stories of nāgas (Khmer: នាគ, néak) have been part of Khmer society for thousands of years, dating back to the Funan era (នគរភ្នំ). According to reports from two Chinese envoys, Kang Tai and Zhu Ying, the state of Funan was established in the 1st century CE when an Indian prince named Kaundinya I (កៅណ្ឌិន្យទី១) married a nāga princess named Soma (សោមាកូនព្រះចន្ទ saôma kon preah chan; "Soma, daughter of the moon god"; Chinese: 柳葉, 柳叶 Liuye; "Willow Leaf"). The couple is symbolized in the story of Preah Thong and Neang Neak. As the legend goes, Kaundinya received instruction in a dream to take a magic bow from a temple and defeat Soma, the nāga princess and daughter of the nāga king. During the ensuing battle, they fell in love and later married, establishing the royal lineage of the Funan dynasty. Kaundinya subsequently constructed the capital city of Vyadhapura, and the kingdom became known as Kambujadeśa or Cambodia (កម្ពុជា, Kampuchea).[43][44][45] The love story between Kaundinya and Soma is the foundation for many standard practices in modern-day Khmer culture, including wedding ceremonies and other rituals.[46][47] The Khmer people regard themselves as descendants of the nāgas and many still believe the nāga exist today, destined to one day return and restore prosperity to their people.[citation needed]

Although wars, nature, and the passage of time destroyed many temples from the Funan era, nāgas can still be seen in ancient temples dating to the Chenla and Angkor eras. For instance, the temple now called "The Coiled Nāgas Temple" (ប្រាសាទនាគព័ន្ធ, Prasat Neak Poan) was previously named, "Emperor's Wealth Temple" (ប្រាសាទរាជ្យស្រី Prasat Reach Srey).[48]

In Khmer culture, nāgas symbolize rain, and represent a bridge between the mortal realm (ឋានមនុស្ស) and the realm of devas (Heaven; ឋានទេវតា/ឋានសួគ៌). They have the ability to transform into half or fully human and act as protectors against invisible forces, deities, or malicious intentions. Furthermore, Cambodian nāgas possess numerological symbolism based on the number of their heads. Odd-headed nāgas embody masculinity, infinity, timelessness, and immortality, since all odd numbers derives from the number one (១). Even-headed nāgas denote femininity, physicality, mortality, temporality, and the Earth. Odd headed nāgas are believed to represent immortality and are carved and used throughout Cambodia.[49][50]

Odd-headed nāga

icon
This section does not cite any sources. Please help improve this section by adding citations to reliable sources. Unsourced material may be challenged and removed. (September 2024) (Learn how and when to remove this message)

1-headed nāga
Mostly seen in modern days, carved on objects for protection in temples, monasteries, king's places and residences of deity (អទិទេព). They symbolize that even if everything in this world is gone, there's still this nāga left bringing victory and happiness to all.

3-headed, Kalyak
Born between the mortal and divine realms, they live at the bottom of the ocean as guardians of wealth, often depicted as evil (nothing to do with the symbolism). They symbolize the Hindu Trimurti; (left Vishnu, middle Shiva, right Brahma) and the three realms - heaven (devas' realm), earth (mortal realm), and hell (norok realm). In Buddhism, the central head represents Buddha, the right Dharma and the left the monks.

5-headed Anontak/Sesak
Born from the earthly elements, they are immortals. They symbolize the 5 directions;

East, West, North, South and Middle (Ganga river, Indus river, Yamuna river, Brahmaputra river (Brahma's Son River), Sarasvati river). In Buddhism, the 5 heads represent the 5 Buddhas - Kadabak, Kunsontho, Koneakumno, Samnak Koudom Gautama Buddha, and Seare Metrey.

7-headed Muchlentak

Originated from the Himalayas, they bring peace and prosperity to humans. They control the seven oceans and seven mountains called 'Seytontaraksatakboriphorn.' Sheltered Gautama Buddha for 7 days and 7 nights (Mucalinda). Often depicted as guardian statues, carved as balustrades on causeways leading to main temples, such as those found in Angkor Wat.[50] They also represent the seven races within nāga society, which has a mythological, or symbolic, association with "the seven colors of the rainbow." They symbolize the Sun, the Moon and five other planets; ចន្ទ (Moon)[also Monday] អង្គារ (Mars)[Tuesday] ពុធ (Mercury)[Wednesday] ព្រហស្បតិ៍ (Jupiter)[Thursday] សុក្រ (Venus)[Friday] សៅរ៍ (Saturn)[Saturday] អាទិត្យ (Sun)[Sunday].

9-headed Vasukak

The king who rules the Earth (Vasuki). When carved on both sides, the front heads represent reincarnation and behind represent death. He symbolizes the power of the nine immortals of the universe - power of the lightning and thunder of the East (ទិសបូព៌ា), power of the fire of the Southeast (ទិសអាគ្នេយ៍), power of the law and order of the South (ទិសខាងត្បូង), power of the spirits and demonic creatures of the Southwest (ទិសនារតី), power of the rain of the West (ទិសខាងលិច), power of the wind of the Northwest (ទិសពាយព្យ), power of the wealth and aesthetic of the North (ទិសឧត្តរ), power of destruction of the Northeast (ទិសឥសាន្ត), power of Brahma (creation and preservation) in the middle (កណ្តាល).

In Indian origin religions, there are four different nāga races:

Primitive Dragons such as the European dragon who can spit fire.

The Spiritual Dragons who are the guardians of wealth, protecting treasure in the ocean. They can take on a half human form.

The Divine Nāgas, who can travel to heaven, came from Lord Indra's realm (the divine realm). They can take on a full human form.

The Supreme and Divine Nāgas, like Vasuki the follower of Lord Shiva, who alone can fight the entire Garuḍa race.

All of them have great powers and can set off storms, rain, tempest and create lands from the sea.

Indonesia

Crowned golden nāga-woodcarving at Keraton Yogyakarta, Java.

In Javanese, Sundanese, and Balinese culture, Indonesia, a nāga is depicted as a crowned, giant, magical serpent, sometimes winged. It is similarly derived from the Shiva-Hinduism tradition, merged with Javanese animism. The nāga in Indonesia mainly derived and influenced by Indic tradition, combined with the native animism tradition of sacred serpents. In Sanskrit, the term nāga literally means snake, but in Java it normally refer to serpent deity, associated with water and fertility. In Borobudur, the nāgas are depicted in their human form, but elsewhere they are depicted in animal shape.[51]

Early depictions of circa-9th-century Central Java closely resembled Indic nāga which was based on imagery of cobras. During this period, nāga-serpents were depicted as giant cobras supporting the waterspout of yoni-lingam. The examples of nāga-sculpture can be found in several Javanese candis, including Prambanan, Sambisari, Ijo, and Jawi. In East Java, the Penataran temple complex contain a Candi Nāga, an unusual nāga-temple with its Hindu-Javanese caryatids holding corpulent nāgas aloft.[52]

Crowned nāga flanked the stairs entrance of Pura Jagatkarta.

The later depiction since the 15th century, however, was slightly influenced by Chinese dragon imagery—although unlike its Chinese counterparts, Javanese and Balinese nāgas do not have legs. Nāga as the lesser deity of earth and water is prevalent in the Hindu period of Indonesia, before the introduction of Islam.

In Balinese tradition, nāgas are often depicted battling garuḍas. Intricately carved nāgas are found as stairs railings in bridges or stairs, such as those found in Balinese temples, Ubud monkey forest, and Taman Sari in Yogyakarta.

In a wayang theater story, a snake-like god (nāga) named Sanghyang Anantaboga or Antaboga is a guardian deity in the bowels of the earth.[53][54] nāgas symbolize the nether realm of earth or underworld.

Laos

Photograph, widely circulated in Laos, purporting to show American sailors in the Vietnam War, who caught a "Mekong Dragon" in Laos. In reality, the image shows a Russell's oarfish (Regalecus russelii) caught near San Diego, California in 1996.

The Nāga (Lao: ພະຍານາກ) is believed to live in the Laotian stretch of the Mekong or its estuaries. Lao mythology maintains that the nāgas are the protectors of Vientiane, and by extension, the Lao state. The association with nāgas was most clearly articulated during and immediately after the reign of Anouvong. An important poem from this period San Leupphasun (Lao: ສານລຶພສູນ) discusses relations between Laos and Thailand in a veiled manner, using the Nāga and the Garuḍa to represent the Lao and the Thai, respectively.[55] The Nāga is incorporated extensively into Lao iconography, and features prominently in Lao culture throughout the length of the country, not only in Vientiane.

Thailand

Phaya Nak or Phaya Nāga (Thai: พญานาค; RTGS: phaya nak; lit. 'lord of Nāga', phaya derived from Mon which mean high nobility) or Nakkharat (Thai: นาคราช; lit. 'king of

Nāga') in Thai beliefs, nāgas are considered the patrons of water. Nāgas are believed to live in either water bodies or in caves. According to a popular legend, the Mekong River in north-eastern Thailand and Laos was said to be created by two Nāga kings slithering through the area, thus creating the Mekong and the nearby Nan River. The Mekong is synonymous with the unexplained fireballs phenomenon which has long been believed to be created by the nāgas that dwell in the river.[56][57] Common explanations of their sightings have been attributed to oarfish, elongated fish with red crests; however, these are exclusively marine and usually live at great depths.[58]

In November 2022, the Thai government declared the nāga as the national symbol of Thailand, with the aim of promoting Thai culture and traditions and increasing the country's cultural capital to drive the creative economy. The nāga is a mythical creature with long-standing beliefs and connections to the Thai people, and its designation as a national symbol is a significant step towards preserving and promoting Thai culture. The National Culture Commission and the Fine Arts Department developed a prototype image of the nāga that accurately represents Thai beliefs and traditions related to the creature. The prototype image features the four families of nāgas, each with its unique color, and the largest nāga, Nak Vasuki (Thai: นาควาสุกรี), who is related to Buddhism and the Thai monarchy, The nāga is also believed to be a symbol of water and fertility and serves as a guardian of Buddhism.[59][60][61]

Due to the strong relation with everything water, the Nāga in Thai belief also plays a role in rain control. The concept of Nak hai nam (Thai: นาคให้น้ำ; lit. Nāga granting water) is used for annual rainfall prediction. It is still practiced nowadays, most notably during the Royal Ploughing Ceremony. The oracle ranges from 1 nak hai nam (1 Nāga granted water); meaning that abundant rainfall should be observed that year, to maximum 7 nak hai nam (7 nagas granted water); meaning there might not be adequate rainfall that year.[62]

In northern Thailand, the Singhanavati Kingdom had a strong connection with nāgas. The kingdom was believed to be built with aids of nāgas, and thus, nāgas were highly revered by the royal family. The kingdom, for a period of time, was renamed Yonok Nāga Rāj (lit. Yonok the nagaraja)[63]

The nāgas are also highly revered. The Buddhist temples and palaces are often adorned with various nāgas. The term Nāga is also present in various Thai architecture terms including the nak sadung (นาคสะดุ้ง, the outer roof finial component featuring Nāga-like structure), and the nak than (นาคทันต์, the corbel with Nāga-shape).[64] Moreover, nāgas are sometimes linked to medicine. The nāga Vasuki is present in the legend of the Samudra Manthana, in which Dhanvantari (god of Ayurveda) and amrita (the elixir of eternal life) were churned from the Ocean of Milk. The nāgas can also be founded substituting the snakes in either Rod of Asclepius or mistakenly Caduceus of several medical institutions' symbols. The former seal of Faculty of Medicine, Srinakharinwirot University, and the seal of Society of Medical Student Thailand are some notable examples using the Caduceus with nagas' presence instead of snakes.[65]

Folklore

Thai folklore holds the Phaya nāgas to be demi-god creatures, which possess supernatural powers as has been described in Buddhist and Hindu cosmology.[66] The "Kamchanod Forest" (ป่าคำชะโนด; RTGS: Pa Khamchanot) Ban Dung district, Udon Thani province, which is held in high reverence and fear across Thailand, is believed to be the crossroads between the human world and the netherworld, and is frequently depicted in Thai folklore as the site of many hauntings, but more frequently is considered to be the home of the nāga.[67]

According to Shan folklore of Nánzhào Kingdom (now southern China and Southeast Asia during the 8th and 9th centuries, which was centered on present-day Yúnnán in China), the nāga inhabited the Ěrhǎi lake and is the creator of the Mekong.[66] In China, the nāga (Chinese: 那伽) is generally more considered to be a dragon.

Appearance

Many people, particularly in Isan (the north-eastern region of Thailand), believe that the nāgas are responsible for unnatural wave phenomena occurring in the rivers or lakes in the vicinity. It is also frequently claimed that the serpent-like demigods are responsible for marks on common objects, such as car hoods or house walls.[57]

A police officer has also claimed to be in contact with the nāga, although the implications of this contact is not thoroughly explained.[68]

In attempts to explain these phenomena, scientists and researchers at the Faculty of Science of Chulalongkorn University have attributed these seemingly preternatural phenomena to standing waves in water, and posit that the existence of the Phaya Nāga is similar to belief in Loch Ness Monster in Scotland or Ogopogo in Canada, and further maintain that the serpent-like tracks of the Phaya Nāga are very possibly forged by humans.[69]

Malaysia

Further information: Lake Chini

In Malay and Orang Asli traditions, the lake Chini, located in Pahang is home to a nāga called Sri Gumum. Depending on legend versions, her predecessor Sri Pahang or her son left the lake and later fought a nāga called Sri Kemboja. Kemboja is the Malay name for Cambodia. Like the nāga-legends there, there are stories about an ancient empire in lake Chini, although the stories are not linked to the nāga-legends.[70][71]

Philippines

Main article: Bakunawa

Bakunawa hilt from a Visayan (Panay) tenegre sword.

The indigenous Bakunawa, a serpent-like moon-eating creature in Philippine mythology, was syncretized with the nāga. It is believed to be the cause of eclipses, earthquakes, rains, and wind.[72] The movements of the bakunawa served as a geomantic calendar system for ancient Filipinos and were part of the shamanistic rituals of the babaylan. It is usually depicted with a characteristically looped tail and was variously believed to inhabit either the sea, the sky, or the underworld.[73] However, the bakunawa may have also syncretized with the Hindu deities, Rahu and Ketu, the navagraha of eclipses.[74]

Examples

Shesha, on whom Vishnu is in yoga nidra (Anantashayana)[75]
Antaboga, the world serpent in Javanese and Balinese mythology of Indonesia, who created the World Turtle Bedawang, on whose back the world resides
Apalala, Nāga in Buddhist mythology
Bakunawa, a dragon in Philippine mythology that is often represented as a gigantic sea serpent. Nāgas are also present in Kapampangan polytheistic beliefs, such as Lakandanum. (See Deities of Philippine mythology.)
Kaliya, a snake conquered by Krishna
Karkotaka, a nāga king in Indian mythology who controls weather, that lived in a forest near Nishadha Kingdom and stung Nala at the request of Indra
Paravataksha, his sword causes earthquakes and his roar caused thunder.
Manasa, the Hindu goddess of nāgas and curer of snake-bite and sister of Vasuki
Mucalinda, a nāga in Buddhism who protected the Gautama Buddha from the elements

after his enlightenment
Naga Seri Gumum, who lives in Tasik Chini, a freshwater lake in Pahang, Malaysia
Padmavati, the Nāgī queen & companion of Dharanendra
Shwe Nabay (Naga Medaw), a goddess or a Nat spirit in Burmese animistic mythology, who is believed to have married a nāga and died from heartbreak after he left her
Takshaka, the king of the nāgas, and ruler of Khandava forest
Ulupi, a wife of Arjuna in the epic Mahabharata
Vasuki, the king of nāgas and who coils over Shiva's neck[76] and offered to serve as the rope to pull Mount Mandara in the Samudra Manthana (Churning of the Ocean of Milk) to release the amrita (nectar of the immortality).
Yulong, the Dragon King of the West Sea in the Chinese classical novel Journey to the West, becomes a nāga after completing his journey with Xuanzang

Film and television
A 4-headed Naga symbol and characters were part of the Leviathan story arc in the 1969 season of the gothic television soap opera Dark Shadows.
Several Bollywood films have been made about female nāgas, including Nagin (1954), Nagin (1976), Nagina (1986), Nigahen (1989), Jaani Dushman: Ek Anokhi Kahani (2002), and Hisss (2010). Nāga also appear in television series such as Naaginn (2007-2009), Naagin (2015) and Adhuri Kahaani Hamari (2015-2016).
In the 1998 film Jungle Boy, the Naga is depicted as a large cobra deity that grants the gift of understanding all languages to those who are pure of heart and punishes those who are not pure of heart in different ways.
In the 1999 Telugu film Devi, a Nagini played by Prema comes to Earth to protect a woman who saves her when she was in the snake form. She eventually falls in love with a human.
The Nagas are antagonists in the cartoon The Secret Saturdays. They served the ancient Sumerian cryptid Kur and attempted to push Zak Saturday into the dark side after learning that he was Kur reincarnated, but eventually served V. V. Argost when he gained his own Kur powers.
Many lakorn (Thai television soap operas) are based on a Phaya Naga legend, such as Poot Mae Nam Khong (ภูติแม่น้ำโขง) in 2008,[77] Manisawat (มณีสวาท) in 2013,[78] or Nakee (นาคี) in 2016.[79]
A search for the Phaya Naga was featured in a Destination Truth episode on the SyFy (formerly Sci-Fi Channel) series in Series 01 (episode 02).[80]
The dragons in the 2021 film Raya and the Last Dragon are based on the Phaya Naga.
A serpent god named Nāga is featured in the 2021 animated film Batman: Soul of the Dragon.
They are featured Pakistani movies like Naag aur Nagin (2005)
Literature

Nāga are featured in The Silent Bells, the fourth book in N. D. Wilson's Ashtown Burials series.

The Japanese anime and manga series, Slayers (1989), has a principal character named Naga the Serpent (introduced in 1990).

In J. K. Rowling's Wizarding World, Nagini is one of Voldemort's horcruxes in the Harry Potter series and a Maledictus, a carrier of blood curse, in the 2018 film Fantastic Beasts: The Crimes of Grindlewald. Her curse allows her to change into a snake and back into a human, but her snake form eventually becomes permanent.

In the Xanth series by Piers Anthony, the Naga are a race of human-headed serpents that can transform between fully human and serpent forms, including any species and size of snake.

In The God in the Bowl, one of the original Conan the Barbarian stories by Robert E. Howard, the titular God is possibly a Nāga-like creature.

Games

“Naga” is name of a T1 battle cruiser in EVE Online . Shown as a long, thin hull, and used for long range attacks.

Nagas appear in the Dungeons & Dragons roleplaying game, depicted as massive serpents with human heads.

The Nagas appear in the multiple franchises by Blizzard Entertainment. In Warcraft, they are depicted as ancient night elves that have snake-like tails in place of legs, and have other serpentine or aquatic features such as scales and fins. The Nagas came to be when they were transformed from the ancient night elves by the Old Gods. Their queen Azshara is described as a demigoddess. The digital card game Hearthstone incorporated Naga as a minion type in its Battlegrounds game mode on May 10, 2022.[81]

Nagas also appear in The Battle for Wesnoth, and are depicted as a more snakelike counterpart to the merfolk, who are often their enemies.

Magic: The Gathering's 2014–2015 block, set on the plane of Tarkir, featured Naga as humanoid snakes versed in powerful venoms and poisons with two arms and no other appendages. They are aligned with the Sultai clan in the sets, Khans of Tarkir[82] and Fate Reforged,[83] and with the Silumgar clan in the Dragons of Tarkir[84] set.

Nagas are units in Heroes of Might and Magic III.

Gigabash features Rawa, a bipedal Phaya Naga inspired kaiju among its playable cast of creatures.

Explanatory notes

Kathiragesu Indrapala writes that "In the traditions preserved in the early Sri Lankan chronicles as well as in the early Tamil literary works the Nagas appear as a distinct group".[39] He further writes that "the adoption of the Tamil language was helping the Nagas in the Tamil chiefdoms to be assimilated into the major ethnic group there".[40]

In the Mahavamsa as indeed in the ancient Sanskrit and Pali literature in general, the nāgas are never represented as human beings, but as a class of superhuman beings, who inhabited a subterranean world.

The qilin (English: /tʃiˈlɪn/ chee-LIN; Chinese: 麒麟; pinyin: qílín) is a legendary hooved chimerical creature that appears in Chinese mythology, and is said to appear with the imminent arrival or death of a sage or illustrious ruler.[1] Qilin are a specific type of the lin mythological family of one-horned beasts. The qilin also appears in the mythologies of other Chinese-influenced cultures.

Origins

Qilin tomb guardian, 4th century CE

The earliest mention of the mythical qilin is in the poem 麟之趾; Lín zhī zhǐ; 'Feet of the Lin' included in the Classic of Poetry (11th – 7th c. BCE).[2][3]

麟之趾，振振公子，于嗟麟兮。
麟之定，振振公姓，于嗟麟兮。
麟之角，振振公族，于嗟麟兮。

Translation:
The feet of the Qilin, the noble sons of our lord. Ah, the Qilin!
The forehead of the Qilin, the noble kinsmen of our lord. Ah, the Qilin!
The horn of the Qilin, the noble clansmen of our lord. Ah, the Qilin!

—[4]

Spring and Autumn Annals mentioned that a lin (麟) was captured in the 14th year of Duke Ai of Lu (魯哀公) (481 CE); Zuo Zhuan credited Confucius with identifying the lin as such.[5][6][7]

The bisyllabic form qilin (麒麟 ~ 騏驎), which carries the same generic meaning as lin alone, is attested in works dated to the Warring States period (475–221 BCE).[citation needed] Qi denotes the male and lin denotes the female[8] according to Shuowen Jiezi.[9][10]

The legendary image of the qilin became associated with the image of the giraffe in the Ming dynasty.[11][12] The identification of the qilin with giraffes began after Zheng He's 15th-century voyage to East Africa (landing, among other places, in modern-day Somalia). The Ming Dynasty bought giraffes from the Somali merchants along with zebras, incense, and various other exotic animals.[13] Zheng He's fleet brought back two giraffes to Nanjing and they were mistaken by the emperor for the mythical creature. The identification of qilin with giraffes has had a lasting influence: even today, the same word is used for the mythical animal and the giraffe in both Korean and Japanese.[14]

A Ming-era painting of a tribute giraffe, which was thought to be a qilin by court officials, from Bengal
Axel Schuessler reconstructs Old Chinese pronunciation of 麒麟 as *gərin. Finnish linguist Juha Janhunen tentatively compares *gərin to an etymon reconstructed as *kalimV,[15] denoting "whale"; and represented in the language isolate Nivkh and four different language families Tungusic, Mongolic, Turkic and Samoyedic, wherein *kalay(ə)ng means "whale" (in Nenets) and *kalVyə "mammoth" (in Enets and Nganasan). As even aborigines "vaguely familiar with the underlying real animals" often confuse the whale, mammoth, and unicorn: they conceptualized the mammoth and whale as aquatic, as well as the mammoth and unicorn possessing a single horn; for inland populations, the extant whale "remains ... an abstraction, in this respect being no different from the extinct mammoth or the truly mythical unicorn." However, Janhunen cautiously remarks that "[t]he formal and semantic similarity between *kilin < *gilin ~ *gïlin 'unicorn' and *kalimV 'whale' (but also Samoyedic *kalay- 'mammoth') is sufficient to support, though perhaps not confirm, the hypothesis of an etymological connection", and also notes a possible connection between Old Chinese and Mongolian (*)kers ~ (*)keris ~ (*)kiris "rhinoceros" (Khalkha: хирс).[16]

Description

A Qing dynasty statue of a qilin in Beijing's Summer Palace
Qilin generally have Chinese dragon-like features: similar heads with antlers, eyes with thick eyelashes, manes that always flow upward, and beards. The body is fully or partially scaled and often shaped like an ox, deer, or horse, or more commonly a goat.[17][18] They are always shown with cloven hooves.[19] While dragons in China (and thus qilin) are also most commonly depicted as golden, qilin may be of any color or even various colors, and can be depicted as bejeweled or exhibiting a jewel-like brilliance.[20]

The qilin is depicted throughout a wide range of Chinese art, sometimes with parts of their bodies on fire.[19]

Legends tell that qilin have appeared in the garden of the legendary Yellow Emperor and in the capital of Emperor Yao; both events bore testimony to the benevolent nature of the rulers.[18] It has also been told that the birth of the great sage Confucius was foretold by the arrival of a qilin.[1]

Qilin as unicorns

One-horned beast depicted in ceramic model from Northern Wei period (386–534)
In modern times, the depictions of qilin have often fused with the Western concept of unicorns,[citation needed] and qilin (麒麟) is often translated into English as "unicorn". The Han dynasty dictionary Shuowen Jiezi describes qi as single-horned,[9] and it can sometimes be depicted as having a single horn. The translation, however, may be

misleading, as qilin can also be depicted as having two horns. In modern Chinese, "one-horned beast" (独角兽; 獨角獸; Dújiǎoshòu) is used for "unicorns". A number of different Chinese mythical creatures can be depicted with a single horn, and a qilin depicted with one horn may be called a "one-horned qilin" in Chinese.[citation needed]

Nevertheless, the mythical and etymological connections between the creatures have been noted by various cultural studies[14][15][16] and even the Chinese government, which has minted silver, gold, and platinum commemorative coins depicting both archetypal creatures.[21]

Other cultural representations

Japan

Kirin, which has also come to be used as the modern Japanese word for a giraffe, are similar to qilin. Japanese art tends to depict the kirin as more deer-like than in Chinese art. Alternatively, it is depicted as a dragon shaped like a deer, but with an ox's tail[22] instead of a lion's tail. They are also often portrayed as partially unicorn-like in appearance, but with a backwards curving horn.

Korea

Girin or kirin (기린) is the Korean form of qilin. It is described as a maned creature with the torso of a deer, an ox tail with the hooves of a horse. The girin were initially depicted as more deer-like, however over time they have transformed into more horse-like.[23] They were one of the four divine creatures along with the dragon, phoenix, and turtle. Girin were extensively used in Korean royal and Buddhist arts.

In modern Korean, the term "girin" is used for "giraffe".

Thailand

In Thailand, the qilin is known as "gilen" (Thai: กิเลน), and is a member of the pantheon of Thai Himapant forest mythical animals. It is most probable that the Gilen was introduced into the pantheon under the influence of the Tai Yai who came down from Southern China to settle in Siam in ancient times, and the legend was probably incorporated into the Himapant legends of Siam in this manner. The Gilen is a mixture of various animals which come from differing elemental environments, representing elemental magical forces present within each personified creature. Many of the Himapant animals actually represent gods and devas of the Celestial Realms, and bodhisattvas, who manifest as personifications which represent the true nature of each creature deity through the symbolism of the various body parts amalgamated into the design of the Mythical creature.[24]

In Phra Aphai Mani, the masterpiece epic poem of Sunthorn Phu, a renowned poet of the 18th century, there is a monster that is Sudsakorn's steed, one of the main characters in the epic. This creature was called "Ma Nin Mangkorn" (Thai: ม้านิลมังกร, "ceylonite dragon horse") and is depicted as having diamond fangs, ceylonite scales, and a birthmark on the tongue. It was a mixture of horse, dragon, deer antlers, fish scales, and Phaya Nak tail, and has black sequins all over. Its appearance resembles a qilin.[25]

Qilin Dance

The Qilin dance is traditionally performed by the Hakka people.[26][27] The Qilin is a mythical creature believed to symbolize good fortune, prosperity, and harmony,[28] and performers wear ornate Qilin costumes with vibrant colors and intricate details to resemble the mythical creature.[28]

The Qilin costume features a single horn in the middle, with finned ridges lined with fur.[26] The dance involves graceful and synchronized movements that mimic cats and tigers.[28] The performance routine typically tells of a Qilin exiting its lair, playfully move round, and looking for vegetable to eat. After eating from the vegetable, it spits it out, and it also spits a jade book, before moving around and returning back to its lair.[26]

The dance is accompanied by music played on traditional Chinese instruments, including drums, flutes, and cymbals.[27] Today, similar to the Chinese Lion and Dragon dances, the Qilin dance is commonly performed during important Chinese celebrations and festivals, such as Chinese New Year and weddings, it is also performed to preserve cultural traditions and enhance community cohesion.[26][27]

List of death deities

From Wikipedia, the free encyclopedia

"Death-worship" redirects here. For the fictional ideology, see Political geography of Nineteen Eighty-Four § Eastasia.

Yama, the Hindu god of death and justice, and Lord of Naraka (hell). He was subsequently adopted by Buddhist, Chinese, Tibetan, Korean, and Japanese mythology as the king of hell.

Maya death god "A" way as a hunter, Classic period

The mythology or religion of most cultures incorporate a god of death or, more frequently, a divine being closely associated with death, an afterlife, or an underworld. They are often amongst the most powerful and important entities in a given tradition, reflecting the fact that death, like birth, is central to the human experience. In religions where a single god is the primary object of worship, the representation of death is usually that god's antagonist, and the struggle between the two is central to the folklore of the culture. In such dualistic models, the primary deity usually represents good, and the death god embodies evil. Similarly, death worship is used as a derogatory term to accuse certain groups of morally abhorrent practices which set no value on human life. In monotheistic religions, death is commonly personified by an angel or demon standing in opposition to the god.

Occurrence

In polytheistic religions which have a complex system of deities governing various natural phenomena and aspects of human life, it is common to have a deity who is assigned the function of presiding over death. This deity may actually take the life of humans or, more commonly, simply rule over the afterlife in that particular belief system (a single religion may have separate deities performing both tasks). The deity in question may be good, evil, or neutral and simply doing their job, in sharp contrast to a lot of modern portrayals of death deities as all being inherently evil just because death is feared. Hades from Greek mythology is an especially common target. The inclusion of such a "departmental" deity of death in a religion's pantheon is not necessarily the same thing as the glorification of death.

A death deity has a good chance of being either male or female, unlike some functions that seem to steer towards one gender in particular, such as fertility and earth deities being female and storm deities being male. A single religion/mythology may have death gods of more than one gender existing at the same time and they may be envisioned as a married couple ruling over the afterlife together, as with the Aztecs, Greeks, and Romans.

In monotheistic religions, the one god governs both life and death (as well as everything else). However, in practice this manifests in different rituals and traditions and varies according to a number of factors including geography, politics, traditions, and the influence of other religions.

Hindu
Yama - the god of death & divine judge of afterlife

Chitragupta - Yama's record keeper, keeps account of the good & misdeeds of souls, on the basis of which the dead are judged.

Yamaduta - Spirits under control of Yama, who are responsible for bringing the dead souls into Yama's presence. However, from the anecdote of Satyavan & Savitri, it is shown that even Yama performs this role.

Kāla - the personification of time, also associated with death

Shiva - the god who is the destroyer of the world at the time of pralaya. As Kalantaka, he is also the conqueror of death. As Bhairava, he is strongly associated with death & destruction.

Kali - Shiva's spouse, strongly associated with death & destruction.

Chamunda - A related form of Kali, invoked for seeking death of enemies during wartime.

Tibetan Buddhist
Tibetan Buddhism, like all other Buddhist denominations, affirms the rejection of the existence of souls (anatta) & existence of a creator God (see the theory of dependent origination), while at the same time affirming in the existence of heaven and hell. The beings listed here aren't 'gods of death' in the traditional sense, they are rather beings that invoke a lot of funerary aspect with them.

Citipati - guardian spirits of charnel grounds

Dakini - Female spirits strongly associated with the imagery of death.

Heruka - Beings strongly associated with the imagery of death & charnel grounds

Wrathful deities - Meditational deities invoking the imagery of death.

Southeast Asian mythology

Magwayen
Batara Kala (Balinese mythology), god of the underworld in traditional Javanese and Balinese mythology, ruling over it in a cave along with Setesuyara. Batara Kala is also named the creator of light and the earth. He is also the god of time and destruction, who devours unlucky people. He is related to Hindu concept of Kāla. In mythology, he causes eclipses by trying to eat the Sun or the Moon.
Shingon (nat) (Burmese)
Thongalel (Manipuri mythology)
Pong Lalondong (Toraja), god of death
Philippines
Main article: List of Philippine mythological figures

This list is incomplete; you can help by adding missing items. (August 2008)

Sampo, a magical artifact of indeterminate type constructed by Ilmarinen that brought riches and good fortune to its holder, in the Finnish epic poetry Kalevala (The Forging of the Sampo, Joseph Alanen, 1911)
Mythological objects encompass a variety of items (e.g. weapons, armor, clothing) found in mythology, legend, folklore, tall tale, fable, religion, spirituality, superstition, paranormal, and pseudoscience from across the world. This list is organized according to the category of object.

Armor
Armor

Achilles wearing his armor
Armor of Achilles, created by Hephaestus and said to be impenetrable. (Greek mythology)
Armor of Beowulf, a mail shirt made by Wayland the Smith. (Anglo-Saxon mythology)
Armor of Örvar-Oddr, an impenetrable "silken mailcoat". (Norse mythology)
Babr-e Bayan, a suit of armor that Rostam wore in wars described in the Persian epic Shahnameh. The armor was invulnerable against fire, water and weapons. (Persian

mythology)
Golden Coat of Chainmail, part of Fafnir's treasure which Sigurd took after he slew the dragon. (Norse mythology)
Green Armor, protects the wearer from physical injuries. (Arthurian legend)
Kavacha, the armor of Karna that was granted to him by his father Surya at birth. (Hindu mythology)
Armor of Diomedes, made of bronze, that Diomedes exchanged with the golden armor of Glaucus. (Greek mythology)
Helmets
Helmet of Rostam, upon which was fixed the head of the white giant Div-e-Sepid, from the Persian epic Shahnameh. (Persian mythology)
Helm of Awe (also Helm of Terror or Ægishjálmr), an Icelandic magical stave. A physical object called "Helm of Terror" is referenced as one item Sigurd takes from the dragon Fafnir's hoard after he slays him in the Völsunga saga. (Norse mythology)
Huliðshjálmr, a concealing helmet of the dwarves. (Norse mythology)
Tarnhelm, a magic helmet giving the wearer the ability to change form or become invisible. Used by Alberich in Der Ring des Nibelungen. (Continental Germanic mythology)
Goswhit, the helmet of King Arthur, passed down to him from Uther Pendragon. (Arthurian legend)
Sun Wukong's magical headband, a magical headband which, once put on, can never be removed. With a special chant, the band will tighten and cause unbearable pain. (Chinese mythology)
Kappa's plate (Kappa no sara), the easiest way to defeat a kappa is to make it spill the water from the sara on top of its head. The sara is filled with water that is the source of its power. (Japanese mythology)
Headgear from Greek mythology
Cap of invisibility (also Helm of Darkness or Helm of Hades), which can turn the wearer invisible. In addition to its owner, the god of the underworld Hades, wearers of the cap in Greek myths include Athena, the goddess of wisdom; the messenger god Hermes, and the hero Perseus.
Ariadne's diadem, a diadem given to her by her husband Dionysus that was made by Hephaestus as a wedding present.
Shields
Shield of El Cid, a shield which bears the image of a fierce shining golden dragon.[1]
Svalinn, a shield which stands before the sun and protects Earth from burning. If the shield were to fall from its frontal position, the mountains and seas would burn up. (Norse mythology)
Dubán, the shield of Cú Chulainn. (Irish mythology)
Han Feizi's shield, from a Chinese parable that tells of a man who was trying to sell a spear and a shield. When asked how good his spear was, he claimed it could pierce any shield. Then, when asked how good his shield was, he claimed it could defend from all spear attacks. When he was asked what would happen if his spear should strike his shield, the seller could not answer. This led to the idiom of "zìxīang máodùn" (自相矛盾, "from each-other spear shield"), or "self-contradictory". (Chinese folklore)

Oba's shield, which she uses to cover her right ear. (Yoruba mythology)
Shields from Arthurian legend
Pridwen (also Wynebgwrthucher), the shield of King Arthur.
Shield of Joseph of Arimathea, according to Arthurian legend, was carried by three maidens to Arthur's castle where it was discovered by Sir Percival. In Perlesvaus he uses it to defeat the Knight of the Burning Dragon.
Shield of Judas Maccabee, a red shield emblazoned with a golden eagle. According to Arthurian legend the same shield was later found and used by Gawain after he defeated an evil knight.
Shield of Evalach, a white shield belonging to King Evalach. Josephus of Arimathea painted a red cross upon it with his own blood, which granted the owner heavenly protection. It was later won by Sir Galahad.
Shields from Græco-Roman mythology

Shield of Achilles (illustration)
Aegis, Zeus' shield, often loaned to his daughter Athena, also used by Perseus. (Greek mythology)
Shield of Ajax, a huge shield made of seven cow-hides with a layer of bronze. (Greek mythology)
Ancile, the shield of the Roman god Mars. One divine shield fell from heaven during the reign of Numa Pompilius, the second king of Rome. He ordered eleven copies made to confuse would-be thieves. (Roman mythology)
Shield of Achilles, the shield that Achilles uses in his fight with Hector. (Greek mythology)
Shield of Aeneas, the shield that Aeneas receives from Vulcan to aid in his war against Turnus.
Shields from Hindu mythology
Khetaka, the shield of Shamba.
Srivatsa, the shield of Vishnu, said to be manifested in the god's chest.
Gauntlets
Járngreipr (Iron Grippers), a pair of iron gauntlets used by the god Thor. (Norse mythology)
Clothing
Crowns

The Crown of Immortality, held by the allegorical figure Eterna (Eternity)
Crown of Immortality, represented in art first as a laurel wreath and later as a symbolic circle of stars. It appears in a number of Baroque iconographic and allegoric works of art to indicate the wearer's immortality. (Christian mythology)
Conquest's crown, the first of the Four Horsemen of the Apocalypse, Conquest, rides a white horse and a crown was given to him. (Christian mythology)
Crown of twelve stars, the Woman of the Apocalypse is seen wearing a crown of twelve stars on her head. (Christian mythology)
Crown of thorns, which was placed on the head of Jesus during his crucifixion. (Christian mythology)

Radiate crown (also Solar crown, Sun crown, Eastern crown or Tyrant's crown), a crown or other headgear symbolizing the sun or more generally powers associated with the sun.

Corona Borealis (Northern Crown), the crown was considered to represent a crown given by Dionysus to Ariadne, after she was taken from the Athenian prince Theseus. When she wore the crown at her marriage to Dionysus, he placed it in the heavens to commemorate their wedding. (Greek mythology)

Corona Australis (Southern Crown), the crown has been associated with the myth of Bacchus and Stimula. Jupiter had impregnated Stimula, causing Juno to become jealous. Juno convinced Stimula to ask Jupiter to appear in his full splendor, which the mortal woman could not handle, causing her to burn. After Bacchus, Stimula's unborn child, became an adult and the god of wine, he honored his deceased mother by placing a wreath in the sky. (Roman mythology)

Belts

Thor wearing the magic belt Megingjörð

Megingjörð (Power-belt), a magic belt worn by the god Thor. (Norse mythology)

Peter Stumpp's magical belt, Peter claimed that the Devil had given him a magical belt or girdle, which enabled him to metamorphose into a werewolf. Removing the belt made him transform back to his human form. (German legend)

Girdles

Aphrodite's Cestus, a magic girdle that enhanced the wearer's beauty and made others fall in love with the wearer. (Greek mythology)

Girdle of Hippolyta, a girdle that was a symbol of Hippolyta's power over the Amazons, and given to her by Ares. Heracles' 9th Labor was to retrieve it. (Greek mythology)

Tyet, the ancient Egyptian symbol of the goddess Isis. It seems to be called "the Knot of Isis" because it resembles a knot used to secure the garments that the Egyptian gods wore. (Egyptian mythology)

Girdle of Brynhildr, Siegfried takes her girdle which makes Brynhildr lose her supernatural strength. (Norse mythology)

Bridle of Constantine, said to be made from the nails used during the crucifixion of Christ.

Gloves

Letter Gloves, or kirikindad were believed to have protective or magic powers. They are decorated with special patterns and are imbued with whispers and spells by the singing of the crafter making them. (Estonian mythology)

Veils

Veronica holding her veil, Hans Memling, c. 1470

Veil of Isis, an artistic motif in which nature is personified as the goddess Isis covered by a veil, representing the inaccessibility of nature's secrets. Helena Blavatsky, in Isis Unveiled in 1877, used the metaphor for the spiritual truths that her Theosophical belief system hoped to discover, and modern ceremonial magic includes a ritual called the "Rending of the Veil" to bring the magician to a higher state of spiritual awareness. (Western esotericism)

Veil of Veronica, according to legend, was used to wipe the sweat from Jesus' brow as he carried the cross. (Christian mythology)

Caps and hats

Cohuleen druith: or cochaillín draíochta is a special hat worn by merrows which enables them to travel between deep water and dry land. If they lose this cap, it is said that they will lose their power to return beneath the water. (Scottish folklore)

Winged petasos (also Winged petasus): the winged traveler hat of the messenger god Hermes. The Roman equivalent is Mercury. (Greek mythology)

Cap of invisibility (also Cap of Hades): a cap that turns a person invisible (Greek mythology)

Saci's cap: the red cap of the Saci which is the said source of all his magical abilities, like appearing and disappearing at will, inhuman speed (despite having just one leg) and the power to create and ride dust devils. Those who want to capture a Saci must throw a sieve over a Saci's dust devil to bind it and give a chance to remove his cap, rendering him powerless. Then he could be locked inside a bottle granting his total obedience - but not his loyalty, since the creature would always try to trick his master into giving back his cap. (Brazilian mythology)

Hat of fingernails, or küüntest kübar is a hat belonging to Vanatühi that makes the wearer invisible. (Estonian mythology)

Garments

Jacob blesses Joseph and gives him the coat of many colors

Hagoromo (Feather cloak), a colored or feathered kimono of a tennin. Tennin are unable to fly without these kimono and thus will be unable to return to Heaven. (Japanese mythology)

Velificatio, a stylistic device used in ancient Roman art to frame a deity by means of a billowing garment. It represents "vigorous movement", an "epiphany", or "the vault of heaven", often appearing with celestial, weather, or sea deities. (Roman mythology)

Coat of many colors, the garment that Joseph owned, which was given to him by his father, Jacob. (Jewish mythology)

Penelope's burial shroud, which Odysseus's wife Penelope pretended to weave for her deceased father-in-law. She claimed that she would choose a suitor when the shroud was complete, but secretly unraveled it every night to delay the decision. (Greek mythology)

Devil's green coat, given to a soldier by the Devil, who claims its pockets are always full of limitless money, as told in the tale Bearskin. (German fairy tale)

Footwear

Boots

Hop-o'-My-Thumb stealing the Seven-league boots from the Ogre, by Gustave Doré

Ǒusībùyúnlǚ (藕絲步雲履; "[Lotus-root Thread] Cloud-stepping Boots" or "~Shoes"), made of lotus fiber, these are one of the treasures of the Dragon Kings; Ào Ming gives them to Sun Wukong in order to get rid of him when he acquires the Ruyi Jingu Bang. (Chinese mythology)

Fast-walker Boots (Сапоги-скороходы), allows the person wearing them to walk and

run at an amazing pace. (Russian folklore)

Swan Cloak, a magic robe made of swan feathers belonging to a swan maiden.
Tarnkappe, Sigurd's magical cloak that made the wearer invisible. (Norse mythology)
Mantles

Holy Robe in Trier
Mantle of Arthur (also Llen Arthyr yng Nghernyw), whoever was under it could not be seen, and he could see everyone. One of the Thirteen Treasures of the Island of Britain. This item is known from two other sources, the prose tales Culhwch and Olwen (c. 1100) and The Dream of Rhonabwy (early 13th century). A very similar mantle also appears in the Second Branch of the Mabinogi, in which it is used by Caswallawn to assassinate the seven stewards left behind by Bran the Blessed and usurp the throne. (Welsh mythology)
Mantle of Elijah, the waters of which, touched by the Mantle (monastic vesture)mantle, divided, so as to permit both to pass over on dry ground across the Jordan River. (Abrahamic religion)
Mantle of Tegau Gold-Breast, Tegau Gold-Breast (Tegau Eurfron, wife of Caradoc) was a Welsh heroine. Her mantle would not serve for any woman who had violated her marriage or her virginity. It would reach to the ground when worn by a faithful woman but would only hang down to the lap of an unfaithful wife. (Welsh mythology)
Robes
Robe of the Fire-rat, a legendary robe of China that is made of the fireproof fur of the fire-rat. One of Kaguya-hime's suitor set out to search for the robe. (Japanese mythology)

Seamless Robe of Jesus (also Holy Robe, Holy Tunic, Honorable Robe or Chiton of the Lord), the robe said to have been worn by Jesus during or shortly before his crucifixion. (Christian mythology)
Sudarium of Oviedo and Veil of Veronica, purported "sweat cloths" that touched upon Jesus
Sun robe, the Woman of the Apocalypse is clothed with the sun. (Christian mythology)
Pants and shirts

Lichas bringing the garment of Nessus to Hercules
Nábrók (Death Underpants), a pair of pants made from the skin of a dead man, which are capable of producing an endless supply of money. (Icelandic folklore)
Shirt of Nessus, the poisoned shirt that killed Heracles. (Greek mythology)
Ragnar's enchanted shirt, when King Ælla threw Ragnar into the snake pit, it was claimed Ragnar was protected by an enchanted shirt that Aslaug had made. It was only when this shirt had been removed that the snakes could bite Ragnar and kill him. (Norse mythology)
Weapons

Yama with his famous Yama Pasha

An angel (Camael) expelling Adam and Eve with a flaming sword

Ahimelech giving the sword of Goliath to David, by Aert de Gelder.
Cura Si Manjakini, a sword mentioned in the legends of the Malay Annals as originally possessed by Sang Sapurba, the legendary ancestor of Malay kings. (Malay folklore)
Flaming Sword, a sword glowing with flame by some supernatural power.
Kalevanmiekka, Kaleva's sword. (Finnish mythology)
Mmaagha Kamalu, a sword that belongs to the Igbo god of war Kamalu. This sword

glows red when people with evil intentions are close by and it can cause tremors when struck on the ground. It gifts mere mortals victory in battle. (Igbo mythology)

Sword of Laban, after nearly being killed by a powerful and nefarious Laban, the young prophet Nephi later finds him drunk and unconscious. He's then commanded of God to use Laban's sword to kill him as he was wicked and would hurt future generations by withholding sacred records revealing God's Plan of Happiness. The sword was made of "precious steel" with a hilt of "pure gold".[2] After slaying Laban, Nephi put on Laban's armor to disguise himself to obtain the records, and escape the city. He would later use it as a model for manufacturing similar weapons for his people's defense. Laban's sword was passed down through the centuries to future prophets, kings, and warriors. (Book of Mormon)

Sword of Victory (also Phra Saeng Khan Chaiyasi), the sword's history has been shrouded in myth and legend. In 1784, Chao Phraya Apai Pubet of Cambodia received the blade from a fisher who found in it in Tonle Sap when it was caught in his fishing net. He gave it to King Phutthayotfa Chulalok (Rama I) of Thailand, his suzerain at the time. According to legend, it was said that the moment the blade arrived in Bangkok, seven lightning strikes hit the city simultaneously, including the city gate, where the blade entered, and over the main gate of the Grand Palace. (Thai folklore)

War's great sword, the second of the Four Horsemen of the Apocalypse rides on a Red Horse is War, a great sword was given to him. (Book of Revelation)

Goliath's sword, which was used by David to decapitate the fallen giant, and then given to him by the priest Achimelech when he ran away from King Shaul. (Jewish mythology)

Swords from Celtic mythology

Claíomh Solais on an Ireland stamp printed in 1922

Beagalltach (also Begallta) or "Little Fierce One", a short sword given to Diarmuid Ua Duibhne by his father Aengus. It broke in two pieces after hitting a boar with it. Paired with Móralltach.

Caladbolg (also Caladcholg), the sword of Fergus mac Róich and powerful enough to cut the tops off three hills; related to the Caledfwlch of Welsh mythology.

Caledfwlch, often compared to Excalibur. This sword is used by Llenlleawg Wyddel to kill Diwrnach Wyddel and his men.

Ceard-nan Gallan, the Smith of the Branches, sword of Oisín.

Claíomh Solais (Sword of Light), the sword of Nuada Airgeadlámh. The sword glowed with the light of the sun and was irresistible in battle, having the power to cut his enemies in half.

Cosgarach Mhor, the Great Triumphant One, sword of Oscar.

Crocea Mors (fr), formerly the sword of Julius Caesar, captured by Nennius according to the legends presented by Geoffrey of Monmouth.

Cruadh-Chosgarach, the Hard Destroying One, sword of Caílte mac Rónáin.

Cruaidín Catutchenn, the sword of Cú Chulainn.

Dyrnwyn (White-Hilt), the Sword of Rhydderch Hael. When drawn by a worthy or well-

born man, the entire blade would blaze with fire. Rhydderch was never reluctant to hand the weapon to anyone, hence his nickname Hael "the Generous", but the recipients, as soon as they had learned of its peculiar properties, always rejected the sword.
Fragarach (also Sword of Air, Answerer or Retaliator), forged by the gods, wielded by Manannán mac Lir and Lugh Lamfada. No armor could stop it, and it would grant its wielder command over the powers of wind.
Mac an Luin, the Son of the Waves, sword of Fionn mac Cumhaill.
Móralltach (also Morallta) or "Great Fierce One", a sword given to Diarmuid Ua Duibhne by his father Aengus, which left no stroke or blow unfinished at the first trial.
Orna, the sword of the Fomorian king Tethra, which recounts the deeds done with it when unsheathed. It was taken by Ogma and it then recounted everything it had done.
Singing Sword of Conaire Mór, a sword that would sing in battle.
Swords from Continental Germanic mythology

Dietrich von Bern and Hildebrand fight against dragons
Adylok or Hatheloke, the sword of Torrent of Portyngale, according to the Torrent of Portyngale it was forged by Wayland the Smith.
Gram, the sword wielded by Sigurd/Siegfried. It is called Balmung in the Nibelungenlied and Nothung in Richard Wagner's Der Ring des Nibelungen.
Blutgang (also Burtgang or Blodgang), the sword of Háma.
Eckesachs (Seax of Ecke), the sword that belonged to the giant Ecke before he was killed by Dietrich von Bern, who then took it for himself.
Mimung, a great sword that Wudga inherits from his father Wayland the Smith.
Nagelring, the sword of Dietrich von Bern.
Swords from Anglo-Saxon mythology and folklore of the British Islands
Brainbiter, the sword of Hereward the Wake.
Hrunting, the magical sword lent to Beowulf by Unferth which was annealed in venom.
Nægling, the other magical sword of Beowulf. Found in the cave of Grendel's mother.[3]
Sword of Saint Peter, St. Joseph of Arimathea brought the sword to Britain and it was kept at Glastonbury Abbey for many years until the Abbot gave it to Saint George. (English folklore)
Wallace Sword, William Wallace used human skin for his sword's scabbard, hilt, and belt. The flesh's donor was said to have been Hugh de Cressingham, treasurer of Scotland, whom Wallace had flayed after defeating him in the battle of Stirling Bridge. (Scottish folklore)
Swords from Arthuriana

The famous sword of Excalibur painted by Howard Pyle
Clarent, a sword of peace meant for knighting and ceremonies as opposed to battle, which was stolen and then used to kill Arthur by Mordred.
Coreiseuse (Wrathful), the sword of King Ban, Lancelot's father.
Excalibur, it is also sometimes referred to as: Caliburn, Caledfwlch, Calesvol, Kaledvoulc'h, Caliburnus due to inconsistencies within the various Arthurian legends. Sometimes attributed with magical powers or associated with the rightful sovereignty of Great Britain. Stated that it was forged on the Isle of Avalon.

Marmiadoise, it is also known as Mamyadoise. Marmiadoise is a sword said to originally belong to the Greek deity Hercules and was later given to his descendants, this sword would eventually be used by King Rions until he was killed by King Arthur during a battle, this sword would later be adopted by Arthur himself as he considered it to be superior when compared to the Excalibur.
Cortain (also Corte, Cortana, "Short"; Danish: Kortone), the shortened sword of Ogier the Dane, which was broken when test-cutting a marble block and had to be refashioned with the shorter blade.[4] And when Ogier was about to strike Prince Charlot dead in vengeance, but the archangel Michael stays the sword Short, and the prince is spared.[5] Ogier's sword had originally been the broken-tipped sword of Tristan according to the 13th century Prose Tristan. There appears to be some conflation between this sword from literature and the actual British regalia sword Curtana aka Sword of Mercy.
Galatine, the name of the sword given to Sir Gawain by the Lady of the Lake.
Grail Sword, a cracked holy sword which Sir Percival bonded back together, though the crack remained.
Morddure, Arthur's sword crafted by Merlin in The Faerie Queene; "neither steele, nor stone" could fend its attack. (Renaissance fiction)
Secace, the sword that Lancelot used to battle the Saxons at Saxon Rock. It is translated as Seure (Sequence) in the Vulgate Cycle.
Sword in the Stone or Caliburn, a sword in the Arthurian legend which only the rightful king of Britain can pull from the stone; sometimes associated with Excalibur. In Mallory, the sword in the stone is not Excalibur and is not named. When the sword is broken in a fight with King Pellinore, the Lady of the Lake gives him Excalibur as a replacement. At Arthur's death, Excalibur is returned to the Lady of the lake by Sir Bedivere.
Sword with the Red Hilt, one of the swords wielded by Sir Balin. After his death, Merlin sealed it in the float stone where it remained until it was drawn by Sir Galahad. After Galahad, the sword passes to his father, Sir Lancelot who fatally wounds Sir Gawain with it.
Swords from English Romance
(non-Arthurian, noncyclical)
Chrysaor, the golden sword of Sir Artegal in The Faerie Queene. It was tempered with Adamant, and it could cleave through anything. (Renaissance fiction)
Egeking, a sword in the medieval poem Greysteil. Sir Graham obtains the sword 'Egeking' from Eger's aunt, Sir Egram's Lady.
Guy of Warwick's Sword, belonged to the legendary Guy of Warwick who is said to have lived in the 10th century.
Morgelai, the king makes Beves a knight and presents him with a sword called Morgelai.
Swords from Norse mythology

King Svafrlame Secures the Sword Tyrfing
Sometimes it is difficult to decide if a legendary sword should be classed here as "mythological", or treated as historical (incl. pseudo-historical)[a]

Angrvaðill (Stream of Anguish), sword passed down from Víkingr to his son Þorsteinn in

Þorsteins saga Víkingssonar, then to the grandson Friðþjóf in Friðþjófs saga hins frœkna. It is inscribed with Runic letters which blaze in time of war but gleam with a dim light in time of peace.

Dáinsleif (Dáinn's legacy), king Högni's sword that gave wounds that never healed and could not be sheathed without killing a man.

Sword of Freyr, the sword of the Norse god Freyr, it is a magic sword which fought on its own.

Gramr (Gram), the sword that Óðinn struck into the world tree Barnstokkr which only Sigmunðr the Völsung was able to pull out. It broke in battle with Odin but was later reforged by Sigmunðr 's son Sigurðr who used it to slay the dragon Fáfnir. After being reforged, it could cleave an anvil in half.

Hǫfuð, the sword of Heimdallr, the guardian of the Bifröst bridge.

Hrotti, part of Fáfnir's treasure, which Sigurðr took after he slew the dragon.

Jökulsnautr (Jokul's Gift), a sword belonging to Grettir which was later given to his brother Atli. (Sagas of Icelanders)

Kársnautr (Karr's-loom), Grettir defeats Kárr who was guarding the treasure in his own funeral tumulus from looters. The treasures are taken from the mound after Grettir's triumph, including an heirloom sword Kársnautr. (Sagas of Icelanders)

Lævateinn, a sword mentioned in an emendation to the Poetic Edda Fjölsvinnsmál by Sophus Bugge.

Mistilteinn, the magical sword of Þráinn, the draugr, later owned by Hrómundr Gripsson and it could never go blunt.

Riðill (also Refil), sword of the dwarf Regin.

Skofnung, the legendary sword of Danish king Hrólf Kraki. It was renowned for supernatural sharpness and hardness, as well as for being imbued with the spirits of the king's twelve faithful berserker bodyguards. A cut made by Skofnung will not heal. The only way to stop this is by touching the cut with the Skofnung stone.

Sword of Surtr the flaming sword of the fire giant king Surtr which he uses to slay Freyr and cover the realms in fire at the end of Ragnarök, possibly the same as Freyr's sword.

Tyrfing (also Tirfing or Tyrving), the cursed sword of Svafrlami with a golden hilt that would never miss a stroke, would never rust and would cut through stone and iron as easily as through clothes. The dwarves made the sword, and it shone and gleamed like fire. However, they cursed it so that it would kill a man every time it was used and that it would be the cause of three great evils.

Swords from the Matter of France

Joan of Arc with her famous sword

Almace (also Almice or Almacia), sword of Turpin, Archbishop of Reims.

Balisarda, the sword of Rogero from Orlando Furioso made by a sorceress, and capable of cutting through enchanted substances.

Corrougue, the sword of Otuel.

Durendal (also Durandal or Durlindana in Italian), the sword of Roland, one of Charlemagne's paladins, (Orlando in medieval Italian verse) — alleged to be the same sword as the one wielded by Hector of Ilium. It was said to be the sharpest sword in all of existence.

Froberge, the sword of Renaud de Montauban.
Hauteclere (also Halteclere or Hauteclaire), the sword of Olivier. It is described as being of burnished steel, with a crystal embedded in a golden hilt.
Joan of Arc's sword, Joan's "voices" told her that a magical and holy sword would be found in the Church (fr) of Saint Catherine of Fierbois. It had five crosses upon it and that the rust was easily removed.
Joyeuse, sword of Charlemagne. Some legends claim Joyeuse was forged to contain the Lance of Longinus within its pommel; others say the blade was smithed from the same materials as Roland's Durendal and Ogier's Curtana.
Merveilleuse, the hero's sword in Doon de Mayence. It was so sharp that when placed edge downwards it would cut through a slab of wood without the use of force.
Murgleys (also Murgleis), sword of Ganelon, traitor and cousin of Roland. Its "gold pommel" held some kind of a "holy relic".
Précieuse, sword of Baligant, Emir of Babylon.
Sauvagine, second of the two magical swords of Ogier the Dane.
Swords from Spanish mythology

"Tizona", the sword attributed to El Cid, on exhibit in the Army Museum of Madrid
Colada, the other sword of El Cid.[6]
Lobera (Wolf Slayer), the sword of the king Saint Ferdinand III of Castile, inheritance of the epic hero Fernán González, according to Don Juan Manuel, Prince of Villena.[7]

Swords from Japanese mythology

Artist's impressions of the (unseen) Imperial Regalia of Japan
Ame-no-Ohabari (also Ama-no-Ohabari), used by Izanagi to kill his offspring, Kagu-tsuchi.
Futsu-no-mitama (August-Snap-Spirit), the sword of Takemikazuchi.
Juuchi Yosamu (10,000 Cold Nights), crafted by Muramasa – in a contest, Sengo Muramasa suspended the blade in a small creek with the cutting edge facing the current. Muramasa's sword cut everything that passed its way; fish, leaves floating down the river, the very air which blew on it.
Kogarasu Maru (Little Crow), a unique tachi sword believed to have been created by the legendary smith Amakuni during the 8th century CE.
Kogitsune-maru (Little Fox), Inari Ōkami and its fox spirits help the blacksmith Munechika forge the blade Kogitsune-maru at the end of the 10th century.
Kusanagi-no-tsurugi (also Ama-no-Murakumo-no-Tsurugi and Tsumugari no Tachi), sword of the Japanese god Susanoo, later given to his sister Amaterasu.
Totsuka-no-Tsurugi, the sword Susanoo used to slay Yamata no Orochi.
Yawarakai-Te (Tender Hands), crafted by Masamune – in a contest, Masamune Okazaki lowered his sword into the current and waited patiently. Only leaves were cut. However, the fish swam right up to it, and the air hissed as it gently blew by the blade. A monk who had been watching explained what he had seen; the Masamune was by far the finer of the two swords, as it did not needlessly cut that which is innocent and undeserving.
Swords from Chinese mythology
Feijian, a sword borrowed from Lü Dongbin to Xuanwu in order to subdue the spirits of the tortoise and the snake.
Gan Jiang and Mo Ye, the legendary Chinese twin swords named after their creators.
Glory of Ten Powers, a legendary Chinese sword allegedly forged in Tibet by husband-and-wife magicians of the ancient Bön tradition.

Spears from Celtic mythology
Areadbhar (also Areadbhair), the spear of Lugh, which originally belonged to Pisear, king of Persia. Lugh had no need to wield the spear himself. It was alive and thirsted for blood that was only stayed by steeping its head in a sleeping-draught of pounded fresh poppy seeds. When battle was near, it was drawn out; then it roared and struggled against its thongs, fire blazed from it, and it tore through the ranks of the enemy once slipped from the leash, never tired of slaying.
Crann Buidhe, the spear of Manannán.
Del Chliss, Cú Chulainn's spear that first belonged to Nechtan Scéne, and used to kill the sons of Nechtan Scéne. Formerly the name for the charioteer's goad, a split piece of wood.
Gáe Buide (Yellow Shaft), a yellow spear that can inflict wounds from which none could

recover. The spear of Diarmuid Ua Duibhne, given to him by Aengus.

Gáe Bulg, the spear of Cú Chulainn, made of the bone of a sea monster. According to the legend, this spear was crafted by the warrior maiden Scáthach and had the power to explode into dozens of barbs, producing instant death.

Gae Assail (Spear of Assal), another spear belonging to Lugh, the incantation "Ibar (Yew)" made the cast always hit its mark, and "Athibar (Re-Yew)" caused the spear to return.

Gáe Dearg (Red Javelin), the red spear of Diarmuid Ua Duibhne, given to him by Aengus. It inflicted wounds that none could recover from similar to Gáe Buide.

Lúin of Celtchar, the name of a long, fiery lance or spear belonging to Celtchar mac Uthechar and wielded by other heroes, such as Dubthach, Mac Cécht and Fedlimid.

Spears from Japanese mythology

Amenonuhoko (天沼矛 or 天之瓊矛 or 天瓊戈, "heavenly jeweled spear") is the name given to the spear in Shinto used to raise the primordial land-mass, Onogoro-shima, from the sea

Amenonuhoko (Heavenly Jewelled Spear), the naginata used by the Shinto deities Izanagi and Izanami to create the world – also called tonbogiri.

Ama-no-Saka-hoko (Heavenly Upside Down Spear) is an antique and mysterious spear, staked by Ninigi-no-Mikoto at the summit of Takachiho-no-mine, where he and his divine followers first landed, according to the legend of Tenson kōrin.

Nihongo, is one of three legendary Japanese spears created by the famed swordsmith Masazane Fujiwara. A famous spear that was once used in the Imperial Palace. Nihongo later found its way into the possession of Masanori Fukushima, and then Tahei Mori.

Otegine, is one of three legendary Japanese spears created by the famed swordsmith Masazane Fujiwara.

Tonbokiri, is one of three legendary Japanese spears created by the famed swordsmith Masazane Fujiwara, said to be wielded by the legendary daimyō Honda Tadakatsu. The spear derives its name from the myth that a dragonfly landed on its blade and was instantly cut in two. Thus Tonbo (Japanese for "dragonfly") and kiri (Japanese for "cutting"), translating this spear's name as "Dragonfly Slaying spear".

Polearms from Chinese mythology

Erlang Shen (二郎神), or Erlang is a Chinese God with his spear

Erlang Shen's spear, a three-pointed and double-edged spear with two cutting edges of a Saber used by Erlang Shen. It is powerful enough to penetrate and cleave through steel and stone like wool.

Green Dragon Crescent Blade, a legendary weapon wielded by Guan Yu in the historical novel Romance of the Three Kingdoms. It is a guandao, a type of traditional Chinese weapon. It is also sometimes referred to as the Frost Fair Blade, from the idea that during a battle in the snow, the blade continuously had blood on it; the blood froze and made a layer of frost on the blade.

Jiuchidingpa (Nine-tooth Iron Rake), the primary weapon of Zhu Bajie.

1.8 zhang long Serpent Spear, Zhang Fei's spear from the Three Kingdoms period in

China.

Spear of Fuchai, the spear used by Goujian's arch-rival King Fuchai of Wu.

Yueyachan (Crescent-Moon-Shovel), a Monk's spade that is the primary weapon of Sha Wujing. A double-headed staff with a crescent-moon blade at one end and a spade at the other, with six xīzhàng rings in the shovel part to denote its religious association.

Han Feizi's spear, a man was trying to sell a spear and a shield. When asked how good his spear was, he said that his spear could pierce any shield. Then, when asked how good his shield was, he said that it could defend from all spear attacks. Then one person asked him what would happen if he were to take his spear to strike his shield; the seller could not answer. This led to the idiom of "zìxīang máodùn" (自相矛盾, "from each-other spear shield"), or "self-contradictory".

Bidents

Bident, a two-pronged implement resembling a pitchfork. In classical mythology, the bident is associated with Pluto/Hades, the ruler of the underworld. (Greek mythology)

Devil's pitchfork, a bident or two-pronged pitchfork belonging to the devil. (Christian mythology)

Javelins

Vel, a divine javelin associated with Hindu war god Kartikeya. (Hindu mythology)

Lances

Bleeding Lance, a sacred object, imbued with magic, in Grail ceremonies. Drops of blood issue from its point. When the Grail is Christianized, this weapon transforms into the Holy Lance, the spear that pierced the side of Jesus by the hand of a Roman soldier named Longinus. The blood is that of the lamb and drips eternally into the Grail. From the Vulgate Cycle on the Lance is also the weapon that inflicted the Grail-keeper's wound even though it is often attributed with healing powers. (Arthurian legend)

Bradamante's lance, a female Christian knight who wields a magical lance that unhorses anyone it touches. (Matter of France)

Lance of Olyndicus, wielded by the Celtiberians' war chief Olyndicus, who fought against Rome. According to Florus, he wielded a silver lance that was sent to him by the gods from the sky.[13] (Spanish mythology)

Holy Lance (also Spear of Longinus or Spear of Destiny), is the name given to the lance that pierced the side of Jesus as he hung on the cross, according to the Gospel of John. (Christian mythology)

Tridents

Shiva with his Trishula

Kongō, A trident-shaped staff which emits a bright light in the darkness, and grants wisdom and insight. The staff belonged originally to the Japanese mountain god Kōya-no-Myōjin. It is the equivalent of the Sanskrit Vajra, the indestructible lightning-diamond pounder of the king of the gods/rain-god Indra. There the staff represents the three flames of the sacrificial fire, part of the image of the vajra wheel. (Japanese mythology)

Trident of Poseidon, associated with Poseidon, the god of the sea in Greek mythology and the Roman god Neptune. When struck the earth in anger, it caused mighty earthquakes and his trident could stir up tidal waves, tsunamis, and sea storms. (Greek mythology)

Trident of Madhu, Madhu handed everything over to his son Lavanasura including his trident before drowning himself in the ocean because of shame. (Hindu mythology)
Trishula, the trident of Shiva, stylized by some as used as a missile weapon and often included a crossed stabilizer to facilitate flight when thrown. Considered to be the most powerful weapon. (Hindu mythology)

Whips

Chentu, a horse whip which looks like a crooked stick, and is a typical attribute of Aiyanar, Krishna in his aspect as Rajagopala, and Shiva with Nandi. (Hindu mythology)

Daggers

Carnwennan (Little White-Hilt), the dagger of King Arthur. It is sometimes attributed with the power to shroud its user in shadow, and was used by Arthur to slice the Very Black Witch in half. (Arthurian legend)
Dagger of Rostam, a glittering dagger that Rostam used to behead the white daeva Div-e Sepid. (Persian mythology)
Knife of Llawfrodedd the Horseman, Llawfrodedd Farchog (from marchog "the Horseman"), or Barfawc "the Bearded" in other manuscripts, is said to have owned a knife which would serve for a company of 24 men at the dinner table. (Welsh mythology)
Parazonium, a dagger frequently carried by Virtus, Mars, Roma, or the Emperor, giving them the aura of courage. (Roman mythology)

Daggers from Indonesia and Malay folklore

Kris Mpu Gandring, Ken Arok's cursed dagger. The unfinished or incomplete kris would kill seven men, including Ken Arok.
Kris Taming Sari (Flower Shield or Beautiful Shield), one of the most well-known kris in Malay literature, said to be so skilfully crafted that anyone wielding it was unbeatable.
Kris Setan Kober, belong to Arya Penangsang, the mighty viceroy (adipati) of Jipang who was killed by his own kris called Setan Kober ("devil of the grave"). Forged by Empu Bayu Aji in the kingdom of Pajajaran, and had 13 luk on its blade.

Axes

The Honest Woodcutter, also known as Mercury and the Woodman and his famous Golden Axe
Axe of Perun, the axe wielded by the Slavic god of thunder and lightning, Perun. (Slavic paganism)
Forseti's axe (also Fosite's axe), a golden battle axe that Forseti (or Fosite in the Frisian mythology) used to save the old sages of the wreck and then threw the axe to an island to bring forth a source of water. (Norse mythology)
Hephaestus's Labrys, a double-headed axe used by Hephaestus to slice open Zeus's head and free Athena, whose pregnant mother Zeus swallowed to prevent her offspring from dethroning him. (Greek mythology)
Lightning axe, an axe that is wielded by the Maya rain deity Chaac and used to produce thunder and rain. (Maya mythology)
Parashu, the battle-axe of Shiva who gave it to Parashurama. (Hindu mythology)
Pangu's axe, an axe wielded by Pangu. He used it to separate yin from yang, creating the Earth (murky yin) and the Sky (clear yang). (Chinese mythology)
Paul Bunyan's axe, an axe wielded by Paul Bunyan. It was responsible for carving the

Grand Canyon after Paul once dragged it behind him while walking. (American folklore)
Gobán Saor's axe, it could hold back the tide when it was thrown onto the seashore. (Irish mythology)
Shango's axe, an axe wielded by Shango that can produce thunder. (Yoruba mythology)
Zeus's Labrys, at Labraunda there were depictions of Zeus who was called Zeus Labrandeus (Ζεὺς Λαβρανδεύς) with a tall lotus-tipped sceptre upright in his left hand and the double-headed axe over his right shoulder. (Greek mythology)
Golden axe, a woodcutter accidentally dropped his axe into a river and sat down to weep. Hermes dived into the water and returned with a golden axe. Hermes asked if this is his axe, but the woodcutter said it was not. (Greek folklore)
Silver axe, the woodcutter returned the same answer when a silver axe was brought to the surface by Hermes. Only when his own axe is found does he claim it. Impressed by his honesty, Hermes allows him to keep all three axes. (Greek folklore)

Hammers

Mjölnir, a magical hammer wielded by Thor. It was invulnerable and when thrown would return to the user's hand. (Norse mythology)
Ukonvasara (also Ukonkirves), the weapon of the Finnish thunder god Ukko. (Finnish mythology)
Uchide no kozuchi, a legendary Japanese "magic hammer" which can "tap out" anything wished for, and is wielded by Daikoku-ten in popular belief. (Japanese folklore)
Hammer of Hephaestus, the hammer of the Greek god Hephaestus, which he used to make the Greek gods' weapons. (Greek mythology)

Bow and arrows

Bows

Houyi, the God of Archery

Arash's bow, Arash used the bow to determine the border between Persia and Turan, it is said that the arrow was traveling for three days, and Arash sacrificed himself while firing the bow by putting his life force in the arrow. (Persian mythology)
Fail-not, the bow of Tristan. It was said to never miss its mark. (Arthurian legend)
Houyi's bow, the God of Archery used his bow to shoot down nine out of ten sun-birds from the sky. (Chinese mythology)
Conquest's bow, the first of the Four Horsemen of the Apocalypse rides on a White Horse is Conquest, and he who sat on it had a bow. (Christian mythology)
Ofas, bows and arrows used by the divine odés (hunters). (Yoruba mythology)
Kērēsāspa's bow, The bow with which Kērēsāspa went to war with the giant demonic bird Kamak and shot infinite arrows like rain into its wings and brought it down and killed it. People also know that bow as a rainbow in the sky.(Persian mythology)

Bows from Classical Greek and Roman mythology

Apollo's bow, a silver bow wielded by Apollo, used to slay Python.
Artemis's bow, a silver bow wielded by Artemis.
Eros's bow, a bow wielded by Eros that could cause one to love or hate the person they first saw after being struck.
Heracles's bow, which also belonged to Philoctetes, its arrows had been dipped in the blood of the Lernaean Hydra, which made them instantly lethal.

Eurytus' bow, Eurytus became so proud of his archery skills that he challenged Apollo. The god killed Eurytus for his presumption, and Eurytus' bow was passed to Iphitus, who later gave the bow to his friend Odysseus. It was this bow that Odysseus used to kill the suitors who had wanted to take his wife, Penelope.

Bows from Hindu mythology

Pinaka, a bow wielded by Shiva that fired arrows that could not be intercepted.

Vijaya, a bow wielded by Parashurama.

Gandiva, a bow created by Brahma and used by Arjuna during the Kurukshetra War.

Sharanga, the bow of the Hindu god Vishnu and his avatars.

Kaundinya's bow, a magic bow wielded by the Brahman Kaundinya, who used it to make the Naga princess Mera fall in love with him.[14]

Indra's bow, the rainbow is depicted as an archer's bow. Indra, the god of thunder and war, uses the rainbow to shoot arrows of lightning.

Arrows

Killing of Ravana Painting by Brahmstra of Arrow of Brahma

Apollo's arrow, An arrow that could cause health or cause famine and death in sleep. (Greek mythology)

Artemis's arrow, golden arrows that could be used to bring sudden death and disease to girls and women. (Greek mythology)

Arrow of Brahma, the demi-god Rama faced the demon king of Sri-Lanka, Ravana. Rama fired the arrow of Brahma that had been imparted to him by Agastya. The arrow of Brahma burst Ravana's navel, and returned to Rama's quiver. (Hindu mythology)

Teen Baan, Shiva gave Barbarika three infallible arrows (Teen Baan). A single arrow was enough to destroy all opponents in any war, and it would then return to Barbarika's quiver. (Hindu mythology)

Elf-arrow (also Pixie Arrow), were arrowheads of flint used in hunting and war by the aborigines of the British Isles and of Europe in general. Elf-Arrows derived their name from the folklore belief that the arrows fell from the sky, and were used by elves to kill cattle and inflict Elfshot on human beings. Elf-Arrows were sometimes worn as amulets, occasionally set in silver, as a charm against witchcraft. (English folklore)

Heracles' arrows, arrows wielded by Heracles that were coated in poisonous Hydra blood. (Greek mythology)

Gusisnautar, magic arrows given to Örvar-Oddr by his father. (Norse mythology)

Sagitta (Arrow), regarded as the weapon that Hercules used to kill the eagle Aquila that perpetually gnawed Prometheus' liver. (Greek mythology)

Crossbows

Saintly Crossbow of the Supernaturally Luminous Golden Claw (also 靈光金爪神弩; SV: Linh Quang Kim Trảo Thần Nỏ), which could kill 300 men with one shot. A giant golden turtle (also Kim Quy) gave An Dương Vương one of his claws and instructed him to make a crossbow using it as a trigger, assuring him he would be invincible with it.[‡ 1][15] A man called Cao Lỗ (or Cao Thông) was tasked with the creation of the crossbow.[‡ 1][16]:88[17](see also Vietnamese mythology)

William Tell's crossbow: the governor of Altdorf forced William to shoot with his crossbow at an apple placed over his son's head a hundred feet away, as a way of punishing him for not bowing to the governor's statue. William, despite being a master of the crossbow, loaded two arrows into it. At the first attempt he hit the target. Amazed, the governor asked the reason for loading the second arrow. William replied that, in case the first projectile hit his son, he would shoot the second arrow into the evil heart of the one who caused his death. (Swiss folklore)

Projectile weapons

Sling-stone (also Cloich Tabaill), was used by Lugh to slay his grandfather, Balor the Strong-Smiter in the Cath Maige Tuired according to the brief accounts in the Lebor Gabála Érenn. (Irish mythology)

Thunderbolt, lightning plays a role in many mythologies, often as the weapon of a sky god and weather god. Thunderbolts as divine weapons can be found in many mythologies. In Greek mythology, the thunderbolt is a weapon given to Zeus by the Cyclops, or by Hephaestus in Greek mythology. Zibelthiurdos of Paleo-Balkan mythology is a god recognized as similar to Zeus as a wielder of lightning and thunderbolts. In Igbo mythology, the thunderbolt is the weapon of Amadioha and in Yoruba mythology, the thunderbolt is the weapon of Shango.

Xiuhcoatl, a lightning-like weapon wielded by Huitzilopochtli. (Aztec religion)

Holly Dart or Mistletoe, a weapon that Loki used to kill Baldr, variously depicted as a holly dart, mistletoe, arrow, or spear. (Norse mythology)

Tathlum, the missile fired by Lugh from the Sling-stone. (Irish mythology)

Magic Bullet, an enchanted bullet obtained through a contract with the devil in the German folk legend Freischütz. A marksman has obtained a certain number of bullets destined to hit without fail whatever object he wishes. Six of the magic bullets are thus subservient to the marksman's will, but the seventh is at the absolute disposal of the devil himself. (German folklore)

Silver bullet, a bullet cast from silver that is often the only weapon effective against a werewolf, witch, or other monsters.

Kenkonken, a chakram of great power wielded by Nezha. (Chinese mythology)

Projectile weapons from Hindu mythology

Astra, a supernatural weapon, presided over by a specific deity. To summon or use an astra required knowledge of a specific incantation/invocation, when armed.

Brahmastra, described in a number of the Puranas, it was considered the deadliest weapon. It was said that when the Brahmastra was discharged, there was neither a counterattack nor a defense that could stop it.

Narayanastra, the personal missile of Vishnu in his Narayana or Naraina form.

Pashupatastra, an irresistible and most destructive personal weapon of Shiva and Kali, discharged by the mind, the eyes, words, or a bow.

Varunastra, a water weapon (a storm) according to the Indian scriptures, incepted by Varuna. In stories it is said to assume any weapon's shape, just like water. This weapon is commonly mentioned as being used to counter the Agneyastra.

Agneyastra, the god of fire Agni possess a weapon that would discharge and emit flames inextinguishable through normal means.

Sudarshana Chakra, a legendary spinning disc like weapon used by the Hindu God Vishnu.

Vajra, the weapon of the Vedic rain and thunder-deity Indra, and is used symbolically by the dharmic traditions to represent firmness of spirit and spiritual power. (Hindu mythology/Buddhist mythology/Jain mythology)

Brahmanda Astra, it is said in the epic Mahabharata that the weapon manifests with the all five heads of Lord Brahma as its tip. Brahma earlier lost his fifth head when he fought with Lord Shiva. This weapon is said to possess the power to destroy entire solar system or Brahmand, the 14 realms according to Hindu cosmology.

Brahmashirsha Astra, It is thought that the Brahmashirsha Astra is the evolution of the Brahmastra, and 4 times stronger than Brahmastra. The weapon manifests with the four heads of Lord Brahma as its tip. When it strikes an area it will cause complete destruction and nothing will grow, not even a blade of grass, for the next 12 years. It will not rain for 12 years in that area, and everything including metal and earth become poisoned.

Vasavi Shakti, the magical dart of Indra. Used by Karna against Ghatotkacha in the Mahabharata war.

Hooks

Māui's Fishhook, used to catch the fish that would become New Zealand's North Island; the hook was also used to create the Hawaiian Islands. (Polynesian mythology) but could also be used as a weapon to defeat those that try to misuse the hook.

Jewelry

Necklaces

Brísingamen, the necklace of the goddess Freyja. (Norse mythology)

Necklace of Harmonia, allowed any woman wearing it to remain eternally young and beautiful, but also brought great misfortune to all of its wearers or owners. It was made by Hephaestus and given to Harmonia, the daughter of Aphrodite and Ares, as a curse on the House of Thebes for Aphrodite's infidelity. (Greek mythology)

Necklace of the Lady of the Lake, a jeweled necklace given to Sir Pelleas after assisting an old woman across a river. It was enchanted so that its wearer would be unfathomably loved. (Arthurian legend)

Yasakani no Magatama, a bejeweled necklace of magatamas offered to Amaterasu. One of three Sacred Imperial Relics of Japan. It represents benevolence. (Japanese mythology)

Mikuratana-no-kami, a necklace of beads. Izanagi gave Amaterasu as a representation of her rule over Takama-ga-hara. (Japanese mythology)

Amulets and Charms

Fig trees often represent talismans with the udumbara

Agimat, a Filipino word for "amulet" or "charm".

Ankh, an amulet which appears frequently in Egyptian tomb paintings and other art, often at the fingertips of a god or goddess. (Egyptian mythology)

Phylactery, an amulet or charm, worn for its supposed magical power.

Rabbit's foot, the foot of a rabbit is carried as an amulet believed to bring good luck. (American folklore/Canadian folklore)

Vedic amulet, in Vedic literature, fig trees often represent talismans with the udumbara fig tree having been deemed the "lord of amulets". (Hindu mythology/Buddhist mythology)

Wolfssegen (also Wolfsegen and Wolf-Segen), an apotropaic charm against wolves. (European folklore)

Rings

Goetia seal of solomon

Andvaranaut, a magical ring capable of producing gold, first owned by Andvari. (Norse mythology)

Draupnir, a golden arm ring possessed by Odin that is a source of endless wealth. (Norse mythology)

Ring of Dispel, a ring given to Sir Lancelot by the Lady of the Lake which could dispel any enchantment. In Le Chevalier de la Charrette it is given to him by a fairy instead. He used the ring to cross the Sword Bridge. (Arthurian legend)

Ring of Mudarra, the ring that Gonzalo Gustioz breaks in two pieces to so he can later on recognize the son with which his lover is pregnant. When that son, Mudarra, joins the two halves, it again becomes a complete ring and Gonzalo Gustioz is healed of his blindness in the epic poem Cantar de los Siete Infantes de Lara.[18] (Spanish mythology)

Ring of Gyges, a mythical magical artifact that granted its owner the power of invisibility. (Greek mythology)

Seal of Solomon, a magical brass or steel ring that could imprison demons. (Jewish mythology/Christian mythology)

Svíagriss, Adils' prized ring in the Hrólfr Kraki's saga. (Norse mythology)

Stone and Ring of Eluned the Fortunate, a cloak of invisibility owned by Merlin. (Welsh mythology)

Angelica's ring, a ring possessed by Angelica, princess of Cathay in the legends of Charlemagne. It rendered its wearer immune to all enchantments, and renders the user invisible when placed in their mouth. (Mythology in France)

Nibelungen ring, Alberich steals the Rhinegold from the Rhinemaidens, having learned that he who is willing to renounce love will thereby gain the ability to forge a ring of power from the gold. Alberich forges the ring and makes himself lord over all the Nibelungen. (German mythology)

Aladdin's ring, a magic ring the sorcerer from the Maghreb has lent him. When he rubs his hands in despair, he inadvertently rubs the ring and a genie appears. (Arabic mythology)

Wish ring, three princesses gave Halvor a ring to wish himself to his parents and back to Soria Moria Castle. (Scandinavian folklore)

Arm rings

The third gift — an enormous hammer (1902) by Elmer Boyd Smith and the ring Draupnir is visible among other creations by the Sons of Ivaldi

Keyur, a golden jewellery, worn by Krishna on his arm over the biceps. (Hindu mythology)

Earrings

Karna Kundala, the ear-rings of Karna (was present at his birth). (Hindu mythology)

Makarakundala, makara shaped ear-rings are sometimes worn by the Hindu gods, for

example Shiva, the Destroyer, or the Preserver-god Vishnu, the Sun god Surya, and the Mother Goddess Chandi. (Hindu mythology)
Shiva Kundala, the Hindu God Shiva wears two earrings or Kundalas. Traditional images of Shiva depict the two earrings named – Alakshya and Niranjana. (Hindu mythology)
Gemstones

As is usual in bestiaries, the lynx in this late 13th-century English manuscript is shown urinating, the urine turning to the mythical stone Lyngurium
Lyngurium (also Ligurium), the name of a mythical gemstone believed to be formed of the solidified urine of the lynx. (Medieval legend)
Batrachite, gemstones that were supposedly found in frogs, to which ancient physicians and naturalists attributed the virtue of resisting poison. (Medieval legend)
Draconite, a mythical gemstone taken from the head of a dragon and believed to have magical properties.
Tide jewels, the kanju (干珠?, lit. "(tide-)ebbing jewel") and manju (満珠?, lit. "(tide-)flowing jewel") were magical gems that the Sea God used to control the tides. (Japanese mythology)
Mermaid tears, Neptune forbade the mermaids to use their abilities to change the course of nature. In a horrible storm, one mermaid weathered the crossings for a ship. She had, over time, grown to fall in love with the ship's captain from afar. When she calmed the wind and waves to save the man's life, Neptune angrily exiled her to the depths of the ocean, and ordered her to never to swim to the surface again. Still, today, her brightly gleaming tears wash up on the shore as sea glass as a reminder of true love. (Medieval legend)
Five-colored Jewel from a Dragon's Neck, a jewel that shines five colors found in a dragon's neck. One of Kaguya-hime's suitor set out to search for the jewel. (Japanese mythology)
Hope Diamond, the diamond has been surrounded by a mythology of a reputed curse to the effect that it brings misfortune and tragedy to persons who own it or wear it, but there are strong indications that such stories were fabricated to enhance the stone's mystery and appeal, since increased publicity usually raised the gem's value and newsworthiness. Unsubstantiated legends claim that the original form of the Hope Diamond was stolen from an eye of a sculpted statue of the goddess Sita, the wife of Rama, the seventh Avatar of Vishnu.
Flaming pearl (also Wish-granting pearl), oriental dragons are shown with a flaming pearl under their chin or in their claws. The pearl is associated with spiritual energy, wisdom, prosperity, power, immortality, thunder, or the moon. (Chinese mythology)
Gem of Kukulkan, the Mayan god brought fire, earth, air, and water to the world. Kukulkan, though, only has the wind gem, and with it can control the air. (Maya mythology) [citation needed]
Gemstones from Hindu/Buddhist mythology

14th century Goryeo painting of Ksitigarbha holding a cintamani
Cintamani (also Chintamani Stone), a wish-fulfilling jewel within both Hindu and Buddhist traditions, equivalent to the philosopher's stone in Western alchemy. (Hindu

mythology/Buddhist mythology)
Kaustubha is a divine jewel or "Mani", which is in the possession of Vishnu. (Hindu mythology)
Navaratna are the sacred nine "royal gems". (Hindu mythology)
Syamantaka (also Syamantakamani and Shyamantaka Jewel), the most famous jewel that is supposed to be blessed with magical powers. (Hindu mythology)
Stones

The Stone of Destiny (Lia Fáil) at the Hill of Tara, once used as a coronation stone for the High Kings of Ireland
Baetyl, a sacred stone endowed with life. (Greek mythology)
Bezoar, a stone believed to provide an antidote against any poison.
Philosopher's stone, said to perform alchemy without an equal sacrifice being made, such as turning lead to gold, and creating something out of nothing. (Medieval legend)
Sesshō-seki (also Killing Stone), a stone that kills anyone who comes into contact with it. (Japanese mythology)
Stone of Giramphiel, a stone described in Diu Crône. Sir Gawain wins from the knight Fimbeus and it offers him protection against the fiery breath of dragons and the magic of the sorcerer Laamorz. (Arthurian legend)
Singasteinn (Old Norse singing stone or chanting stone), an object that appears in the account of Loki and Heimdallr's fight in the form of seals. (Norse mythology)
Llech Ronw (also Slate of Gron), a holed stone located along Afon Bryn Saeth in Blaenau Ffestiniog, Wales. The stone is described as being roughly forty inches by thirty inches with a hole of about an inch in diameter going through it. (Welsh mythology)
Adder stone, believed to have magical powers such as protection against eye diseases or evil charms, preventing nightmares, curing whooping cough, the ability to see through fairy or witch disguises and traps if looked at through the middle of the stone, and recovery from snakebite. (Welsh mythology)
Toadstone (also Bufonite), a mythical stone thought to be produced by a toad that provides an antidote to poison. (Medieval legend)
Stone of Scone (also Stone of Destiny), an oblong block of red sandstone. (Matter of Britain)
Sledovik, a sacred stone venerated in Slavic and Finnic pagan practices. (Slavic paganism)
Lia Fáil (also Stone of Destiny), a stone at the Inauguration Mound on the Hill of Tara in County Meath, Ireland. In legend, all of the kings of Ireland were crowned on the stone up to Muirchertach mac Ercae c. AD 500. (Irish mythology)
Thunderstone, throughout Europe, Asia, and Polynesia – flint arrowheads and axes turned up by farmer's plows are considered to have fallen from the sky. They were often thought to be thunderbolts and are called "thunderstones".
Gjöll, the rock to which Fenrir the wolf is bound. (Norse mythology)
Vaidurya, a precious stone worn by the goddesses Lakshmi and Rigveda. (Hindu Mythology)
Seer stone, some early-nineteenth-century Americans used seer stones in attempts to gain revelations from God or to find buried treasure. From about 1819, Joseph Smith

regularly practiced scrying, a form of divination in which a "seer" looked into a seer stone to receive supernatural knowledge. (Mormon mythology)

Urim and Thummim, a set of seer stones bound in a breastplate, or by silver bows into a set of spectacles. (Mormon mythology)

Lapis manalis (Stone of the Manes), was either of two sacred stones used in the Roman religion. One covered a gate to Pluto, abode of the dead; Festus called it ostium Orci, "the gate of Orcus". The other was used to make rain; this one may have no direct relationship with the Manes, but is instead derived from the verb manare, "to flow". The two stones had the same name. However, the grammarian Festus held the cover to the gate of the underworld and the rainmaking stone to be two distinct stones. (Roman mythology)

Charmstone (charm-stone and charm stone), a stone or mineral artifact associated with various traditional cultures, including those of Scotland and the native cultures of California and the American southwest.

Snakestones (also Serpentstones), fossilised ammonites were thought to be petrified coiled snakes, and were called snakestones. They were considered to be evidence for the actions of saints, such as Hilda of Whitby, a myth referenced in Sir Walter Scott's Marmion, and Saint Patrick, and were held to have healing or oracular powers. (Medieval legend)

Benben, the mound that arose from the primordial waters Nu, and on which the creator god Atum settled. (Egyptian mythology)

Omphalos, Zeus sent two eagles across the world to meet at its center, the "navel" of the world. Omphalos stones marking the center were erected in several places about the Mediterranean Sea; the most famous of those was at Delphi. Omphalos is also the name of the stone given to Cronus. (Greek mythology)

Uluru (also Ayers Rock), the first tells of serpent beings who waged many wars around Uluru, scarring the rock. The second tells of two tribes of ancestral spirits who were invited to a feast, but were distracted by the beautiful Sleepy Lizard Women and did not show up. In response, the angry hosts sang evil into a mud sculpture that came to life as the dingo. There followed a great battle, which ended in the deaths of the leaders of both tribes. The earth itself rose up in grief at the bloodshed, becoming Uluru. (Australian Aboriginal mythology)

Skofnung stone, a stone that can heal wounds made by the sword Skofnung. (Norse mythology)

Colored Stones of Nüwa, five colored stones crafted by the goddess Nüwa that each represent one of the five Chinese elements, fire, water, earth, metal, and wood. (Chinese Mythology)

Madstone, a special medicinal substance that, when pressed into an animal bite, was believed to prevent rabies by drawing the "poison" out. (American folklore)

Alatyr, a sacred stone, the "father to all stones", the navel of the earth, containing sacred letters and endowed with healing properties. (Slavic folklore)

Edun Ara, stones struck by lightning, used by Shango. (Yoruba mythology)

Vehicles

La Carreta Nagua (The Wagon), a haunted cart that is driven by Death and pulled by two skeletal oxen. It could supposedly be heard at night because of the sound of chains

it made being dragged along the streets. (Nicaraguan culture)
Airborne

Riding a Flying Carpet, an 1880 painting by Viktor Vasnetsov
Atet (also Sun Barge of Ra), the legendary boat that the Egyptian Solar deity Ra used to cross the sky during the day, and which bore his body through the Twelve Kingdoms of Knight. (Egyptian mythology)
Flying mortar and pestle of Baba Yaga, she flies around in a mortar and using the pestle as a rudder. (Slavic Mythology)

Akshaya Patra, a wonderful vessel given to Yudishtira by the Lord Surya which provided

a never-ending supply of food to the Pandavas every day. (Hindu mythology)
Crock and Dish of Rhygenydd Ysgolhaig, whatever food might be wished for in them, it would be found on them. It belonged to Rhygenydd the Cleric. (Welsh mythology)
Cornucopia (also Horn of Plenty), the horn of the goat-nymph Amalthea from which poured an unceasing abundance of nectar, ambrosia, and fruit. (Greek mythology)
Manna machine, a machine described within the Zohar writings that is similar to chlorella algae processing of today. (Jewish mythology)
Akshaya Tunir, an inexhaustible quiver of arrows belonging to Arjuna. (Hindu mythology)
Bridges

Adam's Bridge also called as Rama Setu
As-Sirāt, a narrow bridge which every person must pass on the Yawm ad-Din ("Day of the Way of Life" i.e. Day of Judgment) to enter Paradise. (Islamic mythology)
Bifröst, a burning rainbow bridge that reaches between Midgard (the world) and Asgard, the realm of the gods. (Norse mythology)
Chinvat Bridge (also Bridge of the Requiter), a sifting bridge which separates the world of the living from the world of the dead and is guarded by two four-eyed dogs. (Zoroastrianism)
Gjallarbrú (Gjöll Bridge), a covered bridge which spans the river Gjöll and must be crossed in order to reach Hel. (Norse mythology)
Rama Setu (also Rama's Bridge), a floating bridge across the sea constructed by the apes Nala and Nila in the epic poem Ramayana. (Hindu mythology)
Ame-no-ukihashi (Floating Bridge of Heaven), Izanagi and Izanami went to the bridge between heaven and earth to churn the sea below with Amenonuhoko. (Japanese mythology)
Columns
Djed, Isis asked for the pillar in the palace hall from the king and queen of Byblos in Lebanon, and upon being granted it, extracted the coffin from the pillar. She then consecrated the pillar, anointing it with myrrh and wrapping it in linen. This pillar came to be known as the pillar of djed. (Egyptian mythology)
Stambha (also Skambha), a cosmic column which joins the heaven (Svarga) and the earth (prithvi). (Hindu mythology)
Column of the Flagellation, the column which Jesus was tied to during the Flagellation of Christ, kept in the Basilica of Saint Praxedes in Rome. (Christian mythology)
Pillar of heaven, four pillars held Heaven and the goddess Nüwa repaired the pillars after the time when Heaven and Earth were in disruption. (Chinese mythology)
Pillar of salt, Lot's wife was turned into a pillar of salt when she looked back at the cities of Sodom and Gomorrah as they were destroyed. (Christian mythology)
Pillars of Hercules, Hercules raised two pillars at the Strait of Gibraltar when he passed by during one of his ten labours. The tenth labour was to obtain the Cattle of Geryon. (Greek mythology)
Ame-no-mihashira (Heavenly Pillar), Izanagi and Izanami came down from heaven and spontaneously built a central support column called the Ame-no-mihashira which upheld the "hall measuring eight fathoms" that the gods caused to appear afterwards. (Japanese mythology)

Gates

Gates of Alexander, a legendary barrier supposedly built by Alexander the Great to keep the uncivilized barbarians of the north from invading the land to the south. (Medieval legend)

Gates of hell, various places on the surface of the world that have acquired a legendary reputation for being entrances to the underworld. Often they are found in regions of unusual geological activity, particularly volcanic areas, or sometimes at lakes, caves or mountains.

Pearly gates, a conceptual entry to Heaven. (Christian mythology)

Torii, the world was plunged into darkness and chaos. The wrath of Amaterasu, the Goddess of the Sun, led her to retreat to a cave in Amano-Iwato. To make her come out again, the Gods thought over several solutions and decided to set a perch with roosters at the entrance of the cave. They would then sing eternally. Intrigued by their songs, the Amaterasu walked out of the cave, and the world was again bathed in light. Later, people decided to build bird perches at the entrances of shrines. (Japanese mythology)

Gates of Tartarus, a gate flanked by adamantine columns, a substance so hard that nothing can cut through it, akin to diamond. (Roman mythology)

Nets

Indra's net, one of the weapons of the sky-god Indra, used to snare and entangle enemies. The net also signifies magic or illusion. (Hindu mythology)

Rán's net, a net in which she tried to capture men who ventured out on the sea. Her net is also mentioned in Reginsmál and in the Völsunga saga, where she lends it to Loki so that he can capture Andvari. (Norse mythology)

Ogun's net, the unbreakable net that Ogun used to trap his wife Oya and her lover Shango when he caught them engaging in sexual activity. He subsequently dragged them, while still bound, before Olorun for judgement. In the versions of this myth from the Yoruba diaspora, the wife involved is Oshun. (Yoruba mythology)

Sobek's net, Sobek caught the Four sons of Horus in a net in the Nile river. (Egyptian mythology)

Hephaistos' net

Weighing scales

Libra (Weighing Scales), held by Dike or Astraea, the goddess of justice. (Greek and Roman mythology)

Scale of Maat, Anubis weighed the person's heart on a scale against the feather of Maat. If the heart is lighter than the feather, the person is allowed to pass into the afterlife. If not, the heart is eaten by Ammit. (Egyptian mythology)

Scale of justice, Themis was portrayed carrying scales. (Greek mythology)

Mul Zibanu (Scales or Balance), which were held sacred to the sun god Shamash, who was also the patron of truth and justice. (Mesopotamian mythology)

Famine's pair of scales, the third of the Four Horsemen of the Apocalypse rides on a Black Horse is Famine, and he who sat on it had a pair of scales in his hand. (Christian mythology)

Sharpening stones

Odin's whetstone, Baugi had nine thralls who killed each other in their desire to possess Odin's magical sharpening stone. (Norse mythology)

Whetstone of Tudwal Tudglyd, sharpens the blade of a fine warrior. It shall draw blood from any enemy of its user if its user be brave; if its user shall be cowardly, than the blade shall not be sharpened and draw no blood whatsoever. (Welsh mythology)
Wheels

Fortune Wheel
Rota Fortunae (Wheel of Fortune), a concept referring to the capricious nature of Fate. The wheel belongs to the goddess Fortuna, who spins it at random, changing the positions of those on the wheel – some suffer great misfortune, while others gain windfalls. (Greek mythology)
Wheel of time (also wheel of history and Kalachakra), is a concept found in several religious traditions and philosophies, which regard time as cyclical and consisting of repeating ages. (Hindu mythology)
Wheel of fire, which Ixion was bound to as punishment for lusting after Zeus's wife, Hera. (Greek mythology)
Buildings

Giza pyramids
Pyramid, a belief that the ancient Egyptian pyramids and objects of similar shape can confer a variety of benefits. Among these assumed properties are the ability to preserve foods, sharpen or maintain the sharpness of razor blades, etc. (Egyptian mythology)
World Mill (also Heavenly Mill and Cosmic Mill), a theme suggested as recurring in Indo-European and other mythologies. It involves the analogy of the cosmos or firmament and a rotating millstone. (Proto-Indo-European religion)
Tower of Babel, a united humanity agreed to build a tower "tall enough to reach heaven"; seeing this, God, confounded their speech so that they could no longer understand each other and scattered them around the world. (Jewish mythology/Christian mythology)
Heorot (Hall of the Hart), a mead-hall described in the Anglo-Saxon epic Beowulf as "the foremost of halls under heaven". It served as a palace for King Hroðgar, a legendary Danish king of the sixth century. (Anglo-Saxon mythology)
Ryūgū-jō (Dragon Palace Castle), undersea palace of Ryūjin, the dragon god of the sea. Depending on the version of the legend, it is built from red and white coral, or from solid crystal. (Japanese mythology)
Maleperduis, Reynard the Fox's principal hideaway, which is full of holes which Reynard can open and shut to elude his enemies. (Medieval legends)
Caer Dathyl, a fortress in Arfon in northern Gwynedd referred to in the Four Branches of the Mabinogi, the Tale of Math fab Mathonwy. (Welsh mythology)
Caer Sidi (also Caer Siddi), a legendary otherworld fortress mentioned in Middle Welsh mythological poems in the Book of Taliesin. (Welsh mythology)
Chicken-legged hut, Baba Yaga lives in a house standing on chicken legs, which enables the house to move about in accordance with Baba Yaga's wishes. When her house moves it spins while emitting a screeching noise. (Russian folklore)
Soria Moria Castle, the three princesses live in Soria Moria Castle, and only the West Wind knew where the castle was located. (Scandinavian folklore)
Santa's workshop, the legendary workshop where Santa Claus is said to make the toys

and presents, given out at Christmas. (Elf (film))
Wings

The fall of Icarus
Icarus' wings, which were made by Daedalus out of wax and bird feathers.
Egil' wings, Völund is held captive at Nidung's court. To help his brother, Egil shoots birds and collects their feathers, of which Völund makes a pair of wings and flies away. (Norse mythology)
Astronomical objects
Nibiru, a pseudoscientific proposed outer planet within the Solar System, described by Zecharia Sitchin.
Planet X, a hypothetical planet, now disproven, proposed in 1906 by Percival Lowell to have existed beyond the planet Neptune.
Sun, the earliest understanding of the Sun was that of a disk in the sky, whose presence above the horizon creates day and whose absence causes night. In the Bronze Age, this understanding was modified by assuming that the Sun is transported across the sky in a boat or a chariot, and transported back to the place of sunrise during the night passing through the underworld. In many cultures, such as Aboriginal and Native American legends, the raven stole the sun and placed it in the sky.
Counter-Earth (also Antichthon), a hypothetical planet always on the other side of the Sun from Earth.
Kolob, a star or planet described in the Book of Abraham. It is the heavenly body nearest to the Throne of God. (Book of Mormon)
Neith, a hypothetical natural satellite of Venus reportedly sighted by Giovanni Cassini in 1672 and by several other astronomers in following years.
Chiron, the name given to a supposed moon of Saturn sighted by Hermann Goldschmidt in 1861. It has since been determined that no such moon exists.
Themis, William H. Pickering announced the discovery of a tenth satellite of Saturn. The photographic plates on which it supposedly appeared, thirteen in all, spanned a period between April 17 and July 8, 1904. However, no other astronomer has ever confirmed Pickering's claim.
Phaeton, an hypothetical planet hypothesized by the Titius–Bode law to have existed between the orbits of Mars and Jupiter, the destruction of which supposedly led to the formation of the asteroid belt (including the dwarf planet Ceres).
Tyche, an hypothetical gas giant located in the Solar System's Oort cloud, first proposed in 1999 by astrophysicists John Matese, Patrick Whitman and Daniel Whitmire of the University of Louisiana at Lafayette.
Vulcan, a small hypothetical planet that was proposed to exist in an orbit between Mercury and the Sun. The 19th-century French mathematician Urbain Le Verrier hypothesized that peculiarities in Mercury's orbit were the result of another planet.
Vulcanoid, a hypothetical population of asteroids that orbit the Sun in a dynamically stable zone inside the orbit of the planet Mercury. They are named after the hypothetical planet Vulcan, whose existence was disproven in 1915 with the advent of general relativity. So far, no vulcanoids have been discovered, and it is not yet clear whether any exist.

Planet V, a hypothetical fifth terrestrial planet posited by NASA scientists John Chambers and Jack J. Lissauer to have once existed between Mars and the asteroid belt.

Nemesis, a hypothetical red dwarf or brown dwarf, originally postulated in 1984 to be orbiting the Sun at a distance of about 95,000 AU (1.5 light-years), somewhat beyond the Oort cloud, to explain a perceived cycle of mass extinctions in the geological record, which seem to occur more often at intervals of 26 million years.

Lilith, a fictitious invisible second moon of Earth, supposedly about the same mass as the Earth's Moon, proposed in 1918 by astrologer Walter Gorn Old.

Star of Ishtar (also Star of Inanna), a symbol of the ancient Sumerian goddess Inanna and her East Semitic counterpart Ishtar. Because Ishtar was associated with the planet Venus, the star is also known as the Star of Venus. (Mesopotamian mythology)

Winged sun, a symbol associated with divinity, royalty and power. (Egyptian mythology)

Torture devices

Perillos being forced into the brazen bull that he built for Phalaris

Brazen bull (also Bronze bull or Sicilian bull), an alleged torture and execution device invented by Perillos of Athens, who offered it to Phalaris, the tyrant of Akragas, Sicily, as a new means of executing criminals.

Paolao, a legendary torture device created by the wicked fox spirit Daji. It was a tall bronze cylinder heated with charcoal, but if one fell off they would die. With no other alternatives one was forced to dance atop the cylinder until they died. (Chinese Mythology)

Tools

Holy Nails, the nails with which Christ was crucified. (Christian mythology)

Rati, a drill or auger that was used by Odin during his quest to obtain the mead of poetry. (Norse mythology)

Reginnaglar (Old Norse God Nails), are nails used for religious purposes. (Norse mythology)

Miscellaneous

Voodoo doll with pins in it, Museum of Witchcraft

Chessboard of Gwenddoleu ap Ceidio, a large chess board made of gold with pieces of silver and crystal. The pieces play by themselves if set up correctly. (Welsh mythology)

Neith's loom, which Neith uses to weave all of existence into being. (Egyptian mythology)

Father Time's hourglass, carrying an hourglass representing time's constant movement. Many believe that Father Time, like the Grim Reaper, is constantly watching humans and has each and every one of their hourglasses slowly decreasing, sand casually slipping through the hands of time.

Bangu, a bell in Glasgwm Church which was gifted by Saint David. Once a woman took the bell to the nearby town of Rharadr. Her husband was imprisoned in the castle and she believed that if she rang the bell he would be released. But the guards seized it and chased her out of town. That night the town was destroyed by fire, and the only part of it which escaped the flames was the wall on which the sacred bell was hanging. (Medieval legend)

Voodoo doll, an effigy into which pins are inserted. Although it comes in various different forms, such practices are found in the magical traditions of many cultures across the world. (English folklore)

Dreamcatcher, the Ojibwe storytellers speak of the Spider Woman, known as Asibikaashi; she took care of the children and the people on the land. Eventually, the Ojibwe Nation spread across North America and it became difficult for Asibikaashi to reach all the children. So the mothers and grandmothers would weave magical webs for the children, using willow hoops and sinew, or cordage made from plants. The dreamcatchers would filter out all bad dreams and only allow good thoughts to enter our mind. Once the sun rises, all bad dreams just disappear. (Anishinaabe mythology)

Ibong Adarna's droppings, said to turn living beings into stone upon contact. (Philippine mythology)

Kave's apron, according to legend, a Persian blacksmith made a battle flag by hanging his smith's apron from a spear, and used it to rally the people against the wicked king, Zahak. (Persian mythology)

Koschei's needle, Koschei cannot be killed by conventional means targeting his body. His soul is hidden separate from his body inside a needle, which is in an egg, inside of a duck, inside of a hare, in an iron chest buried under a green oak tree, which is on the island of Buyan. (Slavic folklore)

Shirikodama, Kappas can gain power by taking human's shirikodama, a mythical ball said to contain the soul. (Japanese mythology)

Crystal skull, some individuals believe in the paranormal claim that crystal skulls can produce a variety of miracles.

Vasilisa's doll, Vasilisa's mother gave her a tiny wooden doll with instructions to give it a little to eat and a little to drink if she were in need. (Russian folklore)

Sheelah's brush (also Sheelagh's brush or Sheila's brush), the alleged wife of Saint Patrick who would sweep the winter away and gives one last snowstorm after Saint Patrick's Day. (Irish folklore)

Jacob's ladder, a ladder leading to heaven that was featured in a dream Jacob had during his flight from his brother Esau in the Book of Genesis. (Abrahamic religions)

Vase of Soissons, legendary sacred vase, probably in precious metal.

From Greek mythology

Winnowing Oar, an object that appears in Books XI and XXIII of Homer's Odyssey.

Athena's bridle, Polyeidos told Bellerophon to sleep in the temple of Athena. While he slept, he dreamed that Athena set a golden bridle beside him. He awoke and found the bridle he dreamt about in his hands. Afterwards, he went to the meadow Pegasus was grazing at, and was able to bridle and tame Pegasus without difficulty.

Talos, a giant bronze automaton to protect Europa in Crete from pirates and invaders.

From Norse mythology

Svefnthorn (Sleep Thorn), used to put an adversary into a deep sleep from which they would not awaken for a long time.

Friggerock (Frigg's distaff), the Orion's Belt asterism within the constellation of Orion was once known as "Frigg's Distaff". To explain this attribution, some scholars have pointed out that the constellation is on the celestial equator and thus the stars rotating in the night sky may have been associated with Frigg's spinning wheel.

From Germanic heroic legend

Main article: List of named weapons, armour and treasures in Germanic heroic legend

From Christian mythology

Early Hebrew Conception of the Universe

Firmament, the structure above the atmosphere, conceived as a vast solid dome according to the Biblical cosmology. According to the Genesis creation narrative, God created the firmament to separate the "waters above" the earth from the "waters below" the earth.

True Cross, the name for the physical remnants which, by a Catholic church tradition, are believed to be from the cross upon which Jesus was crucified.

Shroud of Turin (also Turin Shroud), a length of linen cloth bearing the image of a man, is believed by some to be the burial shroud of Jesus of Nazareth.

Sudarium of Oviedo (also Shroud of Oviedo), a bloodstained piece of cloth that is claimed to be the cloth wrapped around the head of Jesus Christ after he died.

Image of Edessa, a holy relic consisting of a square or rectangle of cloth upon which a miraculous image of the face of Jesus had been imprinted.

Holy Sponge, a sponge dipped in vinegar (or in some translations sour wine), most likely posca, a favorite beverage of Roman soldiers, and offered to Christ to drink during the crucifixion.

From Hindu Mythology

Main article: List of mythological objects (Hindu Mythology)

From the Book of Mormon

Liahona, a compass-like device given by God to the prophet Lehi and his family to help them navigate through the wilderness. It was powered by faith and obedience to God and if anyone in the party lost faith or sinned, it would stop working until that person repented.

Title of Liberty, a battle standard used by Captain Moroni to rally the Nephites to arms against the armies of Amalickiah. It was made from Moroni's torn cloak, upon which he wrote, "In memory of our God, our religion, and freedom, and our peace, our wives, and our children".

Explanatory notes

Rule of thumb: include magical swords in fornaldarsögur but treat swords in Sagas of Icelanders or sagas of the kings as "historical"

Celtic mythology

Ogma, a figure from Irish and Scottish mythology, said to have invented the Ogham alphabet[8]

Ceridwen, a figure from Welsh mythology, said to be the keeper of the cauldron of knowledge, mother of transformation and the white lady of inspiration and death.

Chinese mythology

Wenchang Wang, the god of literature and scholarship

Kui Xing, God of examinations

Zhuyu Xingjun, God of examination successes [citation needed]

Guan Yu, God of military exams (General)

Lu Dongbin, God of daoist inner alchemy knowledge (scholar and poet)

Laozi, God of wisdom (philosopher)

Bao Zheng, Star of literature (politician)

Manjushri, the bodhisattva of wisdom[9][10]

Christian mythology

The Holy Spirit is the person of the Triune Godhead who is tasked with guiding humans towards knowledge of righteous action. The Spirit's duties includes pointing non-believers towards knowledge of the Christian faith, and the faithful towards knowledge of right and just action and lifestyle.[11]

Etruscan mythology

Menrva, goddess of wisdom, war, weaving, and medicine[12]

Greek mythology

Apollo, god of oracles, knowledge, civilization, music, healing, education, and youth

Athena, Olympian goddess of wisdom, civilization, weaving, and war strategy

Coeus, Titan of the inquisitive mind, his name meaning "query" or "questioning". He is the grandfather of Apollo.

Hermes, a god of cunning

Metis, the Titan associated most closely with wisdom and the mother of Athena, whose name in Ancient Greek described a combination of wisdom and cunning.[13][14]

Mnemosyne, Titan of memory, and one of the deities worshipped by the Cult of Asclepius in hopes that she would help supplicants remember visions[15]

Phoebe, a goddess of intellect[16]

Hindu mythology

A Saraswati statue in a park.

Saraswati, goddess of knowledge, creativity, and speech

Ganesha, god of wisdom, luck, and new beginnings

Kartikeya, god of war, victory, and knowledge

Brihaspati, guru of the devas

Shukra, guru of the asuras

Dakshinamurti, an aspect of Shiva as the guru of sages

Vidya Lakshmi, an aspect of Lakshmi as the bestower of knowledge

Hayagriva, an aspect of Vishnu as the god of knowledge

Gayatri, a form of Saraswati and the goddess of hymns

Savitri, a form of Saraswati and goddess of wisdom[17][18]

Hittite mythology
A'as, god of wisdom
Kamrusepa[19][20]
Japanese mythology
Benzaiten, a Japanese form of Saraswati, goddess of everything that flows: water, words, speech, eloquence, music and by extension, knowledge.
Fukurokuju, god of wisdom and longevity
Kuebiko, scarecrow god of wisdom and agriculture
Omoikane, Shinto god of wisdom and intelligence
Tenjin, god of scholarship[21][22]
Middle Eastern mythology
Al-Kutbay, Nabataean god of knowledge and writing
Enki, Sumerian god of intelligence, crafts, mischief, water, and creation
Nabu, Babylonian god of wisdom and writing
Ninimma, a minor Mesopotamian goddess regarded as the scribe and scholar of Enlil
Nisaba, Sumerian goddess of writing, learning, and the harvest[23]
Muisca mythology
Bochica, messenger god of knowledge[24]
Neoplatonism
Nous, the cosmic embodiment of knowledge and intellect.
Lakota mythology
Hnašká, Lakota frog spirit of pezuota (sacred medicine)
Hunúŋpa, Lakota bear spirit of wóksape (Lakota concept of sacred knowledge), lesser spirit of knowledge
Iktómi, Lakota spider spirit of wóksape and trickery, greater knowledge spirit
Kssa, Oglala spirit of knowledge, sometimes considered Iktómi before being stripped of his title
Matȟó, Lakota mischievous healer spirit, taught the Lakota to fish
Ptesáŋwiŋ/White buffalo calf woman, Lakota prophetess, often conflated with Wohpe
Wiyóhiyaŋpa, Lakota wind spirit of the east, oversees new beginnings and knowledge
Whapiya/Wóhpe, Lakota spirit of knowledge, wishes, dreams, visions, prophecy and the wife of Okaga the south wind
Zuzéča, Lakota snake spirit of hidden knowledge and lies
Norse mythology

Wodan and Frea by Emil Doepler.
Mimir, god of wisdom
Gefjon, goddess associated with plowing, foreknowledge, and virginity.
Odin, god of wisdom who nevertheless relentlessly keeps searching for more knowledge; associated with the runes
Frigg, she is said to know the future, but never tells. The three following goddesses may be hypostases of her.
Sága, goddess of wisdom
Snotra, goddess associated with wisdom
Vör, goddess associated with wisdom[25]

Numerous minor characters in Norse mythology are said to be very wise, though there's often no instance of them demonstrating this supposed wisdom:
Dwarfs, particularly Alviss, whose name means "all-wise". Thor keeps him from marrying his daughter by challenging him to a wisdom contest that lasts all night. He's turned to stone by the rising sun.
Elfs possibly
Heimdallr
Kvasir
Tyr
Utgard-Loki, while not outright stated to be wise, he's notable for being the only giant to be cleverer than the gods and getting to escape with his life
Vafthrudnir, a wise jotunn Odin seeks out to challenge to a wisdom contest[26]
the Vanir in general[27]
Iranian mythology
Anahita, goddess of wisdom
Ahura Mazda, Zoroastrian god of light, benevolence, creation, truth, and perfect wisdom
Chista, goddess of wisdom and knowledge, she leads the mortals to the right way in life and the afterlife; she is also the goddess of religion in Zoroastrian mythology.[28]

Anahita Vessel, 300-500 AD, Sasanian, Iran, silver and gilt – Cleveland Museum of Art – DSC08130
Polynesian mythology
Anulap, god of magic and knowledge
Eijebong[29]
Roman mythology
Egeria, a water nymph who gives wisdom and prophecy in return for libations of water or milk at her sacred grove
Fabulinus, the God who teaches children to speak
Minerva, goddess of wisdom, strategy and crafts, the Roman equivalent of Athena
Providentia, goddess of forethought
Neptune, the god of the sea and freshwater, is said to have all the knowledge of water.[30]
Slavic mythology
Gamayun - symbol of knowledge and wisdom[citation needed]
Veles - Veles has been the most revered god in the Vedic pantheon of Slavic culture since ancient times. He is the patron saint of the interworld — both Light and Darkness are subject to him, he is also called Prophetic, Wise, because in the three worlds he manifests his power, he is the one who knows light and darkness, sets the energy of the world in motion, rotates the Universe, he is a permanent guardian on the border of the worlds, a spiritual mentor, he knows all the secrets of the universe.
Sumerian mythology
Geshtu-E, Minor god of intelligence who was sacrificed to bring forth humanity.
Turkic mythology
Mergen, deity of abundance and wisdom. Mergen symbolizes intelligence and thought.[31]

Vietnamese mythology

Nữ thần nghề mộc, the goddess who taught mankind how to create everyday utensils.

Văn Xương, god of exams, he holds the honor and career of those who follow the academic path.

Yoruban mythology

Ọrunmila

TIL about "The Indiscreet Jewels", a French novel published in 1748 about a magical ring that makes vaginas talk, literally. Its author, Denis Diderot, is one of the most prominent figures of the Age of Enlightenment.
Popular comment · He probably took inspiration from a 14th century fabliau (short narrative in verse) titled "About a knight that made cunts speak". Excerpt: “Sire, have no worries! Have you forgotten the gift of the youngest? If the cunt cannot speak, it's the arse! —By my head, blessed be you! Huet, you speak truly!” said the knight, laughing, who immediately called the arse loudly, begged it, implored it, and urged it to reveal the reason for the cunt's obstinate silence. “It is impossible for him to speak,” said the arse in a very audible voice, because the cunt's mouth is full, of cotton, linen, or wool, which my lady stuffed into it just now when she went to her room. If it is removed, it will be able to move its lips, and I know very well that it will speak!”

Another French museum was robbed — just hours after the theft at the Louvre This time, the target was the Denis Diderot House of Enlightenment in Langres. Thieves made off with a “treasure” — a unique collection of nearly 2,000 coins: 1,633 silver and 319 gold, minted between 1790 and 1840, with an estimated value of around €90,000. In an official statement, the city administration strongly condemned the act of vandalism and theft, calling it an attack on the shared cultural heritage. But maybe it’s time to start

Another French museum robbed: the Denis Diderot House in Langres On the morning of October 20, staff arriving at the Denis Diderot House museum in Langres, northwestern France, discovered a broken entrance door and a shattered glass display case containing gold and silver coins. Thieves stole part of the coin collection, which includes 1,633 silver coins and 319 gold coins minted between 1790 and 1840, discovered during the 2011 restoration of the museum building. Other museum exhibits were reportedly untouched.

France, what's going on? While the world was transfixed by the Louvre heist, ANOTHER museum was robbed. Yes, you read that right — the latest victim is the Denis Diderot House of Enlightenment Museum. Thieves made off with 2,000 gold and silver coins, many unearthed during a 2011 renovation. These coins date back to the 18th and 19th centuries. The break-in happened overnight from Sunday to Monday, just hours after the Louvre theft. They forced open the entrance and smashed display cases. Clouseau is investigating. Naturally.

Denis Diderot (/ˈdiːdəroʊ/;[2] French: [dəni did(ə)ʁo]; 5 October 1713 – 31 July 1784) was a French philosopher, art critic, and writer, best known for serving as co-founder, chief editor, and contributor to the Encyclopédie along with Jean le Rond d'Alembert. He was a prominent figure during the Age of Enlightenment.[3]

Diderot initially studied philosophy at a Jesuit college, then considered working in the church clergy before briefly studying law. When he decided to become a writer in 1734, his father disowned him. He lived a bohemian existence for the next decade. In the 1740s he wrote many of his best-known works in both fiction and non-fiction, including the 1748 novel Les Bijoux indiscrets (The Indiscreet Jewels).

In 1751 Diderot co-created the Encyclopédie with Jean le Rond d'Alembert. It was the first encyclopedia to include contributions from many named contributors and the first to describe the mechanical arts. Its secular tone, which included articles skeptical about Biblical miracles, angered both religious and government authorities; in 1758 it was banned by the Catholic Church and, in 1759, the French government banned it as well, although this ban was not strictly enforced. Many of the initial contributors to the Encyclopédie left the project as a result of its controversies and some were even jailed. D'Alembert left in 1759, making Diderot the sole editor. Diderot also became the main contributor, writing around 7,000 articles. He continued working on the project until 1765. He was increasingly despondent about the Encyclopédie by the end of his involvement in it and felt that the entire project might have been a waste. Nevertheless, the Encyclopédie is considered one of the forerunners of the French Revolution.

Diderot struggled financially throughout most of his career and received very little official recognition of his merit, including being passed over for membership in the Académie Française. His fortunes improved significantly in 1766, when Russian Empress Catherine the Great, who had heard of his financial troubles, bought his 3,000-volume personal library, amassed during his work on the Encyclopédie, for 15,000 livres, and offered him in addition a thousand more livres per year to serve as its custodian while he lived.[4] He received 50 years' "salary" up front from her, and stayed five months at her court in Saint Petersburg in 1773 and 1774, sharing discussions and writing essays on various topics for her several times a week.[5][6]

Diderot's literary reputation during his life rested primarily on his plays and his contributions to the Encyclopédie; many of his most important works, including Jacques the Fatalist, Rameau's Nephew, Paradox of the Actor, and D'Alembert's Dream, were published only after his death.[7][1]:678–679[8]

Early life

N° 9 de la place dans le centre ville de Langres: in the background on the right side is Diderot's birthplace

Statue of Denis Diderot in the city of Langres, his birthplace
Denis Diderot was born in Langres, Champagne. His parents were Didier Diderot, a cutler, maître coutelier, and Angélique Vigneron. Of Denis' five siblings, three survived to adulthood: Denise Diderot, their youngest brother Pierre-Didier Diderot and, their sister Angélique Diderot. Denis Diderot greatly admired his sister Denise, sometimes referring to her as "a female Socrates".[9]

Diderot began his formal education at a Jesuit college in Langres. In 1732 he received the degree of Master of Arts from the University of Paris. He abandoned the idea of entering the clergy in 1735[10] and, instead, decided to study at the Paris Law Faculty. His study of law was short-lived, however, and in the early 1740s he decided to become a writer and translator.[10] Because of his refusal to enter one of the learned professions, he was disowned by his father and, for the next ten years, he lived a bohemian existence.[5]

In 1742 he formed a friendship with Jean-Jacques Rousseau, whom he met while watching games of chess and drinking coffee at the Café de la Régence.[10] In October 1743, he further alienated his father by marrying Antoinette Champion (1710–1796), a devout Catholic.[10] Diderot senior considered the match inappropriate, given Champion's low social standing, poor education, fatherless status, and lack of a dowry. She was about three years older than Diderot. She bore Diderot one surviving child, a girl,[11] named Angélique, after both Diderot's dead mother and his sister. The death in 1749 of his sister Angélique, a nun, in her convent, may have affected Diderot's opinion of religion. She is assumed to have been the inspiration for his novel about a nun, La Religieuse, in which he depicts a woman who is forced to enter a convent, where she suffers at the hands of her fellow nuns.[5][12]

Diderot was unfaithful to his wife, and had affairs with Anne-Gabrielle Babuty (who would marry and later divorce the artist Jean-Baptiste Greuze), Madeleine de Puisieux, Sophie Volland, and Mme de Maux (Jeanne-Catherine de Maux), to whom he wrote numerous surviving letters and who eventually left him for a younger man.[1]:675–676 Diderot's letters to Sophie Volland are known for their candor and are regarded to be "among the literary treasures of the eighteenth century".[1]:675

Early works

Diderot's earliest works included a translation of Temple Stanyan's History of Greece (1743). In 1745, he published a translation of Shaftesbury's Inquiry Concerning Virtue and Merit, to which he had added his own "reflections".[1]:625 With two colleagues, François-Vincent Toussaint and Marc-Antoine Eidous, he produced a translation of Robert James's Medicinal Dictionary (1746–1748).[13]

Philosophical Thoughts

Main article: Philosophical Thoughts
In 1746, Diderot wrote his first original work: the Philosophical Thoughts (Pensées philosophiques).[14][15] In this book, Diderot argued for a reconciliation of reason with

feeling so as to establish harmony. According to Diderot, without feeling there is a detrimental effect on virtue, and no possibility of creating sublime work. However, since feeling without discipline can be destructive, reason is necessary to control feeling.[1]: 625

At the time Diderot wrote this book he was a deist. Hence there is a defense of deism in this book, and some arguments against atheism.[1]:625 The book also contains criticism of Christianity.[1]:626

The Skeptic's Walk

Main article: The Skeptic's Walk

In 1747, Diderot wrote The Skeptic's Walk (Promenade du sceptique)[16] in which a deist, an atheist, and a pantheist have a dialogue on the nature of divinity. The deist gives the argument from design. The atheist says that the universe is better explained by physics, chemistry, matter, and motion. The pantheist says that the cosmic unity of mind and matter, which are co-eternal and comprise the universe, is God. This work remained unpublished until 1830. Accounts differ as to why. It was either because the local police, warned by the priests of another attack on Christianity, seized the manuscript, or because the authorities forced Diderot to give an undertaking that he would not publish this work.[1]:626

The Indiscreet Jewels

Main article: The Indiscreet Jewels

In 1748, Diderot needed to raise money on short notice. His wife had borne him a child, and his mistress Madeleine de Puisieux was making financial demands of him. According to his Daughter's (uncorroborated) Mémoires pour servir â l’histoire de la vie et des ouvrages de Diderot, at this time, Diderot told his mistress that writing a novel was a trivial task, whereupon she challenged him to write one, and so Diderot produced The Indiscreet Jewels (Les bijoux indiscrets).[17]

The book about the magical ring of a Sultan that induces any woman's "discreet jewels"[18][note 1] to confess their sexual experiences when the ring is pointed at them.[1]:626–627 In all, the ring is pointed at thirty different women in the book—usually at a dinner or a social meeting—with the Sultan typically being visible to the woman.[19][1]: 627 However, since the ring has the additional property of making its owner invisible when required, a few of the sexual experiences recounted are through direct observation with the Sultan making himself invisible and placing his person in the unsuspecting woman's boudoir.[19]

Besides the bawdiness, there are several digressions into philosophy, music, and literature in the book. In one such philosophical digression, the Sultan has a dream in which he sees a child named "Experiment" growing bigger and stronger till the child demolishes an ancient temple named "Hypothesis". The book proved to be lucrative for Diderot even though it could only be sold clandestinely. It is Diderot's most published work.[1]:627

The book is believed to draw upon the 1742 libertine novel Le Sopha by Claude Prosper Jolyot de Crébillon (Crébillon fils).[1]:627

Scientific work

Diderot kept writing on science in a desultory way all his life. The scientific work of which he was most proud was Memoires sur differents sujets de mathematique (1748). This work contains original ideas on acoustics, tension, air resistance, and "a project for a new organ" that could be played by all. Some of Diderot's scientific works were applauded by contemporary publications of his time such as The Gentleman's Magazine, the Journal des savants; and the Jesuit publication Journal de Trevoux, which invited more such work: "on the part of a man as clever and able as M. Diderot seems to be, of whom we should also observe that his style is as elegant, trenchant, and unaffected as it is lively and ingenious."[1]:627

On the unity of nature Diderot wrote, "Without the idea of the whole, philosophy is no more," and, "Everything changes; everything passes; nothing remains but the whole." He wrote of the temporal nature of molecules, and rejected emboîtement, the view that organisms are pre-formed in an infinite regression of non-changing germs. He saw minerals and species as part of a spectrum, and he was fascinated with hermaphroditism. His answer to the universal attraction in corpuscular physics models was universal elasticity. His view of nature's flexibility foreshadows the discovery of evolution, but it is not Darwinistic in a strict sense.[20]

Letter on the Blind

Diderot's celebrated Letter on the Blind (Lettre sur les aveugles à l'usage de ceux qui voient) (1749) introduced him to the world as an original thinker.[21] The subject is a discussion of the relation between reasoning and the knowledge acquired through perception (the five senses). The title of his book also evoked some ironic doubt about who exactly were "the blind" under discussion. In the essay, blind English mathematician Nicholas Saunderson[22] argues that, since knowledge derives from the senses, mathematics is the only form of knowledge that both he and a sighted person can agree on. It is suggested that the blind could be taught to read through their sense of touch. (A later essay, Lettre sur les sourds et muets, considered the case of a similar deprivation in the deaf and mute.) According to Jonathan Israel, what makes the Lettre sur les aveugles so remarkable, however, is its distinct, if undeveloped, presentation of the theory of variation and natural selection.[23]

This powerful essay, for which La Mettrie expressed warm appreciation in 1751, revolves around a remarkable deathbed scene in which a dying blind philosopher, Saunderson, rejects the arguments of a deist clergyman who endeavours to win him around to a belief in a providential God during his last hours. Saunderson's arguments are those of a neo-Spinozist Naturalist and fatalist, using a sophisticated notion of the self-generation and natural evolution of species without creation or supernatural intervention. The notion of "thinking matter" is upheld and the "argument from design" discarded (following La Mettrie) as hollow and unconvincing. The work appeared anonymously in Paris in June 1749, and was vigorously suppressed by the authorities. Diderot, who had been under police surveillance since 1747, was swiftly identified as the author, had his manuscripts confiscated, and he was imprisoned for some months, under a lettre de cachet, on the outskirts of Paris, in the dungeons at Vincennes where he was visited almost daily by Rousseau, at the time his closest and most assiduous ally.[24]

Voltaire wrote an enthusiastic letter to Diderot commending the Lettre and stating that he had held Diderot in high regard for a long time, to which Diderot sent a warm response. Soon after this, Diderot was arrested.[1]:629–630

Science historian Conway Zirkle has written that Diderot was an early evolutionary thinker and noted that his passage that described natural selection was "so clear and accurate that it almost seems that we would be forced to accept his conclusions as a logical necessity even in the absence of the evidence collected since his time."[25]

Incarceration and release

Angered by public resentment over the Peace of Aix-la-Chapelle, the government started incarcerating many of its critics. It was decided at this time to rein in Diderot. On 23 July 1749, the governor of the Vincennes fortress instructed the police to incarcerate Diderot, and the next day he was arrested and placed in solitary confinement at Vincennes. It was at this period that Rousseau visited Diderot in prison and came out a changed man, with newfound ideas about the disadvantages of knowledge, civilization, and Enlightenment – the so-called illumination de Vincennes.[26]

Diderot had been permitted to retain one book that he had in his possession at the time of his arrest, Paradise Lost, which he read during his incarceration. He wrote notes and annotations on the book, using a toothpick as a pen, and ink that he made by scraping slate from the walls and mixing it with wine.[1]:630

In August 1749, Mme du Chatelet, presumably at Voltaire's behest, wrote to the governor of Vincennes, who was her relative, pleading for Diderot to be lodged more comfortably during his incarceration. The governor then offered Diderot access to the great halls of the Vincennes castle and the freedom to receive books and visitors providing he wrote a document of submission.[1]:630 On 13 August 1749, Diderot wrote to the governor:

I admit to you ... that the Pensées, the Bijoux, and the Lettre sur les aveugles are debaucheries of the mind that escaped from me; but I can ... promise you on my honor (and I do have honor) that they will be the last, and that they are the only ones ... As for those who have taken part in the publication of these works, nothing will be hidden from you. I shall depose verbally, in the depths [secrecy] of your heart, the names both of the publishers and the printers.[27]

On 20 August, Diderot was moved to a comfortable room in the fortess and allowed to meet visitors and walk within the gardens. On 23 August, Diderot signed another letter promising never to leave the prison without permission.[1]:631 On 3 November 1749, he was given his freedom.[1]:632 Subsequently, in 1750, he released the prospectus for the Encyclopédie.[1]:633

Encyclopédie

Main article: Encyclopédie

Genesis

Title page of the Encyclopédie

André le Breton, a bookseller and printer, approached Diderot with a project for the publication of a translation of Ephraim Chambers' Cyclopaedia, or Universal Dictionary of Arts and Sciences into French, first undertaken by the Englishman John Mills, and followed by the German Gottfried Sellius.[4] Diderot accepted the proposal, and transformed it. He persuaded Le Breton to publish a new work, which would consolidate ideas and knowledge from the Republic of Letters. The publishers found capital for a larger enterprise than they had first planned. Jean le Rond d'Alembert was persuaded to become Diderot's colleague, and permission was procured from the government.

In 1750, an elaborate prospectus announced the project, and the first volume was published in 1751.[4] This work was unorthodox and advanced for the time. Diderot stated that "An encyclopedia ought to make good the failure to execute such a project hitherto, and should encompass not only the fields already covered by the academies, but each and every branch of human knowledge." Comprehensive knowledge will give "the power to change men's common way of thinking."[28] The work combined scholarship with information on trades. Diderot emphasized the abundance of knowledge within each subject area. Everyone would benefit from these insights.

Controversies

Diderot's work, however, was mired in controversy from the beginning; the project was suspended by the courts in 1752. Just as the second volume was completed, accusations arose regarding seditious content, concerning the editor's entries on religion and natural law. Diderot was detained and his house was searched for manuscripts for subsequent articles: but the search proved fruitless as no manuscripts could be found. They had been hidden in the house of an unlikely confederate—Chretien de Lamoignon Malesherbes, who originally ordered the search. Although Malesherbes was a staunch absolutist, and loyal to the monarchy—he was sympathetic to the literary project.[29] Along with his support, and that of other well-placed influential confederates, the project resumed. Diderot returned to his efforts only to be constantly embroiled in controversy.

These twenty years were to Diderot not merely a time of incessant drudgery, but harassing persecution and desertion of friends. The ecclesiastical party detested the Encyclopédie, in which they saw a rising stronghold for their philosophic enemies. By

1757, they could endure it no longer—the subscribers had grown from 2,000 to 4,000, a measure of the growth of the work in popular influence and power.[4] Diderot wanted the Encyclopédie to give all the knowledge of the world to the people of France. However, the Encyclopédie threatened the governing social classes of France (aristocracy) because it took for granted the justice of religious tolerance, freedom of thought, and the value of science and industry.[30] It asserted the doctrine that the main concern of the nation's government ought to be the nation's common people. It was believed that the Encyclopédie was the work of an organized band of conspirators against society, and that the dangerous ideas they held were made truly formidable by their open publication. In 1759, the Encyclopédie was formally suppressed.[4] The decree did not stop the work, which went on, but its difficulties increased by the necessity of being clandestine. Jean le Rond d'Alembert withdrew from the enterprise and other powerful colleagues, including Anne Robert Jacques Turgot, Baron de Laune, declined to contribute further to a book that had acquired a bad reputation.[21]

Diderot's contribution

Diderot was left to finish the task as best he could. He wrote approximately 7,000 articles,[31] some very slight, but many of them laborious, comprehensive, and long. He damaged his eyesight correcting proofs and editing the manuscripts of less scrupulous contributors. He spent his days at workshops, mastering manufacturing processes, and his nights writing what he had learned during the day. He was incessantly harassed by threats of police raids. The last copies of the first volume were issued in 1765.

In 1764, when his immense work was drawing to an end, he encountered a crowning mortification: he discovered that the bookseller, Le Breton, fearing the government's displeasure, had struck out from the proof sheets, after they had left Diderot's hands, all passages that he considered too dangerous. "He and his printing-house overseer", writes Furbank, "had worked in complete secrecy, and had moreover deliberately destroyed the author's original manuscript so that the damage could not be repaired."[32] The monument to which Diderot had given the labor of twenty long and oppressive years was irreparably mutilated and defaced.[4] It was 12 years, in 1772, before the subscribers received the final 28 folio volumes of the Encyclopédie, ou dictionnaire raisonné des sciences, des arts et des métiers since the first volume had been published.[clarification needed]

When Diderot's work on the Encyclopédie project came to an end in 1765, he expressed concerns to his friends that the twenty-five years he had spent on the project had been wasted.[10]

Mature works

Although the Encyclopédie was Diderot's most monumental product, he was the author of many other works that sowed nearly every intellectual field with new and creative ideas.[4] Diderot's writing ranges from a graceful trifle like the Regrets sur ma vieille robe de chambre (Regrets for my Old Dressing Gown) up to the heady D'Alembert's Dream (Le Rêve de d'Alembert) (composed 1769), a philosophical dialogue in which he plunges into the depths of the controversy as to the ultimate constitution of matter and the meaning of life.[4] Jacques le fataliste (written between 1765 and 1780, but not published until 1792 in German and 1796 in French) is similar to Tristram Shandy and The Sentimental Journey in its challenge to the conventional novel's structure and content.[33]

La Religieuse (The Nun or Memoirs of a Nun)

La Religieuse was a novel that claimed to show the corruption of the Catholic Church's institutions.

Plot

The novel began not as a work for literary consumption, but as an elaborate practical joke aimed at luring the Marquis de Croismare, a companion of Diderot's, back to Paris. The Nun is set in the 18th century, that is, contemporary France. Suzanne Simonin is an intelligent and sensitive sixteen-year-old French girl who is forced against her will into a Catholic convent by her parents. Suzanne's parents initially inform her that she is being sent to the convent for financial reasons. However, while in the convent, she learns that she is actually there because she is an illegitimate child, as her mother committed adultery. By sending Suzanne to the convent, her mother thought she could make amends for her sins by using her daughter as a sacrificial offering.

At the convent, Suzanne suffers humiliation, harassment and violence because she refuses to make the vows of the religious community. She eventually finds companionship with the Mother Superior, Sister de Moni, who pities Suzanne's anguish. After Sister de Moni's death, the new Mother Superior, Sister Sainte-Christine, does not share the same empathy for Suzanne that her predecessor had, blaming Suzanne for the death of Sister de Moni. Suzanne is physically and mentally harassed by Sister Sainte-Christine, almost to the point of death.

Suzanne contacts her lawyer, Monsieur Manouri, who attempts to legally free her from her vows. Manouri manages to have Suzanne transferred to another convent, Sainte-Eutrope. At the new convent, the Mother Superior is revealed to be a lesbian, and she grows affectionate towards Suzanne. The Mother Superior attempts to seduce Suzanne, but her innocence and chastity eventually drives the Mother Superior to insanity, leading to her death.

Suzanne escapes the Sainte-Eutrope convent using the help of a priest. Following her liberation, she lives in fear of being captured and taken back to the convent as she awaits the help from Diderot's friend the Marquis de Croismare.

Analysis

Diderot's novel was not aimed at condemning Christianity as such but at criticizing cloistered religious life.[12] In Diderot's telling, some critics have claimed,[who?] the Church is depicted as fostering a hierarchical society, exemplified in the power dynamic between the Mother Superior and the girls in the convent, forced as they are against their will to take the vows and endure what is to them the intolerable life of the convent. On this view, the subjection of the unwilling young women to convent life dehumanized them by repressing their sexuality. Moreover, their plight would have been all the more oppressive since it should be remembered that in France at this period, religious vows were recognized, regulated and enforced not only by the Church but also by the civil authorities. Some broaden their interpretation to suggest that Diderot was out to expose more general victimization of women by the Catholic Church, that forced them to accept the fate imposed upon them by a hierarchical society.[citation needed]

Posthumous publication

Although The Nun was completed in about 1780, the work was not published until 1796, after Diderot's death.

Rameau's Nephew

The dialogue Rameau's Nephew (French: Le Neveu de Rameau) is a "farce-tragedy" reminiscent of the Satires of Horace, a favorite classical author of Diderot's whose lines "Vertumnis, quotquot sunt, natus iniquis" ("Born under (the influence of) the unfavorable (gods) Vertumnuses, however many they are") appear as epigraph. According to Nicholas Cronk, Rameau's Nephew is "arguably the greatest work of the French Enlightenment's greatest writer."[34]

Le Dîner des philosophes painted by Jean Huber. Denis Diderot is the second from the right (seated).

Synopsis

The narrator in the book recounts a conversation with Jean-François Rameau, (fr) nephew of the famous composer Jean-Philippe Rameau. The nephew composes and teaches music with some success but feels disadvantaged by his name and is jealous of his uncle. Eventually he sinks into an indolent and debauched state. After his wife's death, he loses all self-esteem and his brusque manners result in him being ostracized by former friends. A character profile of the nephew is now sketched by Diderot: a man who was once wealthy and comfortable with a pretty wife, who is now living in poverty and decadence, shunned by his friends. And yet this man retains enough of his past to analyze his despondency philosophically and maintains his sense of humor. Essentially he believes in nothing—not in religion, nor in morality; nor in the Roussean view about nature being better than civilization since in his opinion every species in nature consumes one another.[1]:660 He views the same process at work in the economic world where men consume each other through the legal system.[1]:660–661 The wise man, according to the nephew, will consequently practice hedonism:

> Hurrah for wisdom and philosophy!—the wisdom of Solomon: to drink good wines, gorge on choice foods, tumble pretty women, sleep on downy beds; outside of that, all is vanity.[1]:661

The dialogue ends with Diderot calling the nephew a wastrel, a coward, and a glutton devoid of spiritual values to which the nephew replies: "I believe you are right."[1]:661

Analysis

Diderot's intention in writing the dialogue—whether as a satire on contemporary manners, a reduction of the theory of self-interest to an absurdity, the application of irony to the ethics of ordinary convention, a mere setting for a discussion about music, or a vigorous dramatic sketch of a parasite and a human original—is disputed. In political terms it explores "the bipolarisation of the social classes under absolute monarchy," and insofar as its protagonist demonstrates how the servant often manipulates the master, Le Neveu de Rameau can be seen to anticipate Hegel's master–slave dialectic.[35]

Posthumous publication

The publication history of the Nephew is circuitous. Written between 1761 and 1774, Diderot never saw the work through to publication during his lifetime, and apparently did not even share it with his friends. After Diderot's death, a copy of the text reached Schiller, who gave it to Goethe, who, in 1805, translated the work into German.[21] Goethe's translation entered France, and was retranslated into French in 1821. Another copy of the text was published in 1823, but it had been expurgated by Diderot's daughter prior to publication. The original manuscript was only found in 1891.[1]:659

Visual arts

Diderot's most intimate friend was the philologist Friedrich Melchior Grimm.[1]:677 They were brought together by their common friend at that time, Jean-Jacques Rousseau.[1]:632 In 1753, Grimm began writing a newsletter, the La Correspondance littéraire, philosophique et critique, which he would send to various high personages in Europe.[36]

In 1759, Grimm asked Diderot to report on the biennial art exhibitions in the Louvre for the Correspondance. Diderot reported on the Salons between the Salon of 1759 and Salon of 1771 and again in 1775 and 1781.[1]:666–687 Diderot's reports would become "the most celebrated contributions to La Correspondance."[36]

According to Charles Augustin Sainte-Beuve, Diderot's reports initiated the French into a new way of laughing, and introduced people to the mystery and purport of colour by ideas. "Before Diderot", Anne Louise Germaine de Staël wrote, "I had never seen anything in pictures except dull and lifeless colours; it was his imagination that gave them relief and life, and it is almost a new sense for which I am indebted to his genius".[4]

Diderot had appended an Essai sur la peinture to his report on the 1765 Salon in which he expressed his views on artistic beauty. Goethe described the Essai sur la peinture as "a magnificent work; it speaks even more usefully to the poet than to the painter, though for the painter too it is a torch of blazing illumination".[1]:668

Jean-Baptiste Greuze (1725–1805) was Diderot's favorite contemporary artist.[37] Diderot appreciated Greuze's sentimentality, and more particularly Greuze's portrayals of his wife who had once been Diderot's mistress.[1]:668

Theatre

Diderot wrote sentimental plays, Le Fils naturel (1757) and Le Père de famille (1758), accompanying them with essays on theatrical theory and practice, including "Les Entretiens sur Le Fils Naturel" (Conversations on The Natural Son), in which he announced the principles of a new drama: the 'serious genre', a realistic midpoint between comedy and tragedy that stood in opposition to the stilted conventions of the classical French stage. In 1758, Diderot introduced the concept of the fourth wall, the imaginary "wall" at the front of the stage in a traditional three-walled box set in a proscenium theatre, through which the audience sees the action in the world of the play.[38][39][40] He also wrote Paradoxe sur le comédien (Paradox of the Actor), written between 1770 and 1778 but first published after his death in 1830, which is a dramatic essay elucidating a theory of acting in which it is argued that great actors do not experience the emotions they are displaying.[note 2] That essay is also of note for being where the term l'esprit de l'escalier (or l'esprit d'escalier) comes from. It is a French term used in English for the predicament of thinking of the perfect reply too late.

Diderot and Catherine the Great

Journey to Russia

Diderot's travel from Paris to Saint Petersburg in 1773–1774. The blue line marks the outward from 3 June 1773 until 9 October 1773, and the red line marks the return journey 5 March 1774 to 21 October 1774.

When the Russian Empress Catherine the Great heard that Diderot was in need of money, she arranged to buy his library and appoint him caretaker of it until his death, at a salary of 1,000 livres per year. She even paid him 50 years salary in advance.[10] Although Diderot hated traveling,[1]:674 he was obliged to visit her.[1]:448

On 9 October 1773, he reached Saint Petersburg, met Catherine the next day and they had several discussions on various subjects. During his five-month stay at her court, he met her almost every day.[41]:448–449 During these conversations, he would later state, they spoke 'man to man'.[41]:448[note 3]

He would occasionally make his point by slapping her thighs. In a letter to Madame Geoffrin, Catherine wrote:

> Your Diderot is an extraordinary man. I emerge from interviews with him with my thighs bruised and quite black. I have been obliged to put a table between us to protect myself and my members.[41]:448

One of the topics discussed was Diderot's ideas about how to transform Russia into a utopia. In a letter to Comte de Ségur, the Empress wrote that if she followed Diderot's advice, chaos would ensue in her kingdom.[41]:448

Back in France

When returning, Diderot asked the Empress for 1,500 rubles as reimbursement for his trip. She gave him 3,000 rubles, an expensive ring, and an officer to escort him back to Paris. He wrote a eulogy in her honor upon reaching Paris.[41]:449

In 1766, when Catherine heard that Diderot had not received his annual fee for editing the Encyclopédie (an important source of income for the philosopher), she arranged for him to receive a massive sum of 50,000 livres as an advance for his services as her librarian.[10]

In July 1784, upon hearing that Diderot was in poor health, Catherine arranged for him to move into a luxurious suite in the Rue de Richelieu. Diderot died two weeks after moving there—on 31 July 1784.[41]:893

Among Diderot's last works were notes "On the Instructions of her Imperial Majesty...for the Drawing up of Laws". This commentary on Russia included replies to some arguments Catherine had made in the Nakaz.[41]:449[43] Diderot wrote that Catherine was certainly despotic, due to circumstances and training, but was not inherently tyrannical. Thus, if she wished to destroy despotism in Russia, she should abdicate her throne and destroy anyone who tries to revive the monarchy.[43] She should publicly declare that "there is no true sovereign other than the nation, and there can be no true legislator other than the people."[44] She should create a new Russian legal code establishing an independent legal framework and starting with the text: "We the people, and we the sovereign of this people, swear conjointly these laws, by which we are judged equally."[44] In the Nakaz, Catherine had written: "It is for legislation to follow the spirit of the nation."[44] Diderot's rebuttal stated that it is for legislation to make the spirit of the nation. For instance, he argued, it is not appropriate to make public executions unnecessarily horrific.[45]

Ultimately, Diderot decided not to send these notes to Catherine; however, they were delivered to her with his other papers after he died. When she read them, she was furious and commented that they were an incoherent gibberish devoid of prudence, insight, and verisimilitude.[41]:449[46]

Philosophy

Dmitry Levitzky, Denis Diderot, 1773, Musée d'Art et d'Histoire, Geneva

In his youth, Diderot was originally a follower of Voltaire and his deist Anglomanie, but gradually moved away from this line of thought towards materialism and atheism, a move which was finally realised in 1747 in the philosophical debate in the second part of his The Skeptic's Walk (1747).[47] Diderot opposed mysticism and occultism, which were highly prevalent in France at the time he wrote, and believed religious truth claims must fall under the domain of reason, not mystical experience or esoteric secrets.

However, Diderot showed some interest in the work of Paracelsus.[48] He was "a philosopher in whom all the contradictions of the time struggle with one another" (Rosenkranz).[21]

In his 1754 book On the interpretation of Nature, Diderot expounded on his views about nature, evolution, materialism, mathematics, and experimental science.[1]:651–652[49] It is speculated that Diderot may have contributed to his friend Baron d'Holbach's 1770 book The System of Nature.[21] Diderot had enthusiastically endorsed the book stating that:

What I like is a philosophy clear, definite, and frank, such as you have in the System of Nature. The author is not an atheist on one page and a deist on another. His philosophy is all of one piece.[1]:700

In conceiving the Encyclopédie, Diderot had thought of the work as a fight on behalf of posterity and had expressed confidence that posterity would be grateful for his effort. According to Diderot, "posterity is for the philosopher what the 'other world' is for the man of religion."[1]:641

According to Andrew S. Curran, the main questions of Diderot's thought are the following :[50]

Why be moral in a world without god?
How should we appreciate art?
What are we and where do we come from?
What are sex and love?
How can a philosopher intervene in political affairs?

Death and burial

Diderot died of pulmonary thrombosis in Paris on 31 July 1784, and was buried in the city's Église Saint-Roch. His heirs sent his vast library to Catherine II, who had it deposited at the National Library of Russia. He has several times been denied burial in the Panthéon with other French notables.[51]

Diderot's remains were unearthed by grave robbers in 1793, leaving his corpse on the church's floor. His remains were then presumably transferred to a mass grave by the authorities.[52]

Appreciation and influence

Jean-Simon Berthélemy, Young man admiring Denis Diderot's bust

Marmontel and Henri Meister (fr) commented on the great pleasure of having intellectual conversations with Diderot.[1]:678 Morellet, a regular attendee at D'Holbach's salon, wrote: "It is there that I heard...Diderot treat questions of philosophy, art, or literature, and by his wealth of expression, fluency, and inspired appearance, hold our attention for a long stretch of time."[53] Diderot's contemporary, and rival, Jean Jacques Rousseau wrote in his Confessions that after a few centuries Diderot would be accorded as much respect by posterity as was given to Plato and Aristotle.[1]:678 In Germany, Goethe, Schiller, and Lessing[1]:679 expressed admiration for Diderot's writings, Goethe pronouncing Diderot's Rameau's Nephew to be "the classical work of an outstanding man" and that "Diderot is Diderot, a unique individual; whoever carps at him and his affairs is a philistine."[1]:659[54]

As atheism fell out of favor during the French Revolution, Diderot was vilified and considered responsible for the excessive persecution of the clergy.[55]

In the next century, Diderot was admired by Balzac, Delacroix, Stendhal, Zola, and Schopenhauer.[56] According to Comte, Diderot was the foremost intellectual in an exciting age.[1]:679 Historian Michelet described him as "the true Prometheus" and stated that Diderot's ideas would continue to remain influential long into the future. Marx chose Diderot as his "favourite prose-writer."[57]

Modern tributes

Monument to Denis Diderot in Paris, 6th arrondissement, by Jean Gautherin
Otis Fellows and Norman Torrey have described Diderot as "the most interesting and provocative figure of the French eighteenth century."[58]

In 1993, American writer Cathleen Schine published Rameau's Niece, a satire of academic life in New York that took as its premise a woman's research into an (imagined) 18th-century pornographic parody of Diderot's Rameau's Nephew. The book was praised by Michiko Kakutani in the New York Times as "a nimble philosophical satire of the academic mind" and "an enchanting comedy of modern manners."[59]

French author Eric-Emmanuel Schmitt wrote a play titled Le Libertin (The Libertine) which imagines a day in Diderot's life including a fictional sitting for a woman painter which becomes sexually charged but is interrupted by the demands of editing the Encyclopédie.[60] It was first staged at Paris' Théâtre Montparnasse in 1997 starring Bernard Giraudeau as Diderot and Christiane Cohendy as Madame Therbouche and was well received by critics.[61]

In 2013, the 300th anniversary of Diderot's birth, his hometown of Langres held a series of events in his honor and produced an audio tour of the town highlighting places that were part of Diderot's past, including the remains of the convent where his sister Angélique took her vows.[62] On 6 October 2013, a museum of the Enlightenment focusing on Diderot's contributions to the movement, the Maison des Lumières Denis Diderot, was inaugurated in Langres.[63]

The French government considered memorializing the 300th anniversary of his birth,[64] but this did not come to pass.

Notes

Bijou is a slang word meaning the vagina.[18]

This contradicts the view of Horace with regard to the use of emotion in rhetoric: Si vis me flere, primium tibi flendum est (If you wish me to weep you must first weep yourself).[1]:624

Diderot later narrated the following conversation as having taken place:
Catherine: "You have a hot head, and I have one too. We interrupt each other, we do not hear what the other one says, and so we say stupid things."

Diderot: "With this difference, that when I interrupt your Majesty, I commit a great impertinence."

Catherine: "No, between men there is no such thing as impertinence."[42]

Diderot's contemporary, also a Frenchman, Pierre Louis Maupertuis—who in 1745 was named Head of the Prussian Academy of Science under Frederic the Great—was developing similar ideas. These proto-evolutionary theories were by no means as thought out and systematic as those of Charles Darwin a hundred years later.

When Carl Jung was asked if he believed in God, he paused and said: “I don’t believe — I know.” Not as theology. Not as religion. But as lived experience. Jung discovered that God does not first appear in doctrine, but in dreams, symbols, the body, and the unconscious. In moments where the soul is stripped bare. Where certainty dissolves. Where something greater meets you from within. Belief is passive. Knowing requires encounter. To know God is not to explain Him, it is to stay present at the edge of mystery long enough for Him to reveal Himself. Because he’s omnipresent. “The Kingdom of Heaven is within you.” #heal #mindfulmovemend #love

What is next in the world?

Popular comment · An interesting tidbit. On his deathbed he talked about "in the next 50 years" there'd be the last catastrophe for the human race. 50 years from his death would have been 2011, just shy of 2012. And everyone knows the Mayan calendar. Just an interesting thing to point out.

As Carl Jung put it, "Man needs difficulties. They are necessary for health." Yet most people instinctually avoid pain. This is true whether we are talking about building the body (e.g., weight lifting) or the mind (e.g., frustration, mental struggle, embarrassment, shame)--and especially true when people confront the harsh reality of their own imperfections.

What do we think of Carl Jung?
Popular comment · He developed Shadow Work, this alone makes him one of the goats of enlightened minds. Not to mention the “collective unconscious”, archetypes, individuation, and synchronicity. He was mystical AF in actuality and helped map and bring scientific and analytical rigor into “the woo”. That’s why he and his ideas are so respected today. By the end of his life he no longer “believed in” God… but he knew God.

Overview
Carl Gustav Jung was a Swiss psychiatrist, psychologist, and psychotherapist who established analytical psychology. He's best known for his concepts of archetypes and personality orientations, "extroversion" and "introversion". Jung believed that the human experience is similar across history and cultures, and that a reservoir of psychic resources, called archetypes, are passed down through generations.

Carl Gustav Jung (/jʊŋ/ YUUNG;[1][2] Swiss Standard German: [karl jʊŋ]; 26 July 1875 – 6 June 1961) was a Swiss psychiatrist, psychotherapist, and psychologist who founded the school of analytical psychology.[3][a] A prolific author of over twenty books, illustrator, and correspondent, Jung was a complex and convoluted academic, best known for his concept of archetypes. Alongside contemporaries[b] Sigmund Freud and Alfred Adler, Jung became one of the most influential psychologists of the early 20th century and has fostered not only scholarship, but also popular interest.[6]

Jung's work has been influential in the fields of psychiatry, anthropology, archaeology, literature, philosophy, psychology,[7] and religious studies. He worked as a research scientist at the Burghölzli psychiatric hospital in Zurich, under Eugen Bleuler. Jung established himself as an influential mind, developing a friendship with Freud, founder of psychoanalysis, conducting a lengthy correspondence paramount to their joint vision of human psychology. Jung is widely regarded as one of the most influential psychologists in history.[8][9]

Freud saw the younger Jung not only as the heir he had been seeking to take forward his "new science" of psychoanalysis but as a means to legitimize his own work: Freud and other contemporary psychoanalysts were Jews facing rising antisemitism in Europe, and Jung was raised as Christian, although he did not strictly adhere to traditional Christian doctrine, he saw religion, including Christianity, as a powerful expression of the human psyche and its search for meaning.[10] Freud secured Jung's appointment as president of Freud's newly founded International Psychoanalytical Association. Jung's research and personal vision, however, made it difficult to follow his older colleague's doctrine, and they parted ways. This division was painful for Jung and resulted in the establishment of Jung's analytical psychology, as a comprehensive system separate from psychoanalysis.

Among the central concepts of analytical psychology is individuation—the lifelong psychological process of differentiation of the self out of each individual's conscious and unconscious elements. Jung considered it to be the main task of human development. He created some of the best-known psychological concepts, including synchronicity, archetypal phenomena, the collective unconscious, the psychological complex, and extraversion and introversion. His treatment of American businessman and politician Rowland Hazard in 1926 with his conviction that alcoholics may recover if they have a "vital spiritual (or religious) experience" played a crucial role in the chain of events that led to the formation of Alcoholics Anonymous.[11] Jung was an artist, craftsman, builder, and prolific writer. Many of his works were not published until after his death, and some remain unpublished.[12]

Biography

Early life

Childhood

Birthplace in Kesswil TG
Carl Gustav Jung[c] was born 26 July 1875 in Kesswil, in the Swiss canton of Thurgau, as the first surviving son of Paul Achilles Jung (1842–1896) and Emilie Preiswerk (1848–1923).[13] His birth was preceded by two stillbirths and that of a son named Paul, born in 1873, who survived only a few days.[14][15]

Paul Jung, Carl's father, was the youngest son of a noted German-Swiss professor of medicine at Basel, Karl Gustav Jung (1794–1864).[16] Paul's hopes of achieving a fortune never materialised, nor did he progress beyond the status of an impoverished rural pastor in the Swiss Reformed Church. Emilie Preiswerk, Carl's mother, had also grown up in a large family whose Swiss roots went back five centuries. Emilie was the youngest child of a distinguished Basel churchman and academic, Samuel Preiswerk (1799–1871), and his second wife. Samuel Preiswerk was an Antistes (the title given to the head of the Reformed clergy in the city) as well as a Hebraist, author, and editor, who taught Paul Jung as his professor of Hebrew at Basel University.[14]:17–19

The clergy house in Kleinhüningen, Basel, where Jung grew up

Jung's father was appointed to a more prosperous parish in Laufen when Carl was six months old. Tensions between father and mother had developed. Jung's mother was an eccentric and depressed woman; she spent considerable time in her bedroom, where she said spirits visited her at night.[17] Though she was normal during the day, Jung recalled that at night his mother became strange and mysterious. He said that one night, he saw a faintly luminous and indefinite figure coming from her room, with a head detached from the neck and floating in the air in front of the body. Jung had a better relationship with his father.[17]

Jung's mother left Laufen for several months of hospitalization near Basel for some unspecified physical ailment. His father took Carl to be cared for by Emilie Jung's unmarried sister in Basel, but he was later brought back to his father's residence. Emilie Jung's continuing bouts of absence and depression deeply troubled her son and caused him to associate women with "innate unreliability", whereas "father" meant for him reliability, but also powerlessness.[18] In his memoir, Jung would remark that this parental influence was the "handicap I started off with". Later, these early impressions were revised: "I have trusted men friends and been disappointed by them, and I have mistrusted women and was not disappointed."[19] After three years living in Laufen, Paul Jung requested a transfer. In 1879, he was called to Kleinhüningen, next to Basel, where his family lived in a church parsonage.[20] The relocation brought Emilie Jung closer to contact with her family and lifted her melancholy.[21] When he was 9, Jung's sister Johanna Gertrud (1884–1935) was born. Known in the family as "Trudi", she became a secretary to her brother.[14]:349

Memories of childhood

Jung was a solitary and introverted child. From childhood, he believed that, like his mother,[22] he had two personalities—a modern Swiss citizen and a personality more suited to the 18th century.[23] "Personality Number 1", as he termed it, was a typical schoolboy living in the era of the time. "Personality Number 2" was a dignified, authoritative, and influential man from the past. Though Jung was close to both parents, he was disappointed by his father's academic approach to faith.[24]

Jung as a child, early 1880s

Some childhood memories made lifelong impressions on him. As a boy, he carved a tiny mannequin into the end of the wooden ruler from his pencil case and placed it inside it.

He added a stone, which he had painted into upper and lower halves, and hid the case in the attic. Periodically, he would return to the mannequin, often bringing tiny sheets of paper with messages inscribed on them in his own secret language.[25] He later reflected that this ceremonial act brought him a feeling of inner peace and security. Years later, he discovered similarities between his personal experience and the practices associated with totems in Indigenous cultures, such as the collection of soul-stones near Arlesheim or the tjurungas of Australia. He concluded that his intuitive ceremonial act was an unconscious ritual, which he had practiced in a way that was strikingly similar to those in distant locations which he, as a young boy, knew nothing about.[26] His observations about symbols, archetypes, and the collective unconscious were inspired, in part, by these early experiences combined with his later research.[27][28]

At the age of 12, shortly before the end of his first year at the Humanistisches Gymnasium in Basel, Jung was pushed to the ground by another boy so hard he momentarily lost consciousness. (Jung later recognized the incident was indirectly his fault.) A thought then came to him—"Now you won't have to go to school anymore".[29] From then on, whenever he walked to school or began homework, he fainted. He remained home for six months until he overheard his father speaking hurriedly to a visitor about the boy's future ability to support himself. They suspected he had epilepsy. Confronted with his family's poverty, he realized the need for academic excellence. He entered his father's study and began poring over Latin grammar. He fainted three more times but eventually overcame the urge and did not faint again. This event, Jung later recalled, "was when I learned what a neurosis is".[30]

University studies and early career

Old main building of the University of Basel (foreground), where Jung studied between 1895 and 1900

Initially, Jung had aspirations of becoming a Christian minister. His household had a strong moral sense, and several of his family were clergy. Jung had wanted to study archaeology, but his family could not afford to send him further than the University of Basel, which did not teach it. After studying philosophy in his teens, Jung decided against the path of religious traditionalism and decided to pursue psychiatry and medicine.[28] His interest was captured—it combined the biological and spiritual, exactly what he was searching for.[31] In 1895 Jung began to study medicine at the University of Basel. Barely a year later, his father, Paul, died and left the family nearly destitute. They were helped by relatives who also contributed to Jung's studies.[32] During his student days, he entertained his contemporaries with the family legend that his paternal grandfather was the illegitimate son of Goethe and his German great-grandmother, Sophie Ziegler. In later life, he pulled back from this tale, saying only that Sophie was a friend of Goethe's niece.[33]

It was during this early period when Jung was an assistant at the Anatomical Institute at Basel University, that he took an interest in palaeoanthropology and the revolutionary discoveries of Homo erectus and Neanderthal fossils. These formative experiences contributed to his fascination with the evolutionary past of humanity and his belief that an ancient evolutionary layer in the psyche, represented by early fossil hominins, is still evident in the psychology of modern humans.[34]

In 1900, Jung moved to Zurich and began working at the Burghölzli psychiatric hospital under Eugen Bleuler.[35] Bleuler was already in communication with the Austrian neurologist Sigmund Freud. Jung's dissertation, published in 1903, was titled On the Psychology and Pathology of So-Called Occult Phenomena. It was based on the analysis of the supposed mediumship of Jung's cousin Hélène Preiswerk, under the influence of Freud's contemporary Théodore Flournoy.[36] Jung studied with Pierre Janet in Paris in 1902[37] and later equated his view of the complex with Janet's idée fixe subconsciente.[38] In 1905, Jung was appointed as a permanent 'senior' doctor at the hospital and became a lecturer Privatdozent in the medical faculty of Zurich University.[39] In 1904, he published with Franz Riklin their Diagnostic Association Studies, of which Freud obtained a copy.[40][41] In 1909, Jung left the psychiatric hospital and began a private practice in his home in Küsnacht.[42]

Eventually, a close friendship and strong professional association developed between the elder Freud and Jung, which left a sizeable correspondence. In late summer 1909, the two sailed for the U.S., where Freud was the featured lecturer at the twentieth-anniversary celebration of the founding of Clark University in Worcester, Massachusetts, the Vicennial Conference on Psychology and Pedagogy, 7–11 September. Jung spoke as well and received an honorary degree.[43]

It was during this trip that Jung first began separating psychologically from Freud, his mentor, which occurred after intense communications around their individual dreams. It was during this visit that Jung was introduced to the elder philosopher and psychologist William James, known as the "Father of American psychology," whose ideas Jung would incorporate into his own work.[44] Jung connected with James around their mutual interests in mysticism, spiritualism and psychical phenomena.[45] James wrote to a friend after the conference stating Jung "left a favorable impression," while "his views of Freud were mixed."[46] James died about eleven months later.

The ideas of both Jung and James, on topics including hopelessness, self-surrender, and spiritual experiences, were influential in the development and founding of the international altruistic, self-help movement Alcoholics Anonymous on 10 June 1935, in Akron, Ohio, a quarter of a century after James' death and in Jung's sixtieth year.

For six years, Jung and Freud cooperated in their work. In 1912, however, Jung published Psychology of the Unconscious, which manifested the developing theoretical divergence between the two. Consequently, their personal and professional relationship fractured—each stating the other could not admit he could be wrong. After the culminating break in 1913, Jung went through a difficult and pivotal psychological transformation, exacerbated by the outbreak of the First World War. Henri Ellenberger called Jung's intense experience a "creative illness" and compared it favorably to Freud's own period of what he called neurasthenia and hysteria.[47]:173

Marriage

Emma Jung in 1911. She assisted her husband in his early research before becoming a psychoanalyst and author.
In 1903, Jung married Emma Rauschenbach (1882–1955), seven years his junior and the elder daughter of a wealthy industrialist in eastern Switzerland, Johannes Rauschenbach-Schenck.[48] Rauschenbach was the owner, among other concerns, of IWC Schaffhausen—the International Watch Company, manufacturer of luxury time-pieces. Upon his death in 1905, his two daughters and their husbands became owners of the business. Jung's brother-in-law—Ernst Homberger—became the principal proprietor, but the Jungs remained shareholders in a thriving business that ensured the family's financial security for decades.[49] Emma Jung, whose education had been limited, showed considerable ability and interest in her husband's research and threw herself into studies and acted as his assistant at Burghölzli. She eventually became a noted psychoanalyst in her own right. The marriage lasted until Emma died in 1955.[50]
He had five children:

Agathe Niehus, born on 28 December 1904
Gret Baumann, born on 8 February 1906
Franz Jung-Merker, born on 28 November 1908
Marianne Niehus, born on 20 September 1910
Helene Hoerni, born on 18 March 1914
None of the children continued their father's career. The daughters, Agathe and Marianne, assisted in publishing work.[51]

During his marriage, Jung engaged in at least one extramarital relationship: his affair with his patient and, later, fellow psychoanalyst Sabina Spielrein.[52][53][54] A continuing affair with Toni Wolff is also alleged.[55][56]

Relationship with Freud

Meeting and collaboration

Group photo 1909 in front of Clark University. Front row, Sigmund Freud, G. Stanley Hall, Carl Jung. Back row, Abraham Brill, Ernest Jones, Sándor Ferenczi.
Jung and Freud influenced each other during the intellectually formative years of Jung's life. Jung became interested in psychiatry as a student by reading Psychopathia Sexualis by Richard von Krafft-Ebing. In 1900, Jung completed his degree and started work as an intern (voluntary doctor) under the psychiatrist Eugen Bleuler at Burghölzli Hospital.[57] It was Bleuler who introduced him to the writings of Freud by asking him to write a review of The Interpretation of Dreams (1899). In the early 1900s psychology as a science was still in its early stages, but Jung became a qualified proponent of Freud's

new "psycho-analysis". Freud needed collaborators and pupils to validate and spread his ideas. Burghölzli was a renowned psychiatric clinic in Zurich, and Jung's research had already gained him international recognition. Jung sent Freud a copy of his Studies in Word Association in 1906.[58] The same year, he published Diagnostic Association Studies, a copy of which he later sent to Freud, who had already purchased a copy.[41] Preceded by a lively correspondence, Jung met Freud for the first time in Vienna on 3 March 1907.[59] Jung recalled the discussion between himself and Freud as interminable and unceasing for 13 hours.[60] Six months later, the then 50-year-old Freud sent a collection of his latest published essays to Jung in Zurich. This began an intense correspondence and collaboration that lasted six years.[61] In 1908, Jung became an editor of the newly founded Yearbook for Psychoanalytical and Psychopathological Research.

In 1909, Jung traveled with Freud and Hungarian psychoanalyst Sándor Ferenczi to the United States; in September, they took part in a conference at Clark University in Worcester, Massachusetts. The conference at Clark University was planned by the psychologist G. Stanley Hall and included 27 distinguished psychiatrists, neurologists, and psychologists. It represented a watershed in the acceptance of psychoanalysis in North America. This forged welcome links between Jung and influential Americans.[62] Jung returned to the United States the next year for a brief visit.

In 1910, Freud proposed Jung, "his adopted eldest son, his crown prince, and successor," for the position of lifetime President of the newly formed International Psychoanalytical Association. However, after forceful objections from his Viennese colleagues, it was agreed Jung would be elected to serve a two-year term of office.[63]

Divergence and break

Jung outside Burghölzli in 1910
While Jung worked on his Psychology of the Unconscious: a study of the transformations and symbolisms of the libido, tensions manifested between him and Freud because of various disagreements, including those concerning the nature of libido.[64] Jung de-emphasized the importance of sexual development and focused on the collective unconscious: the part of the unconscious that contains memories and ideas that Jung believed were inherited from ancestors. While he did think that the libido was an important source of personal growth, unlike Freud, Jung did not think that the libido alone was responsible for the formation of the core personality.[65]

In 1912, these tensions came to a peak because Jung felt severely slighted after Freud visited his colleague Ludwig Binswanger in Kreuzlingen without paying him a visit in nearby Zurich, an incident Jung referred to as "the Kreuzlingen gesture". Shortly thereafter, Jung again traveled to the US and gave the Fordham University lectures, a six-week series, which were published later in the year as Psychology of the Unconscious, subsequently republished as Symbols of Transformation. While they contain remarks on Jung's dissenting view on the libido, they represent largely a "psychoanalytical Jung" and not the theory of analytical psychology, for which he became famous in the following decades. Nonetheless, it was their publication which, Jung declared, "cost me my friendship with Freud".[66]

Another disagreement with Freud stemmed from their differing concepts of the unconscious.[67] Jung saw Freud's theory of the unconscious as incomplete, unnecessarily negative, and inelastic. According to Jung, Freud conceived the unconscious solely as a repository of repressed emotions and desires.[68] Jung's observations overlap to an extent with Freud's model of the unconscious, what Jung called the "personal unconscious", but his hypothesis is more about a process than a static model, and he also proposed the existence of a second, overarching form of the unconscious beyond the personal, that he named the psychoid—a term borrowed from neo-vitalist philosopher and embryologist Hans Driesch (1867–1941)—but with a somewhat altered meaning.[69] The collective unconscious is not so much a 'geographical location', but a deduction from the alleged ubiquity of archetypes over space and time.[clarification needed]

In November 1912, Jung and Freud met in Munich for a meeting among prominent colleagues to discuss psychoanalytical journals.[70] At a talk about a new psychoanalytic essay on Amenhotep IV, Jung expressed his views on how it related to actual conflicts in the psychoanalytic movement. While Jung spoke, Freud suddenly fainted, and Jung carried him to a couch.[68]

Jung and Freud personally met for the last time in September 1913 at the Fourth International Psychoanalytical Congress in Munich. Jung gave a talk on psychological types, the introvert and extraverted types, in analytical psychology.

Midlife isolation

It was the publication of Jung's book The Psychology of the Unconscious in 1912 that led to the final break with Freud. The letters they exchanged show Freud's refusal to consider Jung's ideas. This rejection caused what Jung described in his posthumously published autobiography, Memories, Dreams, Reflections (1962) as a "resounding censure". Everyone he knew dropped away from him except two of his colleagues. After the Munich congress, he was on the verge of a suicidal psychosis that precipitated his writing of his Red Book, his seven-volume personal diaries that were only published partially and posthumously in 2009. Eleven years later, in 2020, they were published as his Black Books. Jung described his 1912 book as "an attempt, only partially successful, to create a wider setting for medical psychology and to bring the whole of the psychic phenomena within its purview". The book was later revised and retitled Symbols of Transformation in 1952.[71]

London 1913–1914

Jung spoke at meetings of the Psycho-Medical Society in London in 1913 and 1914. His travels were soon interrupted by the war, but his ideas continued to receive attention in England primarily through the efforts of Constance Long, who translated and published the first English volume of his collected writings.[72][73]

The Black Books and The Red Book

Main articles: The Red Book (Jung) and Black Books (Jung)

The Red Book resting on Jung's desk

In 1913, at the age of 38, Jung experienced a horrible "confrontation with the unconscious". He saw visions and heard voices. He worried at times that he was "menaced by a psychosis" or was "doing a schizophrenia". He decided that it was a valuable experience and, in private, he induced hallucinations or, in his words, a process of "active imagination". He recorded everything he experienced in small journals, which Jung referred to in the singular as his Black Book,[74] considering it a "single integral whole", even though some of these original journals have a brown cover.[74] The material Jung wrote was subjected to several edits, hand-written and typed, including another, "second layer" of text, his continual psychological interpretations during the process of editing.[75][76] Around 1915, Jung commissioned a large red leather-bound book,[77][78] and began to transcribe his notes and paint, working intermittently for sixteen years.[9]

Jung left no posthumous instructions about the final disposition of what he called the Liber Novus or Red Book. Sonu Shamdasani, a historian of psychology from London, tried for three years to persuade Jung's resistant heirs to have it published. Ulrich Hoerni, Jung's grandson who manages the Jung archives, decided to publish it when the necessary additional funds were raised through the Philemon Foundation.[9] Up to September 2008, fewer than about two dozen people had ever seen it.

In 2007, two technicians for DigitalFusion, working with New York City publishers W. W. Norton & Company, scanned the manuscript with a 10,200-pixel scanner. It was published on 7 October 2009 in German, with a "separate English translation along with Shamdasani's introduction and footnotes" at the back of the book. According to Sara Corbett, reviewing the text for The New York Times, "The book is bombastic, baroque and like so much else about Carl Jung, a willful oddity, synched with an antediluvian and mystical reality."[9]

The Rubin Museum of Art in New York City displayed Jung's Red Book leather folio, as well as some of his original "Black Book" journals, from 7 October 2009 to 15 February 2010.[79] According to them, "During the period in which he worked on this book Jung developed his principal theories of archetypes, collective unconscious, and the process of individuation." Two-thirds of the pages bear Jung's illuminations and illustrations to the text.[79]

Wartime army service

During World War I, Jung was drafted as an army doctor and soon made commandant of an internment camp for British officers and soldiers. The Swiss were neutral and obliged to intern personnel from either side of the conflict, who crossed their frontier to evade capture. Jung worked to improve the conditions of soldiers stranded in Switzerland and encouraged them to attend university courses.[80][81]

Travels

Jung emerged from his period of isolation in the late 1910s with the publication of several journal articles, followed in 1921 with Psychological Types, one of his most influential books. There followed a decade of active publication, interspersed with overseas travels.

England (1920, 1923, 1925, 1935, 1938, 1946)

Constance Long arranged for Jung to deliver a seminar in Cornwall in 1920. Another seminar was held in 1923, this one organized by Jung's British protégé Helton Godwin Baynes (known as "Peter") (1882–1943), and another in 1925.[82]

Beatrice Ensor and Jung in Montreux, Switzerland, 1923, for the Second International New Education Fellowship Conference

In 1935, at the invitation of his close British friends and colleagues, H. G. Baynes, E. A. Bennet and Hugh Crichton-Miller, Jung gave a series of lectures at the Tavistock Clinic in London, later published as part of the Collected Works.[83]

In 1938, Jung was awarded an honorary degree by the University of Oxford.[84] At the tenth International Medical Congress for Psychotherapy held at Oxford from 29 July to 2 August 1938, Jung gave the presidential address, followed by a visit to Cheshire to stay with the Bailey family at Lawton Mere.[85]

In 1946, Jung agreed to become the first Honorary President of the newly formed Society of Analytical Psychology in London, having previously approved its training programme devised by Michael Fordham.[86]

United States 1909–1912, 1924–1925, & 1936–1937

During the period of Jung's collaboration with Freud, both visited the US in 1909 to lecture at Clark University, Worcester, Massachusetts,[62] where both were awarded honorary degrees. In 1912, Jung gave a series of lectures at Fordham University, New York, which were published later in the year as Psychology of the Unconscious.[66] Jung made a more extensive trip westward in the winter of 1924–5, financed and organized by Fowler McCormick and George Porter. Of particular value to Jung was a visit with Chief Mountain Lake of the Taos Pueblo near Taos, New Mexico.[82] Jung made another trip to America in 1936, receiving an honorary degree at Harvard[87] and giving lectures in New York and New England for his growing group of American followers. He returned in 1937 to deliver the Terry Lectures at Yale University, later published as Psychology and Religion.[88]

East Africa

In October 1925, Jung embarked on his most ambitious expedition, the "Bugishu

Psychological Expedition" to East Africa. He was accompanied by his English friend, "Peter" Baynes, and an American associate, George Beckwith. On the voyage to Africa, they became acquainted with an English woman named Ruth Bailey, who joined their safari a few weeks later. The group traveled through Kenya and Uganda to the slopes of Mount Elgon, where Jung hoped to increase his understanding of "primitive psychology" through conversations with the culturally isolated residents of that area. Later, he concluded that the major insights he had gleaned had to do with himself and the European psychology in which he had been raised.[89][90] One of Jung's most famous proposed constructs is kinship libido. Jung defined this as an instinctive feeling of belonging to a particular group or family and believed it was vital to the human experience and used this as an endogamous aspect of the libido and what lies amongst the family. This is similar to a Bantu term called Ubuntu that emphasizes humanity and almost the same meaning as kinship libido, which is, "I am because you are."[91]

India

Jung in about 1935

In December 1937, Jung left Zurich again for an extensive tour of India with Fowler McCormick. In India, he felt himself "under the direct influence of a foreign culture" for the first time. In Africa, his conversations had been strictly limited by the language barrier, but he could converse extensively in India. Hindu philosophy became an important element in his understanding of the role of symbolism and the life of the unconscious, though he avoided a meeting with Ramana Maharshi. He described Ramana as being absorbed in "the self". During these travels, he visited the Vedagiriswarar Temple, where he had a conversation with a local expert about the symbols and sculptures on the gopuram of this temple. He later wrote about this conversation[92] in his book Aion.[93] Jung became seriously ill on this trip and endured two weeks of delirium in a Calcutta hospital. After 1938, his travels were confined to Europe.[94]

Later life and death

Jung in a 1955 interview

Jung became a full professor of medical psychology at the University of Basel in 1943 but resigned after a heart attack the next year to lead a more private life. In 1945, he began corresponding with an English Roman Catholic priest, Father Victor White, who became a close friend, regularly visiting the Jungs at the Bollingen estate.[1] Jung became ill again in 1952.[95]

Jung continued to publish books until the end of his life, including Flying Saucers: A Modern Myth of Things Seen in the Skies (1959), which analyzed the archetypal meaning and possible psychological significance of the reported observations of UFOs.[96] In 1961, he wrote his last work, a contribution to Man and His Symbols entitled "Approaching the Unconscious" (published posthumously in 1964).[95] Jung died on 6 June 1961 at Küsnacht after a short illness.[47]:450[97] He had been beset by circulatory diseases.[98]

Awards

Among his principal distinctions are honorary doctorates from:

Clark University 1909
Fordham University 1912
Harvard University 1936
University of Allahabad 1937
University of Benares 1937
University of Calcutta 1938
University of Oxford 1938
University of Geneva 1945
Swiss Federal Institute of Technology in Zurich 1955 on his 80th birthday
In addition, he was:

given a Literature prize from the city of Zurich, 1932
made Titular Professor of the Swiss Federal Institute of Technology in Zurich, ETH 1935
appointed Honorary Member of the Royal Society of Medicine 1939
given a Festschrift at Eranos 1945
appointed President of the Society of Analytical Psychology, London, 1946
given a Festschrift by students and friends 1955
named Honorary citizen of Kűsnacht 1960, on his 85th birthday.[99]

Thought

Jung's family, c. 1895: l to r. father Paul, sister Gertrud, mother Emilie and Carl

Jung's thought derived from the classical education he received at school and from early family influences, which on the maternal side were a combination of Reformed Protestant academic theology with an interest in occult phenomena. On his father's side was a dedication to academic discipline emanating from his grandfather, the physician, scientist, and first Basel Professor of Medicine, Karl Gustav Jung, a one-time student activist and convert from Catholicism to Swiss Reformed Protestantism. Family lore suggested there was at least a social connection to the German polymath, Johann Wolfgang Goethe, through the latter's niece, Lotte Kestner, known as "Lottchen", who was a frequent visitor in Jung senior's household.[100]

Carl Jung, the practicing clinician, writer, and founder of analytical psychology, had, through his marriage, the economic security to pursue interests in other intellectual topics of the moment. His early celebrity as a research scientist through the Word Association Test led to the start of prolific correspondence and worldwide travel. It opened academic as well as social avenues, supported by his explorations into anthropology, quantum physics, vitalism, Eastern and Western philosophy. He delved into epistemology, alchemy, astrology, and sociology, as well as literature and the arts. Jung's interest in philosophy and spiritual subjects led many to label him a mystic, although he preferred to be seen as a man of science. Jung, unlike Freud, was deeply knowledgeable about philosophical concepts and sought links between epistemology and emergent theories of psychology.[101][102]

Key concepts

C. G. Jung Institute, Küsnacht, Switzerland
Within the field of analytical psychology, a brief survey of major concepts developed by Jung includes (alphabetical):[103]

Anima and animus—(archetype) the contrasexual aspect of a person's psyche. In a woman's psyche, her inner personal masculine is conceived as a complex and an archetypal image; in a man's psyche, his inner personal feminine is conceived both as a complex and an archetypal image.
Archetype—a concept "borrowed" from anthropology to denote supposedly universal and recurring mental images or themes. Jung's descriptions of archetypes varied over time.
Archetypal images—universal symbols that mediate opposites in the psyche, often found in religious art, mythology, and fairy tales across cultures.
Collective unconscious—aspects of unconsciousness experienced by all people in different cultures.
Complex—the repressed organisation of images and experiences that governs perception and behaviour.
Extraversion and introversion—personality traits of degrees of openness or reserve contributing to psychological type.[104]
Individuation—the process of fulfilment of each individual "which negates neither the conscious or [sic] unconscious position but does justice to them both".[105]
Interpersonal relationship—the way people relate to others reflects how they relate to themselves. This may also be extended to relations with the natural environment.
Numinous—a healing, transformative or destructive spiritual power. Also, an invisible power inherent in an object. Jung develops the concept from the work of Rudolf Otto, who based it on the Latin numen.
Persona—element of the personality that arises "for reasons of adaptation or personal convenience"—the "masks" one puts on in various situations.[106]
Psychological types—a framework for consciously orienting psychotherapists to patients by raising particular modes of personality to consciousness and differentiation between analyst and patient.
Shadow—(archetype) the repressed, therefore unknown, aspects of the personality, including those often considered to be negative.
Self—(archetype) the central overarching concept governing the individuation process, as symbolised by mandalas, the union of male and female, totality, and unity. Jung viewed it as the psyche's central archetype.
Synchronicity—an acausal principle as a basis for the apparently random concurrence of phenomena.[107]

Collective unconscious

Main article: Collective unconscious

Since the establishment of psychoanalytic theory, the notion and meaning of individuals having a personal unconscious has gradually come to be commonly accepted. This was popularised by both Freud and Jung. Whereas an individual's personal unconscious is made up of thoughts and emotions that have, at some time, been experienced or held in mind but which have been repressed or forgotten, in contrast, the collective unconscious is neither acquired by activities within an individual's life nor a container of things that are thoughts, memories or ideas which are capable of being conscious during one's life. The contents of it were never naturally "known" through physical or cognitive experience and then forgotten.

The collective unconscious consists of universal heritable elements common to all humans, distinct from other species.[108] However, this does not necessarily imply a genetic cause. It encapsulates fields of evolutionary biology, history of civilization, ethnology, brain and nervous system development, and general psychological development.[109] Considering its composition in practical physiological and psychological terms, "it consists of pre-existent forms, the archetypes, which can only become conscious secondarily and which give definite form to certain psychic contents."[109] Jung writes about causal factors in personal psychology as stemming from, influenced by an abstraction of the impersonal physical layer, the common and universal physiology among all humans.[110] Jung considers that science would hardly deny the existence and basic nature of "instincts", existing as a whole set of motivating urges. The collective unconscious acts as the frame where science can distinguish individual motivating urges, thought to be universal across all individuals of the human species, while instincts are present in all species. Jung contends, "The hypothesis of the collective unconscious is, therefore, no more daring than to assume there are instincts."[109]

Archetype

Main article: Jungian archetypes

Isis, The Great mother of divine son Horus	Demeter, Great Mother of divine daughter Persephone	Lao Tzu, Wise Old Man	Christ, Hero

Common archetypal motifs: Devourer, Great/Benevolent Mother, Wise Old Man, Hero/Self

The archetype is a concept "borrowed" from anthropology to denote a process of nature. Jung's definitions of archetypes varied over time and have been the subject of debate regarding their usefulness. Archetypal images, also referred to as motifs in mythology,[d] are universal symbols that can mediate opposites in the psyche, are often found in religious art, mythology and fairy tales across cultures. Jung saw archetypes as pre-configurations in nature that give rise to repeating, understandable, describable experiences. In addition, the concept considers the passage of time and patterns resulting from transformation.[111] Archetypes are said to exist independently of any current event or its effect. They are said to exert influence both across all domains of experience and throughout the stages of each individual's unique development. Being in part based on heritable physiology, they are thought to have "existed" since humans became a differentiated species. They have been deduced through the development of storytelling over tens of thousands of years, indicating repeating patterns of individual and group experience, behaviors, and effects across the planet, apparently displaying common themes.[109]

The concept did not originate with Jung but with Plato, who first conceived of primordial patterns. Later contributions came from Adolf Bastian and Hermann Usener, among others.[112] In the first half of the twentieth century, it proved impossible to objectively isolate and categorize the notion of an archetype within a materialist frame. According to Jung, there are "as many archetypes as there are typical situations in life",[113] and he asserted that they have a dynamic mutual influence on one another. Their alleged presence could be extracted from thousand-year-old narratives, from comparative religion, and from mythology.[114] Jung elaborated on many archetypes in "The Archetypes and the Collective Unconscious" and in "Aion: Researches into the Phenomenology of the Self". Examples of archetypes might be the shadow, the hero, the self, anima, animus, mother, father, child, and trickster.

Shadow

See also: shadow (psychology)

The shadow exists as part of the unconscious mind and is composed of the traits individuals instinctively or consciously resist identifying as their own and would rather ignore, typically repressed ideas, weaknesses, desires, instincts, and shortcomings. Much of the shadow comes as a result of an individual's adaptation to cultural norms and expectations.[106] Thus, this archetype not only consists of all the things deemed unacceptable by society but also those things that are not aligned with one's own personal morals and values.

Jung argues that the shadow plays a distinctive role in balancing one's overall psyche, the counter-balancing to consciousness—"where there is light, there must also be shadow". Without a well-developed shadow (often "shadow work", "integrating one's shadow"), an individual can become shallow and extremely preoccupied with the opinions of others; that is, a walking persona.[106] Not wanting to look at their shadows directly, Jung argues, often results in psychological projection. Individuals project imagined attitudes onto others without awareness. The qualities an individual may hate (or love) in another may manifest in those who do not see the external, material truth.[106] In order to truly grow as an individual, Jung believed that both the persona and shadow should be balanced.[106]

The shadow can often appear as a dark, wild, exotic figure in dreams or visions.[115]

Extraversion and introversion

Main article: Extraversion and introversion

See also: Apollonian and Dionysian

Jung was one of the first to define introversion and extraversion in a psychological context. In Jung's Psychological Types, he theorizes that each person falls into one of two categories: the introvert or the extravert. Jung compares these two psychological types to ancient archetypes, Apollo and Dionysus. The introvert is likened to Apollo, who shines a light on understanding. The introvert is focused on the internal world of reflection, dreaming, and vision. Thoughtful and insightful, the introvert can sometimes be uninterested in joining the activities of others. The extravert is associated with Dionysus, interested in joining the activities of the world. The extravert is focused on the outside world of objects, sensory perception, and action. Energetic and lively, the extravert may lose their sense of self in the intoxication of Dionysian pursuits.[116] Jungian introversion and extraversion is quite different from the modern idea of introversion and extraversion.[117] Modern theories often stay true to behaviourist means of describing such a trait (sociability, talkativeness, assertiveness, etc.), whereas Jungian introversion and extraversion are expressed as a perspective: introverts interpret the world subjectively, whereas extraverts interpret the world objectively.[118]

Persona

See also: Persona (psychology)
In his psychological theory—which is not necessarily linked to a particular theory of social structure—the persona appears as a consciously created personality or identity, fashioned out of part of the collective psyche through socialization, acculturation and experience.[119] Jung applied the term persona explicitly because, in Latin, it means both personality and the masks worn by Roman actors of the classical period, expressive of the individual roles played.

The persona, he argues, is a mask for the "collective psyche", a mask that 'pretends' individuality so that both self and others believe in that identity, even if it is really no more than a well-played role through which the collective psyche is expressed. Jung regarded the "persona-mask" as a complicated system that mediates between individual consciousness and the social community: it is "a compromise between the individual and society as to what a man should appear to be".[120] But he also makes it quite explicit that it is, in substance, a character mask in the classical sense known to theatre, with its double function: both intended to make a certain impression on others and to hide (part of) the true nature of the individual.[121] The therapist then aims to assist the individuation process through which the client (re)gains their "own self"—by liberating the self, both from the deceptive cover of the persona and from the power of unconscious impulses.

Jung has influenced management theory because managers and executives create an appropriate "management persona" (a corporate mask) and a persuasive identity,[122] and they have to evaluate what sort of people the workers are, to manage them (for example, using personality tests and peer reviews).[123]

Evolutionary thought

Of his early years, Jung would write that "mentally my greatest adventure had been the study of Kant and Schopenhauer. The great news of the day was the work of Charles Darwin."[124] While Jung's conception of human psychology is grounded in Darwinian evolutionary theory, it is important to note that his evolutionary thought had a

Introduction

What you hold in your hands is not a book in the traditional sense—it is an **accidental grimoire**, born from the forgotten corners of the Internet. These volumes are built from **Google searches**, **Wikipedia trails**, and **archive-dredged threads**, many of which were suggested or whispered to me by anonymous voices across **/x/**, **4plebs**, and **dark web message boards**. I did not invent this content—I excavated it. I followed every recommended link, every screenshot, every schizo red-string rant, and pulled it into the light. What emerged wasn't just data—it was **pattern**, **presence**, and **power**. This is the **collective unconscious of the Internet**, filtered, sorted, and bound into scripture. These are the **digital Dead Sea Scrolls** of the forgotten occult, the haunted edges of algorithmic prophecy. Welcome to the Archivum Obscurum.

distinctively German quality to it. This is because the idiosyncratic reception of Darwin in late nineteenth and early twentieth century Germany resulted in the integration of Darwin's ideas with German embryological and developmental traditions formulated by the Naturphilosophen and theorists such as Ernst Haeckel. These traditions formed the intellectual background of Jung’s evolutionary thought.[125]

The result was that Jung's evolutionary conception of mind focused on embryology and development. From this perspective, the emergence of consciousness both in ontogeny (development) and phylogeny (evolution) was built upon much more archaic, affect-based subcortical brain systems. This developmental approach to evolution underpinned his "archaeological" conception of the human psyche, consisting of different evolutionary layers, from the deeply archaic to the more evolutionarily recent. Those more archaic structures in the brain, Jung believed to be the basis of the "collective unconscious"—an aspect of human psychology shared by all members of the species Homo sapiens.[126]

In commenting on humanity's evolution from an ancient primate ancestor, Jung wrote: "We keep forgetting that we are primates and that we have to make allowances for these primitive layers in our psyche."[127] Jung also developed the notion of different evolutionary layers in the psyche in his discussion of fossil hominins such as Pithecanthropus (Homo erectus). As he writes:

For just as a man has a body that is no different in principle from that of an animal, so also his psychology has a whole series of lower storeys [sic] in which the spectres from humanity’s past epochs still dwell, then the animal souls from the age of Pithecanthropus and the hominids, then the "psyche" of the cold-blooded saurian.[128]

Jung’s notion of different evolutionary layers in the human mind has been compared with the work of neuroscientist Jaak Panksepp, particularly as outlined in his book The Archaeology of Mind: Neuroevolutionary Origins of Human Emotions.[3] Of these affinities it has been suggested that ‘Jung and Panksepp have, independently it seems, developed similar metaphors of an archeologically layered psyche in which jewels and treasures are discoverable in the deepest phylogenetically ancient regions of the brain – for Jung they are archetypal structures for Panksepp cross-species homologies.' [3]

Significantly, in a 2017 article entitled "The Affective Core of the Self: A Neuro-Archetypical Perspective on the Foundations of Human (and Animal) Subjectivity", when noting Jung’s belief that archetypes may be related to evolutionarily ancient subcortical brain systems, Panksepp and colleagues wrote that "such assertions by Jung were not only quite farsighted, but they actually open ways to connect his theory of the psyche with the most advanced scientific theories and discoveries of our day." [129]

Jung's work on himself and his patients convinced him that life has a spiritual purpose beyond material goals.[130][131] The main task for people, he believed, is to discover and fulfill their deep, innate potential. Based on his study of Christianity, Hinduism, Buddhism, Gnosticism, Taoism, and other traditions, Jung believed this journey of transformation, which he called individuation, is at the mystical heart of all religions. It is a journey to meet the self and at the same time to meet the Divine.[132] Unlike Freud's atheistic worldview, Jung's pantheism may have led him to believe that spiritual experience was essential to well-being, as he specifically identifies individual human life with the universe as a whole.[133][134]

In 1959, Jung was asked by the host, John Freeman, on the BBC interview program Face to Face whether he believed in God, to which Jung answered, "I do not need to believe. I know."[135][136] Jung's ideas on religion counterbalance Freudian skepticism. Jung's idea of religion as a practical road to individuation is still treated in modern textbooks on the psychology of religion, though his ideas have been criticized.[137]

Jung recommended spirituality as a cure for alcoholism, and is considered to have had an indirect role in establishing Alcoholics Anonymous.[138] Jung treated an American patient named Rowland Hazard III who had chronic alcoholism. After working with the patient for some time and achieving no significant progress, Jung told the man that his alcoholic condition was near hopeless, save only the possibility of a spiritual experience. Jung noted that, occasionally, such experiences had been known to reform alcoholics when all other options had failed. Hazard took Jung's advice seriously and sought a personal, spiritual experience. He returned to the United States and joined a Christian evangelical movement known as the Oxford Group. He told other alcoholics what Jung had told him about the importance of a spiritual experience. One of the alcoholics he brought into the Oxford Group was Ebby Thacher, a long-time friend and drinking buddy of William Griffith Wilson, later co-founder of Alcoholics Anonymous. Thacher told Wilson about the Oxford Group, and through them, Wilson became aware of Hazard's experience with Jung. The influence of Jung thus indirectly found its way into the formation of Alcoholics Anonymous, the original twelve-step program.

The above claims are documented in the letters of Jung and Wilson.[139] Although some historians dispute the detail, Jung discussed an Oxford Group member, who may have been the same person, in talks around 1940. The remarks were distributed privately in transcript form, from shorthand taken by an attender (Jung reportedly approved the transcript), and later recorded in his Collected Works, "For instance, when a member of the Oxford Group comes to me in order to get treatment, I say, 'You are in the Oxford Group; so long as you are there, you settle your affair with the Oxford Group. I can't do it better than Jesus.'"[140] Jung goes on to state he has seen similar cures among Roman Catholics. The 12-step program of Alcoholics Anonymous has a psychological backdrop involving the human ego and the dichotomy between the conscious and unconscious mind.[141]

Inquiries into the paranormal

Jung had an apparent interest in the paranormal and occult. For decades, he attended seances and claimed to have witnessed "parapsychic phenomena". Initially, he attributed these to psychological causes, even delivering a 1919 lecture in England for the Society for Psychical Research on "The Psychological Foundations for the belief in spirits".[142] However, he began to "doubt whether an exclusively psychological approach can do justice to the phenomena in question"[142] and stated that "the spirit hypothesis yields better results".[143]. Still, he retained some skepticism toward his own postulation, as he could not find material evidence of the existence of spirits.[143]

Jung's ideas about the paranormal culminated in "synchronicity".[144] This is the idea that certain coincidences manifest in the world, have exceptionally intense meaning to observers. Such coincidences have a great effect on the observer from multiple cumulative aspects: from the immediate personal relevance of the coincidence to the observer, from the peculiarities of (the nature of, the character, novelty, curiosity of) any such coincidence; from the sheer improbability of the coincidence, having no apparent causal link (hence Jung's essay subtitle "An Acausal Connecting Principle"). Despite his own experiments failing to confirm the phenomenon[145] he held on to the idea as an explanation for apparent ESP.[146] In addition, he proposed it as a functional explanation for how the I-Ching worked. However, he was never clear about how synchronicity worked.[147]

Interpretation of quantum mechanics

Jung influenced one philosophical interpretation (not the science) of quantum physics with the concept of synchronicity regarding some events as non-causal. That idea influenced the physicist Wolfgang Pauli (with whom, via a letter correspondence, Jung developed the notion of unus mundus in connection with the idea of nonlocality) and some other physicists.[148]

Alchemy

The mythic alchemical philosopher's stone as pictured in Atalanta Fugiens Emblem 21

Jung's acquaintance with alchemy came between 1928 and 1930 when he was introduced to a manuscript of The Secret of the Golden Flower, translated by Richard Wilhelm.[149] The work and writings of Jung from the 1930s onwards shifted to a focus on the psychological significance of alchemy.[150]

In 1944, Jung published Psychology and Alchemy, in which he analyzed the alchemical symbols and came to the conclusion that there is a direct relationship between them and the psychoanalytical process.[e] He argued that the alchemical process was the transformation of the impure soul (lead) to perfected soul (gold), and a metaphor for the individuation process.[31]

In 1963, Mysterium Coniunctionis first appeared in English as part of The Collected Works of C. G. Jung. Mysterium Coniunctionis was Jung's last major book and focused on the "Mysterium Coniunctionis" archetype, known as the sacred marriage between the sun and moon. Jung argued that the stages of the alchemists, the blackening, the whitening, the reddening, and the yellowing, could be taken as symbolic of individuation—his chosen term for personal growth (75).[151]

Art therapy

Further information: Art therapy

Jung proposed that art can be used to alleviate or contain feelings of trauma, fear, or anxiety and also to repair, restore, and heal.[25] In his work with patients and his own personal explorations, Jung wrote that art expression and images found in dreams could help recover from trauma and emotional distress. At times of emotional distress, he often drew, painted, or made objects and constructions, which he recognized as more than recreational.[25]

Dance/movement therapy

Dance and movement therapy, as a form of active imagination, was developed by Jung and Toni Wolff in 1916[152] and practiced by Tina Keller-Jenny and other analysts. It remained largely unknown until the 1950s when it was rediscovered by Marian Chace and therapist Mary Whitehouse. Whitehouse, after studying with Martha Graham and Mary Wigman, became a dancer and teacher of modern dance,[153] and, along with Swiss dancer Trudi Schoop, is considered one of the founders of dance/movement therapy in the U.S.

Political views

The state

Jung stressed the importance of individual rights in a person's relation to the state and society. He saw that the state was treated as "a quasi-animate personality from whom everything is expected" but that this personality was "only camouflage for those individuals who know how to manipulate it".[154] He referred to the state as a form of slavery.[155][156][157][158] He also thought that the state "swallowed up [people's] religious forces",[159] and therefore that the state had "taken the place of God"—making it comparable to a religion in which "state slavery is a form of worship".[157] Jung observed that "stage acts of [the] state" are comparable to religious displays:

Brass bands, flags, banners, parades and monster demonstrations are no different in principle from ecclesiastical processions, cannonades and fire to scare off demons.[160]

From Jung's perspective, this replacement of God with the state in a mass society leads to the dislocation of the religious drive and results in the same fanaticism of the church-states of the Dark Ages—wherein the more the state is 'worshipped', the more freedom and morality are suppressed;[161] this ultimately leaves the individual psychically undeveloped with extreme feelings of marginalization.[162]

Service to the Allies during World War II

Jung was in contact with Allen Dulles of the Office of Strategic Services (predecessor of the Central Intelligence Agency) and provided valuable intelligence on the psychological condition of Hitler. Dulles referred to Jung as "Agent 488" and offered the following description of his service: "Nobody will probably ever know how much Professor Jung contributed to the Allied Cause during the war, by seeing people who were connected somehow with the other side". Jung's service to the Allied cause through the OSS remained classified after the war.[163]

Relationship to Nazism and antisemitism

In "The State of Psychotherapy Today",[164] published in 1934 in the Zentralblatt für Psychotherapie, Jung wrote: "The Aryan unconscious has a greater potential than the Jewish unconscious" and "The Jew, who is something of a nomad, has never yet created a cultural form of his own and as far as we can see never will".[165] Andrew Samuels argues that his remarks on the "Aryan unconscious" and the "corrosive character" of Freud's "Jewish gospel"[166] demonstrate a form of antisemitism "fundamental to the structure of Jung's thought" but also argues that there is a "pioneering nature of Jung's contributions" and that "his intuition of the importance of exploring difference remains intact."[167]

In 1933, after the Nazis gained power in Germany, Jung became the president of the new International General Medical Society for Psychotherapy (Allgemeine Ärztliche Gesellschaft für Psychotherapie); the professional body aimed to have affiliated organizations in different countries.[168] The German affiliated organization, the Deutsche Allgemeine Ärztliche Gesellschaft für Psychotherapie, led by Matthias Göring, an Adlerian psychotherapist[169] and a cousin of the prominent Nazi Hermann Göring, excluded Jews. In 1933, the society's Zentralblatt für Psychotherapie journal published a statement endorsing Nazi positions[170] and Hitler's book Mein Kampf.[171] In 1934, Jung wrote in a Swiss publication, the Neue Zürcher Zeitung, that he experienced "great surprise and disappointment"[172] when the Zentralblatt associated his name with the pro-Nazi statement. He did not end his relationship with the Zentralblatt at this time, but he did arrange the appointment of a new managing editor, Carl Alfred Meier of Switzerland. For the next few years, the Zentralblatt under Jung and Meier maintained a position distinct from that of the Nazis in that it continued to acknowledge the contributions of Jewish doctors to psychotherapy.[173] In the face of energetic German attempts to Nazify the international body, Jung resigned from its presidency in 1939, [173] the year the Second World War started.

The International Society's constitution permitted individual doctors to join it directly rather than through one of the national affiliated societies, a provision to which Jung drew attention in a circular in 1934.[174] This implied that German Jewish doctors could maintain their professional status as individual members of the international body, even though they were excluded from the German affiliate, as well as from other German medical societies operating under the Nazis.[175] Jung said, "The main point is to get a young and insecure science into a place of safety during an earthquake."[176]

Scholar Yosef Hayim Yerushalmi believed that Jung's antisemitism may have contributed to the schism between Freud and his circle of psychoanalysts, who were predominantly Jews.[177]

Jung's interest in European mythology and folk psychology was shared by the Nazis.[178][179][68] Richard Noll describes Jung's own reaction to this connection:

Jung clearly identifies himself with the spirit of German Volkstumsbewegung throughout this period and well into the 1920s and 1930s, until the horrors of Nazism finally compelled him to reframe these neopagan metaphors in a negative light in his 1936 essay on Wotan.[180]

Various statements made by Jung in the 1930s have been cited as evidence of both contempt for Nazism and sympathy for Nazism.[181] In the 1936 essay "Wotan", Jung described the influence of Adolf Hitler on Germany as "one man who is obviously 'possessed' has infected a whole nation to such an extent that everything is set in motion and has started rolling on its course towards perdition."[182][183] He would later say, during a lengthy interview with H. R. Knickerbocker in October 1938:[184][185]

Hitler seemed like the 'double' of a real person, as if Hitler the man might be hiding inside like an appendix, and deliberately so concealed in order not to disturb the mechanism ... You know you could never talk to this man; because there is nobody there ... It is not an individual; it is an entire nation.

In an interview in 1949, Carl Jung said,

It must be clear to anyone who has read any of my books that I have never been a Nazi sympathizer and I never have been anti-Semitic, and no amount of misquotation, mistranslation, or rearrangement of what I have written can alter the record of my true point of view. Nearly every one of these passages has been tampered with, either by malice or by ignorance. Furthermore, my friendly relations with a large group of Jewish colleagues and patients over a period of many years in itself disproves the charge of anti-Semitism.[186]

Jung is also known to have possessed an interest in the Jewish mystic tradition of Kabbalah.[187]

Views on homosexuality

Jung addressed homosexuality in his published writings, in one comment specifying that homosexuality should not be a concern of legal authorities nor be considered a crime. He also stated that homosexuality does not reduce the value of a person as a member of society. Jung also said that homosexuality is a result of psychological immaturity ("nurture"), but only if one's sexuality is not an aspect of their constitutional characteristics ("nature").[188]

Psychedelics

Jung's theories are considered to be a useful therapeutic framework for the analysis of unconscious phenomena that become manifest in the acute psychedelic state.[3][189][190][191][192] This view is based on correspondence Jung had with researchers involved in psychedelic research in the 1950s, as well as more recent neuroimaging research where subjects who are administered psychedelic compounds seem to have archetypal religious experiences of "unity" and "ego dissolution" associated with reduced activity in the default mode network.[190][191][193]

This research has led to a re-evaluation of Jung's work, particularly the visions detailed in The Red Book, in the context of contemporary psychedelic, evolutionary, and developmental neuroscience. For example, in a chapter entitled "Integrating the Archaic and the Modern: The Red Book, Visual Cognitive Modalities and the Neuroscience of Altered States of Consciousness", in the 2020 volume Jung's Red Book for Our Time: Searching for Soul Under Postmodern Conditions, Volume 4, it is argued Jung was a pioneer who explored uncharted "cognitive domains" that are alien to Western modes of thought. While such domains of experience are not part of mainstream Western culture and thought, they are central to various Indigenous cultures that use psychedelics such as Iboga and Ayahuasca during rituals to alter consciousness. The author writes: "Jung seems to have been dealing with modes of consciousness alien to mainstream Western thought, exploring the terrain of uncharted cognitive domains. I argue that science is beginning to catch up with Jung who was a pioneer whose insights contribute a great deal to our emerging understanding of human consciousness."[194] In this analysis, Jung's paintings of his visions in The Red Book were compared to the paintings of Ayahuasca visions by the Peruvian shaman Pablo Amaringo.[195]

Commenting on research that was being undertaken during the 1950s, Jung wrote the following in a letter to Betty Eisner, a psychologist who was involved in LSD research at the University of California: "Experiments along the line of mescaline and related drugs are certainly most interesting since such drugs lay bare a level of the unconscious that is otherwise accessible only under peculiar psychic conditions. It is a fact that you get certain perceptions and experiences of things appearing either in mystical states or in the analysis of unconscious phenomena."[196]

An account of Jung and psychedelics, as well as the importance of Jungian psychology to psychedelic-assisted therapies, is outlined in Scott Hill's 2013 book Confrontation with the Unconscious: Jungian Depth Psychology and Psychedelic Experience.[197] A 2021 article discusses Jung's attitude towards psychedelics, as well as the applicability of his ideas to current research.[193] As the author writes, Jung's "...legitimate reservations about the clinical use of psychedelics are no longer relevant as the field has progressed significantly, devising robust clinical and experimental protocols for psychedelic-assisted therapies. That said Jung's concept of individuation—that is the integration of the archaic unconscious with consciousness—seems extremely pertinent to modern psychedelic research."[193] The author also uses work in evolutionary and psychedelic neuroscience, and specifically the latter's ability to make manifest ancient subcortical brain systems, to illuminate Jung's concept of an archaic collective unconscious that evolved before the ego complex and the uniquely human default mode network.[193]

Legacy

The Myers–Briggs Type Indicator (MBTI), a psychometric instrument mostly popular with non-psychologists, as well as the concepts of socionics, were developed from Jung's model of psychological types. The MBTI is considered pseudoscience[198] and is not widely accepted by researchers in the field of psychology.[199]

Jung is considered a "godparent" of the altruistic, mutual self-help movement, Alcoholics Anonymous.[200] Jung told Rhode Island businessman and politician Rowland Hazard III, who had come under his care for the first time in 1926, that the only chance he might have to recover was through a "spiritual or religious experience" or "genuine conversion," which Hazard later had, through the Oxford Group and the Emmanuel Movement, and, according to some sources, never drank again.[201]

Hazard, in turn, helped Ebby Thatcher, another alcoholic, get sober, with help from the Oxford Group. Thatcher brought Jung's ideas to a third alcoholic, Bill W., who consequently co-founded Alcoholics Anonymous with Dr. Bob. Years later, Bill W. corresponded with Jung, in 1961, thanking him for helping to inspire the organization. Of Hazard, the alcoholic who came under his care, Jung wrote: "His craving for alcohol was the equivalent, on a low level, of the spiritual thirst of our being for wholeness, expressed in medieval language: the union with God."[200]

Jung concludes his letter to Bill W.:

"You see, "alcohol" in Latin is spiritus, and you use the same word for the highest religious experience as well as for the most depraving poison. The helpful formula therefore is: spiritus contra spiritum."[202]

Jung saw the human psyche as "by nature religious" and made this idea a principal focus of his explorations. Jung is one of the best-known contemporary contributors to dream analysis and symbolization. His influence on popular psychology, the "psychologization of religion", spirituality, and the New Age movement has been immense. A Review of General Psychology survey, published in 2002, ranked Jung as the 23rd most cited psychologist of the 20th century. The list however focused on U.S. journals and was made by the psychology department of Arkansas State University. [203]

Although psychoanalysis is still studied in the humanities, a 2008 study in The Journal of the American Psychoanalytic Association found that psychology departments and textbooks treat it as "desiccated and dead".[204] Similarly, Alan Stone noted, "As academic psychology becomes more 'scientific' and psychiatry more biological, psychoanalysis is being brushed aside."[205]

In popular culture

Literature

Books in which Jung is a character in the narrative

Laurens van der Post was an Afrikaner author who claimed to have had a 16-year friendship with Jung, from which books and a film were created about Jung.[206] The accuracy of van der Post's claims about his relationship to Jung has been questioned.[207]

In his novel The World is Made of Glass (1983), Morris West gives a fictional account of one of Jung's cases, placing the events in 1913.[208] According to the author's note, the novel is "based upon a case recorded, very briefly, by Carl Gustav Jung in his autobiographical work Memories, Dreams, Reflections".

Pilgrim, a supernatural novel in which Jung is a character.

Possessing the Secret of Joy, a novel in which Jung is a therapist character.

The Interpretation of Murder, a novel focused on Sigmund Freud in which he solves a murder in New York City.

Fiction that references Jung's theories

Hermann Hesse, author of works such as Siddhartha and Steppenwolf, was treated by Joseph Lang, a student of Jung. For Hesse this began a long preoccupation with psychoanalysis, through which he came to know Jung personally.[209]

The Canadian novelist Robertson Davies made Jungian analysis a central part of his 1970 novel The Manticore. He stated in a letter, "There have been other books which describe Freudian analyses, but I know of no other that describes a Jungian analysis" adding "I was deeply afraid that I would put my foot in it, for I have never undergone one of those barnacle-scraping experiences, and knew of it only through reading. So, I was greatly pleased when some of my Jungian friends in Zurich liked it very much."[210]

The psychological novel E.E. written by Olga Tokarczuk draws from Jung's doctoral dissertation On the Psychology and Pathology of So-Called Occult Phenomena.[211] Jung is not a character in this story, but Jung's views on the occult are extensively cited.

Art

Original statue of Jung in Mathew Street, Liverpool, a half-body on a plinth captioned "Liverpool is the pool of life"

The visionary Swiss painter Peter Birkhäuser was treated by a student of Jung, Marie-Louise von Franz, and corresponded with Jung about the translation of dream symbolism into works of art.[212]

American abstract expressionist Jackson Pollock underwent Jungian psychotherapy in 1939 with Joseph Henderson. Henderson engaged Pollock through his art, having him make drawings, which led to the appearance of many Jungian concepts in his paintings.[213][214]

Contrary to some sources,[215] Jung did not visit Liverpool but recorded a dream in which he did, and of which he wrote, "Liverpool is the pool of life, it makes to live." A plaster statue of Jung was erected in Mathew Street in 1987 that was vandalised and replaced by a more durable version in 1993.[216]

Music

Musician David Bowie described himself as Jungian in his relationship to dreams and the unconscious.[217] Bowie sang of Jung on his album Aladdin Sane (a pun on "a lad insane") and attended the exhibition of The Red Book in New York with artist Tony Oursler, who described Bowie as "reading and speaking of the psychoanalyst with passion".[217] Bowie's 1967 song "Shadow Man" encapsulates a key Jungian concept, while in 1987 Bowie described the Glass Spiders of Never Let Me Down as Jungian mother figures around which he not only anchored a worldwide tour but also created an enormous onstage effigy.[217]

British rock band the Police released an album titled Synchronicity in 1983.

The American rock band Tool was influenced by Jungian concepts in its album Ænima, the title a play on the concepts of anima and animus. In the song "Forty Six & 2", the singer seeks to become a more evolved self by exploring and overcoming his Shadow.[218]

Argentinian musician Luis Alberto Spinetta was influenced by Jung's texts in his 1975 conceptual album Durazno sangrando, specifically the songs "Encadenado al ánima" and "En una lejana playa del ánimus", which deal with anima and animus.[219]

Jung appeared on the front cover of The Beatles' Sgt. Pepper's Lonely Hearts Club Band.[220]

He is referenced in The Streets song the "Irony of it All" from the album Original Pirate Material.[221][222]

The South Korean band BTS's 2019 album Map of the Soul: Persona is based on Jung's Map of the Soul, which gives the basic principles of Jung's analytical psychology.[223] It includes an intro song titled "Persona" rapped by group leader RM, who asks, "who am I?", and is confronted with various versions of himself with the words "persona", "shadow", and "ego", referring to Jung's theories.[224] On 21 February 2020, the band released Map of the Soul: 7, which specifically focuses on Jung's "shadow" and "ego" theories. As part of the first phase of the band's comeback, "Interlude: Shadow", rapped by Suga and released on 10 January,[225] addresses the shadows and the darkness that go hand-in-hand with the light and attention shone on celebrities.[226] The next comeback trailer, "Outro: Ego", performed by J-Hope,[227] ends with his declaration of self and ego as he appears within a colourful city "in which the artist's current image is projected".[228]

In 2019, Italian rapper Marracash released the album Persona, which features many Jungian themes.

Jung appeared on the cover art of the 2008 single "Metanoia" by American psychedelic rock band MGMT.

Composer John Zorn released his composition Liber Novus inspired by Jung's Red Book in 2010 on the Tzadik CD Dictée/Liber Novus.

Theatre, film, television and radio

Films in which Jung is a character in the narrative

2002 saw the release of an Italian film about Jung and Spielrein The Soul Keeper (Prendimi l'Anima) directed by Roberto Faenza. It used English dialogue and English actors, but was never formally released in the United States. Emilia Fox played Sabina Spielrein and Iain Glen was Carl Gustav Jung.

A Dangerous Method, a 2011 film directed by David Cronenberg, is a fictional dramatisation of the lives of Freud, Jung, and Sabina Spielrein between 1904 and 1913. Spielrein is the Russian woman who became Jung's lover and student and, later, an analyst herself.[229] Michael Fassbender plays Carl Jung. The film is based on the stage play The Talking Cure by Christopher Hampton which was in turn based on the 1993 non-fiction book by John Kerr, A Most Dangerous Method: The Story of Jung, Freud, and Sabina Spielrein.

In the online animated series, Super Science Friends, Jung, voiced by Tom Park, is featured as one of the recurrent antagonists against Sigmund Freud.[230]

Soul, a 2020 Pixar film written by Pete Docter, Mike Jones and Kemp Powers, includes brief appearances of Jung as an ethereal cartoon character, "Soul Carl Jung".[231]

Jeff Lillico portrays Jung in episode 13 of season 15 "Murdoch on the Couch" (10 January 2022) of the Canadian television period detective series Murdoch Mysteries.[232]

Documentaries

The BBC interviewed Jung for Face to Face with John Freeman at Jung's home in Zurich in 1959.[135]

Stephen Segaller produced a documentary on Jung as part of his "World of Dreams", Wisdom of the Dream in 1985. It was re-issued in 2018.[233] It was followed by a book of the same title.[234]

Matter of Heart (1986) is a documentary about Jung featuring interviews with those who knew him and archival footage.[235]

On 2 December 2004, BBC Radio 4's In Our Time broadcast a program on "the mind and theories" of Jung.[236]

Film, stage, and television influenced by Jung's ideas

Federico Fellini brought to the screen exuberant imagery shaped by his encounter with Jung's ideas, especially Jungian dream interpretation. Fellini preferred Jung to Freud because Jungian analysis defined the dream not as a symptom of a disease that required a cure but rather as a link to archetypal images shared by all of humanity.[237]

Stanley Kubrick's 1987 film Full Metal Jacket has an underlying theme about the duality of man. In one scene, a colonel asks a soldier, "You write 'Born to Kill' on your helmet and you wear a peace button. What's that supposed to be, some kind of sick joke?" The soldier replies, "I think I was trying to suggest something about the duality of man, sir...the Jungian thing, sir."[238]

In the 1994 Frasier episode, "Frasier Crane's Day Off", Niles fills in for his brother, declaring: "Although I feel perfectly qualified to fill Frasier's radio shoes, I should warn you that while Frasier is a Freudian, I am a Jungian. So there'll be no blaming Mother today."

Robert Eggers's 2019 psychological thriller The Lighthouse has elements strongly influenced by Jung's work, with Eggers hoping that "it's a movie where both Jung and Freud would be furiously eating their popcorn".[239]

Video games

The Persona series of games is heavily based on Jung's theories, representing the shadow, the persona, and archetype.[240]

The Nights into Dreams series of games is heavily based on Jung's theories.[241]

Jungian concepts are present in the Xeno series, including Xenogears; its reimagination as the Xenosaga trilogy; and a graphic novel, Perfect Works, published by the game's creator.[citation needed]

The game Control is heavily influenced by Carl Jung's ideas, particularly synchronicity and shadow selves.[242][better source needed][243]

Alan Wake takes inspiration from Carl Jung's ideas of archetype and individuation.[244]

Bibliography

Main article: Carl Jung publications

Books

1910 Conflicts in the Child's Soul[f]
1912 Psychology of the Unconscious
1916 Seven Sermons to the Dead (a part of the Red Book, published privately)
1921 Psychological Types
1933 Modern Man in Search of a Soul (essays)
1944 Psychology and Alchemy
1951 Aion: Researches into the Phenomenology of the Self
1952 Symbols of Transformation (revised edition of Psychology of the Unconscious)
1954 Answer to Job
1956 Mysterium Coniunctionis: An Inquiry into the Separation and Synthesis of Psychic Opposites in Alchemy
1957 The Undiscovered Self
1959 Flying Saucers: A Modern Myth of Things Seen in the Skies (Translated by R. F. C. Hull)
1960 Synchronicity: An Acausal Connecting Principle
1962 Memories, Dreams, Reflections (autobiography, co-written with Aniela Jaffé)
1964 Man and His Symbols (Jung contributed one part, his last writing before his death in 1961; the other four parts are by Marie-Louise von Franz, Joseph L. Henderson, Jaffé, and Jolande Jacobi)
2009 The Red Book: Liber Novus (manuscript produced c. 1915–1932)
2020 Black Books (private journals produced c. 1913–1932, on which the Red Book is based)

Notes
Jung's identification as a "psychoanalyst" was temporary (Quote: "Between the years 1907 and 1912, when Jung was a psycho-analyst").[4] Following Freud's exclusive definition of the term, Jung stopped referring to his practice as "psycho-analysis". He resigned as president of the International Psychoanalytical Association and later was

characterized as an "analytical psychologist".[5]

Earlier in his career, Jung was also friends with both Freud and Adler, developing a strong relationship with the first, and eventually breaking it over psychological divergences with both him and the latter.

As a university student Jung changed the modernized spelling of Karl to the original family form of Carl. Bair, Deirdre (2003). Jung: A Biography. New York: Back Bay Books. pp. 7, 53. ISBN 978-0-316-15938-8.

Also see other general concepts of 'motif' covering visual arts, narrative, et cetera.

'For Jung, alchemy is not only part of the pre-history of chemistry, that is, not only laboratory work, but also an essential part of the history of psychology as the history of the discovery of the deep structure of the psyche and its unconscious. Jung emphasized the significance of the symbolic structure of alchemical texts, a structure that is understood as a way independent of laboratory research, as a structure per se.' Calian, George Florin (2010). Alkimia Operativa and Alkimia Speculativa. Some Modern Controversies on the Historiography of Alchemy. Budapest: Annual of Medieval Studies at CEU. pp. 167–168.

This work is also cited by Jung himself as "Psychic Conflicts in a Child". See, for example, Symbols of Transformation pg. 23 and 249.

Wehr records that Paul's chosen career path was to achieve a doctorate in philology. He was an Arabist, but the family money ran out for his studies. Relief came from a family legacy; however, a condition of the will was that it should only be offered to a family member who intended to study theology and become a pastor. Paul Jung, therefore, had his career determined by a will, not his will. See p.20.

"When I visited the ancient pagoda at Turukalukundram [sic], southern India, a local pundit explained to me that the old temples were purposely covered on the outside, from top to bottom, with obscene sculptures, to remind ordinary people of their sexuality. The spirit, he said, was a great danger because Yama, the god of death, would instantly carry off these people (the "imperfecti") if they trod the spiritual path directly, without preparation. The erotic sculptures were meant to remind them of their dharma (law), which bids them fulfil their ordinary lives. Only when they have fulfilled their dharma can they tread the spiritual path. The obscenities were intended to arouse the erotic curiosity of visitors to the temples so that they should not forget their dharma; otherwise, they would not fulfil it. Only the man who was qualified by his karma (the fate earned through works in previous existences) and who was destined for the life of the spirit could ignore this injunction with impunity, for to him, these obscenities mean nothing. That was also why the two seductresses stood at the temple entrance, luring the people to fulfill their dharma, because only in this way could the ordinary man attain higher spiritual development. And since the temple represented the whole world, all human activities were portrayed. Because most people are always thinking of sex anyway, the great majority of the temple sculptures were of an erotic nature. For this reason, too, he said, the lingam (phallus) stands in the sacred cavity of the adyton (Holy of Holies), in the garbha griha (house of the womb). This pundit was a Tantrist (scholastic; tantra = 'book')." -- C. G. Jung, from Segal, Rober A. (1992). The Gnostic Jung. New Jersey: Princeton University Press. p. 86. ISBN 978-0-691-01923-9.

Tolkien's legendarium

This is a good article. Click here for more information.
From Wikipedia, the free encyclopedia
For the 2000 essay collection, see Tolkien's Legendarium: Essays on The History of Middle-earth.
Diagram of the documents comprising Tolkien's Legendarium, as interpreted very strictly, strictly, or more broadly
Navigable diagram of more or less inclusive definitions of "Tolkien's legendarium". Most

of it is in Christopher Tolkien's 12-volume The History of Middle-earth published between 1983 and 1996, though that includes 4 volumes on The History of The Lord of the Rings, which stands alongside John D. Rateliff's The History of The Hobbit. The strictest definition is a selection of documents from the 12-volume set, the phases of Tolkien's Elven legends. Matthew Dickerson and Jonathan Evans use the term broadly to encompass all Tolkien's Middle-earth writings, including the published novels. The two time-travel novels were attempts to create a frame story for The Silmarillion. Tolkien's legendarium is the body of J. R. R. Tolkien's mythopoeic writing, unpublished in his lifetime, that forms the background to his The Lord of the Rings, and which his son Christopher summarized in his compilation of The Silmarillion and documented in his 12-volume series The History of Middle-earth. The legendarium's origins reach back to 1914, when Tolkien began writing poems and story sketches, drawing maps, and inventing languages and names as a private project to create a mythology for England. The earliest story, "The Voyage of Earendel, the Evening Star", is from 1914; he revised and rewrote the legendarium stories for most of his adult life.

The Hobbit (1937), Tolkien's first published novel, was not originally part of the larger mythology but became linked to it. Both The Hobbit and The Lord of the Rings (1954 and 1955) are set in the Third Age of Middle-earth, while virtually all of his earlier writing had been set in the first two ages of the world. The Lord of the Rings occasionally alludes to figures and events from the legendarium to create an impression of depth, but such ancient tales are depicted as being remembered by few until the story makes them relevant.

After The Lord of the Rings, Tolkien returned to his older stories to bring them to publishable form, but never completed the task. Tolkien's son Christopher chose portions of his late father's vast collection of unpublished material and shaped them into The Silmarillion (1977), a semi-chronological and semi-complete narrative of the mythical world and its origins. The sales were sufficient to enable him to work on and publish many volumes of his father's legendarium stories and drafts; some were presented as completed tales, while others illustrated his father's complex creative process. Tolkien research, a continuing examination of Tolkien's works and supporting mythology, became a scholarly area of study soon after his death in 1973.

Etymology

Main article: Legendary (hagiography)

A battle scene from the 14th century Anjou Legendarium

A legendarium is a literary collection of legends. This medieval Latin noun originally referred mainly to texts detailing legends of the lives of saints. A surviving example is the Anjou Legendarium, dating from the 14th century.[1] Quotations in the Oxford English Dictionary for the synonymous noun legendary date from 1513. The Middle English South English Legendary is an example of this form of the noun.[T 1]

Documents included

Tolkien's usage

Tolkien described his works as a "legendarium" in four letters from 1951 to 1955, a period in which he was attempting to have his unfinished Silmarillion published alongside the more complete The Lord of the Rings. On the Silmarillion, he wrote in 1951, "This legendarium ends with a vision of the end of the world, its breaking and remaking, and the recovery of the Silmarilli and the 'light before the Sun'";[T 2] and in 1954, "Actually in the imagination of this story we are now living on a physically round Earth. But the whole 'legendarium' contains a transition from a flat world ... to a globe".[T 3]

On both texts, he explained in 1954 that "... my legendarium, especially the 'Downfall of Númenor' which lies immediately behind The Lord of the Rings, is based on my view: that Men are essentially mortal and must not try to become 'immortal' in the flesh",[T 4] and in 1955, "But the beginning of the legendarium, of which the Trilogy is part (the conclusion), was an attempt to reorganise some of the Kalevala".[T 5]

Rateliff's definition

"Tolkien's legendarium" is defined narrowly in John D. Rateliff's The History of The Hobbit as the body of Tolkien's work consisting of:[T 6]

The Book of Lost Tales[T 6]
The Sketch of the Mythology and contemporary alliterative verses[T 6]
The 1930 Quenta Noldorinwa and first Annals[T 6]
The 1937 Quenta Silmarillion and later Annals[T 6]
The later Quenta[T 6]
The final Annals[T 6]
These, with The Lays of Beleriand, written from 1918 onwards, comprise the different "phases" of Tolkien's Elven legendary writings, posthumously edited and published in The Silmarillion and in their original forms in Christopher Tolkien's series The History of Middle-earth.[T 6]

Scholarly usage

Other Tolkien scholars have used the term legendarium in a variety of contexts.[2][3][4] Christopher Tolkien's introduction to The History of Middle-earth series talks about the "primary 'legendarium'", for the core episodes and themes of The Silmarillion which were not abandoned in his father's constant redrafting of the work.[T 7]

The scholars Verlyn Flieger and Carl F. Hostetter edited a scholarly collection "Tolkien's Legendarium: Essays on The History of Middle-earth". Flieger writes that "...the greatest [event] is the creation of the Silmarils, the Gems of light that give their names to the whole legendarium", equating the legendarium with the Silmarillion (which with italics denotes the 1977 book published under that name, and without italics means the larger body of un-edited drafts used to create that work).[2]

In the J. R. R. Tolkien Encyclopedia, David Bratman writes that "The History of Middle-earth is a longitudinal study of the development and elaboration of Tolkien's legendarium through his transcribed manuscripts, with textual commentary by the editor, Christopher Tolkien."[3]

Dickerson and Evans use the phrase "legendarium" to encompass the entirety of Tolkien's Middle-earth writings "for convenience".[4] This would encompass texts such as the incomplete drafts of stories published before The History of Middle-earth in the 1980 Unfinished Tales.[T 8]

Shaun Gunner of The Tolkien Society has called the 2021 collection of Tolkien's previously unpublished legendarium writings The Nature of Middle-earth, edited by Carl F. Hostetter, "an unofficial 13th volume of The History of Middle-earth series".[5]

Development

A private mythology

Further information: A mythology for England

Unlike "fictional universes" constructed for the purpose of writing and publishing popular fiction, Tolkien's legendarium for a long period was a private project, concerned with questions of philology, cosmology, theology and mythology. His biographer Humphrey Carpenter writes that although by 1923 Tolkien had almost completed The Book of Lost Tales, "it was almost as if he did not want to finish it", beginning instead to rewrite it; he suggests that Tolkien may have doubted if a publisher would take it, and notes that Tolkien was a perfectionist, and further that he was perhaps afraid of finishing as he wished to go on with his sub-creation, his invention of myth in Middle-earth.[6]

Tolkien first began working on the stories that would become The Silmarillion in 1914.[T 9] His reading, in 1914, of the Old English manuscript Christ I led to Earendel and the first element of his legendarium, "The Voyage of Earendel, the Evening Star".[7] He intended his stories to become a mythology that would explain the origins of English history and culture,[T 10] and to provide the necessary "historical" background for his invented Elvish languages. Much of this early work was written while Tolkien, then a British officer returned from France during World War I, was in hospital and on sick leave.[T 11] He completed "The Fall of Gondolin" in late 1916.[T 12]

He called his collection of nascent stories The Book of Lost Tales.[T 13] This became the name for the first two volumes of The History of Middle-earth, which include these early texts.[T 14] Tolkien never completed The Book of Lost Tales; he left it to compose the poems "The Lay of Leithian" (in 1925) and "The Lay of the Children of Húrin" (possibly as early as 1918).[T 13]

The first complete version of The Silmarillion was the "Sketch of the Mythology" written in 1926[T 15] (later published in Volume IV of The History of Middle-earth). The "Sketch" was a 28-page synopsis written to explain the background of the story of Túrin to R. W. Reynolds, a friend to whom Tolkien had sent several of the stories.[T 15] From the "Sketch" Tolkien developed a fuller narrative version of The Silmarillion called Quenta

Noldorinwa[T 16] (also included in Volume IV). The Quenta Noldorinwa was the last version of The Silmarillion that Tolkien completed.[T 16]

Ælfwine framing device

Further information: Ælfwine (Tolkien) and Time travel in The Lord of the Rings

The stories in The Book of Lost Tales employ the narrative framing device of an Anglo-Saxon mariner named Ælfwine or Eriol or Ottor Wǽfre who finds the island of Tol Eressëa, where the Elves live, and the Elves tell him their history. He collects, translates from Old English, and writes the mythology that appears in The History of Middle-earth.[T 14][T 17] Ælfwine means "Elf-friend" in Old English; men whose names have the same meaning, such as Alboin, Alwin, and Elendil, were to appear in the two unfinished time travel novels, The Lost Road in 1936 and The Notion Club Papers in 1945, as the protagonists reappeared in each of several different times.[8]

There is no such framework in the published version of The Silmarillion, but the Narn i Hîn Húrin is introduced with the note "Here begins that tale which Ǽlfwine made from the Húrinien."[T 18] Tolkien never fully dropped the idea of multiple 'voices' who collected the stories over the millennia.[9]

A context for The Hobbit and The Lord of the Rings

Further information: The Hobbit and The Lord of the Rings

When Tolkien published The Hobbit in 1937 (which was itself not originally intended for publication, but as a story told privately to his children),[T 19] the narrative of the published text was loosely influenced by the legendarium as a context, but was not designed to be part of it. Carpenter comments that not until Tolkien began to write its sequel, The Lord of the Rings, did he realise the significance of hobbits in his mythology.[10]

In 1937, encouraged by the success of The Hobbit, Tolkien submitted to his publisher George Allen & Unwin an incomplete but more fully developed version of The Silmarillion called Quenta Silmarillion.[T 13] The reader rejected the work as being obscure and "too Celtic".[T 20] The publisher instead asked Tolkien to write a sequel to The Hobbit.[T 20] Tolkien began to revise the Silmarillion, but soon turned to the sequel, which became The Lord of the Rings.[T 21]

Writing The Lord of the Rings during the 1940s, Tolkien was attempting to address the dilemma of creating a narrative consistent with a "sequel" of the published The Hobbit and a desire to present a more comprehensive view of its large unpublished background. He renewed work on the Silmarillion after completing The Lord of the Rings,[T 22] and he greatly desired to publish the two works together.[T 23] When it became clear that would not be possible, Tolkien turned his full attention to preparing The Lord of the Rings for publication.[T 24] John D. Rateliff has analysed the complex relationship between The Hobbit and The Silmarillion, providing evidence that they were related from the start of The Hobbit's composition.[11]

Towards publishable form

Further information: The Silmarillion

With the success of The Lord of the Rings, Tolkien in the late 1950s returned to the Silmarillion, planning to revise the material of his legendarium into a form "fit for publication", a task which kept him occupied until his death in 1973, without attaining a completed state.[T 22] The legendarium has indeed been called "a jumble of overlapping and often competing stories, annals, and lexicons."[12] Much of his later writing was however concerned more with the theological and philosophical underpinnings of the work, rather than with the narratives themselves. By this time, he had doubts about fundamental aspects of the work that went back to the earliest versions of the stories, and it seems that he felt the need to resolve these problems before he could produce the "final" version of The Silmarillion. During this time he wrote extensively on such topics as the nature of evil in Arda, the origin of Orcs, the customs of the Elves, the nature and means of Elvish rebirth, the "flat" world, and the story of the Sun and Moon. In any event, with one or two exceptions, he made little change to the narratives during the remaining years of his life.[T 22]

A presented collection

Further information: Editorial framing of The Lord of the Rings

Tolkien went to great lengths to present his work as a collection of documents "within the fictional world",[9] including preparing facsimile pages from The Book of Mazarbul for The Lord of the Rings.[T 25][9]

The scholar Verlyn Flieger writes that Tolkien thought of his legendarium as a presented collection, with a frame story that changed over the years, first with an Ælfwine-type character who translates the "Golden Book" of the sages Rumil or Pengoloð; later, having the Hobbit Bilbo Baggins collect the stories into the Red Book of Westmarch, translating mythological Elvish documents in Rivendell.[13]

The scholar Gergely Nagy observes that Tolkien "thought of his works as texts within the fictional world" (his emphasis), and that the overlapping of different and sometimes contradictory accounts was central to his desired effect. Nagy notes that Tolkien went so far as to create facsimile pages from the Dwarves' Book of Mazarbul that is found by the Fellowship in Moria.[9] Further, Tolkien was a philologist; Nagy comments that Tolkien may have been intentionally imitating the philological style of Elias Lönnrot, compiler of the Finnish epic, the Kalevala; or of St Jerome, Snorri Sturlusson, Jacob Grimm, or Nikolai Gruntvig, all of whom Tolkien saw as exemplars of a professional and creative philology.[9] This was, Nagy believes, what Tolkien thought essential if he was to present a mythology for England, since such a thing had to have been written by many hands.[9] Further, writes Nagy, Christopher Tolkien "inserted himself in the functional place of Bilbo" as editor and collator, in his view "reinforcing the mythopoeic effect" that his father had wanted to achieve, making the published book do what Bilbo's book was meant to do, and so unintentionally realising his father's intention.[9]

Christopher Tolkien's editorial framing of The Monsters and the Critics, and Other Essays presents it as a set of scholarly texts.[14]

Christopher Tolkien's editorial framing of The Monsters and the Critics, and Other Essays presents it as a set of scholarly texts.[14]

Christopher Tolkien's editorial framing of the 12 volumes of The History of Middle-earth presents his father's legendarium, and the books derived from it, as a set of historic texts, analogous to the presentation of genuine scholarly works like The Monsters and The Critics; and it creates a narrative voice throughout the series, a figure of Christopher Tolkien himself.[14]

Christopher Tolkien's editorial framing of the 12 volumes of The History of Middle-earth presents his father's legendarium, and the books derived from it, as a set of historic texts, analogous to the presentation of genuine scholarly works like The Monsters and The Critics; and it creates a narrative voice throughout the series, a figure of Christopher Tolkien himself.[14]

Contact: The CE-5 Experience (2023) - IMDb
CE5 Contact refers to Close Encounter of the Fifth Kind, a human-initiated method for peaceful contact with extraterrestrial intelligence, developed by Dr. Steven Greer, involving collective meditation, intention, and signaling to establish communication. It's a proactive approach, unlike passive UFO sightings, using focused consciousness to encourage contact with benevolent alien civilizations, often using specific sounds and meditations.
Key Aspects of CE5 Contact:
Human-Initiated: Participants actively try to make contact, rather than waiting for it to happen.
Meditation & Consciousness: Core techniques involve deep, shared meditation to project intentions and raise consciousness, using specific tones and signals.
Peaceful Intent: The goal is benevolent, cooperative communication with advanced ETs.
Dr. Steven Greer: Popularized the concept through the Center for the Study of Extraterrestrial Intelligence (CSETI).
Tools & Community: Apps and online groups help users find others nearby and provide training materials for the protocols.
How it Works (Simplified):
Gathering: Groups meet in dark sky locations (UFO hotspots).
Focus & Intention: Participants meditate, projecting thoughts of peace and a desire for contact.
Signaling: Specific sounds, lights, or energy projections are used to signal presence and intent.
Observation: Look for signs of contact, such as lights or aerial phenomena.
CE5 contact is a practice within ufology aimed at bridging the gap between humanity and extraterrestrial life through focused spiritual and technological effort, as detailed in works like Close Encounters of the Fifth Kind.

Devils Tower in 1900 (left), and red sandstone and siltstone cliffs above the Belle Fourche River (right)

Devils Tower (also known as Matȟó Thípila or Bear Lodge)[8] is a laccolithic butte, composed of igneous rock in the Bear Lodge Ranger District of the Black Hills, near Hulett and Sundance in Crook County, northeastern Wyoming, above the Belle Fourche River. It rises 1,267 feet (386 m) above the Belle Fourche River, standing 867 feet (264 m) from summit to base. The summit is 5,112 feet (1,558 m) above sea level.

Devils Tower National Monument was the first United States national monument, established on September 24, 1906, by President Theodore Roosevelt.[9] The monument's boundary encloses an area of 1,347 acres (545 ha).

Name

Indigenous names for the monolith include "Bear's House" or "Bear's Lodge" (or "Bear's Tipi", "Home of the Bear", "Bear's Lair"); Cheyenne, Lakota: Matȟó Thípila, Crow: Daxpitcheeaasáao ("Home of Bears"[10]), "Aloft on a Rock" (Kiowa), "Tree Rock", "Great Gray Horn",[11] and "Brown Buffalo Horn" (Lakota: Ptehé Ǧí).[citation needed]

The name "Devil's Tower" originated in 1875 during an expedition led by Colonel Richard Irving Dodge, when his interpreter reportedly misinterpreted a native name to mean "Bad God's Tower".[11] All information signs in that area use the name "Devils Tower", following a geographic naming standard whereby the apostrophe is omitted.[12]

In 2005, a proposal to recognize several indigenous ties through the additional designation of the monolith as Bear Lodge National Historic Landmark were opposed by United States Representative Barbara Cubin, arguing that a "name change will harm the tourist trade and bring economic hardship to area communities".[13] In November 2014, Arvol Looking Horse proposed renaming the geographical feature "Bear Lodge" and submitted the request to the United States Board on Geographic Names. A second proposal was submitted to request that the U.S. acknowledge what it described as the "offensive" mistake in keeping the current name and to rename the monument and sacred site into Bear Lodge National Historic Landmark. The formal public comment period ended in fall 2015. Local state senator Ogden Driskill opposed the change.[14][15] The name was not changed.

Geology

Geologic cross section (left), and stratigraphic column (right)

National monument markers depicting the sedimentary rocks in the area (left), and three theories explaining the origin of the igneous rocks (right)

Devils Tower is composed of a porphyritic phonolite (left). Close-up view of the columns (right).

The landscape surrounding Devils Tower is composed mostly of sedimentary rocks. The oldest rocks visible in Devils Tower National Monument were laid down in a shallow sea during the Triassic.[16] This dark red sandstone and maroon siltstone, interbedded with shale, can be seen along the Belle Fourche River. Oxidation of iron minerals causes the redness of the rocks. This rock layer is known as the Spearfish Formation. Above the Spearfish Formation is a thin band of white gypsum, called the Gypsum Springs Formation, Jurassic in age. Overlying this formation is the Sundance Formation.[17] During the Paleocene Epoch, 56 to 66 million years ago, the Rocky Mountains and the Black Hills were uplifted.[16] Magma rose through the crust, intruding into the existing sedimentary rock layers.[16]

Geologists Carpenter and Russell studied Devils Tower in the late 19th century and came to the conclusion that it was formed by an igneous intrusion.[18] In 1907, geologists Nelson Horatio Darton and C.C. O'Harra (of the South Dakota School of Mines) theorized that Devils Tower must be an eroded remnant of a laccolith.[19]

The igneous material that forms the Tower is a phonolite porphyry intruded about 40.5 million years ago,[20] a light to dark-gray or greenish-gray igneous rock with conspicuous crystals of white feldspar.[21] As the magma cooled, hexagonal columns formed (though sometimes 4-, 5-, and 7-sided columns were possible), up to 20 feet (6.1 m) wide and 600 feet (180 m) tall.

As rain and snow continue to erode the sedimentary rocks surrounding the Tower's base, more of Devils Tower will be exposed. Nonetheless, the exposed portions of the Tower still experience certain amounts of erosion. Cracks along the columns are subject to water and ice erosion. Portions, or even entire columns, of rock at Devils Tower are continually breaking off and falling. Piles of broken columns, boulders, small rocks, and stones, called scree, lie at the base of the tower, indicating that it was once wider than it is today.[16]

The geologically related Missouri Buttes are located 3.5 mi (5.6 km) northwest of Devils Tower.

Climate

Native American cultural beliefs
Devils Tower inspired many geomyths.

According to the traditional beliefs of Native American peoples, the Kiowa and Lakota, a group of girls went out to play and were spotted by several giant bears, who began to chase them. In an effort to escape the bears, the girls climbed atop a rock, fell to their knees, and prayed to the Great Spirit to save them. Hearing their prayers, the Great Spirit made the rock rise from the ground towards the heavens so that the bears could not reach the girls. The bears, in an effort to climb the rock, left deep claw marks in the sides, which had become too steep to climb. Those are the marks which appear today on the sides of Devils Tower. When the girls reached the sky, they were turned into the stars of the Pleiades.[24]

Another version tells that two Sioux boys wandered far from their village when Mato the bear, a huge creature that had claws the size of tipi poles, spotted them, and wanted to eat them for breakfast. He was almost upon them when the boys prayed to Wakan Tanka the Creator to help them. They rose up on a huge rock, while Mato tried to get up from every side, leaving huge scratch marks as he did. Finally, he sauntered off, disappointed and discouraged. The bear came to rest east of the Black Hills at what is now Bear Butte. Wanblee, the eagle, helped the boys off the rock and back to their village. A painting depicting this legend by artist Herbert A. Collins hangs over the fireplace in the visitor center at Devils Tower.

In a Cheyenne version of the story, the giant bear pursues the girls and kills most of them. Two sisters escape back to their home with the bear still tracking them. They tell two boys that the bear can only be killed with an arrow shot through the underside of its foot. The boys have the sisters lead the bear to Devils Tower and trick it into thinking they have climbed the rock. The boys attempt to shoot the bear through the foot while it repeatedly attempts to climb up and slides back down leaving more claw marks each time. The bear was finally scared off when an arrow came very close to its left foot. This last arrow continued to go up and never came down.[25]

Wooden Leg, a Northern Cheyenne, recounted another legend told to him by an old man while they were traveling together past Devils Tower around 1866–1868. An Indigenous man decided to sleep at the base of Bear Lodge next to a buffalo head. In the morning, he discovered that both he and the buffalo head had been transported to the top of the rock by the Great Medicine, with no way to descend. He spent another day and night on the rock without food or water. After praying all day and then going to sleep, he awoke to find that the Great Medicine had brought him back down to the ground, but had left the buffalo head at the top near the edge. Wooden Leg asserted that the buffalo head was clearly visible through the old man's spyglass. At that time, the tower had never been climbed, and a buffalo head at the top was otherwise inexplicable.[26]

The buffalo head gives this story special significance for the Northern Cheyenne. All the Cheyenne maintained in their camps a sacred teepee to the Great Medicine containing the tribal sacred objects. In the case of the Northern Cheyenne, the sacred object was a buffalo head.[27]

N. Scott Momaday (Kiowa) was given the name Tsoai-talee (Rock Tree Boy) by Pohd-lohk, a Kiowa elder, linking the child to the Devils Tower bear myth. To reinforce this mythic connection, his parents took him there.[28] Momaday incorporated the bear myth as unifying subtext into his 1989 novel The Ancient Child.[29]

U.S. history

Fur trappers may have visited Devils Tower, but they left no written evidence of having done so. The first documented non-Indigenous visitors were members of Captain William F. Raynolds's 1859 expedition to Yellowstone. Sixteen years later, Colonel Richard I. Dodge escorted an Office of Indian Affairs scientific survey party to the massive rock formation and coined the name Devils Tower.[30] Recognizing its unique characteristics, the United States Congress designated the area a U.S. forest reserve in 1892 and in 1906 Devils Tower became the nation's first National monument.[31]

Climbing

Main article: Durrance Route

Old climbing ladder on Devils Tower (left), and a climber on the tower (right)

A sign informs visitors of the Native American heritage.

As of 1994, climbing Devils Tower had increased in popularity. About 1.3% of the monument's 400,000 annual visitors climbed Devils Tower, mostly using traditional climbing techniques.[32] The first known ascent of Devils Tower by any method occurred on July 4, 1893, and is credited to William Rogers and Willard Ripley, local ranchers in the area. They completed this first ascent after constructing a ladder of wooden pegs driven into cracks in the rock face. A few of these wooden pegs are still intact and are visible on the tower when hiking along the 1.3-mile (2.1 km) Tower Trail at Devils Tower National Monument. Over the following 30 years, many climbs were made using this method before the ladder fell into disrepair.

The first ascent using modern climbing techniques was made by Fritz Wiessner with William P. House and Lawrence Coveney in 1937. Wiessner led almost the entire climb free, placing only a single piece of fixed gear, a piton, which he later regretted, deeming it unnecessary.

In 1941 George Hopkins parachuted onto Devils Tower,[33] without permission, as a publicity stunt resulting from a bet. He had intended to descend by a 1,000-foot (300 m) rope dropped to him after successfully landing on the butte, but the package containing the rope, a sledgehammer and a car axle to be driven into the rock as an anchor point slid over the edge. As the weather deteriorated, a second attempt was made to drop equipment, but Hopkins deemed it unusable after the rope became snarled and frozen due to the rain and wind. Hopkins was stranded for six days, exposed to cold, rain and 50 mph (80 km/h) winds before a mountain rescue team led by Jack Durrance, who had successfully climbed Devils Tower in 1938, finally reached him and brought him down.[34][35] His entrapment and rescue was widely covered by the media of the time.[36]

Today, hundreds of climbers scale the sheer rock walls of Devils Tower each summer. The most common route is the Durrance Route, which was the second free route established in 1938. There are many established and documented climbing routes covering every side of the tower, ascending the various vertical cracks and columns of the rock. The difficulty of these routes ranges from relatively easy to some of the most challenging in the world. All climbers are required to register with a park ranger before and after attempting a climb. No overnight camping at the summit is allowed; climbers return to base on the same day they ascend.[37][full citation needed]

The Tower is sacred to several Plains tribes, including the Lakota, Cheyenne and Kiowa. Because of this, many Native American leaders objected to climbers ascending the monument, considering this to be a desecration. The climbers argued that they had a right to climb the Tower, since it is on federal land. A compromise was eventually reached with a voluntary climbing ban during the month of June when the tribes are conducting ceremonies around the monument. Climbers are asked, but not required, to stay off the Tower in June. According to the PBS documentary In the Light of Reverence, approximately 85% of climbers honor the ban and voluntarily choose not to climb the Tower during the month of June. However, several climbers along with the Mountain States Legal Foundation sued the Park Service, claiming an inappropriate government entanglement with religion.[38][full citation needed][39]

Incidents

Seven people have died climbing Devils Tower in the park's 118 year history. Rescues of stranded and under-equipped climbers on the formation are common.[40] The most recent fatality was in September 2024, when a climber fell to his death while descending, leaving his climbing partner stranded without a rope on the face of the tower until help arrived.[41]

Deer grazing at the national monument entrance

Wildlife

Devils Tower National Monument protects many species of wildlife, such as white-tailed deer, prairie dogs, and bald eagles.[42][43]

In popular culture

The 1977 movie Close Encounters of the Third Kind used the formation as a plot element and as the location of its climactic scenes.[44][45] The film's popularity resulted in a large increase in visitors and climbers to the monument.[46]

National Register of Historic Places

Four areas of Devils Tower National Monument are on the National Register of Historic Places:

Entrance Road
Entrance Station
Old Headquarters Area Historic District
Tower Ladder

Sator Square

From Wikipedia, the free encyclopedia

For other uses, see Sator.

A Sator Square (laid out in the SATOR format), etched onto a wall in the medieval fortress town of Oppède-le-Vieux, France
The Sator Square (or Rotas-Sator Square or Templar Magic Square) is a two-dimensional acrostic class of word square containing a five-word Latin palindrome.[1] The earliest squares were found at Roman-era sites, all in ROTAS form (where the top line is "ROTAS", not "SATOR"), with the earliest discovery at Pompeii (and also likely pre-AD 62).[a] The earliest square with Christian-associated imagery dates from the sixth century.[b] By the Middle Ages, Sator squares existed in Europe, Asia Minor, and North Africa.[1][2] In 2022, the Encyclopedia Britannica called it "the most familiar lettered square in the Western world".[3]

A significant volume of academic research has been published on the square, but after more than a century, there is no consensus on its origin and meaning.[1][4][5] The emergence of the "Paternoster theory" in 1926 led to a brief consensus among academics that the square was created by early Christians, but the subsequent discoveries at Pompeii led many academics to believe that the square was more likely created as a Roman word puzzle (per the Roma-Amor puzzle), which was later adopted by Christians. This origin theory, however, fails to explain how a Roman word puzzle became such a powerful religious and magical medieval symbol. It has instead been argued that the square was created in its ROTAS form as a Jewish symbol, embedded with cryptic religious symbolism, which was later adopted in its SATOR form by Christians.[1][2][6] Other less-supported academic origin theories include a Pythagorean or Stoic puzzle, a Gnostic or Orphic or Italian pagan amulet, a cryptic Mithraic or Semitic numerology charm, or that it was a device for assessing wind direction.[1]

The square has long associations with magical powers throughout its history (and even up to the 19th century in North and South America), including a perceived ability to extinguish fires, particularly in Germany. The square appears in early and late medieval medical textbooks such as the Trotula, and was employed as a medieval cure for many ailments, particularly for dog bites and rabies, as well as for insanity, and relief during childbirth.[1][2]

It has featured in a diverse range of contemporary artworks including fiction books, paintings, musical scores, and films,[5] and most notably in Christopher Nolan's 2020 film Tenet.[7] In 2020, The Daily Telegraph called it "one of the closest things the classical world had to a meme".[8]

Description and naming

Sator square (in ROTAS form) on the eighth-century facade of Abbey of St. Peter ad Oratorium in Italy
The Sator square is arranged as a 5 × 5 grid consisting of five 5-letter words, thus totaling 25 characters. It uses 8 different Latin letters: 5 consonants (S, T, R, P, N) and 3

vowels (A, E, O). In some versions, the vertical and horizontal lines of the grid are also drawn, but in many cases, there are no such lines. The square is described as a two-dimensional palindrome, or word square, which is a particular class of a double acrostic.[3][9]

The square comes in two forms: ROTAS (left, below), and SATOR (right, below):[2][6]

R O T A S
O P E R A
T E N E T
A R E P O
S A T O R

S A T O R
A R E P O
T E N E T
O P E R A
R O T A S

The earliest Roman-era versions of the square have the word ROTAS as the top line (called a ROTAS-form square, left above), but the inverted version with SATOR in the top line became more dominant from early medieval times (called a SATOR-form square, right above).[1] Some academics call it a Rotas-Sator Square,[2][6] and some of them refer to the object as a rebus,[1][10] or a magic square.[2] Since medieval times, it has also been known as a Templar Magic Square.[1][11]

Discovery and dating

One of the four Sator squares (all in ROTAS form) found at Dura-Europos, Syria, circa AD 200.

The oldest known square. Found in 1936 on a column in the Palestra Grande (it) (CIL 8623), it is now kept in the Pompeii Museum.[12]

The existence of the square was long recognized from early medieval times, and various examples have been found in Europe, Asia Minor, North Africa (in mainly Coptic settlements), and the Americas.[1][10] Medieval examples of the square in SATOR form abound, including the earliest French example in a Carolingian Bible from AD 822 at the monastery of Saint-Germain-des-Prés. Many medieval European churches and castles have Sator square inscriptions.[1][10]

The first recognized serious academic study of the Sator square is the 1881 publication of Reinhold Köhler's (de) historical survey in Zeitschrift für Ethnologie (de), which was titled "Sator-Arepo-Formel". Since then, a considerable body of academic research has been published on the topic.[1][10]

Until the 1930s, a Coptic papyrus with the square in the ROTAS form dating from the fourth or fifth century AD was considered the earliest version.[b][10][13] In 1889, British ancient historian Francis Haverfield identified the 1868 discovery of a Sator square found in ROTAS form scratched on a plaster wall in the Roman settlement of Corinium at Cirencester to be of Roman origin; however, his assertion was discounted at the time by most academics, who considered the square to be an "early medieval charm".[1][14]

Haverfield was ultimately proved right by the 1931–32 excavations at Dura-Europos in Syria that uncovered three separate Sator square inscriptions, all in ROTAS form, on the interior walls of a Roman military office (and a fourth a year later) that were dated from circa AD 200.[1][15]

In 1936, Italian archaeologist Matteo Della Corte (it) discovered a Sator square, also in ROTAS form, inscribed on a column in the Palestra Grande (it) (the gymnasium) near the Amphitheatre of Pompeii (CIL IV 8623).[16] This discovery led Della Corte to reexamine a fragment of a square, again also in ROTAS form, that he had made in 1925 at the house of Publius Paquius Proculus, also at Pompeii (CIL IV 8123). The square at the house of Publius Paquius Proculus was dated between AD 50 and AD 79 (based on the decorative style of the interior), and the palestra square find was dated pre-AD 62 (and therefore the earthquake of AD 62),[a] making it the oldest known Sator square discovery to date.[1][10]

Translation

Individual words

The words are in Latin, and the following translations are known by scholars:[2][6]

SATOR
(nominative noun; from serere, "to sow") sower, planter, founder, progenitor (usually divine); originator; literally 'seeder';[2][6]
AREPO
unknown word, perhaps a proper name, either invented to complete the palindrome or of a non-Latin origin (see § Arepo interpretations);[2][6]
TENET
(verb; from tenere, 'to hold') he/she/it holds, keeps, comprehends, possesses, masters, preserves, sustains;[2][6]
OPERA
(ablative [see opera] singular noun) service, pains, labor; care, effort, attention;[2][6]
ROTAS
(rotās, accusative plural of rota) wheels.[2][6]

Sentence construction

Sator form of the square on a door in Grenoble, France

The most direct sentence translation is: "The sower (or, farmer) Arepo holds the wheels with care (or, with care the wheels)".[1][10][14][4][17] Similar translations include: "The farmer Arepo works his wheels",[18] or "Arepo the sower (sator) guides (tenet) the wheel (rotas) with skill (opera)".[19]

Some academics, such as French historian Jules Quicherat,[10] believe the square should be read in a boustrophedon style (i.e. in alternating directions).[20] The boustrophedon style, which in Greek means "as the ox plows", emphasizes the agricultural aspect of the text of the square.[1] Such a reading when applied to the SATOR-form square, and repeating the central word TENET, gives SATOR OPERA TENET – TENET OPERA SATOR, which has been very loosely interpreted as: "as ye sow, so shall ye reap",[10] while some believe the square should be read as just three words – SATOR OPERA TENET, which they loosely translate as: "The Creator (the author of all things) maintains his works"; both of which could imply Graeco-Roman Stoic and/or Pythagorean origins.[1][5]

British academic Duncan Fishwick observes that the translation from the boustrophedon approach fails when applied to a ROTAS-form square;[10] however, Belgian scholar Paul Grosjean reversed the boustrophedon rule on the ROTAS form (i.e. starting on the right-hand side instead of the left) to get SAT ORARE POTEN, which loosely translates into the Jewish call to prayer, "are you able to pray enough?".[1][10]

Arepo interpretations

The word AREPO is a hapax legomenon, appearing nowhere else in attested Latin literature. Some academics believe it is likely a proper name, or possibly a theophoric name, that was adapted from a non-Latin word or was invented specifically for the Sator square.[10] French historian Jerome Carcopino believed that it came from the Gaulish word for a 'plough'; however, this has been discounted by other academics.[c][10] American ancient legal historian David Daube believed that AREPO represented a Hebrew or Aramaic rendition of the ancient Greek for alpha (Ἄλφα) and omega (ω), bespeaking the "Alpha-Omega" concept (cf. Isiah 44.6, and Revelation 1:8) from early Judeo-Christianity.[1] J. Gwyn Griffiths contended that the term AREPO came, via Alexandria, from the attested Egyptian name "Hr-Hp" (ḥr ḥp), which he took to mean "the face of Apis".[1][21] In 1983, Serbian-American scholar Miroslav Marcovich proposed the term AREPO as a Latinized abbreviation of Harpocrates (or "Horus-the-child"), god of the rising sun, also called Γεωργὸς `Αρπον, which Marcovich suggests corresponds to SATOR AREPO. This would translate the square as: "The sower Horus/Harpocrates keeps in check toils and tortures".[1][22][5]

Duncan Fishwick, among other academics, believed that AREPO was simply a residual word that was required to complete what is a complex and sophisticated palindrome (which Fishwick believed was embedded with hidden Jewish symbolism, per the "Jewish Symbol" origin theory below), and to expect more from the word was unreasonable from its likely Jewish creators.[2]

Further anagrams

Attempts have been made to discover "hidden meanings" by the anagrammatic method of rearranging the letters of which the square is composed.[1]

In 1883, German historian Gustav Fritsch reformed the letters to discover an invocation to Satan:[1][10]
SATAN, ORO TE, PRO ARTE A TE SPERO
SATAN, TER ORO TE, OPERA PRAESTO
SATAN, TER ORO TE, REPARATO OPES

French historian Guillaume de Jerphanion catalogued examples that were known formulas for an exorcism such as:[10]
RETRO SATANA, TOTO OPERE ASPER, and the prayers
ORO TE PATER, ORO TE PATER, SANAS
O PATER, ORES PRO AETATE NOSTRA
ORA, OPERARE, OSTENTA TE PASTOR

In 1887, Polish ethnographer Oskar Kolberg amended the strict anagrammatic approach by using abbreviations and thus deduced from the 25 letters of the Sator Square the 36 letters of the monastic rule: SAT ORARE POTEN (TER) ET OPERA(RE) R(ATI)O T(U)A S(IT),[10] which he considered an ancient rule of the Benedictines; French historian Gaston Letonnelier made a similar approach in 1952 to get the Christian prayer: SAT ORARE POTEN(TIA) ET OPER(A) A ROTA S(ERVANT), which translates as: "Prayer is our strength and will save us from the wheel (of fate?)".[1]

In 1935, German art historian Kuno von Hardenberg (de) believed he discovered the relief the Rose of Sharon gave to Saint Peter for the sin of his denial of Christ, with the anagram PETRO ET REO PATET ROSA SARONA, which translates as "For Peter even guilty the rose of Sharon is open"; academics refuted his interpretation.[1][10]

In 2003, American historian Rose Mary Sheldon listed some of the many diverse sentences that can be produced from anagrams of the square including her favorite: APATOR NERO EST, which would translate as saying that the Roman emperor Nero was the result of a virgin birth.[1]

Origin and meaning

The origin and meaning of the square has eluded a definitive academic consensus even after more than a century of study.[6][4][5] In 1938, British classical historian Donald Atkinson said the square occupied the "mysterious region where religion, superstition, and magic meet, where words, numbers, and letters are believed, if properly combined, to exert power over the processes of nature ...".[13] Even by 2003, American academic Rose Mary Sheldon called it "one of the oldest unsolved word puzzles in the world".[1] In 2018, American ancient classical historian Megan O'Donald still noted that "most interpretations of the ROTAS square have failed to gain consensus due to failings", and, in particular, reconciling the archeological evidence with the square's later adoption as a religious and magical object.[23]

Christian symbol

Adoption by Christians

Irrespective of the theory of its origin, the evidence that the Sator square, particularly in its SATOR form, became adopted into Christian imagery is not disputed by academics.[1][2] Academics note the repeated association of Christ with the "sower" (or SATOR),[1] and the words of the Sator square have been discovered in Christian settings even in very early medieval times, including:

Jesuit historian Jean Daniélou claimed that the third century Bishop Irenaeus of Lyons (c. AD 200) knew of the square and had written of "Him who joined the beginning with the end, and is the Lord of both, and has shown forth the plough at the end".[1] Some academics link Irenaeus with creating the association of the five words in the square to the five wounds of Christ.
The Berlin State Museum houses a sixth-century bronze amulet from Asia Minor that has two fish turned toward one another on one side, and a Sator square in Greek characters in a checkerboard pattern on the other side. Written above the square is the word "ICHTHUS", the Greek for fish but also a direct term for Christ; it is the earliest known Christian annotated Sator Square.[b][1]
An illustration in an early Byzantine bible gives the baptismal names of the three Magi as being: ATOR, SATOR, and PERATORAS.[1][10]
In Cappadocia, in the time of Constantine VII (913–959), the shepherds of the Nativity of Jesus are named: SATOR, AREPON, and TENETON.[1][10]
The Sator square appears in diverse Christian communities, such as in Abyssinia where in the Ethiopian Book of the Dead, the individual nails in Christ's cross were called: Sador, Alador, Danet, Adera, Rodas.[1] These are likely derived from even earlier Coptic Christian works that also ascribe the wounds of Christ and the nails of the cross with names that resemble the five words from the square.[1]

While there is little doubt among academics that Christians adopted the square, it was not clear that they had originated the symbol.[1][14]

Paternoster theory

Lord's Prayer anagram from the 25 letters of the square, including the Alpha and Omega positioning of the residual As and Os.[2][24] There is an alternative layout proposed with the As and Os positioned at the extreme ends of the Paternoster cross,[5][25] and a Jewish option with the letters laid out in an X-shape (i.e. tau).[2]
During 1924 to 1926, three people separately discovered,[d] or rediscovered, that the square could be used to write the name of the Lord's Prayer, the "Paternoster", twice and intersecting in a cross form (see image opposite). The remaining residual letters (two As and two Os) could be placed in the four quadrants of the cross and would represent the Alpha and Omega that are established in Christian symbolism.[2][18] The positioning of the As and Os was further supported by the fact that the position of the Ts in the Sator square formed the points of a cross – there are obscure references in the Epistle of Barnabas to T being a symbol of the cross – and that the As and Os also lay in the four quadrants of this cross.[10] At the time of this discovery, the earliest known Sator square was from the fourth century,[b][1] further supporting the dating of the Christian symbolism inherent in the Paternoster theory.[2] Academics considered the Christian origins of the square to be largely resolved.[1][14][2][6][15]

With the subsequent discovery of Sator squares at Pompeii, dating pre-79 AD,[a] the

Paternoster theory began to lose support, even among notable supporters such as French historian Guillaume de Jerphanion.[10][15] Jerphanion noted that (1) it was improbable that many Christians were present at Pompeii, (2) first-century Christians would have written the square in Greek and not Latin, (3) the Christian concepts of Alpha and Omega only appear after the first century, (4) the symbol of the cross only appears from about AD 130–131, and (5) cryptic Christian symbols only appeared during the persecutions of the third century.[1][10][15]

Jérôme Carcopino claimed the Pompeii squares were added at a later date by looters. The lack of any disturbance to the volcanic deposits at the palestra, however, meant that this was unlikely,[10][14][15] and the Paternoster theory as a proof of Christian origination lost much of its academic support.[1][10][6][15][24]

Regardless of its Christian origins, many academics considered the Paternoster discovery as being a random occurrence to be mathematically impossible.[13] Several examined this mathematical probability including German historian Friedrich Focke (de) and British historian Hugh Last, but without reaching a conclusion.[1] A 1987 computer analysis by William Baines derived a number of "pseudo-Christian formulae" from the square but Baines concluded it proved nothing.[6]

Roman word puzzle

There is considerable contemporary academic support for the theory that the square originated as a Roman-era word puzzle.[1][6][23] Italian historian Arsenio Frugoni found it written in the margin of the Carme delle scolte modenesi beside the Roma-Amor palindrome,[1] and Italian classicist Margherita Guarducci noted it was similar to the ROMA OLIM MILO AMOR two-dimensional acrostic word puzzle that was also found at Pompeii (see Wiktionary for details on the Pompeiian graffito), and at Ostia and Bolonia.[1] Similarly, another ROTAS-form square scratched into a Roman-era wall in the basement of the Basilica di Santa Maria Maggiore was found alongside the Roma-Amor, and the Roma-Summus-Amor, palindromes.[26] Duncan Fishwick noted the "composition of palindromes was, in fact, a pastime of Roman landed gentry".[10] American classical epigraphist Rebecca Benefiel noted that by 2012, Pompeii had yielded more than 13,000 separate inscriptions and that the house of Publius Paquius Proculus (where a square was found) had more than 70 pieces of graffiti alone.[4]

A 1969 computer study by Charles Douglas Gunn started with a Roma-Amor square and found 2,264 better versions, of which he considered the Sator square to be the best.[1] The square's origin as a word puzzle solved the problem of AREPO (a word that appears nowhere else in classical writing), as being a necessary component to complete the palindrome.[23]

Fishwick still considered this interpretation unproven and clarified that the apparent discovery of the Roma-Amor palindrome written beside the 1954 discovery of a square on a tile at Aquincum was incorrectly translated (if anything it supported the square as a charm).[10] Fishwick, and others, consider the key failing of the Roman puzzle theory of origin is the lack of any explanation as to why the square would later become so strongly associated with Christianity, and with being a medieval charm.[10][23][15] Some argue that this can be bridged if considered as a Pythagorean-Stoic puzzle creation.[1][5]

In 2018, Megan O'Donnell argued that the square is less of a pure word puzzle but more a piece of Latin Roman graffito that should be read figuratively as a wheel (i.e. the ROTAS), and that the textual-visual interplay had parallels with other forms of graffito found in Pompeii, some of which later became adopted as charms.[23]

Jewish symbol

The central cross created by the vertical and horizontal TENET words, has both Christian and Jewish symbolism (e.g. the "tau cross", or the Hebrew tau "+" symbol).[2][5] It also parallels the Roman system of Cardo and Decumanus, being central road crosses through towns.[5]
Some prominent academics, including British-Canadian ancient Roman scholar Duncan Fishwick,[2] American ancient legal historian David Daube,[1] and British ancient historian Mary Beard,[27] consider the square as being likely of Jewish origin.[1]

Fishwick notes that the failings of the Paternoster theory (above) are resolved when looked at from a Jewish perspective.[2] Large numbers of Latin-speaking Jews had been settled in Pompeii, and their affinity for cryptic and mystical word symbols was well known.[2][10] The Alpha and Omega concept appears much earlier in Judaism (Ex. 3.14; Is. 41.4, and 44.6), and the letters "aleph" and "tau" are used in the Talmud as symbols of totality.[2][10] The Ts of TENET may be explained not as Christian crosses, but as a Latin form of the Jewish "tau" salvation symbol (from Ezekiel), and its archaic form (+ or X) appears regularly on ossuaries of both Hellenistic and early Roman times.[2][10] Fishwick highlights the central position of the letter N, as Jews attached significance to the utterance of the "Name" (or nomen).[2][10]

In addition, Fishwick believes a Jewish origin provides a satisfactory explanation for the Paternoster cross (or X) as the configuration is an archaic Jewish "tau" (+ or X).[2][10] Fishwick draws attention to some liturgical prayers in Judaism, where several prayers refer to "Our Father".[2][10] None of these liturgical prayers, however, can be dated to before Jesus.[28][29] Fishwick concludes that the translations of the words ROTAS OPERA TENET AREPO SATOR are irrelevant, except to the extent that they make some sense and thereby hide a Jewish cryptic charm, and to require them to mean more is "to expect the impossible".[2][10] The motivation for the creation square might have been the Jewish pogroms of AD 19 or AD 49; however, it fell into disuse only to be revived later by Christians facing their own persecution, and who appreciated its hidden Paternoster and Alpha and Omega symbolism, but who focused on the SATOR form (which emphasized the "sower", which was associated with Christ).[2]

Research in 2006 by French classical scholar Nicolas Vinel drew on recent discoveries on the mathematics of ancient magic squares to propose that the square was a "Jewish cryptogram using Pythagorean arithmetic".[25] Vinel decoded several Jewish concepts in the square, including the reason for AREPO, and was able to explain the word SAUTRAN that appears beside the square that was discovered on the palestra column in Pompeii.[25] Vinel addressed a criticism of the Jewish origin theory – why would the Jews have then abandoned the symbol? – by noting the Greek texts that they also abandoned (e.g. the Septuagint) in favor of Hebrew versions.[25]

Other theories

The amount of academic research published on the Rotas-Sator square is regarded as being considerable (and even described by one source as "immense");[4] American academic Rose Mary Sheldon attempted to catalog and review the most prominent works in a 2003 paper published in Cryptologia.[1] Among the more diverse but less supported theories Sheldon recorded were:

Several German academics have written on the links of the square to Pythagoreanism and Stoicism, including philologist Hildebrecht Hommel (de), historian Wolfgang Christian Schneider (de), and Heinz Hoffman, among others.[1][2] Schneider believed the square was an important link between Etruscan religion and Stoic academic philosophy. Hommel believed that in the Stoic tradition, the Ephesian word AREPO would be discarded, and the square would be read in the boustrophedon style as SATOR OPERA TENET, TENET OPERA SATOR, translating as "The Creator preserves his works".[1][5] German scholar Ulrich Ernst (de) writing the Sator square's entry in The Encyclopedia of Christianity found this theory persuasive,[5] but Miroslav Marcovich refuted the translation.[22]

Several academics link the square to Gnostic origins, such as Jean Doignon, Gustav Maresch, Adolfo Omodeo, and Hildebrecht Hommel (de). English egyptogolist J. Gwyn Griffiths explains AREPO as a personal name derived from the Egyptian name "Hr-Hp", and sources the square to an Alexandrine origin where a gnostic tradition employed acrostics.[1][5]

Some academics link the square to Orphic cults, including Serbian historian Milan Budimir who linked the Greek form of AREPO to the name Orpheus.[1][2]

Italian academic Adolfo Omodeo linked the square to Mithraic origins as the Roman-era discoveries were in military locations with whom it was popular, while academic historian Walter O. Moeller attempted to derive a Mithraic relationship using perceived mathematical patterns in the square, but his arguments were not considered convincing by other academics.[1][2][30][31]

Norwegian philologist Samson Eitrem took the last half of the square starting at N to get: "net opera rotans", which translates as "She spins her works", interpreting it to be a feminine being (i.e. Hecate), a demon, or even the square itself rotating on its TENET spokes, thus giving a peasant Italian pagan origin with the square as a wind indicator.[1][2]

Some academics such as Swiss archeologist Waldemar Deonna (fr) have proposed that it is a numerical number square, which would also imply a Semitic origin.[1] A significant issue is that the square is in Latin, and Romans did not have the ciphered number system of the Greeks or the Semites. However, if the letters are transliterated to Greek, and then assigned ciphered numbers, the word TENET can be rendered as 666, the number of the beast.[1] Walter O. Moeller analyzed the resultant numerical combinations to assert that the square was made by Mithraic numerologists.[1][30]

In 1925, Zatzman interpreted the square as a Hebraic or Aramaic apotropaic formula against the devil, and translated the square to read: "Satan Adama Tabat Amada Natas".[1]

In 1958, French historian Paul-Louis Couchoud proposed a novel interpretation as the square being a device for working out wind directions.[1]

Magical and medical associations

In 2003, Rose Mary Sheldon noted: "Long after the fall of Rome, and long after the general public had forgotten about classical word games, the square survived among people who might not even read Latin. They continued to use it as a charm against illness, evil and bad luck. By the end of the Middle Ages, the 'prophylactic magic' of the square was firmly established in the superstition of Italy, Serbia, Germany, and Iceland, and eventually even crossed to North America".[1] The square appears in versions of several popular magical manuscripts from the early and late Middle Ages, magical text such as the Tabula Smaragdina and the Clavicula Salomonis.[32]

Medieval German Sator square fire disks

Oberhausmuseum

State and City Library, Augsburg

In Germany in the Middle Ages, the square was inscribed on disks that were then thrown into fires to extinguish them.[1] An edict in 1743 by Duke Ernest Auguste of Saxe-Weimar-Eisenach required all settlements to make Sator square disks to combat fires.[1] By the fifteenth century the square was being used as a touchstone against fire at the Château de Chinon and Château de Jarnac (fr) in France.[10]

The square appears as a remedy during labour in the twelfth-century Latin medical text the Trotula,[33] and was widely cited as a cure for dog bites and rabies in medieval Europe;[1] in both cases, the remedy/cure is administered by eating bread inscribed with the words of the square.[1][33] By the sixteenth century, the use of the square to cure insanity and fever was being documented in books such as De Varia Quercus Historia (1555) by Jean du Choul, and De Rerum Varietate (1557) by Gerolamo Cardano. Jean du Choul describes a case where a person from Lyon recovered from insanity after eating three crusts of bread inscribed with the square.[10] After the meal, the person then recited five paternosters for the five wounds of Christ, linking to the Christian imagery believed encoded into the square.[10]

The Long Lost Friend (1820)[34]

Scholars have found medieval Sator-based charms, remedies, and cures, for a diverse range of applications from childbirth, to toothaches, to love potions, to ways of warding off evil spells, and even to determine whether someone was a witch.[1] Richard

Cavendish notes a medieval manuscript in the Bodleian says: "Write these [five sator] words on in parchment with the blood of a Culver [pigeon] and bear it in thy left hand and ask what thou wilt and thou shalt have it. fiat."[35] Other examples include Bosnia, where the square was used as a remedy for aquaphobia, and in Iceland, it was etched into the fingernails to cure jaundice.[1]

There are examples from the nineteenth century in South America, where the Sator square was used as a cure for dog bites and snake-bites in Brazil,[1] and in enclaves of German settlers (or mountain whites) in the Allegheny Mountains who used the square to prevent fire, stop fits, and prevent miscarriages.[1] The Sator square features in eighteenth-century books on Pow-wow folk medicine of the Pennsylvania Dutch, such as The Long Lost Friend (see image).[34]

Notable examples

Roman

The oldest Sator square was found in November 1936, in ROTAS form, etched into column number LXI at the Palestra Grande (it) near the amphitheatre of Pompeii (CIL IV 8623). Graffiti associated with the particular columns predates the AD 62 Pompeii earthquake,[a][14][15] making it the oldest known square. It also has additional graffiti just below it, with the words SAUTRAN and VALE (CIL IV 8622a-b).[1][10]

Another Sator square was also found in October 1925, in ROTAS form, etched onto the wall in a bathroom of the house of Publius Paquius Proculus (Reg I, Ins 7, 1), also at Pompeii (CIL IV 8123). The style of the house, which is associated with Nero's reign, dated the square to between AD 50 and AD 79 (the destruction of the city).[1][10][15]

A Sator square was found in 1954, in ROTAS form, etched onto a roof tile of the second-century Roman Imperial governor's house for Pannonia Inferior at Aquincum, near Budapest, Hungary. There has been debate over whether a second partial inscription found beside the square is part of the Roma-Amor palindrome (thus affirming the Roman puzzle origin theory), but it seems unlikely.[10][15]

Roman second-century ROTAS-form squares

Cirencester, England

Manchester, England

Conímbriga Portugal

A Sator square was found in 1978, in ROTAS form, etched on a fragment of Roman pottery at a Roman site at Manchester that was dated circa AD 185.[14]

Four Sator squares were found in 1931–32, all in ROTAS form, etched on the walls of military buildings, at Dura-Europos in Syria, dated circa AD 200.[1][10][14][15]

A Sator square was found in 1868, in ROTAS form, scratched onto a plaster wall in the Roman Britain settlement of Corinium Dobunnorum at Cirencester.[14][15]

A Sator square was found in 1971, in ROTAS form, etched onto an unfired brick at the Roman city of Conímbriga in Portugal that was dated from the second century.[15]

A Sator square was found in 1966–71, in ROTAS form, scratched into a Roman-era wall during excavations of the Basilica di Santa Maria Maggiore in Rome (along with the Roma-Amor, and the Rome Summus Amor palindromes).[26]

Early medieval

Examples of Coptic Sator square amulets, Papyrus Museum, Vienna

The earliest Sator square post-Roman times was the 1899 discovery of a ROTAS-form square inscribed on a Coptic papyrus by German historians Adolph Erman and Fritz Krebs in the Berlin Papyrus Collection of the Berlin State Museums (then the Königlichen Museen); it has no other explicit Christian imagery.[1][13]

The earliest Sator square with explicit additional Christian imagery is a sixth-century bronze amulet from Asia Minor that has two fish turned toward one another on one side, and a Sator square in Greek characters in a checkerboard pattern on the other side. Written above the square is the word "ICHTHUS", which directly translates as a term for Christ. It is also in the Berlin State Museums.[b][1]

One of the earliest examples of a Sator square in a Christian church is the SATOR-form marble square on the facade of the circa AD 752 Benedictine Abbey of St Peter ad Oratorium, near Capestrano, in Italy.[1]

The earliest example from France is a SATOR-form square found in a Carolingian Bible from AD 822 at the monastery of Saint-Germain-des-Prés.[1][10] There are ninth- to tenth-century examples in Codex 384 from Monte Cassino, and a square was found written into the margin of a work titled Versus de cavenda Venere et vino found, which is part of Codex 1.4 of the Capitolare di Modena.[1]

One of the earliest examples of the square being applied to medical beliefs is from the twelfth-century Latin medical textbooks the Trotula, where the translated text advises: "[98] Or let these names be written on cheese and butter: + sa. e. op. ab. z. po. c. zy. e pe. pa. pu c. ac. sator arepo tenet os pera rotas and let them be given to eat".[33] In a similar vein, a thirteenth-century parchment from Aurillac offers a Sator-square chant for women in childbirth.[10]

Later medieval

Samson and the Lion. A twelfth-century mosaic with the words of the square in a circle, Collegiate church of Saint Ursus, Aosta, Italy

Twelfth-century French examples are found on the wall of the Eglise Saint Laurent at Château de Rochemaure (fr), and in the keep of Château de Loches.[1][10]

A Sator square in SATOR form was found on a block set into the doorway facade of a fortified wall in the largely abandoned medieval fortress town of Oppède-le-Vieux, in France's Luberon; the old town itself dates from the twelfth or thirteenth century and was abandoned by the seventeenth century.[7]

Many medieval Italian towns and churches have squares. The twelfth-century church of San Giovanni Decolatto in Pieve Terzagni in Cremona has fragments of a floor mosaic that included a square.[1] Valvisciolo Abbey has letters forming five concentric rings, each one divided into five sectors. One appears on the exterior wall of the Duomo in Siena. Inside the church of Acquaviva Collecroce is a stone with the square in a ROTAS form. Others include the church of the Pieve of San Giovanni, the Collegiate church of Saint Ursus, the Cathedral of Ascoli Satriano, and the Church of San Lorenzo in

Paggese in Marche.[7]

The square is found in diverse locations all over later medieval France, including fifteenth-century examples at the Château de Chinon, the Château de Jarnac (fr), as well as in the courthouse in Valbonnais.[10]

A Sator square in SATOR form is in the medieval Rivington Church in Lancashire, England.[36]

The phrase appears on the rune stone Nä Fv1979;234 from Närke, Sweden, dated to the fourteenth century. It reads "sator arepo tenet" (untranscribed: "sator ¶ ar(æ)po ¶ tænæt).[37] It also occurs in two inscriptions from Gotland (G 145 M and G 149 M), which contain the whole palindrome.[37]

Other

Lady Jane Francesa Wilde's anthology of Irish folklore, Ancient Legends Mystic Charms & Superstitions of Ireland (1888), includes the tale of a young girl who is enchanted by a poet using the spell of a Sator square written on a piece of paper in blood.[38]

The Sator square, with some letters changed, features in eighteenth-century books on Pow-wow folk medicine of the Pennsylvania Dutch, such as The Long Lost Friend (see image earlier).

In popular culture

Filippo Balbi (circa 1860)

The Sator square has inspired many works in the arts, including some classical and contemporary composers such as works by Austrian composer Anton Webern and Italian composer Fabio Mengozzi,[39] writers such as Brazilian writer Osman Lins (whose novel Avalovara (1973) follows the structure of the square), and painters such as American artist Dick Higgins with La Melancolia (1983),[5] and American artist Gary Stephan with Sator Arepo Tenet Opera Rotas (1982).[40]

Director Christopher Nolan's 2020 film Tenet has a story structure that mimics the square's concept of interlinked multiple directions of meaning, and incorporates all five of the names from the Sator square:[7]

The main antagonist is named Sator.[7]

The artist who created the forged Goya drawings was named Arepo.[7]

Tenet is the title of the film as well as the secret organization that works to save the world.[7]

The opening scene is set at an opera house.[7]

Sator owns a construction company called Rotas.[7]

American author Lawrence Watt-Evans notes that Sir Terry Pratchett named the main square in the fictional city of Ankh-Morpork "Sator Square", in a deliberate reference to the symbol. Watt-Evans notes that the Discworld series is full of other incidental references to unusual symbols and concepts.[41]

Notes

Work by Italian archaeologist Amedeo Maiuri in 1938 showed that graffito on the Pompeii palestra square column associated with the Rotas square were linked to graffito that would have predated the earthquake of AD 62; this was later confirmed by German classical philologist Friedrich Focke (de) in 1948 based on an analysis of the stucco plastering of the specific palestra square columns.[14][15]

The fourth- or fifth-century Coptic papyrus with a Sator square had no evidence of any Christian associations or Christian imagery; it would be another two centuries before the first Sator squares appeared that had additional Christian imagery that would definitively associate them as Christian.[1]

Duncan Fishwick showed that this translation into plough was based on a "faulty knowledge of Latin, if not of Greek",[10] and Fishwick's view was reinforced by French historian Robert Étienne.[15]

Most notable and impactful of the three was German priest Felix Grosser, who published in 1926;[2] German historian Christian Frank (de) published in 1924, and Swedish historian Sigurd Agrell published in 1927.[1]

It is much more likely that we are dealing with a Latin-speaking Jewish slogan here, and there is plenty of evidence for Jews in the Vesuvian towns (including a kosher version of garum, the Roman staple of rotten fish sauce). "Alpha" and "omega" are well known in Jewish literature, and "our father" is perfectly compatible with a Jewish cultural background (and are found as that in Jewish prayers).

advaita vedanta

AI Overview
Advaita Vedanta is a prominent Hindu philosophical tradition emphasizing non-duality (Advaita), asserting that the individual soul (Atman) is identical to the ultimate reality (Brahman) and that the perceived world of separate objects and selves is an illusion (Maya), ultimately unreal from the absolute perspective. Championed by Adi Shankara,

it seeks self-realization through practices like listening (Shravana), contemplation (Manana), and meditation (Nididhyasana) to recognize this oneness, leading to liberation (Moksha) from suffering.

Core Concepts

Brahman: The single, ultimate, unchanging reality, pure consciousness.

Atman: The individual self or soul, which is identical to Brahman.

Maya: The cosmic illusion that makes the one Brahman appear as the manifold world and individual selves.

Jiva (Individuality): Appears real due to ignorance (avidya) but is ultimately illusory, a projection of Brahman.

Nirguna Brahman: Brahman without attributes (formless, unconditioned).

Saguna Brahman: Brahman with attributes, worshipped as God (like Isvara) for devotional purposes.

Key Teachings

"Tat Tvam Asi" (Thou Art That): A core Vedic teaching signifying the direct identity between the individual self (you) and the ultimate reality (That/Brahman).

Three Levels of Reality: Subjective (Pratibhasika), empirical (Vyavaharika), and ultimate (Paramarthika).

Non-Duality of Brahman: Brahman has no internal divisions, similarities, or dissimilarities; it is a homogenous, partless reality.

Path to Liberation (Moksha)

Shravana: Listening to the teachings from a qualified teacher (Guru).

Manana: Contemplating and reasoning about the teachings to remove doubts.

Nididhyasana: Meditating on the truth until it becomes a direct, lived experience, realizing one's true nature as Brahman.

Historical Context

Rooted in the Upanishads, its systematic development is attributed to figures like Gaudapada, Mandana Misra, and most notably, Adi Shankara (8th-9th century CE).

It's one of the six orthodox (Āstika) Hindu philosophies (darśanas).

Why is it often claimed that Buddhism and Advaita Vedānta reach the same final truth?
Popular comment · Why is it often claimed that Buddhism and Advaita Vedānta reach the same final truth? Greg Goode, who teaches both Advaita Vedanta and Buddhist Madhyamaka wrote about this once: I wrote this yesterday for the Dharma Connection group, and maybe it's relevant here too (it has some edits for this group). It's in response to someone who was claiming that all paths, including Advaita and Madhyamika, truly lead to the same truth, the same realization. Sometimes when people confront a lot of different paths, they get a sense of cognitive dissonance. They feel like they have to make that tension go away by landing on a judgment about paths or goals as truly "the same" or "different." But how can that really be? So, about Advaita and Madhyamika….. We can certainly say that they share an overall soteriological goal: freedom from suffering, happiness, compassion, love. The heart wants to say "SAME" here. That's understandable, and I feel that deeply. But beyond that, the mechanics, concepts, and languaging are very different, even on the surface. Something [edited out name] said makes a lot of sense, and it has extremely radical consequences: "Certain views lead to certain realizations. Other views lead to other realizations. Realization is dependent on view." If realizations can affect views, then views can affect realizations. The views of Advaita and Madhyamika are quite different. In fact, Madhyamika owes much of its presentation to the rejection of essential nature and absolute truth that Advaita proposes. The two paths could not be more different on this. Even the "ultimate truth" in Buddhism does not map to the Absolute Truth in Advaita, though there has been a perennialist effort to combine the two into a master Vedantic meta-view for about a century. Perennialism began as long ago as the 15th century with Neoplataonism, and was appropriated by Christian exclusivism. In the last century we've seen Swami Vivekananda, Rene Guenon, Frithjof Schuon, Ananda Coomaraswamy, Madame Blavatsky, Aldous Huxley, and the New Age movement opt for "inherent sameness." The resulting view is much more Advaita-like than Buddhist-like, which corresponds with the favored view of the perennialist proponents most of the time. The Buddhist side would not insist on either "inherently same" or "inherently different." The Buddhists would be more like, "You do your thing, we'll do ours. Let's just all be kind to each other." I even remember hearing a story about the Dalai Lama giving emptiness teachings. Someone in the audience asked him, "What about Brahman and all the Vedantins who study that? Are you saying that emptiness is true and Brahman is mistaken?" He thought for a moment and replied, "Brahman – that is their business. Emptiness – that is our business." So I think it is not helpful to try to stand in a neutral place and compare the truths or the metaphysics of these teachings. We can't do it. Where would we find a neutral place? We can give a Mahyamika interpretation of Advaita or an Advaitin interpretation of Madhyamika. Or a comparative religion-style story about them. Or an everyday psychological assessment of both paths, if we have have had experiences in both. But to try to give a metaphysical comparison and ordering and ranking of views from a place that is "neutral" or "impartial" or "unaffected by views" cannot be done. Comparisons and ordering and ranking and assessments are never neutral, but always themselves dependent upon certain standards. And standards are dependent upon

views. It SEEMS possible to do make these assessments neutrally, but that’s only if we are blind to the emptiness of view, blind to how our conceptual or experiential assessment is already conceptually implicated in some view or another. In my experience reading so many of these essays and posts, the comparative efforts usually (not always) tend to favor the perennialist view, resulting in a kind of projection and imperialism of the “mine.”

An Advantage of Advaita Vedanta vis-a-vis Mahayana Buddhism
Popular comment · I have explored both. In my opinion, you are missing the reason why the Buddhists are hesitant to accept any permanent transcendental existence. It's because of their doctrine of emptiness, which lends to their doctrine of dependent arising. For this reason, the concept of the Buddha Mind is controversial and often expressed hesitantly. Meanwhile Vedanta is direct in its assertion. Sarvam kalvidam brahma.

In Advaita Vedanta, what exactly is Brahman — is it pure consciousness, pure being, or something beyond both?
Popular comment · Being (sat) and consciousness (cit) are identical in Advaita. So what is called Brahman is that supreme or pure consciousness. Existence itself.

Adi Shankara, the most prominent exponent of Advaita Vedānta tradition.
"I am other than name, form and action.
My nature is ever free!
I am Self, the supreme unconditioned Brahman.
I am pure Awareness, always non-dual."
Adi Shankara, Upadesasahasri 11.7[1]
Advaita Vedanta (/ʌdˈvaɪtə vɛˈdɑːntə/; Sanskrit: अद्वैत वेदान्त, IAST: Advaita Vedānta) is a Hindu tradition of Brahmanical textual exegesis and philosophy, and a monastic institutional tradition nominally related to the Daśanāmi Sampradaya and propagated by the Smarta tradition. Its core tenet is that jivatman, the individual experiencing self, is ultimately pure awareness mistakenly identified with the body and its senses[2] and with thought-constructs,[3] and non-different from Ātman/Brahman, the highest Self or Reality.[4][5][6][note 1] The term Advaita (अद्वैत) literally means "not-two"[7][8] or "one without a second,"[8] which means that only Brahman, 'the one', is ultimately real while prapanca, 'the second', 'the world' or the multiplicity of thought-constructs, is not fully real.[9] It is commonly rendered as "nonduality,"[10][11] and popularly interpreted as meaning that Atman is non-different from Brahman, and often equated with monism.[note 2]

Advaita Vedanta is a Hindu sādhanā, a path of spiritual discipline and experience.[note 3] It states that moksha (liberation from 'suffering' and rebirth)[12][13] is attained through knowledge of Brahman, recognizing the illusoriness of the phenomenal world and disidentification from body-mind and the notion of 'doership',[note 4] and by acquiring vidyā (knowledge)[14] of one's true identity as Atman/Brahman,[1][15][16][17] self-luminous (svayam prakāśa)[note 5] awareness or Witness-consciousness.[18][note 6]

This knowledge is acquired through Upanishadic statements such as tat tvam asi, "that['s how] you are," which destroy the ignorance (avidyā) regarding one's true identity by revealing that (jiv)Ātman is non-different from immortal[note 7] Brahman.[note 1]

The Advaita vedanta tradition modifies the Samkhya-dualism between Purusha (pure awareness or consciousness) and Prakriti ('nature', which includes matter but also cognition and emotion) as the two equal basic principles of existence.[19][20] It proposes instead that Atman/Brahman (awareness, purusha) alone is ultimately real and, though unchanging,[21] is the cause and origin of the transient phenomenal world (prakriti). In this view, the jivatman or individual self is a mere reflection or limitation of singular Ātman in a multitude of apparent individual bodies.[22] It regards the material world as an illusory appearance (maya) or "an unreal manifestation (vivarta) of Brahman,"[23] the latter as proposed by the 13th century scholar Prakasatman of the Vivarana school.[24]

Advaita Vedanta is often presented as an elite scholarly tradition belonging to the orthodox Hindu Vedānta[note 8] tradition, emphasizing scholarly works written in Sanskrit;[25] as such, it is an "iconic representation of Hindu religion and culture."[26] Yet contemporary Advaita Vedanta is yogic Advaita, a medieval and modern syncretic tradition incorporating Yoga and other traditions, and producing works in vernacular.[25] The earliest Advaita writings are the Sannyasa Upanishads (first centuries CE), the Vākyapadīya, written by Bhartṛhari (second half 5th century,[27]) and the Māndūkya-kārikā written by Gauḍapāda (7th century).[28] Gaudapada adapted philosophical concepts from Buddhism, giving them a Vedantic basis and interpretation.[29] The Buddhist concepts were further Vedanticised by Adi Shankara (8th c. CE), who is generally regarded as the most prominent exponent of the Advaita Vedānta tradition,[30][31][32][33] though some of the most prominent Advaita-propositions come from other Advaitins, and his early influence has been questioned.[34][35][note 9] Adi Shankara emphasized that, since Brahman is ever-present, Brahman-knowledge is immediate and requires no 'action' or 'doership', that is, striving (to attain) and effort.[36][37][38] Nevertheless, the Advaita tradition, as represented by Mandana Misra and the Bhamati school, also prescribes elaborate preparatory practice, including contemplation of mahavakyas,[37][39][40][41][note 9] presenting a tension between sudden and gradual approaches which is also recognized in other spiritual disciplines and traditions.[37][42][note 10]

Sri Shankaracharya, also known as Adi Shankara, was an important Indian philosopher and spiritual teacher who actively promoted Advaita Vedanta. His teachings on non-duality and the unity of all things have had a significant impact on Indian philosophy and spirituality.

Shankaracharya's prominence as the exemplary defender of traditional Hindu-values and spirituality started to take shape only centuries later, in the 14th century, with the ascent of Sringeri matha and its jagadguru Vidyaranya (Madhava, 14th cent.) in the Vijayanagara Empire,[note 11] While Adi Shankara did not embrace Yoga,[43] the

Advaita-tradition by then had accepted yogic samadhi as a means to still the mind and attain knowledge, explicitly incorporating elements from the yogic tradition and texts like the Yoga Vasistha and the Bhagavata Purana,[44] culminating in Swami Vivekananda's full embrace and propagation of Yogic samadhi as an Advaita means of knowledge and liberation.[45][46] In the 19th century, due to the influence of Vidyaranya's Sarvadarśanasaṅgraha,[47] the importance of Advaita Vedānta was overemphasized by Western scholarship,[48] and Advaita Vedānta came to be regarded as the paradigmatic example of Hindu spirituality, despite the numerical dominance of theistic Bhakti-oriented religiosity.[49][50][48][note 9] In modern times, Advaita views appear in various Neo-Vedānta movements.[51]

Etymology and nomenclature

Etymology

The word Advaita is a composite of two Sanskrit words:

Prefix "a-" (अ), meaning "non-"
"Dvaita" (द्वैत), which means 'duality' or 'dualism'.[web 1]
Advaita is often translated as "non-duality," but a more apt translation is "non-secondness."[4] Fabian Volker, following Paul Hacker explains that dvaita does not mean "duality," but "the state in which a second is present," synonymous with prapanca, "conceptual proliferation," and with jagat, "the world." Advaita thus means that only Brahman, 'the one', is ultimately real, while the world with its multiplicity, 'the second', is not fully real.[9] As Gaudapada states, when the unreal is taken as real, people grasp to the unreal, which is samsara. By realizing one's true identity as Brahman, there is no more grasping, and the mind comes to rest.[52]

In a popular sense, advaita is often expressed as the famous diction that Atman is Brahman, meaning that jivatman, the individual experiencing self, is ultimately pure awareness mistakenly identified with body and the senses,[53] and non-different ("na aparah") from Ātman/Brahman, the highest Self or Reality;[4][5][6][note 1]; the knowledge of this true identity is liberating.

The word Vedānta is a composition of two Sanskrit words: The word Veda refers to the whole corpus of vedic texts, and the word "anta" means 'end'. From this, one meaning of Vedānta is "the end of the Vedas" or "the ultimate knowledge of the Vedas". Veda can also mean "knowledge" in general, so Vedānta can be taken to mean "the end, conclusion or finality of knowledge". Vedānta is one of six orthodox schools of Hindu philosophy.

Advaita Vedanta

While "a preferred terminology" for Upanisadic philosophy "in the early periods, before the time of Shankara" was Puruṣavāda,[54][note 12] the Advaita Vedānta school has historically been referred to by various names, such as Advaita-vada (speaker of Advaita), Abheda-darshana (view of non-difference), Dvaita-vada-pratisedha (denial of dual distinctions), and Kevala-dvaita (non-dualism of the isolated).[55] It is also called māyāvāda by Vaishnava opponents, akin to Madhyamaka Buddhism, due to their insistence that phenomena ultimately lack an inherent essence or reality.[56][57][58][59]

"Advaita" (अद्वैत) is from Sanskrit roots a, not; dvaita, "customarily translated as dual."[9] As Advaita, it is usually translated as "not-two"[7][8] or "one without a second",[8] and most commonly as "nondualism", "nonduality" or "nondual," invoking the notion of a dichotomy. Fabian Volker, following Paul Hacker explains that dvaita does not mean "duality," but "the state in which a second is present," the second here being synonymous with prapanca, "conceptual proliferation," and with jagat, "the world." Advaita thus means that only Brahman, 'the one', is ultimately real, while the phenomenal world, or the conceptual multiplicity, 'the second', is not fully real.[9] The term thus does not emphasize two instances, but the notion that the second instance is not fully real, and advaita is better translated as "that which has no second beside it" instead of "nonduality," denying multiplicity and the proliferation of concepts "that tend to obscure the true state of affairs."[9][note 13]

According to Richard King, a professor of Buddhist and Asian studies, the term Advaita first occurs in a recognizably Vedantic context in the prose of Mandukya Upanishad.[55] According to Frits Staal, a professor of philosophy specializing in Sanskrit and Vedic studies, the word Advaita itself is from the Vedic era, and the Vedic sage Yajnavalkya (8th or 7th-century BCE[61][62]) is credited to be the one who coined it.[63] Stephen Phillips, a professor of philosophy and Asian studies, translates the Advaita containing verse excerpt in Brihadaranyaka Upanishad, as "An ocean, a single seer without duality becomes he whose world is Brahman."[note 15]

Advaita tradition

While the term "Advaita Vedanta" in a strict sense may refer to the scholastic tradition of textual exegesis established by Shankara and the monastic institutions, "advaita" in a broader sense may refer to a broad current of advaitic thought, which incorporates advaitic elements with yogic thought and practice and other strands of Indian religiosity, such as Kashmir Shaivism and the Nath tradition.[65] The first connotation has also been called "Classical Advaita"[33][66] and "doctrinal Advaita,"[67] and its presentation as such is due to mediaeval doxographies,[46] the influence of Orientalist Indologists like Paul Deussen,[68] and the Indian response to colonial influences, dubbed neo-Vedanta by Paul Hacker, who regarded it as a deviation from "traditional" Advaita Vedanta.[33] Yet, post-Shankara Advaita Vedanta incorporated yogic elements, such as the Yoga Vasistha, and influenced other Indian traditions, and neo-Vedanta is based on this broader strand of Indian thought.[33] This broader current of thought and practice has also been called "greater Advaita Vedanta,"[25] "vernacular advaita,"[33] and "experiential Advaita."[67] It is this broader advaitic tradition which is commonly presented as "Advaita Vedanta," though the term "advaitic" may be more apt.[33][note 16]

Monism

See also: Metaphysics and Ontology

The nondualism of Advaita Vedānta is often regarded as an idealist monism.[note 2] According to King, Advaita Vedānta developed "to its ultimate extreme" the monistic ideas already present in the Upanishads.[note 17] In contrast, states Milne, it is misleading to call Advaita Vedānta "monistic," since this confuses the "negation of difference" with "conflation into one."[69] Advaita is a negative term (a-dvaita), states Milne, which denotes the "negation of a difference," between subject and object, or between perceiver and perceived.[69]

According to Deutsch, Advaita Vedānta teaches monistic oneness, however without the multiplicity premise of alternate monism theories.[70] According to Jacqueline Suthren Hirst, Adi Shankara positively emphasizes "oneness" premise in his Brahma-sutra Bhasya 2.1.20, attributing it to all the Upanishads.[71]

Nicholson states Advaita Vedānta contains realistic strands of thought, both in its oldest origins and in Shankara's writings.[72]

Soteriology: moksha – liberating knowledge of Brahman

Knowledge is liberating

Ramana Maharshi, the Indian sage who is widely regarded as a Jivanmukta

See also: Jnana, Prajna, and Prajñānam Brahma

The soteriological goal, in Advaita, is to gain self-knowledge as being in essence (Atman), awareness or witness-consciousness, and complete understanding of the real identity of jivan-ātman as Brahman.[1] Correct knowledge of Atman and Brahman is the attainment of Brahman, immortality,[73] and leads to moksha (liberation) from suffering[note 18] and samsara, the cycle of rebirth.[1] This is stated by Shankara as follows:

> I am other than name, form and action.
> My nature is ever free!
> I am Self, the supreme unconditioned Brahman.
> I am pure Awareness, always non-dual.
>
> —Adi Shankara, Upadesasahasri 11.7, [1]

According to Advaita Vedānta, liberation can be achieved while living, and is called Jivanmukti.[74][75][note 19] in contrast to Videhamukti (moksha from samsara after death) in theistic sub-schools of Vedānta.[76][better source needed] The Atman-knowledge, that is the knowledge of true Self and its relationship to Brahman is central to this liberation in Advaita thought.[note 20] Atman-knowledge, to Advaitins, is full awareness that everything is Brahman.[78][79][note 21]

According to Anantanand Rambachan, in Advaita, this state of liberating self-knowledge includes and leads to the understanding that "the self is the self of all, the knower of self sees the self in all beings and all beings in the self."[80]

Attaining vidyā (knowledge)

Main article: Jnana Yoga

Advaita Vedānta regards the liberated state of being Atman/Brahman as one's true identity and inherent to being human. According to Shankara and the Vivarana-school, no human action can 'produce' this liberated state, as it is what one already is.[37] As Swami Vivekananda stated:

> The Vedas cannot show you Brahman, you are That already. They can only help to take away the veil that hides truth from our eyes. The cessation of ignorance can only come when I know that God and I are one; in other words, identify yourself with Atman, not with human limitations. The idea that we are bound is only an illusion [Maya]. Freedom is inseparable from the nature of the Atman. This is ever pure, ever perfect, ever unchangeable.
>
> —Adi Shankara's commentary on Fourth Vyasa Sutra, Swami Vivekananda[81]

According to Shankara, taking a subitist position,[82] moksha is attained at once when the mahavakyas, articulating the identity of Atman and Brahman, are understood.[83][38][note 22]

Yet, the Advaita-tradition also emphasizes human effort, a path of Jnana Yoga with a progression of study and training to realize one's true identity as Atman/Brahman and attain moksha.[37][39][40] According to the contemporary Advaita tradition, knowledge of Atman/Brahman is obtained gradually, by svādhyāya, study of the self and of the Vedic texts, which consists of four stages of samanyasa: virāga ('renunciation'), sravana ('listening to the teachings of the sages'), manana ('reflection on the teachings') and nididhyāsana, introspection and profound and repeated meditation on the mahavakyas, selected Upanishadic statements such as tat tvam asi ('that art thou' or 'you are That') which are taken literal, and form the srutic evidence for the identity of jivanatman and Atman/Brahman.[84][85][web 4] This meditation negates the misconceptions, false knowledge, and false ego-identity, rooted in maya, which obfuscate the ultimate truth of the oneness of Brahman, and one's true identity as Atman/Brahman.[86] This culminates in what Adi Shankara refers to as anubhava, immediate intuition, a direct awareness which is construction-free, and not construction-filled. It is not an awareness of Brahman, but instead an awareness that is Brahman.[87] Although the threefold practice is broadly accepted in the Advaita tradition, and affirmed by Mandana Misra,[88] it is at odds with Shankara,[89] who took a subitist position.[82]

Sruti (scriptures), proper reasoning and meditation are the main sources of knowledge (vidya) for the Advaita Vedānta tradition.[41][90][91] It teaches that correct knowledge of Atman and Brahman is achievable by svādhyāya,[92] study of the self and of the Vedic texts, and three stages of practice: sravana (perception, hearing), manana (thinking) and nididhyasana (meditation),[41] a three-step methodology that is rooted in the teachings of chapter 4 of the Brihadaranyaka Upanishad.[93][94]

According to critics of neo-Advaita, which also emphasizes direct insight, traditional Advaita Vedanta entails more than self-inquiry or bare insight into one's real nature, but also includes self-restraint, textual studies and ethical perfection. It is described in classical Advaita books like Shankara's Upadesasahasri[95] and the Vivekachudamani, which is also attributed to Shankara.

Preparation: the fourfold qualities

The Advaita student has to develop the fourfold qualities,[96] or behavioral qualifications (Samanyasa, Sampattis, sādhana-catustaya):[97][98][99][note 23] A student in Advaita Vedānta tradition is required to develop these four qualities:

Nityānitya vastu viveka (नित्यानित्य वस्तु विवेकम्) – Viveka is the ability to correctly discriminate between the real and eternal (nitya) and the substance that is apparently real, illusory, changing and transitory (anitya).[97][84]

Ihāmutrārtha phala bhoga virāga (इहाऽमुत्रार्थ फल भोगविरागम्) – The renunciation (virāga) of all desires of the mind (bhoga) for sense pleasures, in this world (iha) and other worlds. Willing to give up everything that is an obstacle to the pursuit of truth and self-knowledge.[84][100]

Śamādi ṣatka sampatti (शमादि षट्क सम्पत्ति) – the sixfold virtues or qualities:

Śama – mental tranquility, ability to focus the mind.[84][100]

Dama – self-restraint,[note 24] the virtue of temperance.[84][100] restraining the senses.

Uparati – dispassion, lack of desire for worldly pleasures, ability to be quiet and disassociated from everything;[84] discontinuation of all religious duties and ceremonies[100]

Titikṣa – endurance, perseverance, putting up with pairs of opposites (like heat and cold, pleasure and pain), ability to be patient during demanding circumstances[84][100]

Śraddhā – having faith in teacher and the Sruti scriptural texts[84]

Samādhāna – contentedness, satisfaction of mind in all conditions, attention, intentness of mind[84][100]

Mumukṣutva (मुमुक्षुत्वम्) – An intense longing for freedom, liberation and wisdom, driven to the quest of knowledge and understanding. Having moksha as the primary goal of life[84][96]

The threefold practice: sravana (hearing), manana (thinking) and nididhyasana (meditation)

The Advaita tradition teaches that correct knowledge, which destroys avidya, psychological and perceptual errors related to Atman and Brahman,[16] is obtained in jnanayoga through three stages of practice,[98] sravana (hearing), manana (thinking) and nididhyasana (meditation).[41] This three-step methodology is rooted in the teachings of chapter 4 of the Brihadaranyaka Upanishad:[93][94]

Sravana, which literally means hearing. The student listens and discusses the ideas, concepts, questions and answers.[41][93] of the sages on the Upanishads and Advaita Vedānta, studying the Vedantic texts, such as the Brahma Sutras, aided by discussions

with the guru (teacher, counsellor).[97][104][41]
Manana refers to thinking on these discussions and contemplating over the various ideas based on svadhyaya and sravana.[93][104][105] It is the stage of reflection on the teachings;[93][104]
Nididhyāsana, the stage of meditation and introspection.[84][web 5] This stage of practice aims at realization and consequent conviction of the truths, non-duality and a state where there is a fusion of thought and action, knowing and being.[106][93]
Although the threefold practice is broadly accepted in the Advaita tradition, Shankara's works show an ambivalence toward it: while accepting its authenticity and merits, as it is based in the scriptures, he also takes a subitist position,[82] arguing that moksha is attained at once when the mahavakyas, articulating the identity of Atman and Brahman, are understood.[83][38][note 25] According to Rambachan, "it is not possible to reconcile Sankara's views with this seemingly well-ordered system."[89]

Mandana Misra, on the other hand, explicitly affirms the threefold practice as the means to acquire knowledge of Brahman, referring to meditation as dhyana.[107] He states that these practices, though conceptual, 'can eliminate both ignorance and coneptuality at the same time, leaving only the "pure, transparent nature" of self-awareness'.[108]

Bilimoria states that these three stages of Advaita practice can be viewed as sadhana practice that unifies Yoga and Karma ("action," referring here to ritual) ideas, and was most likely derived from these older traditions.[109][104]

Guru

Main article: Guru
Advaita Vedānta school has traditionally had a high reverence for a Guru (teacher), and recommends that a competent Guru be sought in one's pursuit of spirituality, though this is not mandatory.[110] Reading of Vedic literature and reflection is the most essential practice.[110] Adi Shankara, states Comans, regularly employed compound words "such as Sastracaryopadesa (instruction by way of the scriptures and the teacher) and Vedāntacaryopadesa (instruction by way of the Upanishads and the teacher) to emphasize the importance of Guru".[110] According to Comans, this reflects the Advaita tradition which holds a competent teacher as important and essential to gaining correct knowledge, freeing oneself from false knowledge, and to self-realization.[111] Nevertheless, in the Bhamati-school the guru has a less essential role, as he can explain the teachings, but the student has to venture its further study.[112]

A guru is someone more than a teacher, traditionally a reverential figure to the student, with the guru serving as a "counselor, who helps mold values, shares experiential knowledge as much as literal knowledge, an exemplar in life, an inspirational source and who helps in the spiritual evolution of a student.[113] The guru, states Joel Mlecko, is more than someone who teaches specific type of knowledge, and includes in its scope someone who is also a "counselor, a sort of parent of mind and soul, who helps mold values and experiential knowledge as much as specific knowledge, an exemplar in life, an inspirational source and who reveals the meaning of life."[113]

Pramana (means of knowledge)

Main article: Epistemology in Advaita Vedanta

In classical Indian thought, pramana (means of knowledge) concerns questions like how correct knowledge can be acquired; how one knows, how one doesn't; and to what extent knowledge pertinent about someone or something can be acquired.[114][115] In contrast to other schools of Indian philosophy, early Vedanta paid little attention to pramana.[116] The Brahmasutras are not concerned with pramana, and pratyaksa (sense-perception) and anumana (inference) refer there to sruti and smriti respectively.[116] Shankara recognized the means of knowledge,[117][note 26] but his thematic focus was upon metaphysics and soteriology, and he took for granted the pramanas.[122] For Shankara, sabda is the only means of knowledge for attaining Brahman-jnana.[123] According to Sengaku Mayeda, "in no place in his works [...] does he give any systematic account of them,"[122] taking Atman/Brahman to be self-evident (svapramanaka) and self-established (svatahsiddha), and "an investigation of the means of knowledge is of no use for the attainment of final release."[122]

Nevertheless, the Advaita tradition accepts altogether six kinds of pramāṇas.[124][125][126][123] While Adi Shankara emphasized Śabda (शब्द), relying on word, testimony of past or present reliable experts with regard to religious insights,[115][127][124][128] and also accepted pratyakṣa (प्रत्यक्षाय), perception; and anumāṇa (अनुमान), inference; classical Advaita Vedānta, just like the Bhatta Purvamimamsaka school, also accepts upamāṇa (उपमान), comparison, analogy; arthāpatti (अर्थापत्ति), postulation, derivation from circumstances;[115][129] and anupalabdhi (अनुपलब्धि), non-perception, negative/cognitive proof.[127][124]

Samadhi

According to Dubois, Shankara's Advaita emphasizes that, since Brahman is ever-present, Brahman-knowledge is immediate and requires no 'action', that is, striving and effort;[36] yet, the contemporary Advaita tradition, which is a yogic Advaita synthesis which developed in the late mediaeval period, also prescribes elaborate preparatory practice, including yogic samadhi, posing a paradox which is also recognized in other spiritual disciplines and traditions.[130][42][note 10]

Shankara regarded the srutis as the means of knowledge of Brahman, and he was ambivalent about yogic practices and meditation, which at best may prepare one for Brahma-jnana.[web 6] According to Rambachan, criticising Vivekananda, Shankara states that the knowledge of Brahman can only be obtained from inquiry of the Shruti, and not by Yoga or samadhi, which at best can only silence the mind.[131] The Bhamati school and the Vivarana school differed on the role of contemplation, but they both "deny the possibility of perceiving supersensuous knowledge through popular yoga techniques."[132] Later Advaita texts like the Dṛg-Dṛśya-Viveka (14th century) and Vedāntasara (of Sadananda) (15th century) added samādhi as a means to liberation, a theme that was also emphasized by Swami Vivekananda.[44] The Vivekachudamani, traditionally attributed to Shankara but post-dating him,[133] "conceives of nirvikalpa samadhi as the premier method of Self-realization over and above the well-known vedantic discipline of listening, reflection and deep contemplation."[65] Koller states that yogic concentration is an aid to gaining knowledge in Advaita.[134]

Anubhava ('experience')

The role of anubhava, anubhuti ("experience," "intuition"[135]) as "experience" in gaining Brahman-jnana is contested. While neo-Vedanta claims a central position for anubhava as "experience," Shankara himself regarded reliance on textual authority as sufficient for gaining Brahman-jnana,[136][note 27] "the intuition of Brahman,"[135] and used anubhava interchangeably with pratipatta, "understanding".[137] Arvind Sharma argues that Shankara's own "direct experience of the ultimate truth" guided him in selecting "those passages of the scriptures that resonate with this experience and will select them as the key with which to open previously closed, even forbidden, doors."[138][note 28]

The Vivekachudamani "explicit[ly] declar[es] that experience (anubhuti) is a pramana, or means of knowing (VCM 59),"[65] and neo-Vedanta also accepts anubhava ("personal experience") as a means of knowledge.[139] Dalal and others state that anubhava does not center around some sort of "mystical experience," but around the correct knowledge of Brahman.[91][140] Nikhalananda concurs, stating that (knowledge of) Atman and Brahman can only be reached by buddhi, "reason,"[141] stating that mysticism is a kind of intuitive knowledge, while buddhi is the highest means of attaining knowledge.[142]

Adhyaropa Apavada - imposition and negation

See also: Neti Neti

Since Gaudapada,[143] who adopted the Buddhist four-cornered negation which negates any positive predicates of 'the Absolute',[144][145][note 29] a central method in Advaita Vedanta to express the inexpressable is the method called Adhyaropa Apavada.[143] In this method, which was highly estimated by Satchidanandendra Saraswati, a property is imposed (adhyaropa) on Atman to convince one of its existence, whereafter the imposition is removed (apavada) to reveal the true nature of Atman as nondual and undefinable.[147] In this method, "That which cannot be expressed is expressed through false attribution and subsequent denial."[148] As Shankara writes, "First let me bring them on the right path, and then I will gradually be able to bring them round to the final truth afterwards."[148] For example, Atman, the real "I," is described as witness, giving "it" an attribute to separate it from non-self. Since this implies a duality between observer and observed, next the notion of "witness" is dropped, by showing that the Self cannot be seen and is beyond qualifications, and only that what is remains, without using any words:[web 7]

After one separates oneself i.e. 'I' or Atman from the sense objects, the qualities superimposed on Self are also negated by saying that which not being and not non-being, cannot be described by words, without beginning and end (BG 13.32) or as in Satyam Jnanam Anantam Brahman, beyond words, beyond mind and speech, etc. Here there is an attempt to negate the earlier attribute like being witness, bliss, most subtlest, etc. After this negation of false superimposition, Self Alone shines. One enters into the state of Nirvikalp Samadhi, where there is no second, no one to experience and hence this state cannot be described in words.[web 7]

The Mahavakyas - the identity of Ātman and Brahman

Moksha, liberation from suffering and rebirth and attaining immortality, is attained by disidentification from the body-mind complex and gaining self-knowledge as being in essence Atman, and attaining knowledge of the identity of Atman and Brahman.[1][73] According to Shankara, the individual Ātman and Brahman seem different at the empirical level of reality, but this difference is only an illusion, and at the highest level of reality they are really identical.[149] The real self is Sat, "the Existent," that is, Atman/Brahman.[150][151][note 1] Whereas the difference between Atman and non-Atman is deemed self-evident, knowledge of the identity of Atman and Brahman is revealed by the shruti, especially the Upanishadic statement tat tvam asi.

Mahavakyas

According to Shankara, a large number of Upanishadic statements reveal the identity of Atman and Brahman. In the Advaita Vedanta tradition, four of those statements, the Mahavakyas, which are taken literal, in contrast to other statements, have a special importance in revealing this identity.[86][152] They are:

तत्त्वमसि, tat tvam asi, Chandogya VI.8.7. Traditionally rendered as "That Thou Art" (that you are),[153][154][155] with tat in Ch.U.6.8.7 referring to sat, "the Existent"[156][19][157]); correctly translated as "That's how [thus] you are,"[153][155][158] with tat in Ch.U.6.12.3, its original location from where it was copied to other verses,[153] referring to "the very nature of all existence as permeated by [the finest essence]"[159][160]
अहं ब्रह्मास्मि, aham brahmāsmi, Brhadāranyaka I.4.10, "I am Brahman," or "I am Divine."[161]
प्रज्ञानं ब्रह्म, prajñānam brahma, Aitareya V.3, "Prajñānam[note 30] is Brahman."[note 31]
अयमात्मा ब्रह्म, ayamātmā brahma, Mandukya II, "This Atman is Brahman."

That you are

The longest chapter of Shankara's Upadesasahasri, chapter 18, "That Art Thou," is devoted to considerations on the insight "I am ever-free, the existent" (sat), and the identity expressed in Chandogya Upanishad 6.8.7 in the mahavakya (great sentence) "tat tvam asi", "that thou art."[164][165] In this statement, according to Shankara, tat refers to 'Sat,[165] "the Existent"[156][19][166][167] Existence, Being,[web 9] or Brahman,[168] the Real, the "Root of the world,"[165][note 32] the true essence or root or origin of everything that exists.[19][166][web 9] "Tvam" refers to one's real I, pratyagatman or inner Self,[169] the "direct Witness within everything,"[18] "free from caste, family, and purifying ceremonies,"[170] the essence, Atman, which the individual at the core is.[171][172] As Shankara states in the Upadesasahasri:

Up.I.174: "Through such sentences as "Thou art That" one knows one's own Atman, the Witness of all the internal organs." Up.I.18.190: "Through such sentences as "[Thou art] the Existent" [...] right knowledge concerning the inner Atman will become clearer." Up.I.18.193-194: "In the sentence "Thou art That" [...] [t]he word "That" means inner Atman."[173]

The statement "tat tvam asi" sheds the false notion that Atman is different from Brahman.[174] According toNakamura, the non-duality of atman and Brahman "is a famous characteristic of Sankara's thought, but it was already taught by Sundarapandya"[175] (c.600 CE or earlier).[176] Shankara cites Sundarapandya in his comments to Brahma Sutra verse I.1.4:

When the metaphorical or false atman is non-existent, [the ideas of my] child, [my] body are sublated. Therefore, when it is realized that 'I am the existent Brahman, atman', how can anyduty exist?[177]

From this, and a large number of other accordances, Nakamura concludes that Shankar was not an original thinker, but "a synthesizer of existing Advaita and the rejuvenator, as well as a defender, of ancient learning."[178]

Direct perception versus contemplation of the Mahavakyas

In the Upadesasahasri Shankara, Shankara is ambivalent on the need for meditation on the Upanishadic mahavakya. He states that "right knowledge arises at the moment of hearing,"[38] and rejects prasamcaksa or prasamkhyana meditation, that is, meditation on the meaning of the sentences, and in Up.II.3 recommends parisamkhyana,[179] separating Atman from everything that is not Atman, that is, the sense-objects and sense-organs, and the pleasant and unpleasant things and merit and demerit connected with them.[180] Yet, Shankara then concludes with declaring that only Atman exists, stating that "all the sentences of the Upanishads concerning non-duality of Atman should be fully contemplated, should be contemplated."[181] As Mayeda states, "how they [prasamcaksa or prasamkhyana versus parisamkhyana] differ from each other in not known."[182]

Prasamkhyana was advocated by Mandana Misra,[183] the older contemporary of Shankara who was the most influential Advaitin until the 10th century.[35][184][note 9] "According to Mandana, the mahavakyas are incapable, by themselves, of bringing about brahmajnana. The Vedanta-vakyas convey an indirect knowledge which is made direct only by deep meditation (prasamkhyana). The latter is a continuous contemplation of the purport of the mahavakyas.[185] Vācaspati Miśra, a student of Mandana Misra, agreed with Mandana Misra, and their stance is defended by the Bhamati-school, founded by Vācaspati Miśra.[186] In contrast, the Vivarana school founded by Prakasatman (c. 1200–1300)[187] follows Shankara closely, arguing that the mahavakyas are the direct cause of gaining knowledge.[188]

Shankara's insistence on direct knowledge as liberating also differs from the asparsa yoga described in Gaudapada's Mandukyakarika III.39-46.[189] In this practice of 'non-contact' (a-sparśa), the mind is controlled and brought to rest, and does not create "things" (appearances) after which it grasps; it becomes non-dual, free from the subject-[grasping]-object dualism.[190][52] Knowing that only Atman/Brahman is real, the creations of the mind are seen as false appearances (MK III.31-33). When the mind is brought to rest, it becomes or is Brahman (MK III.46).[189]

Renouncement of ritualism

In the Upadesasahasri Shankara discourages ritual worship such as oblations to Deva (God), because that assumes the Self within is different from Brahman.[note 33][note 34] The "doctrine of difference" is wrong, asserts Shankara, because, "he who knows the Brahman is one and he is another, does not know Brahman".[195][196] The false notion that Atman is different from Brahman[174] is connected with the novice's conviction that (Upadesasaharsi II.1.25)

> ...I am one [and] He is another; I am ignorant, experience pleasure and pain, am bound and a transmigrator [whereas] he is essentially different from me, the god not subject to transmigration. By worshipping Him with oblation, offerings, homage and the like through the [performance of] the actions prescribed for [my] class and stage of life, I wish to get out of the ocean of transmigratory existence. How am I he?[197]

Recognizing oneself as "the Existent-Brahman," which is mediated by scriptural teachings, is contrasted with the notion of "I act," which is mediated by relying on sense-perception and the like.[198] According to Shankara, the statement "Thou art That" "remove[s] the delusion of a hearer,"[199] "so through sentences as "Thou art That" one knows one's own Atman, the witness of all internal organs,"[200] and not from any actions.[201][note 35] With this realization, the performance of rituals is prohibited, "since [the use of] rituals and their requisites is contradictory to the realization of the identity [of Atman] with the highest Atman."[203]

Philosophy: Reality/truth (Brahman, sat) and the world

The swan is an important motif in Advaita. The white colour of swan symbolises Sattva guṇa & the ability to discern Satya (Real, Eternal) from Mithya (Unreal, Changing), just as the mythical swan Paramahamsa discerns milk from water.

Classical Advaita Vedānta states that all reality and everything in the experienced world has its root in Brahman, which is unchanging intelligent Consciousness.[4] To Advaitins, there is no duality between a Creator and the created universe.[4][204] All objects, all experiences, all matter, all consciousness, all awareness are somehow also this one fundamental reality Brahman.[4] Yet, the knowing self has various experiences of reality during the waking, dream and dreamless states,[205] and Advaita Vedānta acknowledges and admits that from the empirical perspective there are numerous distinctions.[206] Advaita explains this by postulating different levels of reality,[207][208][209][205] and by its theory of errors (anirvacaniya khyati).[210][4]

Darśana (view) – central concerns

The ripple, Jivatman, is non-different from the water, Brahman.
Further information: Hindu philosophy
Vedānta is one of the six classical Hindu darśanas, the Indian traditions of religious philosophy and practice which accept the authority of the Vedas. The various schools of Vedanta aim to harmonise the diverging views presented in the Prasthantrayi, the Principal Upanishads,[211][212] along with the Brahma Sutras and the Bhagavad Gitā, offering an integrated body of textual interpretations and religious practices which aim at the attainment of moksha, release or liberation from transmigratory existence.[213][214][note 36]

Rejection of samkhya-dualism

> "Samkhya is not one of the systems of Indian philosophy. Samkhya is the philosophy of India!"
>
> Gopinath Kaviraj[216]

The Brahma Sutras, the constituting text of the Vedanta-tradition, rejects the purusha-prakriti dualism of the samkhya-tradition,[20] and "much of the Brahmasutra appears to have been written to refute the perspective of the Samkhya school."[20] Samkhya postulates two independent primal principles, purusha (primal consciousness) and prakriti (nature, which includes both matter and cognition and emotions). In samkhya, prakriti consists of three qualities (Guṇas), which are in balance, until they come in contact with purusha and the equilibrium is disturbed. From this pradhana then evolves the material universe, distinct from purusha, thereby postulating purusha as the efficient cause of all existence, and prakriti as its material cause or origin.[217]

While closely related to Samkhya,[218][20] the Advaita Vedānta tradition rejects this dualism, instead stating that Reality cannot evolve from an inert, consciousness- and intelligence-less principle or essence. Brahman, which is intelligent and consciousness,[20] is the sole Reality,[219][220] "that from which the origination, subsistence, and dissolution of this universe proceed,"[217] as stated in the second verse of the Brahman Sutras. In Samkhya, purusha is the efficient cause, and prakriti is the material cause: purusha causes prakriti to manifest as the natural world. Advaita, like all Vedanta schools, states that Brahman, consciousness, is both the efficient and the material cause, that from which the material universe evolves.[221] Yet, in the Brahmasutras Brahma is a dynamic force, while the Advaita-tradition regards Brahman as an "essentially unchanging and static reality,"[21] since Brahman changing into something else would mean that Brahman would not exist anymore, while a partial change would leave Brahman divided.[21]

Theoretical difficulties

By accepting that Brahman is the sole, unchanging reality, various theoretical difficulties arise which are not answered by the Brahmasutras, which asserts that the Upanishadic views have to be accepted due to their scriptural authority, "regardless of logical problems and philosophical inconsistencies."[21] Advaita and other Vedānta traditions face several problems, for which they offer different solutions.[222][219][220] According to Deutsch and Dalvi, "The basic problem of Vedanta [is] the relation between the plural, complex, changing phenomenal world and the Brahman in which it substantially subsists."[19] According to Mayeda, following the post-Shankara[20] predicate sat-cit-ananda, three problems emerge. First, how did Brahman, which is sat ('existence'), without any distinction, become manifold material universe? Second, how did Brahman, which is cit ('consciousness'), create the material world? Third, if Brahman is ananda ('bliss'), why did the empirical world of sufferings arise? The Brahma Sutras do not answer these philosophical queries, and later Vedantins including Shankara had to resolve them.[222]

To solve these questions, Shankara introduced the concept of "Unevolved Name-and-Form," or primal matter corresponding to Prakriti, from which the world evolves,[223] coming close to Samkhya dualism.[224] Shankara's notion of "Unevolved Name-and-Form" was not adopted by the later Advaita tradition; instead, the later tradition turned avidya into a metaphysical principle, namely mulavidya or "root ignorance," a metaphysical substance which is the "primal material cause of the universe (upadana)."[225] In this view, Brahman alone is real, and the phenomenal world is an appearance (maya) or "an unreal manifestation (vivarta) of Brahman."[23] Prakasatmans (13th c.) defense of vivarta to explain the origin of the world, which declared phenomenal reality to be an illusion,[24] became the dominant explanation, with which the primacy of Atman/Brahman can be maintained.[219][220]

Relation between jivatman and Atman/Brahman
A main question in all schools of Vedanta is the relation between the individual self (jiva) and Atman/Brahman.[226] As Shankara and his followers regard Atman/Brahman to be the ultimate Real, jivanatman is "ultimately [to be] of the nature of Atman/Brahman."[219][6] This truth is established from a literal reading of selected parts[86] of the oldest Principal Upanishads and Brahma Sutras, and is also found in parts of the Bhagavad Gitā and numerous other Hindu texts,[4] and is regarded to be self-evident.[134][note 37] Great effort is made to show the correctness of this reading, and its compatibility with reason and experience, by criticizing other systems of thought.[134] Vidya, correct knowledge or understanding of the identity of jivan-ātman and Brahman, destroys or makes null avidya ('false knowledge'), and results in liberation.[228][note 38]

Three levels of Reality/truth
See also: Three Bodies Doctrine (Vedanta) and Two truths doctrine
Shankara proposes three levels of reality, using sublation as the ontological criterion:[207][208][209]

Pāramārthika (paramartha, absolute), the Reality that is metaphysically true and ontologically accurate. It is the state of experiencing that "which is absolutely real and into which both other reality levels can be resolved". This reality is the highest; it can't be sublated (assimilated) by any other.[207][229] Ultimate reality only consists of Brahman. Everything else is like a dream.[230]
Vyāvahārika (vyavahara), or samvriti-saya,[231] consisting of the empirical or

pragmatical reality. It is ever changing over time, thus empirically true at a given time and context but not metaphysically true. It is "our world of experience, the phenomenal world that we handle every day when we are awake". It is the level in which both jiva (living creatures or individual Selfs) and Iswara are true; here, the material world is also true but this is incomplete reality and is sublatable.[229][232] Vyāvahārika reality results from superimposing ignorance on Brahman, like seeing a snake instead of a rope.[230]
Prātibhāsika (pratibhasika, apparent reality, unreality), "reality based on imagination alone". It is the level of experience in which the mind constructs its own reality. Well-known examples of pratibhasika is the imaginary reality such as the "roaring of a lion" fabricated in dreams during one's sleep, and the perception of a rope in the dark as being a snake.[229][233][234]
Absolute and relative reality are valid and true in their respective contexts, but only from their respective particular perspectives.[205][206][235] John Grimes explains this Advaita doctrine of absolute and relative truth with the example of light and darkness.[206] From the sun's perspective, it neither rises nor sets, there is no darkness, and "all is light". From the perspective of a person on earth, sun does rise and set, there is both light and darkness, not "all is light", there are relative shades of light and darkness. Both are valid realities and truths, given their perspectives. Yet, they are contradictory. What is true from one point of view, states Grimes, is not from another. To Advaita Vedānta, this does not mean there are two truths and two realities, but it only means that the same one Reality and one Truth is explained or experienced from two different perspectives.[206][236]

As they developed these theories, Advaita Vedānta scholars were influenced by some ideas from the Nyaya, Samkhya and Yoga schools of Hindu philosophy.[237][209] These theories have not enjoyed universal consensus among Advaitins, and various competing ontological interpretations have flowered within the Advaita tradition.[4][238][note 39]

Pāramārthika - Sat (True Reality)
Ātman
Main article: Ātman (Hinduism)
See also: Samadhi, Buddha-nature, Sunyata, and Choiceless awareness
Ātman (IAST: ātman, Sanskrit: आत्मन्) is the "real self"[239][240][241][242][note 40] or "essence"[web 11][note 41] of the individual. It is caitanya, Pure Consciousness,[243] a consciousness, states Sthaneshwar Timalsina, that is "self-revealed, self-evident and self-aware (svaprakashata),"[242] and, states Payne, "in some way permanent, eternal, absolute or unchanging."[note 41] It is self-existent awareness, limitless and non-dual.[78] It is "a stable subjectivity, or a unity of consciousness through all the specific states of individuated phenomenality."[244] Ātman, states Eliot Deutsch, is the "pure, undifferentiated, supreme power of awareness", it is more than thought, it is a state of being, that which is conscious and transcends subject-object divisions and momentariness.[245] According to Ram-Prasad, "it" is not an object, but "the irreducible essence of being [as] subjectivity, rather than an objective self with the quality of consciousness."[246]

According to Shankara, it is self-evident and "a matter not requiring any proof" that Atman, the 'I', is 'as different as light is from darkness' from non-Atman, the 'you' or 'that', the material world whose characteristics are mistakenly superimposed on Atman, resulting in notions as "I am this" and "This is mine."[247] One's real self is not the constantly changing body, not the desires, not the emotions, not the ego, nor the dualistic mind,[248][249][250] but the introspective, inwardly self-conscious "on-looker" (saksi),[251] which is in reality completely disconnected from the non-Atman.[247]

The jivatman or individual self is a mere reflection of singular Atman in a multitude of apparent individual bodies.[22] It is "not an individual subject of consciousness,"[244] but the same in each person and identical to the universal eternal Brahman,[79] a term used interchangeably with Atman.[252]

Atman is often translated as soul,[note 42] though the two concepts differ significantly, since "soul" includes mental activities, whereas "Atman" solely refers to detached witness-consciousness.

Three states of consciousness and Turiya

Advaita posits three states of consciousness, namely waking (jagrat), dreaming (svapna), deep sleep (suṣupti), which are empirically experienced by human beings,[253][254] and correspond to the Three Bodies Doctrine:[255]

The first state is the waking state, in which we are aware of our daily world.[256] This is the gross body.
The second state is the dreaming mind. This is the subtle body.[256]
The third state is the state of deep sleep. This is the causal body.[256]
Advaita also posits "the fourth," Turiya, which some describe as pure consciousness, the background that underlies and transcends these three common states of consciousness.[web 12][web 13] Turiya is the state of liberation, where states Advaita school, one experiences the infinite (ananta) and non-different (advaita/abheda), that is free from the dualistic experience, the state in which ajativada, non-origination, is apprehended.[257] According to Candradhara Sarma, Turiya state is where the foundational Self is realized, it is measureless, neither cause nor effect, all pervading, without suffering, blissful, changeless, self-luminous,[note 5] real, immanent in all things and transcendent.[258] Those who have experienced the Turiya stage of self-consciousness have reached the pure awareness of their own non-dual Self as one with everyone and everything, for them the knowledge, the knower, the known becomes one, they are the Jivanmukta.[259][260][261][262][263]

Advaita traces the foundation of this ontological theory in more ancient Sanskrit texts.[264] For example, chapters 8.7 through 8.12 of Chandogya Upanishad discuss the "four states of consciousness" as awake, dream-filled sleep, deep sleep, and beyond deep sleep.[264][265] One of the earliest mentions of Turiya, in the Hindu scriptures, occurs in verse 5.14.3 of the Brihadaranyaka Upanishad.[note 43] The idea is also discussed in other early Upanishads.[266]

Svayam prakāśa (self-luminosity)

Brahma Jnanavali Mala, attributed to Adi Shankara:[web 14]

> 6. I am the indwelling consciousness, I am calm (free from all agitation), I am beyond prakriti (maya), I am of the nature of eternal bliss, I am the very Self, indestructible and changeless.
>
> 14. I am a mass of awareness and of consciousness. I am not a doer nor an experiencer. I am the very Self, indestructible and changeless.

Manisha Panchakam, attributed to Adi Shankara:[web 15]

Main article: Prakāśa
See also: Svasaṃvedana
In the Advaita tradition, consciousness is svayam prakāśa, "self-luminous,"[4][267][note 5] which means that "self is pure awareness by nature."[268] According to Dasgupta, it is "the most fundamental concept of the Vedanta."[269] According to T. R. V. Murti, the Vedanta concept is explained as follows:

> The point to be reached is a foundational consciousness that is unconditional, self-evident, and immediate (svayam-prakāśa). It is that to which everything is presented, but is itself no presentation, that which knows all, but is itself no object. The self should not be confused with the contents and states which it enjoys and manipulates. If we have to give an account of it, we can describe it only as what it is not, for any positive description of it would be possible only if it could be made an object of observation, which from the nature of the case it is not. We "know" it only as we withdraw ourselves from the body with which we happen to be identified, in this transition.[270][note 44]

According to Jonardon Ganeri, the concept was introduced by the Buddhist philosopher Dignāga (c.480–c.540 CE), and accepted by the Vedanta tradition;[268] according to Zhihua Yao, the concept has older roots in the Mahasanghika school.[271]

Brahman

Main articles: Brahman and Satcitananda
According to Advaita Vedānta, Brahman is the true Self, consciousness, awareness, intelligent, possessed with will, and the only Reality (Sat).[77][272][273][note 45] Brahman is Paramarthika Satyam, "Absolute Truth"[274] or absolute Real.[275] It is That which is unborn and unchanging,[272][276] and immortal.[note 7] Other than Brahman, everything else, including the universe, material objects and individuals, are ever-changing and therefore maya. Brahman is "not sublatable",[77] which means it cannot be superseded by a still higher reality:[277]

> the true Self, pure consciousness [...] the only Reality (sat), since It is untinged by

difference, the mark of ignorance, and since It is the one thing that is not sublatable".[77]

In Advaita, Brahman is the substrate and cause of all changes.[272][276] Refuting samkhya, which considers pradhana or prakriti the material cause (primal matter) and purusha the efficient cause,[278] in Advaita Vedanta Brahman is considered to be the material cause[note 46] and the efficient cause[note 47] of all that exists.[279][280][281] The Brahma Sutras I.1.2 state that Brahman is:

...that from which the origination, subsistence, and dissolution of this universe proceed.[282][note 48]

Advaita's Upanishadic roots state Brahman's qualities[note 49] to be Sat-cit-ānanda,[284][285][286] "true being-consciousness-bliss,"[286][287] or "Eternal Bliss Consciousness".[288][note 50] A distinction is made between nirguna Brahman, formless Brahman, and saguna Brahman, Brahman with form, that is, Ishvara, God. Nirguna Brahman is undescribable, and the Upanishadic neti neti ('not this, not that' or 'neither this, nor that') negates all conceptualizations of Brahman.[85][289]

Vyāvahārika (conventional reality) – Avidya and Māyā

Avidyā (ignorance)

Avidyā is a central tenet of Shankara's Advaita, and became the main target of Ramanuja's criticism of Shankara.[290][291] In Shankara's view, avidyā is adhyasa, "the superimposition of the qualities of one thing upon another."[292] As Shankara explains in the Adhyasa-bhasya, the introduction to the Brahmasutrabhasya:

Owing to an absence of discrimination, there continues a natural human behaviour in the form of 'I am this' or 'This is mine'; this is avidya. It is a superimposition of the attributes of one thing on another. The ascertainment of the nature of the real entity by separating the superimposed thing from it is vidya (knowledge, illumination).

Due to avidya, we're steeped in loka drsti, the empirical view.[293] From the beginning we only perceive the empirical world of multiplicity, taking it to be the only and true reality.[293][294] Due to avidyā there is ignorance, or nescience, of the real Self, Atman/Brahman, mistakenly identifying the Self with the body-mind complex.[web 16] With parmartha drsti ignorance is removed and vidya is acquired, and the Real, distinctionless Brahman is perceived as the True reality.[293]

The notion of avidyā and its relationship to Brahman creates a crucial philosophical issue within Advaita Vedānta thought: how can avidyā appear in Brahman, since Brahman is pure consciousness?[295] For Shankara, avidya is a perceptual or psychological error.[225] According to Satchidanandendra Saraswati, for Shankara "avidya is only a technical name to denote the natural tendency of the human mind that is engaged in the act of superimposition."[296] The later tradition diverged from Shankara by turning avidya into a metaphysical principle, namely mulavidya or "root ignorance," a metaphysical substance which is the "primal material cause of the universe (upadana)," thereby setting aside Shankara's 'Unevolved Name-and-Form' as the explanation for the existence of materiality.[225][297] According to Mayeda, "[i]n order to save monism, they characterized avidya as indefinable as real or unreal (sadasadbhyam anirvacanya), belonging neither to the category of being nor to that of non-being."[225] In the 20th century, this theory of mulavidya became a point of strong contention among Advaita Vedantins, with Satchidanandendra Saraswati arguing that Padmapada and Prakasatman had misconstrued Shanakara's stance.[298]

Shankara did not give a 'location' of avidya, giving precedence to the removal of ignorance.[299][note 51] Sengaku Mayeda writes, in his commentary and translation of Adi Shankara's Upadesasahasri:

Certainly the most crucial problem which Sankara left for his followers is that of avidyā. If the concept is logically analysed, it would lead the Vedanta philosophy toward dualism or nihilism and uproot its fundamental position.[300]

The later Advaita-tradition diverged from Shankara, trying to determinate a locus of avidya,[301] with the Bhamati-school locating avidya in the jiva c.q. prakriti, while the Vivarana-school locates it in Brahman.[302][301]

Māyā (appearance)

In Advaita Vedanta, the perceived empirical world, "including people and other existence," is Māyā, "appearance."[303][304] Jiva, conditioned by the human mind, is subjected to experiences of a subjective nature, and misunderstands and interprets the physical, changing world as the sole and final reality.[303] Due to avidya, we take the phenomenal world to be the final reality,[web 16] while in Reality only Sat (True Reality, Brahman) is Real and unchanging.[305]

While Shankara took a realistic stance, and his explanations are "remote from any connotation of illusion," the 13th century scholar Prakasatman, founder of the influential Vivarana school, introduced the notion that the world is illusory.[24][219][220] According to Hacker, maya is not a prominent theme for Shankara, in contrast to the later Advaita tradition, and "the word maya has for [Shankara] hardly any terminological weight."[306]

Five koshas (sheaths)

Due to avidya, atman is covered by koshas (sheaths or bodies), which hide man's true nature. According to the Taittiriya Upanishad, the Atman is covered by five koshas, usually rendered "sheath".[307] They are often visualized like the layers of an onion.[308] From gross to fine the five sheaths are:

Annamaya kosha, physical/food sheath
Pranamaya kosha, life-force sheath
Manomaya kosha, mental sheath
Vijnanamaya kosha, discernment/wisdom sheath

Anandamaya kosha, bliss sheath (Ananda)

Parinamavada and vivartavada - causality and change

See also: Satkāryavāda, Ajativada, and Vivartavada

Cause and effect are an important topic in all schools of Vedanta.[note 52] Two sorts of causes are recognised, namely Nimitta kāraṇa, the efficient cause, that which causes the existence of the universe, and Upādāna kāraṇa, the material cause, that from which the matery of this universe comes.[310] All schools of Vedānta agree that Brahman is both the material and the efficient cause, and all subscribe to the theory of Satkāryavāda,[web 18] which means that the effect is pre-existent in the cause.[23][note 53]

There are different views on the origination of the empirical world from Brahman. All commentators "agree that Brahman is the cause of the world," but disagree on how exactly Brahman is the cause of the world.[23] According to Nicholson, "Mediaeval Vedantins distinguished two basic positions." Parinamavada is the idea that the world is a real transformation (parinama) of Brahman.[23] Vivartavada is the idea that the world is merely an unreal manifestation (vivarta) of Brahman. Vivartavada states that although Brahman appears to undergo a transformation, in fact no real change takes place. The myriad of beings are unreal manifestation, as the only real being is Brahman, that ultimate reality which is unborn, unchanging, and entirely without parts.[23]

20th verse of Brahmajnanavalimala, attributed to Shankara:

ब्रह्म सत्यं जगन्मिथ्या
जीवो ब्रह्मैव नापरः

Brahman is real, the world is an illusion
Brahman and Jiva are not different.

Brahmajnanavalimala 1.20[web 20]

The Brahma Sutras, the ancient Vedantins, most sub-schools of Vedānta,[23][web 18] as well as Samkhya argue for parinamavada.[web 18] The "most visible advocates of Vivartavada," states Nicholson, are the Advaitins, the followers of Shankara.[23] "Although the world can be described as conventionally real", adds Nicholson, "the Advaitins claim that all of Brahman's effects must ultimately be acknowledged as unreal before the individual self can be liberated".[web 18][note 54]

Yet, Adi Shankara himself most likely explained causality through parinamavada.[web 18][23][24][312] In Shankara's works "Brahman constitutes the basic essence (svabhava) of the universe (BS Bh 3.2.21) and as such the universe cannot be thought of as distinct from it (BS Bh 2.1.14)." In Shankara's view, then, "The world is real, but only in so far as its existence is seen as totally dependent upon Brahman."[312]

Shankara introduced the concept of "Unevolved Name-and-Form," or primal matter corresponding to Prakriti, from which the world evolves,[223] but this concept was not adopted by the later Advaita tradition.[24] Vivartavada became the dominant explanation, with which the primacy of Atman/Brahman can be maintained.[219][220] Scholars such as Hajime Nakamura and Paul Hacker already noted that Adi Shankara did not advocate Vivartavada, and his explanations are "remote from any connotation of illusion".[24][note 55]

Manisha Panchakam, attributed to Adi Shankara:[web 21]

2. I am Brahman (pure consciousness). It is pure consciousness that appears as this universe.

It was the 13th century scholar Prakasatman, who founded the influential Vivarana school, who gave a definition to vivarta, introducing the notion that the world is illusory. It is Prakasatman's theory that is sometimes misunderstood as Adi Shankara's position.[24] Andrew Nicholson concurs with Hacker and other scholars, adding that the vivarta-vada isn't Shankara's theory, that Shankara's ideas appear closer to parinama-vada, and the vivarta explanation likely emerged gradually in Advaita subschool later.[web 18][note 56]

Ethics

Some claim, states Deutsch, "that Advaita turns its back on all theoretical and practical considerations of morality and, if not unethical, is at least 'a-ethical' in character".[315] However, Deutsch adds, ethics does have a firm place in this philosophy. Its ideology is permeated with ethics and value questions enter into every metaphysical and epistemological analysis, and it considers "an independent, separate treatment of ethics are unnecessary".[315][316] According to Advaita Vedānta, states Deutsch, there cannot be "any absolute moral laws, principles or duties", instead in its axiological view Atman is "beyond good and evil", and all values result from self-knowledge of the reality of "distinctionless Oneness" of one's real self, every other being and all manifestations of Brahman.[317] Advaitin ethics includes lack of craving, lack of dual distinctions between one's own Self and another being's, good and just Karma.[318]

The values and ethics in Advaita Vedānta emanate from what it views as inherent in the state of liberating self-knowledge. This state, according to Rambachan, includes and leads to the understanding that "the self is the self of all, the knower of self sees the self in all beings and all beings in the self."[80] Such knowledge and understanding of the indivisibility of one's and other's Atman, Advaitins believe leads to "a deeper identity and affinity with all". It does not alienate or separate an Advaitin from his or her community, rather awakens "the truth of life's unity and interrelatedness".[80] These ideas are exemplified in the Isha Upanishad – a sruti for Advaita, as follows:

One who sees all beings in the self alone, and the self of all beings,

feels no hatred by virtue of that understanding.
For the seer of oneness, who knows all beings to be the self,
where is delusion and sorrow?

—Isha Upanishad 6–7, Translated by A Rambachan[319]

Adi Shankara, in verse 1.25 to 1.26 of his Upadeśasāhasrī, asserts that the Self-knowledge is understood and realized when one's mind is purified by the observation of Yamas (ethical precepts) such as Ahimsa (non-violence, abstinence from injuring others in body, mind and thoughts), Satya (truth, abstinence from falsehood), Asteya (abstinence from theft), Aparigraha (abstinence from possessiveness and craving) and a simple life of meditation and reflection.[320] Rituals and rites can help focus and prepare the mind for the journey to Self-knowledge,[321] but can be abandoned when moving on to "hearing, reflection, and meditation on the Upanishads."[322]

Elsewhere, in verses 1.26–1.28, the Advaita text Upadesasahasri states the ethical premise of equality of all beings. Any Bheda (discrimination), states Shankara, based on class or caste or parentage is a mark of inner error and lack of liberating knowledge.[323] This text states that the fully liberated person understands and practices the ethics of non-difference.[323]

One, who is eager to realize this highest truth spoken of in the Sruti, should rise above the fivefold form of desire: for a son, for wealth, for this world and the next, and are the outcome of a false reference to the Self of Varna (castes, colors, classes) and orders of life. These references are contradictory to right knowledge, and reasons are given by the Srutis regarding the prohibition of the acceptance of difference. For when the knowledge that the one non-dual Atman (Self) is beyond phenomenal existence is generated by the scriptures and reasoning, there cannot exist a knowledge side by side that is contradictory or contrary to it.

—Adi Shankara, Upadesha Sahasri 1.44, [324][note 57]

Texts

The Upanishads, the Bhagavad Gitā and Brahma Sutras are the central texts of the Advaita Vedānta tradition, lending authority to the doctrines about the identity of Atman and Brahman and their changeless nature.[6][325]

Adi Shankara gave a nondualist interpretation of these texts in his commentaries. Adi Shankara's Bhashya (commentaries) have become central texts in the Advaita Vedānta philosophy, but are one among many ancient and medieval manuscripts available or accepted in this tradition.[32] The subsequent Advaita tradition has further elaborated on these sruti and commentaries. Adi Shankara is also credited for the famous text Nirvana Shatakam.

Prasthanatrayi

The Vedānta tradition provides exegeses of the Upanishads, the Brahma Sutras, and the Bhagavadgita, collectively called the Prasthanatrayi, literally, three sources.[326][6]

[325]

The Upanishads,[note 58] or Śruti prasthāna; considered the Śruti (Vedic scriptures) foundation of Vedānta.[note 59][214][329][330] Most scholars, states Eliot Deutsch, are convinced that the Śruti in general, and the Upanishads in particular, express "a very rich diversity" of ideas, with the early Upanishads such as Brihadaranyaka Upanishad and Chandogya Upanishad being more readily amenable to Advaita Vedānta school's interpretation than the middle or later Upanishads.[331][332] In addition to the oldest Upanishads, states Williams, the Sannyasa Upanishads group composed in pre-Shankara times "express a decidedly Advaita outlook".[333]
The Brahma Sutras, or Nyaya prasthana / Yukti prasthana; considered the reason-based foundation of Vedānta. The Brahma Sutras attempted to synthesize the teachings of the Upanishads. The diversity in the teachings of the Upanishads necessitated the systematization of these teachings. The only extant version of this synthesis is the Brahma Sutras of Badarayana. Like the Upanishads, Brahma Sutras is also an aphoristic text, and can be interpreted as a non-theistic Advaita Vedānta text or as a theistic Dvaita Vedānta text. This has led, states Stephen Phillips, to its varying interpretations by scholars of various sub-schools of Vedānta.[334] The Brahmasutra is considered by the Advaita school as the Nyaya Prasthana (canonical base for reasoning).[335]
The Bhagavad Gitā, or Smriti prasthāna; considered the Smriti (remembered tradition) foundation of Vedānta.[335] It has been widely studied by Advaita scholars, including a commentary by Adi Shankara.[139][336]
Textual authority
The Advaita Vedānta tradition considers the knowledge claims in the Vedas to be the crucial part of the Vedas, not its karma-kanda (ritual injunctions).[6] The knowledge claims about self being identical to the nature of Atman/Brahman are found in the Upanishads, which Advaita Vedānta has regarded as "errorless revealed truth."[6] Nevertheless, states Koller, Advaita Vedantins did not entirely rely on revelation, but critically examined their teachings using reason and experience, and this led them to investigate and critique competing theories.[6]

Advaita Vedānta, like all orthodox schools of Hindu philosophy, accepts as an epistemic premise that Śruti (Vedic literature) is a reliable source of knowledge.[214][329][330] The Śruti includes the four Vedas including its four layers of embedded texts – the Samhitas, the Brahmanas, the Aranyakas and the early Upanishads.[337] Of these, the Upanishads are the most referred to texts in the Advaita school.

The possibility of different interpretations of the Vedic literature, states Arvind Sharma, was recognized by ancient Indian scholars.[338][336] The Brahmasutra (also called Vedānta Sutra, composed in 1st millennium BCE) accepted this in verse 1.1.4 and asserts the need for the Upanishadic teachings to be understood not in piecemeal cherrypicked basis, rather in a unified way wherein the ideas in the Vedic texts are harmonized with other means of knowledge such as perception, inference and remaining pramanas.[338][335] This theme has been central to the Advaita school, making the Brahmasutra as a common reference and a consolidated textual authority for Advaita.[338][339]

The Bhagavad Gitā, similarly in parts can be interpreted to be a monist Advaita text, and in other parts as theistic Dvaita text. It too has been widely studied by Advaita scholars, including a commentary by Adi Shankara.[139][336]

Other texts

A large number of texts are attributed to Shankara; of these texts, the Brahma Sutra Bhasya (commentary on the Brahma Sutras), the commentaries on the principal Upanishads, and the Upadesasahasri are considered genuine and stand out.[citation needed]

Post-Shankara Advaita saw the composition of both scholarly commentaries and treatises, as well as, from late mediaeval times (14th century) on, popular works and compositions which incorporate Yoga ideas. These include notable texts mistakenly attributed to Shankara, such as the Vivekachudamani, Atma bodha, and Aparokshanubhuti; and other texts like Advaita Bodha Deepika and Dṛg-Dṛśya-Viveka. Texts which influenced the Advaita tradition include the Avadhuta Gita, the Yoga Vasistha, and the Yoga Yajnavalkya.[citation needed]

Sampradaya and Smarta tradition

Monastic order - Mathas

See also: Dashanami Sampradaya

(Vidyashankara temple) at Sringeri Sharada Peetham, Shringeri

Advaita Vedānta is not just a philosophical system, but also a tradition of monastic renunciation. Philosophy and renunciation are closely related:[web 22]

Most of the notable authors in the advaita tradition were members of the sannyasa tradition, and both sides of the tradition share the same values, attitudes and metaphysics.[web 22]

According to tradition, around 740 AD Gaudapada founded Shri Gaudapadacharya Math[note 60], also known as Kavaḷē maṭha. It is located in Kavale, Ponda, Goa,[web 23] and is the oldest matha of the South Indian Saraswat Brahmins.[340][web 24]

Shankara, himself considered to be an incarnation of Shiva,[web 22] is credited with establishing the Dashanami Sampradaya, organizing a section of the Ekadandi monks under an umbrella grouping of ten names.[web 22] Several Hindu monastic and Ekadandi traditions, however, remained outside the organisation of the Dasanāmis.[341][342][343]

Sankara is said to have organised the Hindu monks of these ten sects or names under four Maṭhas (Sanskrit: मठ) (monasteries), called the Amnaya Mathas, with the headquarters at Dvārakā in the West, Jagannatha Puri in the East, Sringeri in the South and Badrikashrama in the North.[web 22] According to tradition, each math was first headed by one of his four main disciples, and the tradition continues since then. Yet, according to Paul Hacker, no mention of the mathas can be found before the 14th century CE.[344] Until the 15th century, the timespan of the directors of Sringeri Math are unrealistically long, spanning 60+ and even 105 years. After 1386, the timespans become much shorter.[345] According to Hacker, these mathas may have originated as late as the 14th century, to propagate Shankara's view of Advaita.[346][note 61][note 62] According to another tradition in Kerala, after Sankara's samadhi at Vadakkunnathan Temple, his disciples founded four mathas in Thrissur, namely Naduvil Madhom, Thekke Madhom, Idayil Madhom and Vadakke Madhom.

Monks of these ten orders differ in part in their beliefs and practices, and a section of them is not considered to be restricted to specific changes attributed to Shankara. While the dasanāmis associated with the Sankara maths follow the procedures attributed to Adi Śankara, some of these orders remained partly or fully independent in their belief and practices; and outside the official control of the Sankara maths. The advaita sampradaya is not a Saiva sect,[web 22][350] despite the historical links with Shaivism.[note 63] Nevertheless, contemporary Sankaracaryas have more influence among Saiva communities than among Vaisnava communities.[web 22]

Smarta Tradition

Main article: Smarta Tradition

The Smarta tradition of Hinduism is a synthesis of various strands of Indian religious thought and practice, which developed with the Hindu synthesis, dating back to the early first century CE.[note 64] It is particularly found in south and west India, and reveres all Hindu divinities as a step in their spiritual pursuit.[352][353][354] Their worship practice is called Panchayatana puja.[355][352] The worship symbolically consists of five deities: Shiva, Vishnu, Devi or Durga, Surya and an Ishta Devata or any personal god of devotee's preference.[353][356]

In the Smarta tradition, Advaita Vedānta ideas combined with bhakti are its foundation. Adi Shankara is regarded as the greatest teacher[354] and reformer of the Smarta.[357] According to Alf Hiltebeitel, Shankara's Advaita Vedānta and practices became the doctrinal unifier of previously conflicting practices with the smarta tradition.[note 65]

Philosophically, the Smarta tradition emphasizes that all images and statues (murti), or just five marks or any anicons on the ground, are visibly convenient icons of spirituality saguna Brahman.[359][355] The multiple icons are seen as multiple representations of the same idea, rather than as distinct beings. These serve as a step and means to realizing the abstract Ultimate Reality called nirguna Brahman. The ultimate goal in this practice is to transition past the use of icons, then follow a philosophical and meditative path to understanding the oneness of Atman (Self) and Brahman – as "That art Thou".

[359][360]

Buddhist influences on Advaita Vedānta

Main article: Buddhist philosophy

Further information: Buddhist influences on Advaita Vedanta

Similarities with Buddhism

Advaita Vedānta and other schools of Hindu philosophy share numerous terminology, doctrines, and dialectical techniques with Buddhism.[361][362] According to a 1918 paper by the Buddhist scholar O. Rozenberg, "a precise differentiation between Brahmanism and Buddhism is impossible to draw."[361] T. R. V. Murti notices that "the ultimate goal" of Vedānta, Sāṃkhya, and Mahāyāna Buddhism is "remarkably similar"; while Advaita Vedānta postulates a "foundational self", according to Murti "Mahāyāna Buddhism implicitly affirms the existence of a deep underlying reality behind all empirical manifestations in its conception of śūnyatā (the indeterminate, the void), or vijñapti-mātra (consciousness only), or tathātā (thatness), or dhārmata (noumenal reality)."[270] According to Frank Whaling, the similarities between Advaita Vedānta and Buddhism are not limited to the terminology and some doctrines, but also includes practice. The monastic practices and monk tradition in Advaita Vedānta are similar to those found in Buddhism.[363]

Mahāyāna philosophy

The influence of Mahāyāna Buddhism on Advaita Vedānta has been significant.[363][364] Sharma points out that the early commentators on the Brahma Sūtras were all realists, or pantheist realists. He states that they were influenced by Buddhism, particularly during the 5th–6th centuries CE with the development of the Yogācāra school of Buddhist philosophy.[365] Von Glasenapp states that there was a mutual influence between Vedānta and Buddhism.[note 66] S. N. Dasgupta and Mohanta suggest that Buddhism and Advaita Vedānta represent "different phases of development of the same non-dualistic metaphysics from the Upanishadic period to the time of Śaṅkara."[366][note 67]

The influence of Buddhist doctrines on Gauḍapāda has been a vexed question.[369][370] Modern scholarship generally accepts that Gauḍapāda was influenced by Buddhism, at least in terms of using Buddhist terminology to explain his ideas, but adds that Gauḍapāda was a Vedantin and not a Buddhist.[369] Ādi Śaṅkara, states Natalia Isaeva, incorporated "into his own system a Buddhist notion of māyā which had not been minutely elaborated in the Upanishads".[361] According to Mudgal, Śaṅkara's Advaita view and Nāgārjuna's Mādhyamaka view of ultimate reality are compatible because they are both transcendental, indescribable, non-dual and only arrived at through a via negativa or neti neti. Mudgal concludes therefore that "the difference between Śūnyavāda philosophy of Buddhism and Advaita philosophy of Hinduism may be a matter of emphasis, not of kind".[371] Similarly, there are many points of contact between the Buddhist Yogācāra school and Śaṅkara's Advaita tradition.[372] According to S. N. Dasgupta, Śaṅkara and his followers borrowed much of their dialectic form of criticism from the Buddhists. His Brahman was very much like the śūnya of Nāgārjuna [...] The debts of Śaṅkara to the self-luminosity[note 5] of the Vijñānavāda Buddhism can hardly be overestimated. There seems to be much truth in the accusations against Śaṅkara by Vijñāna Bhikṣu and others that he was a hidden Buddhist himself. I am led to think that Śaṅkara's philosophy is largely a compound of Vijñānavāda and Śūnyavāda Buddhism with the Upanishadic notion of the permanence of self superadded.[373]

Differences from Buddhism

The Advaita Vedānta tradition has historically rejected accusations of crypto-Buddhism highlighting their respective views on Ātman, Anattā, and Brahman.[374] Yet, some early Buddhist texts (1st millennium CE), such as the Mahāyāna Buddhist scriptures Tathāgatagarbha Sūtras suggest "self-like" concepts, variously called Tathāgatagarbha or "Buddha nature".[375][376] In modern era studies, scholars such as Wayman state that these "self-like" concepts are neither self nor sentient being, nor individual soul, nor personality.[377][378] Some scholars posit that the Tathāgatagarbha Sūtras were written to promote Buddhism to non-Buddhists.[379][380][381]

The epistemological foundations of Buddhism and Advaita Vedānta are different. Buddhism accepts two valid means to reliable and correct knowledge—perception and inference, while Advaita Vedānta accepts six (described elsewhere in this article).[124][382][383] However, some Buddhists in history, have argued that Buddhist scriptures are a reliable source of spiritual knowledge, corresponding to Advaita's Śabda pramana, however Buddhists have treated their scriptures as a form of inference method.[384]

Advaita Vedānta posits a substance ontology, an ontology which holds that underlying the change and impermanence of empirical reality is an unchanging and permanent absolute reality, like an eternal substance it calls Ātman/Brahman.[385] In its substance ontology, as like other philosophies, there exist a universal, particulars, and specific properties, and it is the interaction of particulars that create events and processes.[386] In contrast, Buddhism posits a process ontology, also called as "event ontology".[387][386] According to Buddhist philosophy, particularly after the rise of ancient Mahāyāna Buddhist scholarship, the concept of impermanence (anicca) is understood as one of the three marks of existence (trilakṣaṇa):[388] there is neither empirical nor absolute permanent reality, because all phenomena are characterized by their lack of a solid and independent existence (svabhāva), and ontology can be explained as a process.[387][389][note 68]

In Buddhist ontology, there is a system of dependent origination and interdependent phenomena (pratītya-samutpāda) but no stable persistent identities, neither eternal universals nor particulars.[388] In Buddhism, thoughts and memories are mental constructions and fluid processes (skandhā) without a real observer, personal agent, or cognizer (anattā).[388] By contrast, in Advaita Vedānta and the other orthodox schools of Hinduism, the eternal, unchanging ultimate self (ātman) identical with Brahman is understood as the real observer, personal agent, and cognizer.[391] However, the historical Buddha considered this Brahmanical belief to be one of the six wrong views about the self; in fact, Buddha held that attachment to the appearance of a permanent self in this world of change is the cause of suffering (duḥkha), and the main obstacle to the attainment of spiritual liberation (mokṣa).[388]

Criticisms of concurring Hindu schools

Some Hindu scholars have criticized Advaita Vedānta for its notion of māyā and non-theistic doctrinal similarities with Buddhism,[392][363] sometimes referring to the Advaita tradition as Māyāvāda.[393]

Bhāskara, a Hindu philosopher of the Bhedabheda Vedānta school (9th century CE), accused Śaṅkara's Advaita tradition as "this despicable broken down Māyāvāda that has been chanted by the Mahāyāna Buddhists", characterizing it as a school that is undermining the ritual duties set in Vedic orthodoxy.[363]

Rāmāṉuja, a Hindu saint and founder of the Vishishtadvaita Vedānta school (12th century CE), similarly accused Ādi Śaṅkara of being a Prachanna Bauddha, that is, a "crypto-Buddhist",[394] and someone who was undermining the theistic Bhakti-oriented devotionalism.[363]

Relationship with other traditions

The Advaita Vedānta ideas, particularly of 8th century Adi Shankara, were challenged by theistic Vedānta philosophies that emerged centuries later, such as the 11th-century Vishishtadvaita (qualified nondualism) of Ramanuja, and the 14th-century Dvaita (theistic dualism) of Madhvacharya.[395] Their application of Vedanta philosophy to ground their faith turned Vedanta into a major factor in India's religious landscape.[396]

Vishishtadvaita

Main article: Vishishtadvaita

Ramanuja's Vishishtadvaita school and Shankara's Advaita school are both nondualism Vedānta schools,[397][398] both are premised on the assumption that all Selfs can hope for and achieve the state of blissful liberation; in contrast, Madhvacharya and his Dvaita subschool of Vedānta believed that some Selfs are eternally doomed and damned.[399][400] Shankara's theory posits that only Brahman and causes are metaphysical unchanging reality, while the empirical world (Maya) and observed effects are changing, illusive and of relative existence.[401][402] Spiritual liberation to Shankara is the full comprehension and realization of oneness of one's unchanging Atman (Self) as the same as Atman in everyone else as well as being identical to the nirguna Brahman.[398][403][404] In contrast, Ramanuja's theory posits both Brahman and the world of matter are two different absolutes, both metaphysically real, neither should be called false or illusive, and saguna Brahman with attributes is also real.[402] God, like man, states Ramanuja, has both soul and body, and all of the world of matter is the glory of God's body.[397] The path to Brahman (Vishnu), asserted Ramanuja, is devotion to godliness and constant remembrance of the beauty and love of personal god (saguna Brahman, Vishnu), one which ultimately leads one to the oneness with nirguna Brahman.[397]

[401][402]

Shuddhadvaita

Main article: Shuddhadvaita

Vallabhacharya (1479–1531 CE), the proponent of the philosophy of Shuddhadvaita Brahmvad enunciates that Ishvara has created the world without connection with any external agency such as Maya (which itself is his power) and manifests Himself through the world.[405] That is why shuddhadvaita is known as 'Unmodified transformation' or 'Avikṛta Pariṇāmavāda'. Brahman or Ishvara desired to become many, and he became the multitude of individual Selfs and the world. Vallabha recognises Brahman as the whole and the individual as a 'part' (but devoid of bliss).[406]

Dvaita

Main article: Dvaita

Madhvacharya was also a critic of Advaita Vedānta. Advaita's nondualism asserted that Atman (Self) and Brahman are identical (both in bondage and liberation[407]), there is interconnected oneness of all Selfs and Brahman, and there are no pluralities.[408][409] Madhva in contrast asserted that Atman (Self) and Brahman are different (both in bondage and liberation[407]), only Vishnu is the Lord (Brahman), individual Selfs are also different and depend on Vishnu, and there are pluralities.[408][409] Madhvacharya stated that both Advaita Vedānta and Mahayana Buddhism were a nihilistic school of thought.[410] Madhvacharya wrote four major texts, including Upadhikhandana and Tattvadyota, primarily dedicated to criticizing Advaita.[410]

Followers of ISKCON are highly critical of Advaita Vedānta, regarding it as māyāvāda, identical to Mahayana Buddhism.[web 25][web 26]

Influence on other traditions

Within the ancient and medieval texts of Hindu traditions, such as Vaishnavism, Shaivism and Shaktism, the ideas of Advaita Vedānta have had a major influence.[note 69] Advaita Vedānta influenced Krishna Vaishnavism in the different parts of India.[411] One of its most popular text, the Bhagavata Purana, adopts and integrates in Advaita Vedānta philosophy.[412][413][414] The Bhagavata Purana is generally accepted by scholars to have been composed in the second half of 1st millennium CE.[415][416]

In the ancient and medieval literature of Shaivism, called the Āgamas, the influence of Advaita Vedānta is once again prominent.[417][418][419] Of the 92 Āgamas, ten are Dvaita texts, eighteen are Bhedabheda, and sixty-four are Advaita texts.[420][421] According to Natalia Isaeva, there is an evident and natural link between 6th-century Gaudapada's Advaita Vedānta ideas and Kashmir Shaivism.[422]

Shaktism, the Hindu tradition where a goddess is considered identical to Brahman, has similarly flowered from a syncretism of the monist premises of Advaita Vedānta and dualism premises of Samkhya–Yoga school of Hindu philosophy, sometimes referred to as Shaktadavaitavada (literally, the path of nondualistic Shakti).[423][424][425]

Other influential ancient and medieval classical texts of Hinduism such as the Yoga Yajnavalkya, Yoga Vashishta, Avadhuta Gitā, Markandeya Purana and Sannyasa Upanishads predominantly incorporate premises and ideas of Advaita Vedānta.[426][427][428]

History of Advaita Vedānta

Gaudapada, one of the most important pre-Śaṅkara philosophers in Advaita tradition
Main article: History of Advaita Vedanta

Historiography

The historiography of Advaita Vedanta is coloured by Orientalist notions,[429][note 71] while modern formulations of Advaita Vedānta, which developed as a reaction to western Orientalism and Perennialism[431] have "become a dominant force in Indian intellectual thought."[432] According to Michael S. Allen and Anand Venkatkrishnan, "scholars have yet to provide even a rudimentary, let alone comprehensive account of the history of Advaita Vedānta in the centuries leading up to the colonial period."[433]

Early Vedānta

The Upanishads form the basic texts, of which Vedānta gives an interpretation.[434] The Upanishads do not contain "a rigorous philosophical inquiry identifying the doctrines and formulating the supporting arguments".[435][note 72] This philosophical inquiry was performed by the darsanas, the various philosophical schools.[437][note 73]

The Brahma Sutras of Bādarāyana, also called the Vedānta Sutra,[439] were compiled in its present form around 400–450 CE,[440] but "the great part of the Sutra must have been in existence much earlier than that".[440] Estimates of the date of Bādarāyana's lifetime differ between 200 BCE and 200 CE.[441] The Brahma Sutra is a critical study of the teachings of the Upanishads, possibly "written from a Bhedābheda Vedāntic viewpoint."[web 18] Bādarāyana was not the first person to systematise the teachings of the Upanishads.[442] He refers to seven Vedantic teachers before him.[442]

Early Advaita Vedānta

Two Advaita writings predating Maṇḍana Miśra and Shankara were known to scholars such as Nakamura in the first half of 20th-century, namely the Vākyapadīya, written by Bhartṛhari (second half 5th century[27]), and the Māndūkya-kārikā written by Gauḍapāda (7th century).[28] Later scholarship added the Sannyasa Upanishads (first centuries CE[443]) to the earliest known corpus, some of which are of a sectarian nature,[444] and have a strong Advaita Vedānta outlook.[445][446][447]

According to Nakamura, "there must have been an enormous number of other writings turned out in this period [between the Brahma Sutras and Shankara], but unfortunately all of them have been scattered or lost and have not come down to us today".[28] In his commentaries, Shankara mentions 99 different predecessors of his Sampradaya.[112] In the beginning of his commentary on the Brhadaranyaka Upanishad Shankara salutes the teachers of the Brahmavidya Sampradaya.[web 27] Pre-Shankara doctrines and sayings can be traced in the works of the later schools, which does give insight into the development of early Vedānta philosophy.[28]

Gauḍapāda and Māṇḍukya Kārikā

Main article: Gaudapada

According to tradition, Gauḍapāda (6th century)[448] was the teacher of Govinda Bhagavatpada and the grandteacher of Shankara. Gauḍapāda wrote or compiled[449] the Māṇḍukya Kārikā, also known as the Gauḍapāda Kārikā or the Āgama Śāstra.[450] The Māṇḍukya Kārikā is a commentary in verse form on the Māṇḍūkya Upanishad, one of the shortest Upanishads consisting of just 13 prose sentences. Of the ancient literature related to Advaita Vedānta, the oldest surviving complete text is the Māṇḍukya Kārikā.[451] The Māṇḍūkya Upanishad was considered to be a Śruti before the era of Adi Shankara, but not treated as particularly important.[450] In later post-Shankara period its value became far more important, and regarded as expressing the essence of the Upanishad philosophy. The entire Karika became a key text for the Advaita school in this later era.[452][note 74]

Gaudapada took over the Yogachara teaching of vijñapti-mātra, "representation-only," which states that the empirical reality that we experience is a fabrication of the mind, experienced by consciousness-an-sich,[144][note 75] and the four-cornered negation, which negates any positive predicates of 'the Absolute'.[144][145][note 76] Gaudapada "wove [both doctrines] into the philosophy of Mandukaya Upanisad, which was further developed by Shankara".[455][note 77] In this view,

> the ultimate ontological reality is the pure consciousness, which is bereft of attributes and intentionality. The world of duality is nothing but a vibration of the mind (manodṛśya or manaspandita). The pluralistic world is imagined by the mind (saṁkalpa) and this false projection is sponsored by the illusory factor called māyā.[web 28]

Gauḍapāda uses the concepts of Ajātivāda to explain that 'the Absolute' is not subject to birth, change and death. The Absolute is aja, the unborn eternal.[457] The empirical world of appearances is considered unreal, and not absolutely existent.[457]

Early medieval period - Maṇḍana Miśra and Adi Shankara

Maṇḍana Miśra

Maṇḍana Miśra, an older contemporary of Shankara,[458] was a Mimamsa scholar and a follower of Kumarila, but also wrote a seminal text on Advaita that has survived into the modern era, the Brahma-siddhi.[459][460] According to Fiordalis, he was influenced by the Yoga-tradition, and with that indirectly by Buddhism, given the strong influence of Buddhism on the Yoga-tradition.[43] For a couple of centuries he seems to have been regarded as "the most important representative of the Advaita position,"[35][184][note 78] and the "theory of error" set forth in the Brahma-siddhi became the normative Advaita Vedanta theory of error.[461]

Adi Shankara

Main article: Adi Shankara

See also: Late-Classical Age and Hinduism in the Middle Ages

Very little is known about Shankara. According to Dalal, "Hagiographical accounts of his life, the Śaṅkaravijayas ("Conquests of Śaṅkara"), were composed several centuries after his death,"[web 6] in the 14th to 17th century, and established Shankara as a rallying symbol of values in a time when most of India was conquered by Muslims.[34] He is often considered to be the founder of the Advaita Vedānta school, but was actually a systematizer, not a founder.[web 6][462]

Systematizer of Advaita thought

Shankara was a scholar who synthesized and systematized Advaita-vāda thought which already existed at his lifetime.[462] According to Nakamura, comparison of the known teachings of the early Vedantins and Shankara's thought shows that most of the characteristics of Shankara's thought "were advocated by someone before Śankara".[462] According to Nakamura, after the growing influence of Buddhism on Vedānta, culminating in the works of Gauḍapāda, Adi Shankara gave a Vedantic character to the Buddhistic elements in these works,[463] synthesising and rejuvenating the doctrine of Advaita.[464] According to Koller, using ideas in ancient Indian texts, Shankara systematized the foundation for Advaita Vedānta in the 8th century, reforming Badarayana's Vedānta tradition.[465] According to Mayeda, Shankara represents a turning point in the development of Vedānta,[463] yet he also notices that it is only since Deussens's praise that Shankara "has usually been regarded as the greatest philosopher of India."[466] Mayeda further notes that Shankara was primarily concerned with moksha, "and not with the establishment of a complete system of philosophy or theology,"[466] following Potter, who qualifies Shankara as a "speculative philosopher."[467] Lipner notes that Shankara's "main literary approach was commentarial and hence perforce disjointed rather than procedurally systematic [...] though a systematic philosophy can be derived from Samkara's thought."[468]

Writings

Main article: Adi Shankara bibliography

Adi Shankara is best known for his reviews and commentaries (Bhasyas) on ancient Indian texts. His Brahmasutrabhasya (literally, commentary on Brahma Sutra) is a fundamental text of the Vedānta school of Hinduism.[339] His commentaries on ten Mukhya (principal) Upanishads are also considered authentic by scholars.[339][469] Other authentic works of Shankara include commentaries on the Bhagavad Gitā (part of his Prasthana Trayi Bhasya).[139] He also authored Upadesasahasri, his most important original philosophical work.[465][470] The authenticity of Shankara being the author of Vivekacūḍāmaṇi[471] has been questioned, and "modern scholars tend to reject its authenticity as a work by Shankara."[472]

Influence of Shankara

While Shankara has an unparalleled status in the history of Advaita Vedanta, scholars have questioned the traditional narrative of Shankara's early influence in India.[34][35]

[184] Until the 10th century Shankara was overshadowed by his older contemporary Maṇḍana Miśra, who was considered to be the major representative of Advaita.[35][184] Only when Vacaspati Misra, an influential student of Maṇḍana Miśra, harmonised the teachings of Shankara with those of Maṇḍana Miśra, Shankara's teachings gained prominence.[473] Some modern Advaitins argue that most of post-Shankara Advaita Vedanta actually deviates from Shankara, and that only his student Suresvara, who's had little influence, represents Shankara correctly.[474] In this view, Shankara's influential student Padmapada misunderstood Shankara, while his views were maintained by the Suresvara school.[474] According to Satchidanandendra Sarasvati, "almost all the later Advaitins were influenced by Mandana Misra and Bhaskara."[475][note 9] Until the 11th century, Vedanta itself was a peripheral school of thought;[476] Vedanta became a major influence when Vedanta philosophy was utilized by various sects of Hinduism to ground their doctrines,[396] such as Ramanuja (11th c.), who aligned bhakti, "the major force in the religions of Hinduism," with philosophical thought, meanwhile rejecting Shankara's views.[web 29]

The cultural influence of Shankara and Advaita Vedanta started only centuries later, in the Vijayanagara Empire in the 14th century,[34][477][478] when Sringeri matha started to receive patronage from the kings of the Vijayanagara Empire and became a powerful institution.[479] Vidyaranya, also known as Madhava, who was the Jagadguru of the Śringeri Śarada Pītham from ca. 1374–1380 to 1386[479] played a central role in this growing influence of Advaita Vedanta, and the deification of Shankara as a ruler-renunciate.[34][477][480][481] From 1346 onwards Sringeri matha received patronage from the Vijayanagara kings, and its importance and influence grew rapidly in the second half of the 14th century.[479][note 79] Vidyaranya and the Sringeri matha competed for royal patronage and converts with Srivaisnava Visistadvaita, which was dominant in territories conquered by the Vijayanagara Empire,[483] and Madhava (the pre-ordination name of Vidyaranya) presented Shankara's teachings as the summit of all darsanas, portraying the other darsanas as partial truths which converged in Shankara's teachings.[346] The subsequent Shankara Digvijayam genre, following the example of the earlier Madhva Digvijayam,[484] presented Shankara as a ruler-renunciate, conquering the four quarters of India and bringing harmony.[480][481] The genre created legends to turn Shankara into a "divine folk-hero who spread his teaching through his digvijaya ("universal conquest") all over India like a victorious conqueror."[346][482]

Shankara's position was further established in the 19th and 20th century, when neo-Vedantins and western Orientalists, following Vidyaranya, elevated Advaita Vedanta "as the connecting theological thread that united Hinduism into a single religious tradition."[485] Shankara became "an iconic representation of Hindu religion and culture," despite the fact that most Hindus do not adhere to Advaita Vedanta.[486]

Advaita Vedanta sub-schools

Two defunct schools are the Pancapadika and Istasiddhi, which were replaced by Prakasatman's Vivarana school.[187] The still existing Bhāmatī and Vivarana developed in the 11th-14th century.[web 30][112] These schools worked out the logical implications of various Advaita doctrines. Two of the problems they encountered were the further interpretations of the concepts of māyā and avidya.[web 30]

Padmapada (c. 800 CE),[487] the founder of the defunct Pancapadika school, was a direct disciple of Shankara. He wrote the Pancapadika, a commentary on the Sankara-bhaya.[487] Padmapada diverged from Shankara in his description of avidya, designating prakrti as avidya or ajnana.[488]

Sureśvara (fl. 800–900 CE)[489] was a contemporary of Shankara,[458] and often (incorrectly) identified with Maṇḍana Miśra.[458][note 80] Sureśvara has also been credited as the founder of a pre-Shankara branch of Advaita Vedānta.[489]

Mandana Mishra's student Vachaspati Miśra (9th/10th century CE),[490][491][492] who is believed to have been an incarnation of Shankara to popularize the Advaita view,[493] wrote the Bhamati, a commentary on Shankara's Brahma Sutra Bhashya, and the Brahmatattva-samiksa, a commentary on Mandana Mishra's Brahma-siddhi. His thought was mainly inspired by Mandana Miśra, and harmonises Shankara's thought with that of Mandana Miśra.[494][web 30] The Bhamati school takes an ontological approach. It sees the Jiva as the source of avidya.[web 30] It sees contemplation as the main factor in the acquirement of liberation, while the study of the Vedas and reflection are additional factors.[495][496]

Vimuktatman (c. 1200 CE)[497] wrote the Ista-siddhi.[497] It is one of the four traditional siddhi, together with Mandana's Brahma-siddhi, Suresvara's Naiskarmya-siddhi, and Madusudana's Advaita-siddhi.[498] According to Vimuktatman, absolute Reality is "pure intuitive consciousness".[499] His school of thought was eventually replaced by Prakasatman's Vivarana school.[187]

Prakasatman (c. 1200–1300)[187] wrote the Pancapadika-Vivarana, a commentary on the Pancapadika by Padmapadacharya.[187] The Vivarana lends its name to the subsequent school. According to Roodurmun, "[H]is line of thought [...] became the leitmotif of all subsequent developments in the evolution of the Advaita tradition."[187] The Vivarana school takes an epistemological approach. It is distinguished from the Bhamati school by its rejection of action and favouring Vedic study and "a direct apprehension of Brahma."[495] Prakasatman was the first to propound the theory of mulavidya or maya as being of "positive beginningless nature",[500] and sees Brahman as the source of avidya. Critics object that Brahman is pure consciousness, so it cannot be the source of avidya. Another problem is that contradictory qualities, namely knowledge and ignorance, are attributed to Brahman.[web 30]

Another late figure which is widely associated with Advaita and was influential on late Advaita thought was Śrīharṣa.

Late medieval India - yogic Advaita

Michael S. Allen and Anand Venkatkrishnan note that Shankara is very well-studied, but "scholars have yet to provide even a rudimentary, let alone comprehensive account of the history of Advaita Vedānta in the centuries leading up to the colonial period."[433]

While indologists like Paul Hacker and Wilhelm Halbfass took Shankara's system as the measure for an "orthodox" Advaita Vedānta, the living Advaita Vedānta tradition in medieval times was influenced by, and incorporated elements from, the yogic tradition and texts like the Yoga Vasistha and the Bhagavata Purana.[44] Yoga and samkhya had become minor schools of thought since the time of Shankara, and no longer posed a thread for the sectarian identity of Advaita, in contrast to the Vaishnava traditions.[478]

The Yoga Vasistha became an authoritative source text in the Advaita vedānta tradition in the 14th century, and the "yogic Advaita"[501][502] of Vidyāraṇya's Jivanmuktiviveka (14th century) was influenced by the (Laghu-)Yoga-Vasistha, which in turn was influenced by Kashmir Shaivism.[503] Vivekananda's 19th century emphasis on nirvikalpa samadhi was preceded by medieval yogic influences on Advaita Vedānta. In the 16th and 17th centuries, some Nath and hatha yoga texts also came within the scope of the developing Advaita Vedānta tradition.[65]

According to Andrew Nicholson, it was with the arrival of Islamic rule, first in the form of Delhi Sultanate and later the Mughal Empire, and the subsequent persecution of Indian religions, that Hindu scholars began a self-conscious attempts to define an identity and unity.[504][505] Between the twelfth and the fourteenth century, this effort emerged with the "astika and nastika" schema of classifying Indian philosophy.[504]

Vidyāraṇya

It is only during this period that the historical fame and cultural influence of Shankara and Advaita Vedanta was established.[34][477][478] Advaita Vedanta's position as most influential Hindu darsana took shape as Advaitins in the Vijayanagara Empire competed for patronage from the royal court, and tried to convert others to their sect.[483] Sringeri matha started to receive patronage from the kings of the Vijayanagara Empire[184][34][479][477] who shifted their allegiance from Advaitic Agamic Shaivism to Brahmanical Advaita orthodoxy.[506]

Central in this repositioning was Vidyāraṇya,[34][477] also known as Madhava, who was the Jagadguru of the Śringeri Śarada Pītham from 1380 to 1386[507] and a minister in the Vijayanagara Empire.[508] He inspired the re-creation of the Hindu Vijayanagara Empire of South India, in response to the devastation caused by the Islamic Delhi Sultanate,[34][477][478][508] but his efforts were also targeted at Srivaisnava groups, especially Visistadvaita, which was dominant in territories conquered by the Vijayanagara Empire.[509] Sects competed for patronage from the royal court, and tried to convert others to their own sectarian system, and Vidyaranya efforts were aimed at promoting Advaita Vedanta.[483] Most of Shankara's biographies were created and published from the 14th to the 17th century, such as the widely cited Śankara-vijaya, in which legends were created to turn Shankara into a "divine folk-hero who spread his teaching through his digvijaya ("universal conquest") all over India like a victorious conqueror."[346][482][510]

Vidyaranya and his brothers wrote extensive Advaitic commentaries on the Vedas and Dharma to make "the authoritative literature of the Aryan religion" more accessible.[346] In his doxography Sarvadarśanasaṅgraha ("Summary of all views") Vidyaranya presented Shankara's teachings as the summit of all darsanas, presenting the other darsanas as partial truths which converged in Shankara's teachings, which was regarded to be the most inclusive system.[511][346] The Vaishanava traditions of Dvaita and Visitadvaita were not classified as Vedanta, and placed just above Buddhism and Jainism, reflecting the threat they posed for Vidyaranya's Advaita allegiance.[47] Bhedabheda wasn't mentioned at all, "literally written out of the history of Indian philosophy."[512] Vidyaranya became head of Sringeri matha, proclaiming that it was established by Shankara himself.[346][482] Vidyaranya enjoyed royal support,[508] and his sponsorship and methodical efforts helped establish Shankara as a rallying symbol of values, spread historical and cultural influence of Shankara's Vedānta philosophies, and establish monasteries (mathas) to expand the cultural influence of Shankara and Advaita Vedānta.[34]

Modern Advaita

Niścaldās and "Greater" Advaita

Michael S. Allen has written on the influence and popularity of Advaita Vedanta in early modern north India, especially on the work of the Advaita Dādū-panthī monk Niścaldās (ca. 1791–1863), author of The Ocean of Inquiry (Hindi: Vichāra-sāgara), a vernacular compendium of Advaita.[25] According to Allen, the work of Niścaldās "was quite popular in the late nineteenth and early twentieth centuries: it was translated into over eight languages and was once referred to by Vivekananda as having 'more influence in India than any [book] that has been written in any language within the last three centuries.'"[25]

Allen highlights the widespread prominence in early modern India of what he calls "Greater Advaita Vedānta" which refers to popular Advaita works, including "narratives and dramas, “eclectic” works blending Vedānta with other traditions, and vernacular works such as The Ocean of Inquiry."[25] Allen refers to several popular late figures and texts which draw on Advaita Vedanta, such as the Maharashtrian sant Eknāth (16th c.), the popular Adhyātma-rāmāyaṇa (ca. late 15th c.), which synthesizes Rama bhakti and advaita metaphysics and the Tripurā-rahasya (a tantric text that adopts an advaita metaphysics).[25] Other important vernacular Advaita figures include the Hindu authors Manohardās and Māṇakdās (who wrote the Ātma-bodh). Advaita literature was also written in Tamil, Telugu, Malayalam, Kannada, Marathi, Gujarati, Hindi, Punjabi, Bengali, and Oriya.[25]

Neo-Vedanta

Mahatma Gandhi stated "I am an advaitist".[513][514]

Main articles: Neo-Vedanta and Hindu nationalism
According to King, with the consolidation of the British imperialist rule the new rulers started to view Indians through the "colonially crafted lenses" of Orientalism. In response Hindu nationalism emerged, striving for socio-political independence and countering the influence of Christian missionaries.[515] Among the colonial era intelligentsia the monistic Advaita Vedānta has been a major ideological force for Hindu nationalism,[516] with Hindu intellectuals formulating a "humanistic, inclusivist" response, now called Neo-Vedānta, attempting to respond to this colonial stereotyping of "Indian culture [as] backward, superstitious and inferior to the West."[517]

Due to the influence of Vidyaranya's Sarvadarśanasaṅgraha, early Indologists regarded Advaita Vedanta as the most accurate interpretation of the Upanishads.[47] Vedānta came to be regarded, both by westerners as by Indian nationalists, as the essence of Hinduism, and Advaita Vedānta came to be regarded as "then paradigmatic example of the mystical nature of the Hindu religion" and umbrella of "inclusivism".[518] Colonial era Indian thinkers, such as Vivekananda, presented Advaita Vedānta as an inclusive universal religion, a spirituality that in part helped organize a religiously infused identity. It also aided the rise of Hindu nationalism as a counter weight to Islam-infused Muslim communitarian organizations such as the Muslim League, to Christianity-infused colonial orientalism and to religious persecution of those belonging to Indian religions.[519][505][520] Neo-Vedānta subsumed and incorporated Buddhist ideas thereby making the Buddha a part of the Vedānta tradition, all in an attempt to reposition the history of Indian culture.[431] This view on Advaita Vedānta, according to King, "provided an opportunity for the construction of a nationalist ideology that could unite Hindus in their struggle against colonial oppression".[521]

Vivekananda discerned a universal religion, regarding all the apparent differences between various traditions as various manifestations of one truth.[522] Vivekananda emphasised nirvikalpa samadhi as the spiritual goal of Vedānta, he equated it to the liberation in Yoga and encouraged Yoga practice which he called Raja yoga.[523][note 81] With the efforts of Vivekananda, modern formulations of Advaita Vedānta have "become a dominant force in Indian intellectual thought", though Hindu beliefs and practices are diverse.[432]

Sarvepalli Radhakrishnan, first a professor at Oxford University and later a President of India, further popularized Advaita Vedānta, presenting it as the essence of Hinduism.[web 31] According to Michael Hawley, Radhakrishnan saw other religions, as well as "what Radhakrishnan understands as lower forms of Hinduism," as interpretations of Advaita Vedānta, thereby "in a sense Hindusizing all religions".[web 31] Radhakrishnan metaphysics was grounded in Advaita Vedānta, but he reinterpreted Advaita Vedānta for contemporary needs and context.[web 31][note 82]

Mahatma Gandhi declared his allegiance to Advaita Vedānta, and was another popularizing force for its ideas.[526]

Contemporary Advaita Vedānta

Contemporary teachers are the orthodox Jagadguru of Sringeri Sharada Peetham; the more traditional teachers Sivananda Saraswati (1887–1963), Chinmayananda Saraswati (1916-1993),[web 32] Dayananda Saraswati (Arsha Vidya) (1930-2015), Swami Paramarthananda, Swami Tattvavidananda Sarasvati, Carol Whitfield (Radha), Sri Vasudevacharya (previously Michael Comans)[web 32] and less traditional teachers such as Narayana Guru.[web 32] According to Sangeetha Menon, prominent names in 20th century Advaita tradition are Shri Chandrashekhara Bharati Mahaswami, Chandrasekharendra Saraswati Swamigal, Sacchidānandendra Saraswati.[web 33]

Influence on new religious movements

Advaita Vedānta has gained attention in western spirituality and New Age as nondualism, where various traditions are seen as driven by the same non-dual experience.[8] Nonduality points to "a primordial, natural awareness without subject or object".[web 34] It is also used to refer to interconnectedness, "the sense that all things are interconnected and not separate, while at the same time all things retain their individuality".[web 35]

Neo-Advaita is a new religious movement based on a popularised, western interpretation of Advaita Vedānta and the teachings of Ramana Maharshi.[527] Notable neo-advaita teachers are H. W. L. Poonja,[528][527] his students Gangaji[529] Andrew Cohen[note 83], and Eckhart Tolle.[527]

Notes

Highest self:

Shankara, Upadesasahasri I.18.3: "I am ever-free, the existent" (Sat). I.18.6: "The two [contradictory] notions "I am the Existent-Brahman" and "I act," have Atman as their witness. It is considered more reasonable to give up only [that one] of the two [notions] which arises from ignorance. I.18.7: "The notion, "I am the Existent," arises from right means of knowledge [while] the other notion has its origin in fallacious means of knowledge." (Mayeda 1992, p. 172)

Brahmajnanavalimala Verse 20: "Brahman is real, the universe is mithya (it cannot be categorized as either real or unreal). The jiva is Brahman itself and not different." Translation by S. N. Sastri [1]

Sivananda 1993, p. 219: "Brahman (the Absolute) is alone real; this world is unreal; and the Jiva or individual soul is non-different from Brahman."

Menon 2012: "The experiencing self (jīva) and the transcendental self of the Universe

(ātman) are in reality identical (both are Brahman), though the individual self seems different as space within a container seems different from space as such. These cardinal doctrines are represented in the anonymous verse "brahma satyam jagan mithya; jīvo brahmaiva na aparah" (Brahman is alone True, and this world of plurality is an error; the individual self is not different from Brahman)."
Deutsch 1973, p. 54: "[the] essential status [of the individual human person] is that of unqualified reality, of identity with the Absolute [...] the self (jiva) is only misperceived: the self is really Brahman."
Koller 2013, pp. 100–101: "Atman, which is identical to Brahman, is ultimately the only reality and [...] the appearance of plurality is entirely the work of ignorance [...] the self is ultimately of the nature of Atman/Brahman [...] Brahman alone is ultimately real."
Bowker 2000a, "Advaita Vedanta": "There is only Brahman, which is necessarily undifferentiated. It follows that there cannot even be a difference, or duality, between the human subject, or self, and Brahman, for Brahman must be that very self (since Brahman is the reality underlying all appearance). The goal of human life and wisdom must, therefore, be the realization that the self (ātman) is Brahman."
Hacker (1995, p. 88) notes that Shankara uses two groups of words to denote 'atman': "One group - principally jiva, vijnanatman, and sarira - expresses the illusory aspect of the soul [...] But in addition there are the two expressions atman and pratyagatman. These also designate the individual soul, but in its real aspect." Mayeda (1992, pp. 11, 14) uses the word pratyagatman; Sivananda1993, p. 219), Deutsch (1973, p. 54), and Menon (2012) use the term jiva when referring to the identity of atman and Brahman.
Form of monism:
Malkovsky 2000, p. 71: "The interpretation of advaita that is the most common equates non-duality with monism and acosmic illusionism. Only the Absolute, or the paraa brahma, is said to exist; everything else is but an illusory appearance."
Menon 2012: "The essential philosophy of Advaita is an idealist monism, and is considered to be presented first in the Upaniṣads and consolidated in the Brahma Sūtra by this tradition."
King 1995, p. 65: "The prevailing monism of the Upanishads was developed by the Advaita Vedanta to its ultimate extreme."
Mohanty 1980, p. 205: "Nyaya-Vaiseshika is realistic; Advaita Vedanta is idealistic. The former is pluralistic, the latter monistic."
Philosophy and spiritual experience:
Deutsch 1988, p. 4: "Advaita Vedanta is more than a philosophical system, as we understand these terms in the West today; it is also a practical guide to spiritual experience and is intimately bound up with spiritual experience."
Puligandla 1997, p. 11: "Any philosophy worthy of its title should not be a mere intellectual exercise but should have practical application in enabling man to live an enlightened life. A philosophy which makes no difference to the quality and style of our life is no philosophy, but an empty intellectual construction."
According to Shankara, in Adhyasa-bhasya (pre-amble to Brahma Sutra Bhashya I.1.1), it is self-evident that Ātman, pure awareness or the witness-consciousness, is completely different from non-Atman, the thinking and acting self and the material world.
Self-luminosity; see Deutsch 1973, p. 48; Dasgupta 1975, pp. 148–149; Indich 2000,

pp. 24, 28; Menon 2012; Ganeri 2019, p. 103; Murti 1983, p. 339; Isaeva 1993, p. 102.
For the translation and meaning of svayam prakāśa:
svayam: "himself, autonomous, in person" (Sanskrit Dictionary for Spoken Sanskrit, svayam Archived 7 December 2021 at the Wayback Machine)
prakāśa: "manifestation," literally "light" or "illumination"; "the capacity to disclose, present, or make manifest" (Fasching 2021 note 1, referring to "MacKenzie 2017, 335; cf. also Ram-Prasad 2007, 53")
Svayam prakāśa can be translated as:
"self-luminous" (Ganeri 2019; Menon 2012)
"self-revealing" (Dasgupta 1975))
"self-manifesting" (Chatterjea 2003, p. 1)
"Self-aware" (Wood 1992, p. 102)
"Immediate" (Murti 1983, p. 339)
On the meaning of svayam prakāśa:
Menezes 2017, p. 198: "Self-luminosity (svayam prakāśa) means self is pure awareness by nature"; idem Ganeri 2019: "self is pure awareness by nature."
Murti 1983, p. 339: "a foundational consciousness [...] to which everything is presented, but is itself no presentation, that which knows all, but is itself no object."
For a detailed treatment, see Mackenzie 2012; Fasching 2011.
For pure Consciousness, also included in the phrase sat-cit-ananda, see Mayeda 1992, p. 103 (verse 1), p.105 (note 1); p.126, verse 7; Deutsch 1973, pp. 48–51; Davis 2010, pp. 34–35; Rambachan 2006, pp. 7, 99–103; Menon 2012; Fasching 2021; Sinha 2016, p. 42.
Shankara, Upadeśasāhasrī I.1.1, translated in Mayeda 1992, p. 103: "Salutation to the all-knowing Pure Consciousness [note 1] which pervades all, is all, abides in the hearts of all beings, and is beyond all objects [of knowledge]. [Note 1 by Mayeda: "The Sanskrit term caitanya translated here as "Pure Consciousness" is used as a synonym for Brahman-Atman, indicating the nature of It."]
Shankara, Upadeśasāhasrī I.11.7, translated in Mayeda 1992, p. 126: "Being different from name, form, and action and by nature constantly free, I am Atman, ie. the highest Brahman; I am Pure Consciousness only and always non-dual."
Deutsch 1973, p. 48: "Atman (or paramatman, the highest Self), for Advaita vedanta, is that pure, undifferentiated, self-shining consciousness, timeless, spaceless, and unthinkable, that is non-different from Brahman and that underlies and supports the individual human person."
Menon 2012: "For classical Advaita Vedānta, Brahman is the fundamental reality underlying all objects and experiences. Brahman is explained as pure existence, pure consciousness and pure bliss. All forms of existence presuppose a knowing self. Brahman or pure consciousness underlies the knowing self. Consciousness according to the Advaita School, unlike the positions held by other Vedānta schools, is not a property of Brahman but its very nature. Brahman is also one without a second, all-pervading and the immediate awareness."
Fasching 2021: "According to Advaita Vedānta, the absolute is pure, qualityless and unchanging consciousness. Our consciousness (the consciousness of individual conscious entities) is not distinct from it, but is nothing other than this absolute itself,

(seemingly) modified by the mental states of respective individual minds."
Sinha 2016, p. 42: "According to the Advaita Vedānta, the Atman is pure, eternal, undifferenced consciousness, while the jīva is the pure consciousness limited or determined by the internal organ (antahkarana)."

Potter (2008, p. 136); see Brihadaranyaka Upanishad 2.51-14; Chandogya Upanishad 8.3.4.

Literally: end or the goal of the Vedas, referring to the Upanishads and their interpretation; it is a tradition of interpretation of the Upanishads,(Nakamura 1990, p. 112) the Brahma Sutras, and the Bhagavad Gitā.(Grimes 1990, pp. 6–7, Menon 2012)

King 2002, p. 128: "Although it is common to find Western scholars and Hindus arguing that Sankaracarya was the most influential and important figure in the history of Hindu intellectual thought, this does not seem to be justified by the historical evidence."
Critical scholarship has identified a number of key concepts used in contemporary Advaita Vedānta which differ from Shankara's views, revealing a discrepancy between the nominal adherence to Shankara and the actual alliance with his views.(Suthren Hirst 2005, p. 4, Potter 2006, pp. 6–7)
Some modern Advaitins, specifically Satchidanandendra Sarasvati, argue that most of post-Shankara Advaita Vedanta actually deviates from Shankara, an argument deemed correct by Potter.(Potter 2006, pp. 6–7, Roodurmun 2002, pp. 33–34)
Potter (2006, pp. 6–7): "...these modern interpreters are implying that most Advaitins after Samkara's time are confused and basically mistaken, and that 99% of the extant classical interpretive literature on Samkara's philosophy is off the mark. This is clearly a remarkably radical conclusion. Yet, there is good reason to think that it may well be true."
Satchidanandendra Sarasvati 1997, p. 6: "almost all the later Advaitins were influenced by Mandana Misra and Bhaskara."

Compare, in Buddhism: Subitism, Hongaku ("original enlightenment"), Post-satori practice. See also Nisargadatta Maharaj on 'the bird's way and the ant's way'.

Sringeri matha received patronage from the kings of the Vijayanagara Empire, (Goodding 2013, p. 89) competing with Srivaisnava Visistadvaita groups for royal patronage and converts.(Stoker 2016, pp. 55–56) The works of the influential Advaitin Vidyaranya (Madhava, 14th cent.), jagadguru of Sringeri matha from ca. 1374–1380 to 1386, presented Advaita teachings as the summit of the Indian darśanam,(Hacker 1995, pp. 29–30, Blake Michael 1992, pp. 60–62 with notes 6, 7, and 8, King 2002, p. 128, Roodurmun 2002, pp. 33–34) while the subsequent Shankara Digvijayam genre deified him as a ruler-renunciate who conquered the four quarters.(Nowicka 2016, p. 147, Bader 2001, p. vii) Shankara's prominence was further established in the 19th and 20th century, gaining worldwide fame, in a "confluence of interests" of Western Christian missionaries, the British Raj, and Indian nationalists.(King 2002, pp. 129–135)

See also Purusha.

According to Anantanand Rambachan, advaita describes the relation between Brahman, the origin of everything, and the world and the individual self. This relation is neither one nor two. It is not "one," because "[t]he world, as an effect, originates from Brahman and is dependent on Brahman for its existence." But it is also not "two," because Brahman is "the ultimate ontological ground of the world and the self."[60]

For an alternate English translation: Robert Hume, The Thirteen Principal Upanishads, BU 4.3.32, Oxford University Press, p. 138.

सलिले एकस् द्रष्टा अद्वैतस् भवति एष ब्रह्मलोकस्
सम्राट् ति ह एनम् उवाच अनुशशास याज्ञवल्क्यस्
एषा अस्य परमा गतिस् एषास्य परमा सम्पद्

—Brihadaranyaka Upanishad 4.3.32[web 2]

Translation:

An ocean, a single seer without duality becomes he whose world is Brahman,
O King, Yajnavalkya instructed
This is his supreme way. This is his supreme achievement.

—Transl: Stephen Phillips[64][note 14]

A reference to Non-duality is also made in the Chandogya Upanishad, within a dialogue between the Vedic sage Uddalaka Aruni and his son Svetaketu, as follows :

सदेव सोम्येदमग्र आसीत एकमेवा अद्वितीयम्
तद्धैक आहुरसदेवेदमग्र आसीदेकमेवाद्वितीयं तस्मादसतः सज्जायत

—Chandogya Upanishad 6.2.1[web 3]

Translation:

Somya, before this world was manifest, there was only existence, one without duality
On this subject, some maintain that before this world was manifest, there was only non-existence, one without a second.
Out of that non-existence, existence emerged.

—Chandogya Upanishad

Many of these traditions, which were influential among Neo-Vedantins, did not derive from Vedantic lineages, i.e., the "Advaita Vedanta" of Shankara. As Madaio (2017, p. 4) points out "...it is possible to speak of sanskritic and vernacular advaitic texts (which are either explicitly non-dualistic or permit a non-dualistic reading) and 'Advaita Vedanta' texts which originate within sampradayas that claim an Advaita Vedantic lineage. This, then, avoids the obfuscating tendency to subsume advaitic but non-vedantic works under a 'Vedanta' or 'Advaita Vedanta' umbrella."

King 1995, p. 65: "The prevailing monism of the Upanishads was developed by the Advaita Vedanta to its ultimate extreme."

The suffering created by the workings of the mind entangled with physical reality

Jivanmukti is a state that transforms the nature, attributes and behaviors of an individual.After this transformation, the liberated individual shows attributes such as: (Aiyar 1914, pp. 140–147);(Nikhilananda 1958, pp. 53–79); (Fort 1998)

he is not bothered by disrespect and endures cruel words, treats others with respect regardless of how others treat him;

when confronted by an angry person he does not return anger, instead replies with soft and kind words;

even if tortured, he speaks and trusts the truth;

he does not crave for blessings or expect praise from others;
he never injures or harms any life or being (ahimsa), he is intent in the welfare of all beings;
he is as comfortable being alone as in the presence of others;
he is as comfortable with a bowl, at the foot of a tree in tattered robe without help, as when he is in a mithuna (union of mendicants), grama (village) and nagara (city);
he does not care about or wear sikha (tuft of hair on the back of head for religious reasons), nor the holy thread across his body. To him, knowledge is sikha, knowledge is the holy thread, knowledge alone is supreme. Outer appearances and rituals do not matter to him, only knowledge matters;
for him there is no invocation nor dismissal of deities, no mantra nor non-mantra, no prostrations nor worship of gods, goddess or ancestors, nothing other than knowledge of Self;
he is humble, high spirited, of clear and steady mind, straightforward, compassionate, patient, indifferent, courageous, speaks firmly and with sweet words.

The true Self is itself just that pure consciousness, without which nothing can be known in any way.(...) And that same true Self, pure consciousness, is not different from the ultimate world Principle, Brahman (...) Brahman (=the true Self, pure consciousness) is the only Reality (sat), since It is untinged by difference, the mark of ignorance, and since It is the one thing that is not sublimatable.[77]

Fowler 2002, pp. 30–31, 260–264: "As a philosophical and metaphysical term it [monism] refers to the acceptance of one single, ultimate, principle as the basis of the cosmos, the unity and oneness of all reality (...) [monism] has a model par excellence in that put forward by the eighth-century Indian philosopher Shankara, who is associated with the school of thought of Advaita Vedanta. (p. 263) – "In Shankara's words: 'the notions oneself and one's own are indeed falsely constructed (upon Atman) through nescience. When there is (the knowledge of) the oneness of Atman, these notions certainly do not exist. If the seed does not exist, whence shall the fruit arise?".

See also kelamuni (2006), The Philosophy of Adi Shankaracharya, section "II. The Threefold Means," on Brahma Sutra Bhashya 4.1.2 and subitism.

These characteristics and steps are described in various Advaita texts, such as by Shankara in Chapter 1.1 of Brahmasutrabhasya,[84] and in the Bhagavad Gita Chapter 10

Example self-restraints mentioned in Hindu texts: one must refrain from any violence that causes injury to others, refrain from starting or propagating deceit and falsehood, refrain from theft of others' property, refrain from sexually cheating on one's partner, and refrain from avarice.[101][102][103]

See also kelamuni (2006), The Philosophy of Adi Shankaracharya, section "II. The Threefold Means," on Brahma Sutra Bhashya 4.1.2 and subitism.

Mayeda refers to statements from Shankara regarding epistemology (pramana-janya) in section 1.18.133 of Upadesasahasri, and section 1.1.4 of Brahmasutra-bhasya.[118][119] NB: some manuscripts list Upadesasahasri verse 1.18.133 as 2.18.133, while Mayeda lists it as 1.18.133, because of interchanged chapter numbering.[120][121]

See also ramesam, AtmA anubhava / anubhUti (blog).

Sharma 2000, p. 177 refers to Brahma Sutra Bhashya 4.1.15, "which tradition views as an allusion to his own direct experience of the ultimate truth." It runs as follows: [...] How can one contest the heart-felt cognition of another as possessing brahman-knowledge, even though bearing a body?

1. Something is. 2. It is not. 3. It both is and is not. 4. It neither is nor is not.[146]

"Consciousness",[162][web 8] "intelligence",[163][161] "wisdom"

"the Absolute",[162][web 8] "infinite",[web 8] "the Highest truth"[web 8]

While the Vedanta tradition equates sat ("the Existent") with Brahman, the Chandogya Upanishad itself does not refer to Brahman.[19][155] Deutsch & Dalvi (2004, p. 8): "Although the text does not use the term brahman, the Vedanta tradition is that the Existent (sat) referred to is no other than Brahman."

Shankara, himself, had renounced all religious ritual acts;[191]

For an example of Shankara's reasoning "why rites and ritual actions should be given up",[192] Elsewhere, Shankara's Bhasya on various Upanishads repeat "give up rituals and rites".[193]

Compare Mookerji 2011 on Svādhyāya (Vedic learning). Mookerji (2011, pp. 29–31) notes that the Rigveda, and Sayana's commentary, contain passages criticizing as fruitless mere recitation of the Ṛik (words) without understanding their inner meaning or essence, the knowledge of dharma and Parabrahman. Mookerji (2011, pp. 29, 34) concludes that in the Rigvedic education of the mantras "the contemplation and comprehension of their meaning was considered as more important and vital to education than their mere mechanical repetition and correct pronunciation." Mookerji (2011, p. 35) refers to Sayana as stating that "the mastery of texts, akshara-praptī, is followed by artha-bodha, perception of their meaning." (Artha may also mean "goal, purpose or essence," depending on the context.[194][web 10]) According to Mookerji (2011, p. 36), "the realization of Truth" and the knowledge of paramatman as revealed to the rishis is the real aim of Vedic learning, and not the mere recitation of texts.

Up.I.18.219: "The renunciation of all actions becomes the means for discriminating the meaning of the word "Thou" since there is an [Upanisadic] teaching, "Having become calm, self-controlled [..., one sees Atman there in oneself]" (Bhr. Up. IV, 4, 23)."[202]

It is not a philosophy in the western meaning of the word, according to Milne.[215]

Reason clarifies the truth and removes objections, according to the Advaita school, however it believes that pure logic cannot lead to philosophical truths and only experience and meditative insights do. The Sruti, it believes is a collection of experience and meditative insights about liberating knowledge,[227]

Sharma 1993, pp. 72–83: "According to Advaita, the pure subject is our true self whose knowledge is liberative, (...) If the subject could be realised in its purity then all misery would cease: this is called self-knowledge"

Timalsina 2008, p. xvii: "Advaita can be approached from various angles. Not only are there multiple interpretations of Advaita, there are different starting points from which one can arrive at the conclusion of non-duality".

Atman, Oxford Dictionaries, Oxford University Press (2012), Quote: "1. real self of the individual; 2. a person's soul"

Payne 2005, pp. 199–200 with p. 215 notes 5, 6: "A fourth metaphor is the monistic equation of the true or absolute self (atman) with absolute being (Brahman). In general, then, the conception of the self that emerges is one in which the self is in some way permanent, eternal, absolute or unchanging. It is also simultaneously universal and individual. The view is that there is an essence and that it can be known."

Soul:

Atman, Oxford Dictionaries, Oxford University Press (2012), Quote: "1. real self of the individual; 2. a person's soul"

David Lorenzen (2004), The Hindu World (Editors: Sushil Mittal and Gene Thursby), Routledge, ISBN 0-415215277, pp. 208–209, Quote: "Advaita and nirguni movements, on the other hand, stress an interior mysticism in which the devotee seeks to discover the identity of individual soul (atman) with the universal ground of being (brahman) or to find god within himself";

Richard King (1995), Early Advaita Vedanta and Buddhism, State University of New York Press, ISBN 978-0791425138, p. 64, Quote: "Atman as the innermost essence or soul of man, and Brahman as the innermost essence and support of the universe. (...) Thus we can see in the Upanishads, a tendency towards a convergence of microcosm and macrocosm, culminating in the equating of atman with Brahman".

Chad Meister (2010), The Oxford Handbook of Religious Diversity, Oxford University Press, ISBN 978-0195340136, p. 63; Quote: "Even though Buddhism explicitly rejected the Hindu ideas of Atman (soul) and Brahman, Hinduism treats Sakyamuni Buddha as one of the ten avatars of Vishnu."

Olivelle (1998, p. 77);

Sanskrit (Wikisource): प्राणोऽपानो व्यान इत्यष्टावक्षराणि अष्टाक्षर ह वा एकं गायत्र्यै पदम् एतदु हैवास्या एतत् स यावदिदं प्राणि तावद्ध जयति योऽस्या एतदेवं पदं वेद अथास्या एतदेव तुरीयं दर्शतं पदं परोरजा य एष तपति यद्वै चतुर्थं तत्तुरीयम् दर्शतं पदमिति ददृश इव ह्येष परोरजा इति सर्वमु ह्येवैष रज उपर्युपरि तपत्य् एव हैव श्रिया यशसा तपति योऽस्या एतदेवं पदं वेद ॥ ३ ॥

Compare Fasching 2021: For Advaita Vedānta, consciousness is to be distinguished from all contents of consciousness that might be introspectively detectable: It is precisely consciousness of whatever contents it is conscious of and not itself one of these contents. Its only nature is, Advaita holds, prakāśa (manifestation); in itself it is devoid of any content or structure and can never become an object.

Brahman is also defined as:

The unchanging, infinite, immanent, and transcendent reality which is all matter, energy, time, space, being, and everything beyond in this Universe; that is the one supreme, universal spirit without a second.(Brodd (2003); Vachatimanont (2005, pp. 47–48))

Bowker 2003, "Brahman": "(Skt., literally, 'growth' or 'expansion'). The one supreme, all pervading Spirit that is the origin and support of the phenomenal universe."

Puligandla 1997, p. 222 The supreme self. Puligandla states it as "the unchanging reality amidst and beyond the world."

The Self-existent, the Absolute and the Imperishable. Brahman is indescribable.Fowler 2005, p. 30: "Upanisadic thought is anything but consistent; nevertheless, there is a common focus on the acceptance of a totally transcendent Absolute, a trend which arose in the Vedic period. This indescribable Absolute is called Brahman [...]."

It provides the "stuff" from which everything is made

It sets everything into working, into existence

Gambhirananda: "That (is Brahman) from which (are derived) the birth etc. of this (universe)."[283]

Svarupalakshana, qualities, definition based on essence

The Advaitin scholar Madhusudana Sarasvati explained Brahman as the Reality that is simultaneously an absence of falsity (sat), absence of ignorance (cit), and absence of sorrow/self-limitation (ananda).[286]

Compare Parable of the Poisoned Arrow

These concepts are discussed in ancient and medieval texts of Hinduism, and other Indian religions, using synonymous terms. Cause is referred to as kāraṇa (कारण), nidana (निदान), hetu (हेतु) or mulam (मूलम्), while effect is referred to as kārya (कार्य), phala (फल), parinam (परिणाम) or Shungam (शुङ्ग).[web 17][309]

Advaita furthermore states that effect (kārya) is non-different from cause (kāraṇa), but the cause is different from the effect. This principle is called kārya-kāraṇa ananyatva. When the cause is destroyed, the effect will no longer exist. For example, cotton cloth is the effect of the cotton threads, which is the material cause. Without threads there will be no cotton cloth. Without cotton there will be no thread. According to Swami Sivananda, in his comments on the Brahmasūtra-Bhāṣya 2.1.9, Adi Shankara describes this as follows:

ananyatve'pi kāryakāraṇayoḥ kāryasya kāraṇātmatvaṃ na tu kāraṇasya kāryātmatvaṃ
Despite the non-difference of cause and effect, the effect has its self in the cause but not the cause in the effect.
The effect is of the nature of the cause and not the cause the nature of the effect. Therefore the qualities of the effect cannot touch the cause.[web 19]

According to Eliot Deutsch, Advaita Vedānta states that from "the standpoint of Brahman-experience and Brahman itself, there is no creation" in the absolute sense, all empirically observed creation is relative and mere transformation of one state into another, all states are provisional and a cause-effect driven modification.[311]

According to Hugh Nicholson, "the definitive study on the development of the concept of vivarta in Indian philosophy, and in Advaita Vedanta in particular, remains Hacker's Vivarta.[313] According to Hacker, "the word maya has for [Shankara] hardly any terminological weight."[314]

Compare the misunderstanding of Yogacharas concept of vijñapti-mātra, 'representation-only', as 'consciousness-only'.

Śaṅkarācārya 1949, p. 32;

Sanskrit: तच् चैतत् परमार्थदर्शनं प्रतिपत्तुमिच्छता वर्णाश्रमाद्यभिमान-कृतपाञ्क्तरूपपुत्रवित्तलोकैषणादिभ्यो व्युत्थानं कर्तव्यम् । सम्यक्प्रत्ययविरोधात् तदभिमानस्य भेददर्शनप्रतिषेधार्थोपपत्तिश्चोपपद्यते । न ह्येकस्मिन्नात्मन्यसंसारित्वबुद्धौ शास्त्रन्यायोत्पादितायां तद्विपरीता बुद्धिर्भवति । न ह्य् अग्नौ शितत्वबुद्धिः, शरीरे वाजरामरणबुद्धिः । तस्मादविद्याकार्यत्वात् सर्वकर्मणां तत्साधनानां च यज्ञोपवीतादीनां परमार्थदर्शनिष्टेन त्यागः कर्तव्यः ॥ ४४॥

Many in number, the Upanishads developed in different schools at various times and places, some in the Vedic period and others in the medieval or modern era (the names of up to 112 Upanishads have been recorded).[327] All major commentators have considered the twelve to thirteen oldest of these texts as the principal Upanishads and as the foundation of Vedanta.

The Śruti includes the four Vedas including its four layers of embedded texts – the Samhitas, the Brahmanas, the Aranyakas, and the early Upanishads.[328]

Sanskrit: श्री संस्थान गौडपदाचार्य मठ, Śrī Sansthāna Gauḍapadācārya Maṭha

Nakamura also recognized the influence of these mathas, which he argues contributed to the influence of Shankara, which was "due to institutional factors". The mathas which he established remain active today, and preserve the teachings and influence of Shankara, "while the writings of other scholars before him came to be forgotten with the passage of time".[347]

According to Pandey, these Mathas were not established by Shankara himself, but were originally ashrams established by Vibhāṇḍaka and his son Ṛṣyaśṛnga.[348] Shankara inherited the ashrams at Dvārakā and Sringeri, and shifted the ashram at Śṛngaverapura to Badarikāśrama, and the ashram at Angadeśa to Jagannātha Purī.[349]

Sanskrit.org: "Advaitins are non-sectarian, and they advocate worship of Siva and Visnu equally with that of the other deities of Hinduism, like Sakti, Ganapati and others."[web 22]

Archeological evidence suggest that the Smarta tradition in India dates back to at least 3rd-century CE.[351][352]

Practically, Shankara fostered a rapprochement between Advaita and smarta orthodoxy, which by his time had not only continued to defend the varnasramadharma theory as defining the path of karman, but had developed the practice of pancayatanapuja ("five-shrine worship") as a solution to varied and conflicting devotional practices. Thus one could worship any one of five deities (Vishnu, Siva, Durga, Surya, Ganesa) as one's istadevata ("deity of choice").[358]

Helmuth von Glasenapp (1995), Vedanta & Buddhism: A comparative study, Buddhist Publication Society, pages 2-3, Quote: "Vedānta and Buddhism have lived side by side for such a long time that obviously they must have influenced each other. The strong predilection of the Indian mind for a doctrine of universal unity has led the representatives of Mahāyāna to conceive Saṃsāra and Nirvāṇa as two aspects of the same and single true reality; for Nāgārjuna the empirical world is a mere appearance, as all dharmas, manifest in it, are perishable and conditioned by other dharmas, without having any independent existence of their own. Only the indefinable "Voidness" (Śūnyatā) to be grasped in meditation, and realized in Nirvāṇa, has true reality [in Buddhism]".

This development did not end with Advaita Vedānta but continued in Tantrism and various schools of Shaivism. Non-dual Kashmir Shaivism, for example, was influenced by, and took over doctrines from, several orthodox and heterodox Indian religious and philosophical traditions.[367] These include the orthodox Hindu schools of Vedānta, Sāṃkhya, Patañjali's Yoga tradition, and Nyāya, and prominent Buddhist schools, including Yogācāra and Mādhyamaka,[367] but also Tantra and the Nath-tradition.[368]

Kalupahana describes how in Buddhism there is also a current which favours substance ontology. Kalupahanan sees Mādhyamaka and Yogācāra as reactions against developments toward substance ontology in Buddhism.[390]

Scholars are divided on the historical influence of Advaita Vedānta. Some Indologists state that it is one of the most studied Hindu philosophy and the most influential schools of classical Indian thought:

Indich 2000, pp. 57–60

Brannigan 2009, p. 19: "Advaita Vedanta is the most influential philosophical system in Hindu thought."

Deutsch 1969, p. 3: "[Advaita Vedānta] has been and continues to be the most widely accepted system of thought among philosophers in India, and it is, we believe, one of the greatest philosophical achievements to be found in the East or the West."

See also Devdutt Pattanaik (August 30, 2020), Who is a Hindu? - What they don't tell you about Advaita Archived 19 December 2021 at the Wayback Machine, Mumbai Mirror.

In the Orientalist view, the medieval Muslim period was a time of stagnation and cultural degeneration, in which the original purity of the Upanisadic teachings, systematized by philosophers like Shankara, was lost. In this view, "the genuine achievements of Indian civilization" were recovered during the British colonial rule of India, due to the efforts of western Indologists, who viewed Advaita Vedanta as the authentic philosophy of the Upanishads, and Shankara as its greatest exponent.[429][note 70] While this view has been criticised by postcolonial studies and critiques of Orientalism, "in some corners of the academy, the Orientalists' understanding of premodern Indian history has so far escaped thorough reexamination."[430]

Nevertheless, Balasubramanian argues that since the basic ideas of the Vedanta systems are derived from the Vedas, the Vedantic philosophy is as old as the Vedas.[436]

Deutsch and Dalvi point out that, in the Indian context, texts "are only part of a tradition which is preserved in its purest form in the oral transmission as it has been going on."[438]

Nakamura notes that there are contradictions in doctrine between the four chapters.[449]

It is often used interchangeably with the term citta-mātra, but they have different meanings. The standard translation of both terms is "consciousness-only" or "mind-only." Several modern researchers object this translation, and the accompanying label of "absolute idealism" or "idealistic monism".[453] A better translation for vijñapti-mātra is representation-only.[454]

1. Something is. 2. It is not. 3. It both is and is not. 4. It neither is nor is not.[146][page needed] The 'four-cornered negation' is an English gloss of the Sanskrit, Chatushkoti.[citation needed]

The influence of Mahayana Buddhism on other religions and philosophies was not limited to Vedanta. Kalupahana notes that the Visuddhimagga – a Theravada Buddhist tradition, contains "some metaphysical speculations, such as those of the Sarvastivadins, the Sautrantikas, and even the Yogacarins".[456]

King 2002, p. 128: "Although it is common to find Western scholars and Hindus arguing that Sankaracarya was the most influential and important figure in the history of Hindu intellectual thought, this does not seem to be justified by the historical evidence."[35]

The insignificance of Srineri matha before this time was such, that Hacker and Kulke & Rothermund have argued that Sringeri matha may have been founded by Vidyaranya himself, proclaiming that it was established by Shankara himself.[346][482]

Potter 2008, pp. 346–347, 420–423: "There is little firm historical information about Suresvara; tradition holds Suresvara is same as Mandanamisra."

According to Comans, this approach is missing in historic Advaita texts.[524]

Neo-Vedanta seems to be closer to Bhedabheda-Vedanta than to Shankara's Advaita Vedanta, with the acknowledgement of the reality of the world. Nicholas F. Gier: "Ramakrsna, Svami Vivekananda, and Aurobindo (I also include M.K. Gandhi) have been labeled "neo-Vedantists," a philosophy that rejects the Advaitins' claim that the world is illusory. Aurobindo, in his The Life Divine, declares that he has moved from Sankara's "universal illusionism" to his own "universal realism" (2005: 432), defined as metaphysical realism in the European philosophical sense of the term."[525]

Presently Cohen has distanced himself from Poonja, and calls his teachings "Evolutionary Enlightenment".[530] What Is Enlightenment, the magazine published by Choen's organisation, has been critical of neo-Advaita several times, as early as 2001. See.[web 36][web 37][web 38]

Siderits, Mark (Spring 2015). "Buddha: Non-Self". In Zalta, Edward N. (ed.). Stanford Encyclopedia of Philosophy. The Metaphysics Research Lab, Center for the Study of Language and Information, Stanford University. ISSN 1095-5054. OCLC 643092515. Archived from the original on 27 April 2023. Retrieved 24 June 2023. The Buddha's "middle path" strategy can be seen as one of first arguing that there is nothing that the word "I" genuinely denotes, and then explaining that our erroneous sense of an "I" stems from our employment of the useful fiction represented by the concept of the person. While the second part of this strategy only receives its full articulation in the later development of the theory of two truths, the first part can be found in the Buddha's own teachings, in the form of several philosophical arguments for non-self. Best known among these is the argument from impermanence (S III.66–8) [...].
It is the fact that this argument does not contain a premise explicitly asserting that the five skandhas (classes of psychophysical element) are exhaustive of the constituents of

persons, plus the fact that these are all said to be empirically observable, that leads some to claim that the Buddha did not intend to deny the existence of a self tout court. There is, however, evidence that the Buddha was generally hostile toward attempts to establish the existence of unobservable entities. In the Poṭṭhapāda Sutta (D I.178–203), for instance, the Buddha compares someone who posits an unseen seer in order to explain our introspective awareness of cognitions, to a man who has conceived a longing for the most beautiful woman in the world based solely on the thought that such a woman must surely exist. And in the Tevijja Sutta (D I.235–52), the Buddha rejects the claim of certain Brahmins to know the path to oneness with Brahman, on the grounds that no one has actually observed this Brahman. This makes more plausible the assumption that the argument has as an implicit premise the claim that there is no more to the person than the five skandhas.

Vajrayana: The Esoteric or Diamond Vehicle of Buddhism
Vajrayana, the "Diamond Vehicle," is a mystical branch of Mahayana Buddhism using powerful techniques like mantras, mudras (symbolic gestures), and mandalas (cosmic

diagrams) for a faster path to enlightenment, emphasizing guru guidance and deity visualization to realize inherent Buddha-nature. Originating in India, it's prominent in Tibetan Buddhism, utilizing rituals and practices to transform all experiences into the path to awakening, focusing on realizing the union of wisdom (prajna) and skillful means (upaya).

Core Concepts & Practices

Mantra: Sacred syllables or phrases for mental protection and invoking divine energy.

Mandala: Symbolic cosmic maps for visualization, representing Buddha realms.

Mudra: Ritual hand gestures symbolizing enlightened qualities.

Deity Yoga: Visualizing oneself as a deity to embody enlightened qualities.

Guru Yoga: Connecting with a spiritual teacher (guru) to realize one's own Buddha-nature.

Yab-Yum: A symbol of sexual embrace representing the union of wisdom and method.

Key Features

Faster Path: Aims to achieve enlightenment more quickly than traditional methods.

Uses All Experience: Incorporates all aspects of life, including emotions and the world, as part of the path.

Esoteric & Ritualistic: Involves secret teachings, initiations (empowerments), and complex rituals.

Teacher-Dependent: Requires initiation and guidance from a qualified lama or guru.

Relationship to Buddhism

Mahayana Foundation: Builds upon Mahayana philosophy, using its concepts of emptiness (sunyata) and compassion.

Three Vehicles (Yanas): Often seen as the third, most advanced vehicle after Shravakayana and Mahayana.

Tibetan Buddhism: The primary vehicle for Tibetan traditions (Nyingma, Kagyu, Sakya, Gelug).

Modern Context

Spread globally after Tibetan refugees fled to India in 1959, bringing teachings to the West.

The Dalai Lama is a prominent leader, offering insights to a worldwide following.

What people are saying
Need some advice on a strange feeling
Popular comment · Most practicing Tibetan Buddhist monastaries aren't in Tibet anymore. Anyway, what do "like" and "dislike" have to do with your practice? Do you practice to satisfy your ego? Your practice would be more sophisticated and profound if you found a community you would actually engage in practice with, regardless of tradition or your likes and dislikes. Edit: of course some temples aren't good fits, but that is very different from like and dislike.

Let's Have a Real Discussion Here - Does Vajrayana Really Works?
Popular comment · reading Dharma benefits you by giving you true teachings on the nature of mind and reality which permeates throughout your life, that is the blessing. There are more blessing that may follow, but a closed off person is not receptive to

them, thus they are “secret” does controlling your anger release you from suffering for yourself and others? Does defeating the enemy wrongdoing or controlling your cravings which bind you to samsara? The Dharma is a blessing. * Mantras interact with the energy system of the body and carry positive energy if done correctly, thus, many spiritual benefits come from them. 2b) karmic purification takes place in the mindstream, you are thinking of the westernized misrepresentation of Karma, the type of karmic purification from mantra and preliminaries is mostly inner. You can plainly observe this. If you need more explanation, feel free to ask. * negative karma requires multiple facets to fulfill , if you aren’t aware that you’re doing them wrong or you have a lapse in judgement, the negative karma isn’t as strong, prostrations are a positive practice that help to subdue the ego and self cherishing mind. 3b no… it’s not better to “just not be Buddhist” because you will eventually be faced with your negative karma one way or another and ignoring practice is only allowing it to build and snowball. * I myself went from having $0 and being miserable living on the streets to making 60k+ per year with a home and vehicle through Buddhist practice.. there’s your “proof of material benefit” story. It is not always a benefit in the dualistic sense and your practice must be sincere as well as your samaya * this is a misunderstanding and over generalization therefore it needs no explaining. A lay practitioner should mostly be concerned with the intent and nature of craving behind their sexual activity. Further restriction of sexual activity and sexual practices are for people with empowerment or monastics. * I’m not really sure what you’re getting at with this question but it seems to be that if something increases the merit of a virtuous act - why is it not required. There are various practices within Vajrayana and none of it is automatically required, it is more about what fits and benefits the practitioner at where they are in their journey, it’s also not something everyone can automatically do. Hope this clears up your confusion and criticism of Vajrayana. I’m really curious what you mean by “does it work” if you could clarify that. It’s like asking “does 2+2 work?”. Buddhism is based purely on logic and reason. Cultivating wisdom and compassion makes you wiser and more compassionate. Not acting from self grasping or craving/ignorance reduces suffering. These are plain observable facts, there is no question of “if they work”. It’s not a self help program to help you with worldly pursuits. It’s a means of mind training, practice, and study for liberation of suffering & cyclic existence for yourself and others completely.

Vajrayoginī (Sanskrit: Vajrayoginī; Tibetan: རྡོ་རྗེ་རྣལ་འབྱོར་མ་, Dorjé Naljorma) is a Tantric Buddhist female Buddha and a Dākiṇī. Vajrayoginī's essence is "great passion" (maharaga), a transcendent passion that is free of selfishness and illusion — she intensely works for the well-being of others and for the destruction of ego clinging. She is seen as being ideally suited for people with strong passions, providing the way to transform those passions into enlightened virtues. She is an Anuttarayoga Tantra iṣṭadevatā (meditation deity) and her practice includes methods for preventing ordinary death, intermediate state (bardo) and rebirth (by transforming them into paths to enlightenment), and for transforming all mundane daily experiences into higher spiritual paths. Origin and Lineage Vajrayoginī's sādhanā originated in the Himalayan region between the tenth and twelfth centuries. It evolved from the Cakrasaṃvara Tantra, where Vajrayoginī appears as his Yab-Yum consort, to beco

In Vajrayana Buddhism, Vajradhara and Vajradharma may appear similar, yet each carries a profoundly unique role. Vajradhara - the primordial Buddha - embodies the very essence of enlightenment and transmits the sacred tantric teachings. Vajradharma, in turn, reveals how that ultimate truth unfolds in our spiritual practice, guiding us step by step. Though often mistaken for one another, recognizing their subtle differences opens a deeper doorway to wisdom, compassion, and the transformative journey toward enlightenment. 🖳Curious to explore their timeless teachings? Vajrayāna (Sanskrit: वज्रयान, lit. 'Diamond Vehicle or Thunderbolt Vehicle'), otherwise known as Mantrayāna ("Mantra Vehicle"), Guhyamantrayāna ("Secret Mantra Vehicle"), Tantrayāna ("Tantra Vehicle"), Indo-Tibetan Buddhism, Tantric Buddhism, and Esoteric Buddhism, is a Mahāyāna Buddhist tradition that emphasizes esoteric practices and rituals aimed at rapid spiritual awakening. Emerging between the 5th and 7th centuries CE in medieval India,[1] Vajrayāna Buddhism incorporates a range of techniques, including the use of mantras (sacred sounds), dhāraṇīs (mnemonic codes), mudrās (symbolic hand gestures), mandalās (spiritual diagrams), and the visualization of deities and Buddhas. These practices are designed to transform ordinary experiences into spiritual paths toward enlightenment and liberation, often by engaging with aspects of desire and aversion in a ritualized context.

A distinctive feature of Vajrayāna Buddhism is its emphasis on esoteric transmission, where teachings are passed directly from teacher (guru or vajrācārya) to student through initiation ceremonies.[2] Tradition asserts that these teachings have been passed down through an unbroken lineage going back to the historical Buddha (c. the 5th century BCE), sometimes via other Buddhas or bodhisattvas (e.g., Vajrapani).[3]

This lineage-based transmission ensures the preservation of the purity and effectiveness of the teachings. Practitioners often engage in deity yoga, a meditative practice where one visualizes oneself as a deity embodying enlightened qualities to transform one's perception of reality. The tradition also acknowledges the role of feminine energy, venerating female Buddhas and ḍākiṇīs (spiritual beings), and sometimes incorporates practices that challenge conventional norms to transcend dualistic thinking.

Vajrayāna has given rise to various sub-traditions across Asia. In Tibet, it evolved into Tibetan Buddhism, which became the dominant spiritual tradition, integrating local beliefs and practices. In Japan, it influenced Shingon Buddhism, established by Kūkai, emphasizing the use of mantras and rituals. Chinese Esoteric Buddhism also emerged, blending Vajrayāna practices with existing Chinese Buddhist traditions, however this is no longer a separate sect and has mostly mixed in with normal exoteric Buddhism. Each of these traditions adapted Vajrayāna principles to its cultural context while maintaining core esoteric practices aimed at achieving enlightenment.

Central to Vajrayāna symbolism is the vajra, a ritual implement representing indestructibility and irresistible force, embodying the union of transcendental wisdom and compassion.[4] Practitioners often use the vajra in conjunction with a bell during rituals, symbolizing the integration of male and female principles. The tradition also employs rich visual imagery, including mudrās, complex mandalās, and depictions of wrathful deities that serve as meditation aids to help practitioners internalize spiritual concepts and confront inner obstacles on the path to enlightenment.

Terminology

A vajra and bell (ghanta), which are classic ritual symbols of Vajrayāna Buddhism
In medieval India, the initial terms that were used to refer to the tantric Buddhist tradition were Mantranāya ("Path of Mantras") and Mantrayāna ("Mantra Vehicle").[5] Later, other terms were adopted, like Vajrayāna ("Diamond Vehicle" or "Thunderbolt Vehicle").

In Tibetan Buddhism practiced in the Himalayan regions of India, Nepal, Tibet, and Bhutan, Buddhist Tantra is most often termed Vajrayāna (Tib. རྡོ་རྗེ་ཐེག་པ་, dorje tekpa, Wyl. rdo rje theg pa) and Secret mantra (Skt. Guhyamantra, Tib. གསང་སྔགས་, sang ngak, Wyl. gsang sngags). The vajra is a mythical weapon associated with Indra that was said to be indestructible and unbreakable (like a diamond)[4] and extremely powerful (like a thunder). Thus, the term is variously translated as Diamond Vehicle, Thunderbolt Vehicle, Indestructible Vehicle, and so on.

The vajra, or diamond, is an adamantine symbol. A diamond has two qualities: it has the power to shatter all ordinary stones, and conversely, no stone can break a diamond. The actual vajra is the mind that has the realization of the ultimate truth inseparably merged with a special kind of tantric bliss. [...] That is why the vajra, or diamond, is the symbol of the tantric path and its result: the wisdom of nondual emptiness and bliss.[4]

In Chinese Esoteric Buddhism, it is generally known by terms such as Zhēnyán (Chinese: 真言, literally "true word", referring to mantra), Tángmì or Hanmì (唐密 - 漢密, "Tang Esotericism" or "Han Esotericism"), Mìzōng (密宗, "Esoteric Sect"), or Mìjiao (Chinese: 密教; Esoteric Teaching). The Chinese term mì 密 ("secret, esoteric") is a translation of the Sanskrit term Guhya ("secret, hidden, profound, abstruse").[6]

In Japan, Buddhist esotericism is known as Mikkyō (密教, secret teachings) or by the term Shingon (a Japanese rendering of Zhēnyán), which also refers to a specific school of Shingon-shū (真言宗).

The term "Esoteric Buddhism" is first used by Western occultist writers, such as Helena Blavatsky and Alfred Percy Sinnett, to describe theosophical doctrines passed down from "supposedly initiated Buddhist masters."[7]

According to David B. Gray, Vajrayana originated from pre-existing Tantric traditions, also known as 'Tantrism', which emerged within Hinduism during the first millennium CE. These early Hindu tantric practices had a profound influence on South Asian Mahāyāna Buddhism, leading to the development of distinct Buddhist tantric traditions, which arose in the 7th century CE, rapidly spread across Southeast, East, and Central Asia, giving rise to distinct traditions in East Asia and Tibet.[8]

History

Mahasiddhas, Palpung monastery. Note the figure of the great adept Putalipa at center, seated in a cave and gazing at an image of the meditational deity Samvara and the figure at the bottom left holding a skull-staff (khaṭvāṅga) and a flaying knife (kartika).

Mahasiddhas and the tantric movement

Tantric Buddhism is associated with groups of wandering yogis called mahasiddhas in medieval India.[9] According to Robert Thurman, these tantric figures thrived during the latter half of the first millennium CE.[3] According to John Myrdhin Reynolds, the mahasiddhas date to the medieval period in North India and used methods radically different from those used in Buddhist monasteries, including practicing on charnel grounds.[10]

Since Tantra focuses on the transformation of poisons into wisdom, the yogic circles came together in tantric feasts, often in sacred sites (pitha) and places (ksetra), which included dancing, singing, consort practices, and the ingestion of taboo substances like alcohol, urine, and meat.[11] At least two of the mahasiddhas cited in the Buddhist literature are comparable with the Shaiva Nath saints (Gorakshanath and Matsyendranath) who practiced Hatha Yoga.

According to Schumann, a movement called Sahaja-siddhi developed in the 8th century in Bengal.[12] It was dominated by long-haired, wandering mahasiddhas who openly challenged and ridiculed the Buddhist establishment.[13] The mahasiddhas pursued siddhis, magical powers such as flight and extrasensory perception as well as spiritual liberation.[14][15]

Tantras

Main article: Tantras (Buddhism)

Vajra Realm Mandala, based on the tantric Vajrasekhara Sutra, and symbolizing the final realization of Vairocana Buddha in Shingon

Naked tantrikas dancing and eating from skull cups (kapalas), closeup of a Chakrasamvara mandala

Mahāyāna sutras contain "proto-tantric" material, such as the Gandavyuha and the Dasabhumika, which might have served as a central source of visual imagery for Tantric texts.[16] Later Mahāyāna texts like the Kāraṇḍavyūha Sūtra (c. 4th–5th century CE) expound the use of mantras such as Om mani padme hum, associated with vastly powerful beings like Avalokiteshvara. The Heart Sutra also includes a mantra.

Vajrayāna Buddhists developed a large corpus of texts, the Buddhist Tantras, some of which can be traced to at least the 7th century CE but might be older. The dating of the tantras is "a difficult, indeed an impossible task", according to David Snellgrove.[17]

Some of the earliest of these texts, Kriya tantras such as the Mañjuśrī-mūla-kalpa (c. 6th century), teach the use of mantras and dharanis for mostly worldly ends, including curing illness, controlling the weather and generating wealth.[18] The Tattvasaṃgraha Tantra (Compendium of Principles), classed as a "Yoga tantra", is one of the first Buddhist tantras that focuses on liberation as opposed to worldly goals. In another early tantra, the Vajrasekhara (Vajra Peak), the influential schema of the five Buddha families is developed.[19] Other early tantras include the Mahāvairocana Abhisaṃbodhi and the Guhyasamāja (Gathering of Secrets).[20]

The Guhyasamāja is a Mahayoga class of Tantra, which features forms of ritual practice considered "left-hand" (vamachara), such as use of taboo substances like alcohol, consort practices, and charnel ground practices that evoke wrathful deities.[21] Ryujun Tajima divides the tantras into those that were "a development of Mahāyānist thought" and those "formed in a rather popular mould toward the end of the eighth century and declining into the esoterism of the left".[22] This "left esoterism" mainly refers to the Yogini tantras and later works associated with wandering yogis. This practice survives in

Tibetan Buddhism, but it is rare for this to be done with an actual person. It is more common for a yogi or yogini to use an imagined consort (a buddhist tantric deity, i.e. a yidam).[23]

Later tantras such as the Hevajra Tantra and the Chakrasamvara are classed as "Yogini tantras" and represent the final form of development of Indian Buddhist tantras in the ninth and tenth centuries.[18] The Kalachakra tantra developed in the 10th century.[24] It is farthest removed from the earlier Buddhist traditions, and incorporates concepts of messianism and astrology not present elsewhere in Buddhist literature.[13]

According to Ronald M. Davidson, the rise of Tantric Buddhism was a response to the feudal structure of Indian society in the early medieval period (ca. 500–1200 CE), which saw kings divinized as manifestations of gods. Likewise, tantric yogis reconfigured their practice through the metaphor of being consecrated (abhiśeka) as the overlord (rājādhirāja) of a mandala palace of divine vassals, an imperial metaphor symbolizing kingly fortresses and their political power.[25]

Relationship to Shaivism

Further information: Kashmir Shaivism

Vajrayana adopted deities such as Bhairava, known as Yamantaka in Tibetan Buddhism.

The central deity of the Cakrasaṃvara Tantra, which, according to scholars like David B. Gray and Alexis Sanderson, appropriated numerous elements from nondual Shaiva Tantra

The question of the origins of early Vajrayāna has been taken up by various scholars. David Seyfort Ruegg has suggested that Buddhist tantra employed various elements of a "pan-Indian religious substrate" that is not specifically Buddhist, Shaiva or Vaishnava.[26]

According to Alexis Sanderson, various classes of Vajrayāna literature developed as a result of royal courts sponsoring both Buddhism and Shaivism.[27] The relationship between the two systems can be seen in texts like the Mañjusrimulakalpa, which later came to be classified under Kriya tantra, and states that mantras taught in the Shaiva, Garuda, and Vaishnava tantras will be effective if applied by Buddhists since they were all taught originally by Manjushri.[28]

Sanderson notes that the Vajrayāna Yogini tantras draw extensively from the material also present in Shaiva Bhairava tantras classified as Vidyapitha. Sanderson's comparison of them shows similarity in "ritual procedures, style of observance, deities, mantras, mandalas, ritual dress, Kapalika accouterments like skull bowls, specialized terminology, secret gestures, and secret jargons. There is even direct borrowing of passages from Shaiva texts."[29] Sanderson gives numerous examples, such as the Guhyasiddhi of Padmavajra, a work associated with the Guhyasamaja tradition, which prescribes acting as a Shaiva guru and initiating members into Saiva Siddhanta scriptures and mandalas.[30] Sanderson says that the Samvara tantra texts adopted the pitha list from the Shaiva text Tantrasadbhāva, introducing a copying error where a deity was mistaken for a place.[31]

Davidson argues that Sanderson's arguments for direct influence from Shaiva Vidyapitha texts are problematic because "the chronology of the Vidyapitha tantras is by no means so well established"[32] and "the available evidence suggests that received Saiva tantras come into evidence sometime in the ninth to tenth centuries with their affirmation by scholars like Abhinavagupta (c. 1000 c.e.)"[33] Davidson also notes that the list of pithas or sacred places is "certainly not particularly Buddhist, nor are they uniquely Kapalika venues, despite their presence in lists employed by both traditions."[34] He adds that, like the Buddhists, the Shaiva tradition was involved in the appropriation of Hindu and non-Hindu deities, texts, and traditions, an example being "village or tribal divinities like Tumburu".[35]

Davidson adds that Buddhists and Kapalikas as well as other ascetics (possibly Pasupatas) mingled and discussed their paths at various pilgrimage places and that there were conversions between the different groups. Thus he concludes:

> The Buddhist-Kapalika connection is more complex than a simple process of religious imitation and textual appropriation. There can be no question that the Buddhist tantras were heavily influenced by Kapalika and other Saiva movements, but the influence was apparently mutual. Perhaps a more nuanced model would be that the various lines of transmission were locally flourishing and that in some areas they interacted, while in others they maintained concerted hostility. Thus the influence was both sustained and reciprocal, even in those places where Buddhist and Kapalika siddhas were in extreme antagonism.[36]

Davidson also argues for the influence of non-Brahmanical and outcaste tribal religions and their feminine deities (such as Parnasabari and Janguli).[37]

Traditional legends

According to several Buddhist tantras as well as traditional Tibetan Buddhist sources, the Vajrayana tantras were taught by the Buddha Shakyamuni, but only to some individuals. There are several stories and versions of how the tantras were disseminated. The Jñana Tilaka Tantra, for example, has the Buddha say that the tantras will be explained by the bodhisattva Vajrapani. One of the most famous legends is that of king Indrabhuti (also known as King Ja) of Oddiyana (a figure related to Vajrapani, in some cases said to be an emanation of him).[38]

Other accounts attribute the revelation of Buddhist tantras to Padmasambhava, saying that he was an emanation of Amitabha and Avalokiteshvara and that the Buddha predicted his arrival. Some accounts also maintain Padmasambhava is a direct reincarnation of Buddha Shakyamuni.[39]

Philosophical background

Nalanda Mahavihara, a major center for the study of Vajrayana philosophy during the Pala era.
According to Alex Wayman, the philosophical view of Vajrayana is based on Mahayana Buddhist philosophy, mainly the Madhyamaka and Yogacara schools.[40] The major difference seen by Vajrayana thinkers is the superiority of Tantric methods, which provide a faster vehicle to liberation and contain many more skillful means (upaya).

The importance of the theory of emptiness is central to the Tantric Buddhist view and practice. The Buddhist emptiness view sees the world as fluid, without an ontological foundation or inherent existence, but ultimately a fabric of constructions. Because of this, tantric practice such as self-visualization as the deity is seen as no less real than everyday reality, but a process of transforming reality itself, including the practitioner's identity as the deity. Stephan Beyer notes, "In a universe where all events dissolve ontologically into Emptiness, the touching of Emptiness in the ritual is the re-creation of the world in actuality".[41]

The doctrine of Buddha-nature, as outlined in the Ratnagotravibhāga of Asanga, was also an important theory that became the basis for Tantric views.[42] As explained by the Tantric commentator Lilavajra, this "intrinsic secret [behind] diverse manifestation" is Tantra's utmost secret and aim. According to Wayman, this "Buddha embryo" (tathāgatagarbha) is a "non-dual, self-originated Wisdom (jnana), an effortless fount of good qualities" that resides in the mindstream but is "obscured by discursive thought".[43] This doctrine is often associated with the idea of inherent or natural luminosity (Skt: prakṛti-prabhāsvara-citta, T. ’od gsal gyi sems) or purity of the mind (prakrti-parisuddha).

Another fundamental theory of Tantric practice is that of transformation. In Vajrayāna, negative mental factors such as desire, hatred, greed, and pride are used as part of the path. As French Indologist Madeleine Biardeau notes, the tantric doctrine is "an attempt to place kama, desire, in every meaning of the word, in the service of liberation."[44] This view is outlined in the following passage from the Hevajra tantra:

> Those things by which evil men are bound, others turn into means and gain thereby release from the bonds of existence. By passion the world is bound, by passion too it is released, but by heretical Buddhists this practice of reversals is not known.[45]

The Hevajra further states that "one knowing the nature of poison may dispel poison with poison."[44] As Snellgrove notes, this idea is already present in Asanga's Mahayana-sutra-alamkara-karika and therefore it is possible that he was aware of Tantric techniques, including sexual yoga.[46]

According to Buddhist Tantra, there is no strict separation of the profane or samsara and the sacred or nirvana; rather, they exist in a continuum. Everyone is seen as containing the seed of enlightenment, which is covered over by defilements. Douglas Duckworth notes that Vajrayana sees Buddhahood not as something outside or an event in the future, but as immanently present.[47]

Indian Tantric Buddhist philosophers such as Buddhaguhya, Vimalamitra, Ratnākaraśānti, and Abhayakaragupta continued the tradition of Buddhist philosophy and adapted it to their commentaries on the major Tantras. Abhayakaragupta's Vajravali is a key source in the theory and practice of tantric rituals. After monks such as Vajrabodhi and Śubhakarasiṃha brought Tantra to Tang China (716 to 720), tantric philosophy continued to be developed in Chinese and Japanese by thinkers such as Yi Xing and Kūkai.

Likewise in Tibet, Sakya Pandita (1182–28 – 1251), as well as later thinkers like Longchenpa (1308–1364) expanded on these philosophies in their tantric commentaries and treatises. The status of the tantric view continued to be debated in medieval Tibet. Tibetan Buddhist Rongzom Chokyi Zangpo (1012–1088) held that the views of sutra such as Madhyamaka were inferior to that of tantra, which was based on basic purity of ultimate reality.[48] Tsongkhapa (1357–1419), on the other hand, held that there is no difference between Vajrayāna and other forms of Mahayana in terms of prajnaparamita (perfection of insight) itself, only that Vajrayāna works faster.[49]

Place within Buddhist tradition

Tangut Auspicious Tantra of All-Reaching Union
Various classifications distinguish Vajrayāna from other Buddhist traditions. Vajrayāna can be seen as a third yana, next to Śrāvakayāna and Mahayana.[13] Vajrayāna can be distinguished from Sutrayana. Sutrayana is the method of perfecting good qualities, where Vajrayāna is the method of taking the intended outcome of Buddhahood as the path. Vajrayāna can also be distinguished from the paramitayana. According to this schema, Indian Mahayana revealed two vehicles (yana) or methods for attaining enlightenment: the method of the perfections (Paramitayana) and the method of mantra (Mantrayana).[50]

The Paramitayana consists of the six or ten paramitas, of which the scriptures say that it takes three incalculable aeons to lead one to Buddhahood. The tantra literature, on the other hand, says that Mantrayana leads one to Buddhahood in a single lifetime.[50] According to the literature, the mantra is an easy path without the difficulties of Paramitayana.[50] Mantrayana is sometimes portrayed as a method for those of inferior abilities,[50] but the practitioner of mantra must still adhere to the Bodhisattva vow.[50]

Characteristics

Manjushri, the bodhisattva associated with prajñā

Goal

The goal of spiritual practice in the Mahayana and Vajrayāna traditions is to become a Sammāsambuddha (fully awakened Buddha); those on this path are termed

Bodhisattvas. As with the Mahayana, motivation is a vital component of Vajrayāna practice. The Bodhisattva-path is an integral part of Vajrayāna, which teaches that all practices are to be undertaken with the motivation to achieve Buddhahood for the benefit of all sentient beings.

In the vehicle of Sutra Mahayana, the "path of the cause" is taken whereby a practitioner starts with his or her potential Buddha-nature and nurtures it to produce the fruit of Buddhahood. In Vajrayāna, the "path of the fruit" is taken whereby the practitioner takes his or her innate Buddha-nature as the means of practice. Experiencing ultimate truth is said to be the purpose of all the various tantric techniques practiced in Vajrayana.[51]

Esoteric transmission

Main article: Esoteric transmission

Monks attending the 2003 Kalachakra empowerment in Bodhgaya, India. Some empowerment ceremonies can include large numbers of initiates.

Vajrayāna Buddhism is esoteric in the sense that the transmission of certain teachings occurs only from teacher to student during an empowerment (abhiṣeka), and their practice requires initiation in a ritual space containing the mandala of the deity.[52] Because of their role in giving access to the practices and guiding the student through them, the Vajracharya Lama is considered indispensable in Vajrayāna.[53]

The secrecy of teachings was often protected through the use of allusive, indirect, symbolic, and metaphorical language (twilight language) that required interpretation and guidance from a teacher.[54] The teachings may also be considered "self-secret", meaning that even if they were to be told directly to a person, that person would not necessarily understand the teachings without proper context. In this way, the teachings are "secret" to the minds of those who are not following the path with more than simple curiosity.[55][56]

Esler points out that while secrecy is presented as necessary to prevent the teachings from falling into the hands of unworthy recipients, it also serves to demarcate a kind of religious in-group. He observes that from an anthropological perspective, allowing reference to the secret to "remain close to the social surface" through veiled allusions plays a more important role in some ways than the secret content itself, as it mobilizes the secret as a kind of symbolic capital.[57]

Affirmation of the feminine, antinomian and taboo

Tibetan Chakrasamvara statue in Yab-Yum union with his consort Vajravārāhī

Some Vajrayāna rituals traditionally included the use of certain taboo substances, such as blood, semen, alcohol, and urine, as ritual offerings and sacraments, though some of these are often replaced with less taboo substances such as yogurt. Tantric feasts and initiations sometimes employed substances like human flesh, as noted by Kahha's Yogaratnamala.[58]

The use of these substances is related to the non-dual (advaya) nature of a Buddha's wisdom (buddhajñana). Since the ultimate state is in some sense non-dual, a practitioner can approach that state by "transcending attachment to dual categories such as pure and impure, permitted and forbidden". As the Guhyasamaja Tantra states, "the wise man who does not discriminate achieves Buddhahood".[58]

Vajrayāna rituals also include sexual yoga, union with a physical consort as part of advanced practices. Some tantras go further: the Hevajra tantra states, "You should kill living beings, speak lying words, take what is not given, consort with the women of others".[58] While some of these statements were taken literally as part of ritual practice, others, such as killing, were interpreted metaphorically. In the Hevajra, "killing" is defined as developing concentration by killing the life-breath of discursive thoughts.[59] Likewise, while actual sexual union with a physical consort is practiced, it is also common to use a visualized consort.[citation needed]

Wayman points out that the symbolic meaning of tantric sexuality is ultimately rooted in bodhicitta and the bodhisattva's quest for enlightenment is likened to a lover seeking union with the mind of the Buddha.[60] Judith Simmer-Brown notes the importance of the psycho-physical experiences arising in sexual yoga, termed "great bliss" (mahasukha): "Bliss melts the conceptual mind, heightens sensory awareness, and opens the practitioner to the naked experience of the nature of mind."[61] This tantric experience is not the same as ordinary self-gratifying sexual passion since it relies on tantric meditative methods using the illusory body and visualizations as well as the motivation for enlightenment.[62] The Hevajra tantra says:

This practice [of sexual union with a consort] is not taught for the sake of enjoyment, but for the examination of one's own thought, whether the mind is steady or waving.[63]

Feminine deities and forces are a major element of Vajrayāna. In the Yogini tantras in particular, women and female yoginis are given high status as the embodiment of female deities such as the wild and nude Vajrayogini.[64] The Candamaharosana Tantra (viii:29–30) states:

Women are heaven, women are the teaching (dharma)
Women indeed are the highest austerity (tapas)
Women are the Buddha, women are the Sangha
Women are the Perfection of Wisdom.[64]

In India, there is evidence that women participated in tantric practice alongside men and were also teachers, adepts, and authors of tantric texts.[65]

Vows and behaviour
Main article: Samaya
Practitioners of Vajrayāna must abide by various tantric vows or pledges called samaya.

These are extensions of the rules of the Prātimokṣa and Bodhisattva vows for the lower levels of tantra, and are taken during initiations into the empowerment for a particular Unsurpassed Yoga Tantra. The special tantric vows vary depending on the specific mandala practice for which the initiation is received and on the level of initiation. Ngagpas of the Nyingma school keep a special non-celibate ordination.

A tantric guru, or teacher, is expected to keep his or her samaya vows in the same way as his students. Proper conduct is considered especially necessary for a qualified Vajrayana guru. For example, the Ornament for the Essence of Manjushrikirti states:

Distance yourself from Vajra Masters who are not keeping the three vows
who keep on with a root downfall, who are miserly with the Dharma,
and who engage in actions that should be forsaken.
Those who worship them go to hell and so on as a result.[66]

Tantra techniques

Mani stones, stones inscribed with the "om mani padme hum" mantra

A Japanese Handscroll depicting various mudras, 11th–12th century
See also: Tibetan tantric practice
While all Vajrayāna Buddhist traditions include all the traditional practices used in Mahayana Buddhism, such as developing bodhicitta, practicing the paramitas, and meditations, they also make use of unique tantric methods and Dzogchen meditation, which are seen as more advanced. These include mantras, mandalas, mudras, deity yoga, other visualization-based meditations, illusory body yogas like tummo, and rituals like the goma fire ritual. Vajrayana teaches that these techniques provide a faster path to Buddhahood.[67]

A central feature of tantric practice is the use of mantras and seed syllables (bijas). Mantras are words, phrases, or a collection of syllables used for various meditative, magical, and ritual ends. Mantras are usually associated with specific deities or Buddhas, and are seen as their manifestations in sonic form. They are traditionally believed to have spiritual power, which can lead to enlightenment as well as supramundane abilities (siddhis).[68]

According to Indologist Alex Wayman, Buddhist esotericism centers on what is known as "the three mysteries" or "secrets": the tantric adept affiliates his body, speech, and mind with the body, speech, and mind of a Buddha through mudra, mantras, and samadhi, respectively.[69] Padmavajra (c. 7th century) explains in his Tantrarthavatara Commentary, the secret Body, Speech, and Mind of the Buddhas are:[70]

Secret of Body: Whatever form is necessary to tame the living beings.
Secret of Speech: Speech exactly appropriate to the lineage of the creature, as in the language of the yaksas, etc.

Secret of Mind: Knowing all things as they really are.
These elements are brought together in the practice of tantric deity yoga, which involves visualizing the deity's body and mandala, reciting the deity's mantra, and gaining insight into the nature of things based on this contemplation. Advanced tantric practices such as deity yoga are taught in the context of an initiation ceremony by tantric gurus or vajracharyas (vajra-masters) to the tantric initiate, who also takes on formal commitments or vows (samaya).[68] In Tibetan Buddhism, advanced practices like deity yoga are usually preceded by or coupled with "preliminary practices" called ngondro, consisting of five to seven accumulation practices and includes prostrations and recitations of the 100 syllable mantra.[71]

Vajrayana is a system of tantric lineages, and thus only those who receive an empowerment or initiation (abhiseka) may practice the more advanced esoteric methods. In tantric deity yoga, mantras, or bijas are used during the ritual evocation of deities that are said to arise out of the uttered and visualized mantric syllables. After the deity's image and mandala has been established, heart mantras are visualized as part of the contemplation in different points of the deity's body.[72]

Most Tantric Buddhists believe nirvana is achievable in a single lifetime with "vigorous study and meditation".[73]

Deity yoga

Main article: Deity yoga

An 18th century Mongolian miniature which depicts a monk generating a tantric visualization

A Japanese depiction of the Amida Triad in Seed Syllable form (Siddham Script). Visualizing deities in the form of seed syllables is a common Vajrayana meditation. In Shingon, one of the most common practices is Ajikan (阿字觀), meditating on the syllable A.
The fundamental practice of Buddhist Tantra is "deity yoga" (devatayoga), meditation on a chosen deity or "cherished divinity" (Skt. Iṣṭa-devatā, Tib. yidam), which involves the recitation of mantras and prayers and visualization of the deity, the associated mandala of the deity's Buddha field, along with consorts and attendant Buddhas and bodhisattvas.[74] According to the Tibetan scholar Tsongkhapa, deity yoga separates Tantra from Sutra practice.[75]

In the Unsurpassed Yoga Tantras, the most widespread tantric form in Indo-Tibetan Buddhism, this method is divided into two stages, generation (utpatti-krama) and completion (nispanna-krama). In the generation stage, one dissolves one's reality into emptiness and meditates on the deity-mandala, resulting in identification with this divine reality. During deity visualization, the deity is to be imagined as not solid or tangible, as "empty yet apparent", with the character of a mirage or a rainbow.[76]

This visualization is to be combined with "divine pride", which is "the thought that one is oneself the deity being visualized."[77] Divine pride is different from common pride because it is based on compassion for others and an understanding of emptiness.[78] The divine image along with the illusory body is then dissolved into luminous emptiness. This dissolution into emptiness is then followed by the visualization of the deity and the yogi's re-emergence as the deity.[77] This practice is repeated over a number of daily sessions. The practitioner proceeds to the completion state after completing a requisite number of mantra repetitions, either defined in the text or given by the empowering lama.[79]

A Tibetan depiction of the perfection stage practices of tummo (Skt. candali, inner heat) and phowa (transference of consciousness)
The Tibetologist David Germano outlines two main types of completion practice: a formless and image-less contemplation on the ultimate empty nature of the mind and various yogas that make use of the illusory body to produce energetic sensations of bliss and warmth.[80] The illusory body yogas systems like the Six Dharmas of Naropa and the Six Yogas of Kalachakra make use of energetic schemas of human psycho-physiology composed of "energy channels" (Skt. nadi, Tib. rtsa), "winds" or currents (Skt. vayu, Tib. rlung), "drops" or charged particles (Skt. bindu, Tib. thig le), and chakras ("wheels"). These subtle energies are seen as "mounts" for consciousness, the physical component of awareness. They are engaged by various means such as pranayama (breath control) to produce blissful experiences that are then applied to the realization of ultimate reality.[81]

Other methods associated with the completion stage in Tibetan Buddhism include dream yoga (which relies on lucid dreaming), practices associated with the bardo (the interim state between death and rebirth), transference of consciousness (phowa), and Chöd, in which the yogi ceremonially offers their body to be eaten by tantric deities in a ritual feast.

Other practices

A Newari Buddhist mandala used for Guru Puja, Nepal, 19th century, gilt copper inlaid with semiprecious stones
Video of a Shingon Goma Fire Ritual at Yakuōin Yūkiji, Mount Takao
Another form of Vajrayana practice are certain meditative techniques associated with Mahāmudrā and Dzogchen, often termed "formless practices" or the path of self-liberation. These techniques do not rely on deity visualization per se but on direct pointing-out instruction from a master, and are often seen as the most advanced and direct methods.[82]

Another distinctive feature of Tantric Buddhism is its unique and often elaborate rituals. They include pujas (worship rituals), prayer festivals, protection rituals, death rituals, tantric feasts (ganachakra), tantric initiations (abhiseka) and the goma fire ritual (common in East Asian Esotericism).

Duration: 1 minute and 11 seconds.1:11
A video of the Cham dance, a traditional practice in some sects of Tibetan Buddhism
An important element in some of these rituals (particularly initiations and tantric feasts) seems to have been the practice of ritual sex or sexual yoga (karmamudra, "desire seal", also called "consort observance", vidyavrata, and euphemistically as "puja"), as well as the sacramental ingestion of "power substances" such as the mingled sexual fluids and uterine blood (often performed by licking these substances off the vulva, a practice termed yonipuja).[83]

The practice of ingestion of sexual fluids is mentioned by numerous tantric commentators, sometimes euphemistically referring to the penis as the "vajra" and the vagina as the "lotus". The Cakrasamvara Tantra commentator Kambala, writing about this practice, states:

The seats are well-known on earth to be spots within the lotus mandala; by abiding within it there is great bliss, the royal nature of nondual joy. Therefore the lotus seat is supreme: filled with a mixture of semen and uterine blood, one should especially kiss it, and lolling with the tongue take it up. Unite the vajra and lotus, with the rapture of drinking [this] liquor.[84]

According to David Gray, these sexual practices probably originated in a non-monastic context and were later adopted by monastic establishments (such as Nalanda and Vikramashila). He notes that the anxiety of figures like Atisa about these practices, and the stories of Virūpa and Maitripa being expelled from their monasteries for performing them, shows that supposedly celibate monastics were undertaking these sexual rites.[85]

Because of its adoption by the monastic tradition, sexual yoga slowly became either done with an imaginary consort visualized by the yogi instead of an actual person, or reserved to a small group of the "highest" or elite practitioners. Likewise, the drinking of sexual fluids was also reinterpreted by later commentators to refer to illusory body anatomy of the perfection stage practices.[86]

Symbols and imagery

Dagchen Rinpoche's hand holds a vajra drawing lines that close the Hevajra Mandala, after the empowerment, Tharlam Monastery of Tibetan Buddhism, Boudha, Kathmandu, Nepal.
Vajrayāna uses a rich variety of symbols, terms, and images that have multiple meanings according to a complex system of analogical thinking. In Vajrayāna, symbols, and terms are multi-valent, reflecting the microcosm and the macrocosm as in the phrase "As without, so within" (yatha bahyam tatha 'dhyatmam iti) from Abhayakaragupta's Nispannayogavali.[87]

The vajra

Bronze vajras and bell from Itsukushima, Japan
The Sanskrit term "vajra" denoted a thunderbolt like a legendary weapon and divine attribute that was made from an adamantine, or an indestructible substance which could, therefore, pierce and penetrate any obstacle or obfuscation. It is the weapon of choice of Indra, the King of the Devas. As a secondary meaning, "vajra" symbolizes the ultimate nature of things which is described in the tantras as translucent, pure and radiant, but also indestructible and indivisible. It is also symbolic of the power of tantric methods to achieve its goals.[88]

A vajra is also a scepter-like ritual object (Standard Tibetan: རྡོ་རྗེ dorje), which has a sphere (and sometimes a gankyil) at its centre, and a variable number of spokes, 3, 5 or 9 at each end (depending on the sadhana), enfolding either end of the rod. The vajra is often traditionally employed in tantric rituals in combination with the bell or ghanta; symbolically, the vajra may represent method as well as great bliss and the bell stands for wisdom, specifically the wisdom realizing emptiness. The union of the two sets of spokes at the center of the wheel is said to symbolize the unity of wisdom (prajña) and compassion (karuna) as well as the sexual union of male and female deities.[89]

Imagery and ritual in deity yoga

Chöd ritual, showing the use of Damaru drum and hand-bell, as well as the Kangling (thighbone trumpet)
Representations of the deity, such as statues (murti), paintings (thangka), or mandala, are often employed as an aid to visualization, in deity yoga. The use of visual aids, particularly microcosmic/macrocosmic diagrams, known as mandalas, is another unique feature of Buddhist Tantra. Mandalas are symbolic depictions of the sacred space of the awakened Buddhas and Bodhisattvas as well as of the inner workings of the human person.[90] The macrocosmic symbolism of the mandala then, also represents the forces of the human body. The explanatory tantra of the Guhyasamaja tantra, the Vajramala, states: "The body becomes a palace, the hallowed basis of all the Buddhas."[91]

Mandalas are also sacred enclosures, sacred architecture that house and contain the uncontainable essence of a central deity or yidam and their retinue. In the book The World of Tibetan Buddhism, the Dalai Lama describes mandalas thus: "This is the celestial mansion, the pure residence of the deity." The Five Tathagatas or 'Five Buddhas', along with the figure of the Adi-Buddha, are central to many Vajrayana mandalas as they represent the "five wisdoms", which are the five primary aspects of primordial wisdom or Buddha-nature.[92]

All ritual in Vajrayana practice can be seen as aiding in this process of visualization and identification. The practitioner can use various hand implements such as a vajra, bell, hand-drum (damaru) or a ritual dagger (phurba), but also ritual hand gestures (mudras) can be made, special chanting techniques can be used, and in elaborate offering rituals or initiations, many more ritual implements and tools are used, each with an elaborate symbolic meaning to create a special environment for practice. Vajrayana has thus become a major inspiration in traditional Tibetan art.

Texts

Three leaves from a manuscript of the Vajrāvalī, a ritual compendium compiled by Abhayakaragupta, abbot of the Vikramashila monastery around 1100 CE
See also: Tantras (Buddhism) and Tibetan Buddhist canon
There is an extended body of texts associated with Buddhist Tantra, including the "tantras" themselves, tantric commentaries and shastras, sadhanas (liturgical texts), ritual manuals (Chinese: 儀軌; Pinyin: Yíguǐ; Rōmaji: Giki), dharanis, poems or songs (dohas), termas and so on. According to Harunaga Isaacson,

Though we do not know precisely at present just how many Indian tantric Buddhist texts survive today in the language in which they were written, their number is certainly over one thousand five hundred; I suspect indeed over two thousand. A large part of this body of texts has also been translated into Tibetan, and a smaller part into Chinese. Aside from these, there are perhaps another two thousand or more works that are known today only from such translations. We can be certain as well that many others are lost to us forever, in whatever form. Of the texts that survive a very small proportion has been published; an almost insignificant percentage has been edited or translated reliably.[93]

Vajrayāna texts exhibit a wide range of literary characteristics—usually a mix of verse and prose, almost always in a Sanskrit that "transgresses frequently against classical norms of grammar and usage," although also occasionally in various Middle Indic dialects or elegant classical Sanskrit.[93]

In Chinese Mantrayana (Zhenyan), and Japanese Shingon, the most influential esoteric texts are the Mahavairocana Tantra and the Vajraśekhara Sūtra.[94][95]

In Tibetan Buddhism, a large number of tantric works are widely studied and different schools focus on the study and practice of different cycles of texts. According to Geoffrey Samuel,

the Sakyapa specialize in the Hevajra Tantra, the Nyingmapa specialize in the various so called Old Tantras and terma cycles, and the most important Kagyudpa and Gelugpa tantras are Guhyasamāja, Cakrasaṃvara and Kālacakra.[96]

Dunhuang manuscripts
The Dunhuang manuscripts also contain Tibetan Tantric manuscripts. Dalton and

Schaik (2007, revised) provide an excellent online catalogue listing 350 Tibetan Tantric Manuscripts] from Dunhuang in the Stein Collection of the British Library which is currently fully accessible online in discrete digitized manuscripts.[97] With the Wylie transcription of the manuscripts they are to be made discoverable online in the future.[98] These 350 texts are just a small portion of the vast cache of the Dunhuang manuscripts.

Traditions

Map showing the dominant Buddhist tradition throughout Asia. Vajrayana (in the form of Tibetan Buddhism) dominates the Himalayan regions and in the Mongolian regions.

The Nīlakaṇṭha Dhāraṇī engraved on a stele. Temple Fo Ding Shan Chao Sheng in Sanyi Township, Taiwan. Erected in June 2005.
Although there is historical evidence for Vajrayāna Buddhism in Southeast Asia and elsewhere (see History of Vajrayāna above), today Vajrayāna exists primarily in the form of the two major traditions of Indo-Tibetan Buddhism (in Tibet and other parts of the PRC, Bhutan, India and also internationally) and Japanese Esoteric Buddhism (mostly in Japan), which is found in the Shingon (literally "True Speech", i.e. mantra) and Tendai schools.

Other traditions like contemporary Chinese Buddhism, Japanese Zen, Korean Buddhism, and Vietnamese Buddhism also make use of esoteric (Chinese: mijiao, Japanese: mikkyo) or mantrayana methods to a lesser extent. In many Asian Mahayana Buddhist traditions, esoteric methods are used as a complement, not as the central practice. This mainly involves the recitation of mantras (like the ten small mantras) and various popular dharanis. However, certain revival movements have attempted to establish new esoteric schools in mainland East Asia such as Mantra School Bright Lineage (in China) and the South Korean Jingak Order.

There was strong connection between the Palas in Bengal, Srivijaya in Nusantara, and the kingdoms in East Asia through the sea route. Medieval monks were a prime factor in the spread of esoteric Buddhism.[99]

A map depicting the spread of Esoteric Buddhism in Southeast and Eastern Eurasia
The distinction between mantrayana traditions is not always rigid. For example, the tantra sections of the Tibetan Buddhist canon of texts sometimes include material not usually thought of as tantric outside the Tibetan Buddhist tradition, such as the widely recited Heart Sutra[100] and even versions of some material found in the Pali Canon.[a]

Chinese Esoteric Buddhism

Main article: Chinese Esoteric Buddhism

The Jing'an Temple in Shanghai, China, which promotes the Chinese Zhenyan

(Mantrayana) tradition.
Esoteric and Tantric teachings followed the same route into northern China as Buddhism itself, arriving via the Silk Road and Southeast Asian Maritime trade routes sometime during the first half of the 7th century, during the Tang dynasty and received sanction from the emperors of the Tang dynasty. During this time, three great masters came from India to China: Śubhakarasiṃha, Vajrabodhi, and Amoghavajra who translated key texts and founded the Zhenyan (真言, "true word", "mantra") tradition.[101]

Zhenyan was also brought to Japan as Shingon during this period. This tradition focused on tantras like the Mahavairocana tantra, and unlike Tibetan Buddhism, it does not employ the antinomian and radical tantrism of the Anuttarayoga Tantras. The prestige of this tradition eventually influenced other schools of Chinese Buddhism such as Chan and Tiantai to adopt various esoteric practices over time, leading to a merging of teachings between the various schools.[102][103][104] During the Yuan dynasty, the Mongol emperors made Tibetan Buddhism the official religion of China, and Tibetan lamas were given patronage at the court.[105] Imperial support of Tibetan Vajrayana continued into the Ming and Qing dynasties.

The vajrācārya of a Yujia Yankou ritual performing a mudrā while wearing a Five Buddha crown adorned with images of the Five Tathāgatas
Today, esoteric traditions are deeply embedded in mainstream Chinese Buddhism and expressed through various rituals which make use of tantric mantra and dhāraṇī and the veneration of certain tantric deities like Cundi and Acala.[106] One example of esoteric teachings still practiced in many Chinese Buddhist monasteries is the Śūraṅgama Sūtra and the dhāraṇī revealed within it, the Śūraṅgama Mantra, which are especially influential in the Chinese Chan tradition.[107] Another example is the popular tantric Yujia Yankou ritual, where monastics take on the role of a vajrācārya and performs deity yoga through the usage of mantras, mudrās and maṇḍala offerings in order to help facilitate the nourishment and ultimate liberation of all sentient beings.[108] In particular, the usage of mantras, mudrās and maṇḍalas in the ritual correspond directly to the concept of the "Three Mysteries" (Chinese: 三密; pinyin: Sānmì) in tantric Buddhism: the "secrets" of body, speech and mind.[108][109] This ritual is commonly performed during or at the end of regular religious temple events such as repentance rites, Buddha recitation retreats, the dedication of a new monastic complex or gatherings for the transmission of monastic vows. It is also widely performed as a post-mortem rite within Chinese society during funerals and other related occasions such as the Ghost Festival.[108] A related ritual that also involves esoteric practices is the extensive Shuilu Fahui ceremony, which involves setting up maṇḍalas of esoteric deities such as the Ten Wisdom Kings as well as the invocation of those deities to the ritual space via mantras, mudrās and visualization.[110][111]

A recent development is known as the "tantric revival movement" (mijiao fuxing yundong 密教復興運動) which involved the revival of Chinese Esoteric schools by Chinese students of Japanese Shingon.[112] Some important figures of this revival include Wang

Hongyuan 王弘願 (1876–1937), and Guru Wuguang (悟光上師 (1918–2000), both trained in Shingon and went on to spread Shingon teachings in the Chinese speaking world.[113][114] These revivalist lineages exist in Hong Kong, Taiwan and Malaysia. Though they draw mainly from Shingon teachings, they have also adopted some Tibetan Buddhist elements.[115]

Another form of esoteric Buddhism in China is the related but unique tradition of Azhaliism, which is practiced among the Bai people of China and venerates Mahakala as a major deity.[116][117]

Japanese esotericism

Shingon Buddhism

Main article: Shingon Buddhism

The Shingon school is found in Japan and includes practices, known in Japan as Mikkyō ("Esoteric (or Mystery) Teaching"), which are similar in concept to those in Vajrayana Buddhism. The lineage for Shingon Buddhism differs from that of Tibetan Vajrayana, having emerged from India during the 9th–11th centuries in the Pala Dynasty and Central Asia (via China) and is based on earlier versions of the Indian texts than the Tibetan lineage. Shingon shares material with Tibetan Buddhism – such as the esoteric sutras (called Tantras in Tibetan Buddhism) and mandalas – but the actual practices are not related.

The primary texts of Shingon Buddhism are the Mahavairocana Sutra and Vajrasekhara Sutra. The founder of Shingon Buddhism was Kukai, a Japanese monk who studied in China in the 9th century during the Tang dynasty and brought back Vajrayana scriptures, techniques and mandalas then popular in China. The school was merged into other schools in China towards the end of the Tang dynasty but was sectarian in Japan. Shingon is one of the few remaining branches of Buddhism in the world that continues to use the siddham script of the Sanskrit language.

Tendai Buddhism

Main article: Tendai

Although the Tendai school in China and Japan does employ some esoteric practices, these rituals came to be considered of equal importance with the exoteric teachings of the Lotus Sutra. By chanting mantras, maintaining mudras, or practicing certain forms of meditation, Tendai maintains that one is able to understand sense experiences as taught by the Buddha, have faith that one is innately an enlightened being, and that one can attain enlightenment within the current lifetime.

Korean milgyo

Esoteric Buddhist practices (known as milgyo, 密教) and texts arrived in Korea during the introduction of Buddhism to the region in 372 CE.[118] Esoteric Buddhism was supported by the royalty of both Unified Silla (668–935) and Goryeo Dynasty (918–1392).[118] During the Goryeo Dynasty esoteric practices were common within large sects like the Seon school and the Hwaeom school as well as smaller esoteric sects like the Sinin (mudra) and Ch'ongji (Dharani) schools. During the era of the Mongol occupation (1251–1350s), Tibetan Buddhism also existed in Korea, though it never gained a foothold there.[119]

During the Joseon dynasty, Esoteric Buddhist schools were forced to merge with the Seon and Kyo schools, becoming the ritual specialists. With the decline of Buddhism in Korea, Esoteric Buddhism mostly died out, save for a few traces in the rituals of the Jogye Order and Taego Order.[119]

There are now five esoteric Buddhist schools in South Korea: Jingak Order, Jineon Order, Chongji Order, Jisong Order, and Cheonhwa Buddhism.[120] According to Henrik H. Sørensen, the Jineon and Jingak Orders "have absolutely no historical link with the Korean Buddhist tradition per se but are late constructs based in large measures on Japanese Shingon Buddhism."[119]

Vietnamese Buddhist esotericism

Statue of Từ Đạo Hạnh wearing an esoteric Five Tathāgatas Crown in the Thầy Temple near Hanoi.

Vietnamese Buddhist esotericism is known as Mật giáo or Mật Tông and is a common part of Vietnamese Mahayana Buddhism (along with Pure Land practice and Thien).[121] Commonly recited esoteric texts include Uṣṇīṣavijayadhāraṇī, the Nīlakaṇṭha Dhāraṇī and the Śūraṅgama mantra. According to Quang Minh Thich "at present, it is still the norm in Vietnamese Buddhist temples, both in Vietnam and abroad, that these mantras, as elements of the Mantrayana, are recited either in their distinctive chanted sessions or in conjunction with other popular Buddhist scriptures. In function, the Vietnamese Tantric practices serve as a complement to the practices of Zen and Pure Land, not as an independent tradition."[121]

The first Vietnamese monk we know of who studied Vajrayana was Master Van Ky (c. 7th century) who received initiation in the kingdom of Srivijaya from a certain Jñanabhadra (Tri Hien) as reported by Yijing.[122] By the 12th century (under the Lý dynasty), esoteric Buddhism was widespread in Vietnam, and was especially favored by the Vô Ngôn Thông school as well as by the Vinitaruci school.[123] One famous esoteric master of this period was Từ Đạo Hạnh.[123] He brought back various texts and practices from Burma. He became famous as a powerful magician.[124] He was fond of the Mahākaruṇika Dhāraṇī.[123] He also spread esoteric teachings throughout Vietnam and liberalized their practice, making them less dependent on reincarnation lineages (similar to Tibetan tulkus).[125] Another promoter of esoteric Buddhism during this period was Sùng Phạm (1004-1078) of Phap Van pagoda who studied in India for nine years before returning to Vietnam and was the teacher of the influential esoteric master Tri Bat.[123] Phap Loa (1284-1330), a leader of the Truc Lam school, was another very influential Vietnamese esoteric master. He is known for establishing esoteric abhiseka (initiation) ceremonies as well as Huayan (Hoa Nghiêm) assemblies. He also wrote various texts on esoteric topics.[126]

Chinese Buddhist esotericism also influenced Vietnamese esotericism during the medieval period, especially the Huayan Esotericism of Daoshen's Xianmi yuantong chengfo xinyao ji (顯密圓通成佛心要集 Collection of Essentials for the Attainment of Buddhahood by Total [Inter-]Penetration of the Esoteric and the Exoteric, T1955).

Some modern teachers and organizations focus specifically on Vietnamese esoteric Buddhism. Thích Viên Đức (1932-1980) was one important modern promoter of Esoteric Buddhism. He is known for translating a collection of Esoteric Buddhist texts, contributing to the dissemination of Esoteric Buddhism in Vietnam. Thích Viên Đức promoted esoteric Buddhist teachings as the fastest path to enlightenment. He established numerous communities in southern Vietnam and was also known as a healer. He also met with Tibetan lamas and Japanese Buddhists.[127] Another modern Vietnamese esoteric organization is Mat Giao Friendship Association who publishes Phước Triệu's Quintessence of Esoteric Buddhism (2004). Esoteric practices are also currently associated with the Thầy Temple in Greater Hanoi. Vietnamese esotericism can also be quite sycretic, borrowing from Chinese, Japanese and Tibetan Buddhism.

Main article: Tibetan Buddhism

Born in the Tantric heartland of Oddiyana (identified as Swat district), Padmasambhava was an important figure in disseminating Buddhism in Tibet
Buddhism was initially established in Tibet in the 8th century when various figures like Padmasambhāva (8th century CE) and Śāntarakṣita (725–788) were invited by King Trisong Detsen, some time before 767. In contrast to its neighbours that adhered to Mahayana, Tibet adopted Vajrayana on full scale following the Samye debate, where Indian Vajrayana scholar Kamalaśīla defeated the Chan Buddhist scholar Moheyan in

an Indian style debate. Tibetan Buddhism reflects the later stages tantric Indian Buddhism of the post-Gupta Early Medieval period (500 to 1200 CE).[128][129]

This tradition practices and studies a set of tantric texts and commentaries associated with the more "left hand" (vamachara) tantras, which are not part of East Asian Esoteric Buddhism. These tantras (sometimes termed 'Anuttarayoga tantras' include many transgressive elements, such as sexual and mortuary symbolism that is not shared by the earlier tantras that are studied in East Asian Buddhism. These texts were translated into Classical Tibetan during the "New translation period" (10th–12th centuries). Tibetan Buddhism also includes numerous native Tibetan developments, such as the tulku system, new sadhana texts, Tibetan scholastic works, Dzogchen literature and Terma literature. There are four major traditions or schools: Nyingma, Sakya, Kagyu, and Gelug in addition to minor schools like Jonang and Rimé movement.

In the pre-modern era, Tibetan Buddhism spread outside of Tibet primarily due to the influence of the Mongol Yuan dynasty (1271–1368), founded by Kublai Khan, which ruled China, Mongolia and eastern Siberia. In the modern era it has spread outside of Asia due to the efforts of the Tibetan diaspora (1959 onwards).

The Tibetan Buddhist tradition is today found in Tibet, Bhutan, northern India, Nepal, southwestern and northern China, Mongolia and various constituent republics of Russia that are adjacent to the area, such as Amur Oblast, Buryatia, Zabaykalsky Krai, the Tuva Republic and Khabarovsk Krai. Tibetan Buddhism is also the main religion in Kalmykia. It has also spread to Western countries and there are now international networks of Tibetan Buddhist temples and meditation centers in the Western world from all four schools.

Bengali Buddhism

Main article: Bengali Buddhists

12th century stone statue of Chakrasamvara in sexual union with Vajravarahi from Bengal

Bengal was a thriving centre of Vajrayana under the patronage of the Pala dynasty. Many mahasiddhas hailed from the Eastern zone of the Indian subcontinent, with the Charyapada, a collection of songs composed by these mahasiddhas, containing early references to Vajrayana as well as being an early written record of Eastern Indic languages. Bengali Vajrayana scholar Atiśa played a vital role in revitalizing Buddhism in Tibet following its persecution by the Bon emperor Langdarma and onset of the Era of Fragmentation, leading to the foundation of the Kadam lineage. Another Bengali Vajrayana scholar Abhayakaragupta also had a profound impact on Tibetan Buddhism. However Vajrayana declined by the time the Sena dynasty came to power. Vajrayana was further affected by the Islamic conquest of India & consolidation of Muslim rule in Bengal, with many of its adherents converting to Islam under duress & later Gaudiya Vaishnavism, which lead to creation of new groups like Sahajiyas. Today Buddhism in Bengal is followed only by a small minority of Jumma people who are followers of

Theravāda Buddhism.[130]

Nepalese Newar Buddhism
Main article: Newar Buddhism

A contemporary Newar vajracharya performing rituals at Swayambhunath
Newar Buddhism is practiced by Newars in Nepal. It is the only form of Vajrayana Buddhism in which the scriptures are written in Sanskrit and this tradition has preserved many Vajrayana texts in this language. Its priests do not follow celibacy and are called vajracharya (literally "diamond-thunderbolt carriers").

Indonesian Esoteric Buddhism
Main article: Indonesian Esoteric Buddhism
Indonesian Esoteric Buddhism refers to the traditions of Esoteric Buddhism found in the Indonesian islands of Java and Sumatra before the rise and dominance of Islam in the region (13–16th centuries). The Buddhist empire of Srivijaya (650 CE–1377 CE) was a major center of Esoteric Buddhist learning which drew Chinese monks such as Yijing and Indian scholars like Atiśa.[131] The temple complex at Borobudur in central Java, built by the Shailendra dynasty also reflects strong Tantric or at least proto-tantric influences, particularly of the cult of Vairocana.[132][133]

Hevajra statue from Khmer empire, dating to the reign of Jayavarman VII
Indonesian Esoteric Buddhism may have also reached the Philippines, possibly establishing the first form of Buddhism in the Philippines. The few Buddhist artifacts that have been found in the islands reflect the iconography of Srivijaya's Vajrayana.[134]

Related traditions
Some traditions are related to Vajrayana, but are not to be seen as "Vajrayana" or "Mantrayana" proper. Vajrayana here referring to the Buddhist tradition based on the tantric literature of North Indian Mahayana, the Buddhist tantras and the works of the Nalanda - Vikramashila masters and the Buddhist mahasiddhas. However, these related traditions may have been influenced by Vajrayana proper and have borrowed practices from Vajrayana schools.

Shugendō

Yamabushi priests at Gose, Nara
Main article: Shugendō
Shugendō was founded in 7th-century Japan by the ascetic En no Gyōja, based on the Queen's Peacocks Sutra. With its origins in the solitary hijiri back in the 7th century, Shugendō evolved as a sort of amalgamation between Esoteric Buddhism, Shinto and several other religious influences including Taoism. Buddhism and Shinto were amalgamated in the shinbutsu shūgō, and Kūkai's syncretic religion held wide sway up until the end of the Edo period, coexisting with Shinto elements within Shugendō[135]

In 1613 during the Edo period, the Tokugawa Shogunate issued a regulation obliging Shugendō temples to belong to either Shingon or Tendai temples. During the Meiji Restoration, when Shinto was declared an independent state religion separate from Buddhism, Shugendō was banned as a superstition not fit for a new, enlightened Japan. Some Shugendō temples converted themselves into various officially approved Shintō denominations. In modern times, Shugendō is practiced mainly by Tendai and Shingon sects, retaining an influence on modern Japanese religion and culture.[136]

Southern Esoteric Buddhism

Main article: Southern Esoteric Buddhism

Abhayagiri vihara was a thriving centre of esoteric Buddhism in Sri Lanka until its suppression by Parakramabahu I.
"Southern Esoteric Buddhism" or Borān kammaṭṭhāna ('ancient practices') is a term for esoteric forms of Buddhism from Southeast Asia, where Theravada Buddhism is dominant. The monks of the Sri Lankan, Abhayagiri vihara once practiced forms of tantra which were popular in the island.[137] Another tradition of this type was Ari Buddhism, which was common in Burma. The Tantric Buddhist 'Yogāvacara' tradition was a major Buddhist tradition in Cambodia, Laos and Thailand well into the modern era.[138]

Southern Esoteric Buddhism is a unique Southeast Asian development based on Theravada Abhidhamma and Pali language sources. As such, it has no direct connection to the Indian "Vajrayana" of the Buddhist tantras, the Indian mahasiddhas and the Nalanda-Vikramashila traditions.

Southern Esoteric Buddhism declined after the rise of Southeast Asian Buddhist modernism. However, esoteric Buddhist practices remain in some contemporary South East Asian traditions, including the Thai Dhammakaya tradition, the Burmese Weizza tradition and in rural Cambodian Buddhism.

Academic study difficulties

Serious Vajrayana academic study in the Western world is in early stages due to the following obstacles:[139]

Although a large number of Tantric scriptures are extant, they have not been formally ordered or systematized.
Due to the esoteric initiatory nature of the tradition, many practitioners will not divulge information or sources of their information.
As with many different subjects, it must be studied in context and with a long history spanning many different cultures.
Ritual, as well as doctrine, need to be investigated.
Buddhist tantric practice is categorized as secret practice; this is to avoid misinformed people from harmfully misusing the practices. A method to keep this secrecy is that

tantric initiation is required from a master before any instructions can be received about the actual practice. During the initiation procedure in the highest class of tantra (such as the Kalachakra), students must take the tantric vows which commit them to such secrecy.[140] "Explaining general tantra theory in a scholarly manner, not sufficient for practice, is likewise not a root downfall. Nevertheless, it weakens the effectiveness of our tantric practice."[141]

Terminology

The terminology associated with Vajrayana Buddhism can be confusing. Most of the terms originated in the Sanskrit language of tantric Indian Buddhism and may have passed through other cultures, notably those of Japan and Tibet, before translation for the modern reader. Further complications arise as seemingly equivalent terms can have subtle variations in use and meaning according to context, the time and place of use. A third problem is that Vajrayana texts employ the tantric tradition of twilight language, a means of instruction that is deliberately coded. These obscure teaching methods relying on symbolism as well as synonym, metaphor and word association add to the difficulties faced by those attempting to understand Vajrayana Buddhism:

In the Vajrayana tradition, now preserved mainly in Tibetan lineages, it has long been recognized that certain important teachings are expressed in a form of secret symbolic language known as saṃdhyā-bhāṣā, 'Twilight Language'. Mudrās and mantras, maṇḍalas and cakras, those mysterious devices and diagrams that were so much in vogue in the pseudo-Buddhist hippie culture of the 1960s, were all examples of Twilight Language [...][142]

The term Tantric Buddhism was not one originally used by those who practiced it. As scholar Isabelle Onians explains:

"Tantric Buddhism" [...] is not the transcription of a native term, but a rather modern coinage, if not totally occidental. For the equivalent Sanskrit tāntrika is found, but not in Buddhist texts. Tāntrika is a term denoting someone who follows the teachings of scriptures known as Tantras, but only in Saivism, not Buddhism [...] Tantric Buddhism is a name for a phenomenon which calls itself, in Sanskrit, Mantranaya, Vajrayāna, Mantrayāna or Mantramahāyāna (and apparently never Tantrayāna). Its practitioners are known as mantrins, yogis, or sādhakas. Thus, our use of the anglicised adjective “Tantric” for the Buddhist religion taught in Tantras is not native to the tradition, but is a borrowed term which serves its purpose.[143]

vte

In various occultist movements, Secret Chiefs are said to be transcendent cosmic authorities, a spiritual hierarchy responsible for the operation and moral calibre of the cosmos, or for overseeing the operations of an esoteric organization that manifests outwardly in the form of a magical order or lodge system. Their names and descriptions have varied through time, differing among those who have claimed experience of contact with them. They are variously held to exist on higher planes of being or to be incarnate; if incarnate, they may be described as being gathered at some special location, such as Shambhala, or scattered through the world working anonymously.

History

One early and influential source on these entities is Karl von Eckartshausen, whose The Cloud upon the Sanctuary,[1] published in 1793, explained in some detail their character and motivations.[2] Several 19th and 20th century occultists claimed to belong to or to have contacted these Secret Chiefs and made these communications known to others: Aleister Crowley (who used the term to refer to members of the upper three grades of his order, A∴A∴),[3] Dion Fortune (who called them the "esoteric order"),[4] and Max Heindel (who called them the "Elder Brothers").[5]

Golden Dawn

Main article: Hermetic Order of the Golden Dawn

The Hermetic Order of the Golden Dawn was founded by persons claiming to be in communication with the Secret Chiefs. One of these Secret Chiefs (or a person in contact with them) was supposedly the (probably fictional) Anna Sprengel, whose name and address were allegedly decoded from the Cipher Manuscripts by William Wynn Westcott.[6]

In 1892, S. MacGregor Mathers (another founder) claimed that he had contacted these Secret Chiefs independently of Sprengel, and that this confirmed his position as head of the Golden Dawn.[7] He declared this in a manifesto four years later saying that they were human and living on Earth, yet possessed terrible superhuman powers.[7] He used this status to found the Second Order within the Golden Dawn,[8] and to introduce the Adeptus Minor ritual.[9]

Aleister Crowley

Main article: Aleister Crowley

While in Algeria in 1909, Aleister Crowley, along with Victor Neuburg, recited numerous Enochian Calls or Aires. After the fifteenth Aire, he declared that he had attained the grade of Magister Templi (Master of the Temple), which meant that he was now on the level of these Secret Chiefs, although this declaration caused many occultists to stop taking him seriously if they had not done so already.[10][11] He also described this attainment as a possible and in fact a necessary step for all who truly followed his path.[a]

AI Overview
Hindu Tantra is a complex spiritual path focused on using rituals, mantras, meditation, and yogic practices to awaken divine energy (Shakti) within, aiming for spiritual

liberation (mukti) and worldly enjoyment (bhukti) by integrating the material and spiritual realms, often centered on deities like Shiva and the Great Goddess. It's a system for spiritual transformation that emphasizes direct experience and uses tools like sacred sounds (mantras) and diagrams (yantras) to achieve union with the divine.
Core Concepts
Shakti: The dynamic, creative, divine feminine energy, seen as the source of the universe, often worshipped as the supreme Goddess (Devi).
Shiva: The static, unmanifested aspect of reality, often seen as the counterpart to Shakti; Tantra seeks to unite Shiva (consciousness) and Shakti (energy).
Non-Dualism (Advaita): The belief that Shiva and Shakti are ultimately one, and the goal is to realize this oneness within oneself.
Key Practices (Tantric Methods)
Mantra: Chanting sacred syllables or phrases for spiritual power.
Yantra/Mandala: Using geometric diagrams as visual aids for meditation and deity invocation.
Yoga & Pranayama: Yogic postures and breath control to channel energy.
Ritual (Puja): Ceremonial worship of deities, often with specific, esoteric rites.
Kundalini Yoga: Awakening the dormant spiritual energy (Kundalini) at the base of the spine.
Goals
Enlightenment/Liberation (Mukti): Achieving oneness with the divine.
Enjoyment (Bhukti): Experiencing the world fully and skillfully, not renouncing it.
Transformation: Using the body and mind as tools for spiritual growth, not seeing them as obstacles.
Tantra vs. Mainstream Hinduism
Tantra offers a faster, more direct path than traditional Vedic methods, making it suitable for the current age (Kali Yuga).
It often integrates aspects of daily life and the physical body into the spiritual path, viewing them as potential vehicles for awakening.
Common Misconceptions
Tantra is often misunderstood as solely focusing on sexual practices (Maithuna), but this is just one ritualistic component within a much broader system of spiritual disciplines.

Tantra (/ˈtʌntrə/; Sanskrit: तन्त्र, lit. 'expansion-device, salvation-spreader; loom, weave, warp') is an esoteric yogic tradition that developed on the Indian subcontinent beginning in the middle of the 1st millennium CE, initially within Shaivism and Shaktism, and subsequently in Mahayana Buddhism and Vaishnavism.[1] The Tantras focus on sādhana, encompassing dīkṣā, rituals, and yoga, within a ritual framework that includes bodily purification, divine self-creation through mantra, dhyāna, pūjā, mudrā, mantra recitation, and the use of yantras or maṇḍalas, despite variations in deities and mantras. They present complex cosmologies, viewing the body as divine and typically reflecting the union of Shiva and Shakti as the path to liberation. Tantric goals include siddhi (supernatural accomplishment), bhoga (worldly enjoyment), and Kuṇḍalinī's ascent, while also addressing states of possession (āveśa) and exorcism.

The term tantra, in the Indian traditions, also means any systematic broadly applicable "text, theory, system, method, instrument, technique or practice".[2][3] A key feature of these traditions is the use of mantras, and thus they are commonly referred to as Mantramārga ("Path of Mantra") in Hinduism or Mantrayāna ("Mantra Vehicle") and Guhyamantra ("Secret Mantra") in Buddhism.[4][5]

In Buddhism, the Vajrayana traditions are known for tantric ideas and practices, which are based on Indian Buddhist Tantras.[6] They include Indo-Tibetan Buddhism, Chinese Esoteric Buddhism, Japanese Shingon Buddhism and Nepalese Newar Buddhism.

Although Southern Esoteric Buddhism does not directly reference the tantras, its practices and ideas parallel them. In Buddhism, tantra has influenced the art and iconography of Tibetan and East Asian Buddhism, as well as historic cave temples of India and the art of Southeast Asia.[7][8][9]

Tantric Hindu and Buddhist traditions have also influenced other Eastern religious traditions such as Jainism, the Tibetan Bön tradition, Daoism, and the Japanese Shintō tradition.[10] Certain modes of worship, such as Puja, are considered tantric in their conception and rituals. Hindu temple building also generally conforms to the iconography of tantra.[note 1][11] Hindu texts describing these topics are called Tantras, Āgamas or Samhitās.[12][13] Though Western views often equate Tantra with sex, scholars emphasize that sexual practices in tantric traditions are rare, highly restricted to initiated adepts, and serve as a means of spiritual transcendence rather than an end in themselves.

Etymology

Tantra (Sanskrit: तन्त्र) literally means "loom, warp, weave".[14][2][15] According to Padoux, the verbal root Tan means: "to extend", "to spread", "to spin out", "weave", "display", "put forth", and "compose". Therefore, by extension, it can also mean "system", "doctrine", or "work".[16]

The connotation of the word tantra to mean an esoteric practice or religious ritualism is a colonial era European invention.[17][18][19] This term is based on the metaphor of weaving, states Ron Barrett, where the Sanskrit root tan means the warping of threads on a loom.[2] It implies "interweaving of traditions and teachings as threads" into a text, technique or practice.[2][15]

The word appears in the hymns of the Rigveda such as in 10.71, with the meaning of "warp (weaving)".[14] It is found in many other Vedic era texts, such as in section 10.7.42 of the Atharvaveda and many Brahmanas.[14][20] In these and post-Vedic texts, the contextual meaning of Tantra is that which is "principal or essential part, main point, model, framework, feature".[14] In the Smritis and epics of Hinduism (and Jainism), the term means "doctrine, rule, theory, method, technique or chapter" and the word appears both as a separate word and as a common suffix, such as atma-tantra meaning "doctrine or theory of Atman (Self)".[14][20]

The term "Tantra" after about 500 BCE, in Buddhism, Hinduism and Jainism is a bibliographic category, just like the word Sutra (which means "sewing together", mirroring the metaphor of "weaving together" in Tantra). The same Buddhist texts are sometimes referred to as tantra or sutra; for example, Vairocabhisambodhi-tantra is also referred to as Vairocabhisambodhi-sutra.[21] The various contextual meanings of the word Tantra vary with the Indian text and are summarized in the appended table.

Appearance of the term "Tantra" in Indian texts

Period[note 2]	Text or author	Contextual meaning of tantra
1500–1100 BCE	Ṛigveda X, 71.9	Loom (or weaving device)[22]
1200–1000 BCE	Sāmaveda, Tandya Brahmana	Essence (or "main part", perhaps denoting the quintessence of the Śāstras)[22]
1200–900 BCE	Atharvaveda X, 7.42	Loom (or weaving)[22]
1200–800 BCE	Yajurveda, Taittiriya Brahmana 11.5.5.3	Loom (or weaving)[22]
800-600 BCE	Śatapatha Brāhmaṇa	Essence (or main part; see above)[22]
600–500 BCE	Pāṇini in Aṣṭādhyāyī 1.4.54 and 5.2.70	Warp (weaving), loom[23]
350–283 BCE	Chanakya on Arthaśāstra	Science;[24] system or shastra[25]
300 CE	Īśvarakṛṣṇa author of Sānkhya Kārikā (kārikā 70)	Doctrine (identifies Sankhya as a tantra)[26]
320 CE	Viṣṇu Purāṇa	Practices and rituals[27]
320–400 CE	Poet Kālidāsa on Abhijñānaśākuntalam	Deep understanding or mastery of a topic[note 3]
423	Gangdhar stone inscription in Rajasthan	Worship techniques (Tantrodbhuta)[28] Dubious link to Tantric practices.[29]
500 [30]	Hindu Agamas	A set of esoteric doctrines and practices, featuring archaic prosody and linguistic evidence dating back to 500 BCE.[30][31] Tantra here implies "Extensive knowledge of principles of reality".[32]
550	Sabarasvamin's commentary on Mimamsa Sutra 11.1.1, 11.4.1 etc.	Thread, text;[33] beneficial action or thing[25]
606–647	Sanskrit scholar and poet Bāṇabhaṭṭa (in Harṣacarita[note 4] and in Kādambari), in Bhāsa's Cārudatta and in Śūdraka's Mṛcchakatika	Set of sites and worship methods to goddesses or Matrikas.[28][34]
650 [35]	Vairocanābhisaṃbodhi Sūtra	The first evidence of Buddhist esoteric doctrines or practices, known as Vajrayāna and sometimes also as Tantrayāna.
post-650	Buddhist tantric literature	Various Vajrayāna esoteric doctrines or practices.
975–1025	Philosopher Abhinavagupta in his Tantrāloka	Set of doctrines or practices, teachings, texts, system (synthesis of the 64 monistic āgamas and based on Kashmir Shaivism)[36][15]
1150–1200	Jayaratha, Abhinavagupta's commentator on Tantrāloka	Set of doctrines or practices, teachings
1690–1785	Bhaskararaya (philosopher)	System of thought or set of doctrines or practices, a canon[37]

Definition

Ancient and medieval era

The 5th-century BCE scholar Pāṇini in his Sutra 1.4.54–55 of Sanskrit grammar, cryptically explains tantra through the example of "Sva-tantra" (Sanskrit: स्वतन्त्र), which he states means "independent" or a person who is his own "warp, cloth, weaver, promoter, karta (actor)".[23] Patanjali in his Mahābhāṣya quotes and accepts Panini's definition, then discusses or mentions it at a greater length, in 18 instances, stating that its metaphorical definition of "warp (weaving), extended cloth" is relevant to many contexts.[38] The word tantra, states Patanjali, means "principal, main".

He uses the same example of svatantra as a composite word of "sva" (self) and tantra, then stating "svatantra" means "one who is self-dependent, one who is his own master, the principal thing for whom is himself", thereby interpreting the definition of tantra.[23] Patanjali also offers a semantic definition of Tantra, stating that it is structural rules, standard procedures, centralized guide or knowledge in any field that applies to many elements.[38]

Starting in the early centuries of the common era, newly revealed Tantras centering on Vishnu, Shiva or Shakti emerged.[39] There are tantric lineages in all main forms of modern Hinduism, such as the Shaiva Siddhanta tradition, the Shakta sect of Shri Vidya, the Kaula, and Kashmir Shaivism.

The ancient Mimamsa school of Hinduism uses the term tantra extensively, and its scholars offer various definitions. For example:

When an action or a thing, once complete, becomes beneficial in several matters to one person, or to many people, that is known as Tantra. For example, a lamp placed amidst many priests. In contrast, that which benefits by its repetition is called Āvāpa, such as massaging with oil. (...)

—Sabara, 6th century, [25][40]
Medieval texts present their own definitions of Tantra. Kāmikā-tantra, for example, gives the following explanation of the term tantra:

Because it elaborates (tan) copious and profound matters, especially relating to the principles of reality (tattva) and sacred mantras, and because it provides liberation (tra), it is called a tantra.[32]

Modern era

The occultist and businessman Pierre Bernard (1875–1955) is widely credited with introducing the philosophy and practices of tantra to the American people, at the same time creating a somewhat misleading impression of its connection to sex.[41] That popular sexualization is more accurately regarded as the western Neo-Tantra movement.

While hugely influential on Hindu practices and ritual, the Tantric traditions are poorly understood by contemporary Hindus.[42] Likewise, western scholarship has often ignored this important aspect of Indian and Hindu-culture.[42]

Many definitions of Tantra have been proposed since, and there is no universally accepted definition.[43] André Padoux, in his review of Tantra definitions offers two, then rejects both. One definition, according to Padoux, is found among Tantra practitioners – it is any "system of observances" about the vision of man and the cosmos where correspondences between the inner world of the person and the macrocosmic reality play an essential role. Another definition, more common among observers and non-practitioners, is some "set of mechanistic rituals, omitting entirely the ideological side".[44]

Tantric traditions have been studied mostly from textual and historical perspectives. Anthropological work on living Tantric tradition is scarce, and ethnography has rarely engaged with the study of Tantra. This is arguably a result of the modern construction of Tantrism as occult, esoteric and secret. Some scholars have tried to demystify the myth of secrecy in contemporary Tantric traditions, suggesting new methodological avenues to overcome the ethical and epistemological problems in the study of living Tantric traditions.[45]

According to David N. Lorenzen, two different kinds of definitions of Tantra exist, narrow and broad.[13] According to the narrow definition, Tantrism, or "Tantric religion", is the elite traditions directly based on the Sanskrit texts called the Tantras, Samhitas, and Agamas.[13][46] Lorenzen's "broad definition" extends this by including a broad range of "magical beliefs and practices" such as Yoga and Shaktism.[46][47]

The term "yoga" is broadly attributed to many traditions and practices, including the western assumption that yoga is synonymous with physical stretching and little more. The Yoga Sutras of Patanjali define yoga as "the stilling of the disturbances of the mind".[48] Richard Payne states that Tantra has been commonly but incorrectly associated with sex, given popular culture's prurient obsession with intimacy. Tantra has been labelled as the "yoga of ecstasy", driven by senseless ritualistic libertinism.[21] This is far from the diverse and complex understanding of what Tantra means to those Buddhists, Hindu and Jains who practice it.[21]

David Gray disagrees with broad generalizations and states that defining Tantra is a difficult task because "Tantra traditions are manifold, spanning several religious traditions and cultural worlds. As a result they are also diverse, which makes it a significant challenge to come up with an adequate definition".[49] The challenge of defining Tantra is compounded by the fact that it has been a historically significant part of major Indian religions, including Buddhism, Hinduism and Jainism, both in and outside South Asia and East Asia.[50] To its practitioners, Tantra is defined as a combination of texts, techniques, rituals, monastic practices, meditation, yoga, and ideology.[51]

According to Georg Feuerstein,

The scope of topics discussed in the Tantras is considerable. They deal with the creation and history of the world; the names and functions of a great variety of male and female deities and other higher beings; the types of ritual worship (especially of Goddesses); magic, sorcery, and divination; esoteric "physiology" (the mapping of the subtle or psychic body); the awakening of the mysterious serpent power (kundalinî-shakti); techniques of bodily and mental purification; the nature of enlightenment; and not least, sacred sexuality.[52]

Hindu puja, temples and iconography all show tantric influence.[note 1] These texts, states Gavin Flood, contain representation of "the body in philosophy, in ritual and in art", which are linked to "techniques of the body, methods or technologies developed within the tantric traditions intended to transform body and self".[53]

Tantrism
Mantra
Vishnu mandala
Sexual yoga
Kali Yantra
Subtle body
Kapala
Elements of Tantrism. Clockwise from upper left: Mantra (Buddhist), Mandala (Hindu), Yantra (of Kali), Skull cup (Kapala), Nadis and Chakras (Tibetan), Deities depicted in sexual union. These are neither compulsory nor universal in Tantrism.[54]
The term tantrism is a 19th-century European invention not present in any Asian language;[18] compare "Sufism", of similar Orientalist origin. According to Padoux, Tantrism is a Western term and notion, not a category that is used by Tantrikas themselves.[17] The term was introduced by 19th-century Indologists, with limited knowledge of India and in whose view Tantrism was a particular, unusual and minority practice in contrast to Indian traditions they believed to be mainstream.[17]

Robert Brown similarly notes that "tantrism" is a construct of Western scholarship, not a concept of the religious system itself.[55] He defines Tantrism as an apologetic label of Westerners for a system that they little understand that is "not coherent" and which is "an accumulated set of practices and ideas from various sources, that has varied between its practitioners within a group, varied across groups, across geography and over its history". It is a system, adds Brown, that gives each follower the freedom to mix Tantric elements with non-Tantric aspects, to challenge and transgress any and all norms, experiment with "the mundane to reach the supramundane".[43]

Teun Goudriaan in his 1981 review of Hindu Tantrism, states that Tantrism usually means a "systematic quest for salvation or spiritual excellence" by realizing and fostering the divine within one's own body, one that is simultaneous union of the masculine-feminine and spirit-matter, and has the ultimate goal of realizing the "primal blissful state of non-duality".[56] It is typically a methodically striven system, consisting of voluntarily chosen specific practices which may include Tantric items such as mantras (bijas), geometric patterns and symbols (mandala), gestures (mudra), mapping of the microcosm within one's body to the macrocosmic elements outside as the subtle body (kundalini yoga), assignments of icons and sounds (nyasa), meditation (dhyana), ritual worship (puja), initiation (diksha) and others.[57] Tantrism, adds Goudriaan, is a living system that is decidedly monistic, but with wide variations, and it is impossible to be dogmatic about a simple or fixed definition.[58]

Tantrism is an overarching term for "Tantric traditions", states David Gray in a 2016 review, that combine Vedic, yogic and meditative traditions from 5th-century Hinduism as well as rival Buddhist and Jain traditions.[42] it is a neologism of western scholars and does not reflect the self-understanding of any particular tantric tradition. While Goudriaan's description is useful, adds Gray, there is no single defining universal characteristic common to all Tantra traditions, being an open evolving system.[19] Tantrism, whether Buddhist or Hindu, can best be characterized as practices, a set of techniques, with a strong focus on rituals and meditation, by those who believe that it is a path to liberation that is characterized by both knowledge and freedom.[59]

Tantrika

According to Padoux, the term "Tantrika" is based on a comment by Kulluka Bhatta on Manava Dharmasastra 2.1, who contrasted vaidika and tantrika forms of Śruti (canonical texts). The Tantrika, to Bhatta, is that literature which forms a parallel part of the Hindu tradition, independent of the Vedic corpus. The Vedic and non-Vedic (Tantric) paths are seen as two different approaches to ultimate reality, the Vedic approach based on Brahman, and Tantrika being based on the non-Vedic Āgama texts.[60] Despite Bhatta attempt to clarify, states Padoux, in reality Hindus and Buddhists have historically felt free to borrow and blend ideas from all sources, Vedic, non-Vedic and in the case of Buddhism, its own canonical works.[61]

One of the key differences between the Tantric and non-Tantric traditions – whether it be orthodox Buddhism, Hinduism or Jainism – is their assumptions about the need for monastic or ascetic life.[62] Non-Tantrika, or orthodox traditions in all three major ancient Indian religions, hold that the worldly life of a householder is one driven by desires and greeds which are a serious impediment to spiritual liberation (moksha, nirvana, kaivalya). These orthodox traditions teach renunciation of householder life, a mendicant's life of simplicity and leaving all attachments to become a monk or nun. In contrast, the Tantrika traditions hold, states Robert Brown, that "both enlightenment and worldly success" are achievable, and that "this world need not be shunned to achieve enlightenment".[62][63] Yet, even this supposed categorical divergence is debatable, e.g. Bhagavad Gita v.2:48–53, including: "Yoga is skill in [the performance of] actions."[64]

Features

The Tantras emphasize spiritual practice or sādhana, including initiation (dīkṣā), rituals, and yoga. A standard ritual framework is present in the Tantras, despite variations in deities and mantras, involving body purification through symbolic dissolution, creation of a divine body or self via mantra, internal worship or dhyāna (visualization), and external worship or pūjā, utilizing hand gestures (mudrā), mantra chanting, and sacred diagrams (yantra, maṇḍala). The Tantras feature complex cosmological hierarchies that incorporate earlier traditions' cosmic structures, with the highest Śaiva Siddhānta realm surpassed by additional realms in Kashmir Śaiva traditions. The body is seen as divine, containing the cosmic order, reflecting the polarity of the male deity and his consort, the feminine energy, often Shiva and his Shakti as Goddess Kuṇḍalinī, with their union symbolizing liberation. The Tantras focus on attaining mystical powers (siddhi) and experiencing bliss in higher realms (bhoga) as part of the practitioner's spiritual journey, also interpreted as the movement of Kuṇḍalinī through the body. The Tantras address possession (āveśa) and the practice of exorcism.[65]

History

Proto-tantric elements in Indian religions

While Tantra arose in the 5th century CE in Shaivite religions, practices and ideas can be found in Indian religion and history which may have been formative to Tantric practices and ideas.

Proto-tantric elements in Vedic religion

Rig Veda

The Keśin hymn of the Rig Veda (10.136) describes the "wild loner" who, states Karel Werner, "carrying within oneself fire and poison, heaven and earth, ranging from enthusiasm and creativity to depression and agony, from the heights of spiritual bliss to the heaviness of earth-bound labor".[66] The Rigveda uses words of admiration for these loners,[66] and whether it is related to Tantra or not, has been variously interpreted. According to David Lorenzen, it describes munis (sages) experiencing Tantra-like "ecstatic, altered states of consciousness" and gaining the ability "to fly on the wind".[67] In contrast, Werner suggests that these are early Yoga pioneers and accomplished yogis of the ancient pre-Buddhist Indian tradition, and that this Vedic hymn is speaking of those "lost in thoughts" whose "personalities are not bound to earth, for they follow the path of the mysterious wind".[66] However, Patrick Olivelle suggests that in the early Vedic-Brahmanical texts, some of which predate the 3rd-century BCE ruler Ashoka, Brahmana and Śramaṇa (ascetics) were neither distinct nor opposed. The later distinctions were semantic developments possibly influenced by the appropriation of the term Śramaṇa by Buddhism and Jainism.[68]

Upanishads

The two oldest Upanishadic scriptures of Hinduism, the Brihadaranyaka Upanishad in section 4.2 and Chandogya Upanishad in section 8.6, refer to nadis (hati) in presenting their theory on how the Atman (Self) and the body are connected and interdependent through energy carrying arteries when one is awake or sleeping, but they do not mention anything related to Tantric practices.[69] The Shvetashvatara Upanishad describes breath control that became a standard part of Yoga, but Tantric practices do not appear in it.[67][70] Likewise, the Taittiriya Upanishad discusses a central channel running through the body and various Vedic texts mention the bodily pranas (vital breaths) that move around in the body and animate it. However, the idea of consciously moving the bodily pranas through yoga is not found in these sources.[71] According to Lorenzen, Vedic ideas related to the body later diversified into the "mystical anatomy" of nadis and chakras found in Tantra.[72] The yogic component of Tantrism appears clearly in Bāṇabhaṭṭa's Harshacharita and Daṇḍin's Dashakumaracharita.[73] In contrast to this theory of Lorenzen, other scholars such as Mircea Eliade consider Yoga and the evolution of Yogic practices to be separate and distinct from the evolution of Tantra and Tantric practices.[74]

Tapas and spiritualized sexual energy

According to Geoffrey Samuel, the inner development of a spiritual energy called tapas becomes a central element of Vedic religion in the Brahmanas and Srauta texts. In these texts, ascetic practices allow a holy man to build up tapas, a kind of magical inner heat, which allows them to perform all sorts of magical feats as well as granting visions and divine revelations.[75] Samuel also notes that in the Mahabharata, one of the commonest use of the term "yoga" refers to "a dying warrior transferring himself at death to the sphere of the sun through yoga, a practice that links up with Upanisadic references to the channel to the crown of the head as the pathway by which one can travel through the solar orb to the World of Brahman." This practice of transferring one's consciousness at death is still an important practice in Tibetan Buddhism.[76] Samuel also notes that sexual rituals and a spiritualized sexuality are mentioned in the late Upanishads. According to Samuel, "late Vedic texts treat sexual intercourse as symbolically equivalent to the Vedic sacrifice, and ejaculation of semen as the offering." This theme can be found in the Jaiminiya Brahmana, the Chandogya Upanisad, and the Brhadaranyaka Upanisad. The Brhadaranyaka contains various sexual rituals and practices which are mostly aimed at obtaining a child which are concerned with the loss of male virility and power.[77]

Yogini cults

David Gordon White views Yogini cults as foundational to early tantra but disagrees with scholars who maintain that the roots of such cults lie in an "autochthonous non-Vedic source" such as indigenous tribes or the Indus Valley civilization.[78] Instead, White suggests Vedic Srauta texts mention offerings to goddesses Rākā, Sinīvālī, and Kuhū in a manner similar to a tantric ritual.[79]

Atharvaveda

Frederick Smith – a professor of Sanskrit and Classical Indian Religions, considers Tantra to be a religious movement parallel to the Bhakti movement of the 1st millennium CE.[80] Tantra along with Ayurveda, states Smith, has traditionally been attributed to Atharvaveda, but this attribution is one of respect not of historicity. Ayurveda has primarily been an empirical practice with Vedic roots, but Tantra has been an esoteric, folk movement without grounding that cannot be traced to anything in Atharvaveda or any other vedic text.[80]

Proto-Tantric elements in Buddhism

A Buddhist dhāraṇī (incantation), the Nilaṇṭhanāmahṛdaya dhāraṇī, in Siddham Script with Chinese transliteration

Pre-tantric Buddhism contains elements which could be seen as proto-tantric, and which may have influenced the development of the Buddhist Tantric tradition. The use of magical chants or incantations can be found in the early Buddhist texts as well as in some Mahayana sutras.[81] These magical spells or chants were used for various reasons, such as for protection, and for the generation of auspiciousness.[82] Mahayana incantations are called dhāraṇīs. Some Mahayana sutras incorporate the use of mantras, a central feature of tantric practice.

According to Geoffrey Samuel, sramana groups like the Buddhists and Jains were associated with the dead. Samuel notes that they "frequently settled at sites associated with the dead and seem to have taken over a significant role in relation to the spirits of the dead." To step into this realm required entering a dangerous and impure supernatural realm from the Indian perspective. This association with death remains a feature of modern Buddhism, and in Buddhist countries today, Buddhist monks and other ritual specialists are in charge of the dead.[83] Thus, the association of tantric practitioners with charnel grounds and death imagery is preceded by early Buddhist contact with these sites of the dead.

Some scholars think that the development of tantra may have been influenced by the cults of nature spirit-deities like Yakṣas and Nagas.[84] Yakṣa cults were an important part of early Buddhism. Yakṣas are powerful nature spirits which were sometimes seen as guardians or protectors.[85] Yakṣas like Kubera are also associated with magical incantations. Kubera is said to have provided the Buddhist sangha with protection spells in the Āṭānāṭiya Sutta.[86] These spirit deities also included numerous female deities (yakṣiṇī) that can be found depicted in major Buddhist sites like Sanchi and Bharhut. In early Buddhist texts there is also mention of fierce demon like deities called rākṣasa and rākṣasī, like the children-eating Hārītī.[87] They are also present in Mahayana texts, such as in Chapter 26 of the Lotus Sutra which includes a dialogue between the Buddha and a group of rākṣasīs, who swear to uphold and protect the sutra. These figures also teach magical dhāraṇīs to protect followers of the Lotus Sutra.[88]

A key element of Buddhist Tantric practice is the visualization of deities in meditation. This practice is actually found in pre-tantric Buddhist texts as well. In Mahayana sutras like the Pratyutpanna Samādhi and the three Amitabha Pure land sutras.[89] There are other Mahāyāna sutras which contain what may be called "proto-tantric" material such as the Gandavyuha and the Dasabhumika which might have served as a source for the imagery found in later Tantric texts.[90] According to Samuel, the Golden Light Sutra (c. 5th century at the latest) contains what could be seen as a proto-mandala. In the second chapter, a bodhisattva has a vision of "a vast building made of beryl and with divine jewels and celestial perfumes. Four lotus-seats appear in the four directions, with four Buddhas seated upon them: Aksobhya in the East, Ratnaketu in the South, Amitayus in the West and Dundubhīśvara in the North."[91]

A series of artwork discovered in Gandhara, in modern-day Pakistan, dating from about the 1st century CE, show Buddhist and Hindu monks holding skulls.[92] The legend corresponding to these artworks is found in Buddhist texts, and describes monks "who tap skulls and forecast the future rebirths of the person to whom that skull belonged".[92][93] According to Robert Brown, these Buddhist skull-tapping reliefs suggest that tantric practices may have been in vogue by the 1st century CE.[92]

Proto-Tantric elements in Shaktism and Shaivism

A modern aghori with a skull-cup (Kapala). Their predecessors, the medieval Kapalikas ("Skull-men") were influential figures in the development of transgressive or "left hand" Shaiva tantra.

The Mahabharata, the Harivamsa, and the Devi Mahatmya in the Markandeya Purana all mention the fierce, demon-killing manifestations of the Great Goddess, Mahishamardini, identified with Durga-Parvati.[94] These suggest that Shaktism, reverence and worship for the Goddess in Indian culture, was an established tradition by the early centuries of the 1st millennium.[95] Padoux mentions an inscription from 423 to 424 CE which mentions the founding of a temple to terrifying deities called "the mothers".[96] However, this does not mean Tantric rituals and practices were as yet a part of either Hindu or Buddhist traditions. "Apart from the somewhat dubious reference to Tantra in the Gangadhar inscription of 423 CE", states David Lorenzen, it is only 7th-century Banabhatta's Kadambari which provide convincing proof of Tantra and Tantric texts.[29]

Shaivite ascetics seem to have been involved in the initial development of Tantra, particularly the transgressive elements dealing with the charnel ground. According to Samuel, one group of Shaiva ascetics, the Pasupatas, practiced a form of spirituality that made use of shocking and disreputable behavior later found in a tantric context, such as dancing, singing, and smearing themselves with ashes.[97]

Early Tantric practices are sometimes attributed to Shaiva ascetics associated with Bhairava, the Kapalikas ("skull men", also called Somasiddhatins or Mahavartins).[98][99][100] Besides the shocking fact that they frequented cremation grounds and carried human skulls, little is known about them, and there is a paucity of primary sources on the Kapalikas.[101][100] Samuel also states that the sources depict them as using alcohol and sex freely, that they were associated with terrifying female spirit-deities called yoginis and dakinis, and that they were believed to possess magical powers, such as flight.[102]

Kapalikas are depicted in fictional works and also widely disparaged in Buddhist, Hindu and Jain texts of the 1st millennium CE.[101][103] In Hāla's Gatha-saptasati (composed by the 5th century AD), for example, the story calls a female character Kapalika, whose lover dies, he is cremated, she takes his cremation ashes and smears her body with it.[99] The 6th-century Varāhamihira mentions Kapalikas in his literary works.[103] Some of the Kāpālika practices mentioned in these texts are those found in Shaiva Hinduism and Vajrayana Buddhism, and scholars disagree on who influenced whom.[104][105]

These early historical mentions are in passing and appear to be Tantra-like practices, they are not detailed nor comprehensive presentation of Tantric beliefs and practices. Epigraphic references to the Kaulas Tantric practices are rare. Reference is made in the early 9th century to vama (left-hand) Tantras of the Kaulas.[106] Literary evidence suggests Tantric Buddhism was probably flourishing by the 7th century.[67] Matrikas, or fierce mother goddesses that later are closely linked to Tantra practices, appear both in Buddhist and Hindu arts and literature between the 7th and 10th centuries.[107]

Rise and development

According to Peter C. Bisschop, the expansion of the Pāśupata Śaivite movement (early CE) throughout North India gave rise to different forms of Śaivism, eventually leading to the emergence of various tantric traditions.[108]

According to David B. Gray, Vajrayana originated from pre-existing Tantric traditions, also known as 'Tantrism', which emerged within Hinduism during the first millennium CE. These early Hindu tantric practices had a profound influence on South Asian Mahāyāna Buddhism, leading to the emergence of distinct Buddhist tantric traditions in the 7th century CE. These traditions quickly spread across Southeast, East, and Central Asia, giving rise to unique forms in East Asia and Tibet.[109]

According to Gavin Flood, the earliest date for the Tantra texts related to Tantric practices is 600 CE, though most of them were probably composed after the 8th century onwards.[110] According to Flood, very little is known about who created the Tantras, nor much is known about the social status of these and medieval era Tantrikas.[111]

Flood states that the pioneers of Tantra may have been ascetics who lived at the cremation grounds, possibly from "above low-caste groups", and were probably non-Brahmanical and possibly part of an ancient tradition.[112][113][114] By the early medieval times, their practices may have included the imitation of deities such as Kali and Bhairava, with offerings of non-vegetarian food, alcohol and sexual substances. According to this theory, these practitioners would have invited their deities to enter them, then reverted the role in order to control that deity and gain its power.[111] These ascetics would have been supported by low castes living at the cremation places.[111]

According to Samuel, a key element in the development of tantra was "the gradual transformation of local and regional deity cults through which fierce male and, particularly, female deities came to take a leading role in the place of the yaksa deities."

Samuel states that this took place between the fifth to eighth centuries CE.[115] According to Samuel, there are two main scholarly opinions on these terrifying goddesses which became incorporated into Śaiva and Buddhist Tantra. The first view is that they originate out of a pan-Indian religious substrate that was not Vedic. Another opinion is to see these fierce goddesses as developing out of the Vedic religion.[116]

Alexis Sanderson has argued that tantric practices originally developed in a Śaiva milieu and were later adopted by Buddhists. He cites numerous elements that are found in the Śaiva Vidyapitha literature, including whole passages and lists of pithas, that seem to have been directly borrowed by Vajrayana texts.[117] This has been criticized by Ronald M. Davidson, however, due to the uncertain date of the Vidyapitha texts.[118] Davidson argues that the pithas seem to have been neither uniquely Buddhist nor Śaiva, but frequented by both groups. He also states that the Śaiva tradition was also involved in the appropriation of local deities and that tantra may have been influenced by tribal Indian religions and their deities.[119] Samuel writes that "the female divinities may well best be understood in terms of a distinct Śākta milieu from which both Śaivas and Buddhists were borrowing",[120] but that other elements, like the Kapalika style practices, are more clearly derived from a Śaiva tradition.[120]

There is considerable evidence that the Hevajra and Cakrasamvara tantras borrow significant portions from Saiva sources. The text Cakrasamvara and its commentaries have revealed numerous attempts by the Buddhists to enlarge and modify it, both to remove references to Saiva deities and to add more Buddhist technical terminology.[121]

Vamachara and Dakshinachara

Vamachara

Vamachara is used to describe a particular mode of tantric worship or sadhana (spiritual practice) that uses heterodox methods to sublimate for spiritual growth. These tantric practices also included secret initiation ceremonies in which individuals would enter the tantric family (kula) and receive the secret mantras of the tantric deities. These initiations included the consumption of the sexual substances (semen and female sexual secretions) produced through ritual sex between the guru and his consort. These substances were seen as spiritually powerful and were also used as offerings for tantric deities.[122] For both Śaivas and Buddhists, tantric practices often took place at important sacred sites (pithas) associated with fierce goddesses.[123] Samuel writes that "we do not have a clear picture of how this network of pilgrimage sites arose." Whatever the case, it seems that it was in these ritual spaces visited by both Buddhists and Śaivas that the practice of Kaula and Anuttarayoga Tantra developed during the eighth and ninth centuries.[124] Besides the practices outlined above, these sites also saw the practice of animal sacrifice as blood offerings to Śākta goddesses like Kamakhya. This practice is mentioned in Śākta texts like the Kālikāpurāṇ̣a and the Yoginītantra. In some of these sites, such as Kamakhya Pitha, animal sacrifice is still widely practiced by Śāktas.[125] Samuel states that transgressive and antinomian tantric practices developed in both Buddhist and Brahmanical (mainly Śaiva ascetics like the Kapalikas) contexts and that "Śaivas and Buddhists borrowed extensively from each other, with varying degrees of acknowledgement." According to Samuel, these deliberately transgressive practices included, "night time orgies in charnel grounds, involving the eating of human flesh, the use of ornaments, bowls and musical instruments made from human bones, sexual relations while seated on corpses, and the like."[126] Samuel writes that the Saiva Tantra tradition appears to have originated as ritual sorcery carried out by hereditary caste groups (kulas) and associated with sex, death and fierce goddesses. The initiation rituals involved the consumption of the mixed sexual secretions (the clan essence) of a male guru and his consort. These practices were adopted by Kapalika styled ascetics and influenced the early Nath siddhas. Over time, the more extreme external elements were replaced by internalized yogas that make use of the subtle body. Sexual ritual became a way to reach the liberating wisdom taught in the tradition.[127]

Another key and innovative feature of medieval tantric systems was the development of internal yogas based on elements of the subtle body (sūkṣma śarīra). This subtle anatomy held that there were channels in the body (nadis) through which certain substances or energies (such as vayu, prana, kundalini, and shakti) flowed. These yogas involved moving these energies through the body to clear out certain knots or blockages (granthi) and to direct the energies to the central channel (avadhuti, sushumna). These yogic practices are also closely related to the practice of sexual yoga, since sexual intercourse was seen as being involved in the stimulation of the flow of these energies.[128] Samuel thinks that these subtle body practices may have been influenced by Chinese Daoist practices.[129]

One of the earliest mentions of sexual yoga practice is in the Buddhist Mahāyānasūtrālamkāra of Asanga (c. 5th century), which states "Supreme self-control is achieved in the reversal of sexual intercourse in the blissful Buddha-poise and the untrammelled vision of one's spouse."[130] According to David Snellgrove, the text's mention of a 'reversal of sexual intercourse' might indicate the practice of withholding ejaculation. Snellgrove states that it is possible that sexual yoga was already being practiced in Buddhist circles at this time, and that Asanga saw it as a valid practice.[131] Likewise, Samuel thinks that there is a possibility that sexual yoga existed in the fourth or fifth centuries (though not in the same transgressive tantric contexts where it was later practiced).[132]

It is only in the seventh and eighth centuries however that we find substantial evidence for these sexual yogas. Unlike previous Upanishadic sexual rituals however, which seem to have been associated with Vedic sacrifice and mundane ends like childbirth, these sexual yogas were associated with the movement of subtle body energies (like Kundalini and Chandali, which were also seen as goddesses), and also with spiritual ends.[133] These practices seemed to have developed at around the same time in both Saiva and Buddhist circles, and are associated with figures such as Tirumūlar, Gorakhnath, Virupa, Naropa. The tantric mahasiddhas developed yogic systems with subtle body and sexual elements which could lead to magical powers (siddhis), immortality, as well as spiritual liberation (moksha, nirvana). Sexual yoga was seen as one way of producing a blissful expansion of consciousness that could lead to liberation.[132]

According to Jacob Dalton, ritualized sexual yoga (along with the sexual elements of the tantric initiation ritual, like the consumption of sexual fluids) first appears in Buddhist works called Mahayoga tantras (which include the Guhyagarbha and Guhyasamaja).[134][135] These texts "focused on the body's interior, on the anatomical details of the male and female sexual organs and the pleasure generated through sexual union." In these texts, sexual energy was also seen as a powerful force that could be harnessed for spiritual practice and according to Samuel "perhaps create the state of bliss and loss of personal identity which is homologised with liberating insight."[134] These sexual yogas continued to develop further into more complex systems which are found in texts dating from about the ninth or tenth century, including the Saiva Kaulajñānanirṇaya and Kubjikātantra as well as the Buddhist Hevajra, and Cakrasamvara tantras which make use of charnel ground symbolism and fierce goddesses.[136] Samuel writes that these later texts also combine the sexual yoga with a system of controlling the energies of the subtle body.[129]

The Buddhists developed their own corpus of Tantras, which also drew on various Mahayana doctrines and practices, as well as on elements of the fierce goddess tradition and also on elements from the Śaiva traditions (such as deities like Bhairava, which were seen as having been subjugated and converted to Buddhism).[110][137] Some Buddhist tantras (sometimes called "lower" or "outer" tantras) which are earlier works, do not make use of transgression, sex and fierce deities. These earlier Buddhist tantras mainly reflect a development of Mahayana theory and practice (like deity visualization) and a focus on ritual and purity.[138] Between the eighth and tenth centuries, new tantras emerged which included fierce deities, kula style sexual initiations, subtle body practices and sexual yoga. The later Buddhist tantras are known as the "inner" or "unsurpassed yoga" (Anuttarayoga or "Yogini") tantras. According to Samuel, it seems that these sexual practices were not initially practiced by Buddhist monastics and instead developed outside of the monastic establishments among traveling siddhas.[139]

Dakshinachara

Dakshinachara is used to describe tantric sects that do not engage in heterodox practices. The Brahma Yamala, a tantric text, asserts that there are three currents of tradition (dakshina, vama, and madhyama) characterized respectively by the predominance of each of the three gunas (sattva, rajas, and tamas). According to this text, dakshina is characterized by sattva, and is pure; madhyama (a balance of the two), characterized by rajas, is mixed; and vama, characterized by tamas, is impure. The tantras of each class follow a particular line of spiritual practice.[140] N. N. Bhattacharyya explains the Sanskrit technical term ācāra as follows:

The means of spiritual attainment which varies from person to person according to competence.... Ācāras are generally of seven kinds – Veda, Vaiṣṇava, Śaiva, Dakṣiṇa, Vāma, Siddhāṇta, and Kaula, falling into two broad categories – Dakṣiṇa and Vāma. Interpretations vary regarding the nature and grouping of the ācāras.[141]

Tantric age

From the 8th to the 14th century, Tantric traditions rose to prominence and flourished throughout India and beyond.[142][143][18][144] By the 10th century, the main elements of tantric practice had reached maturity and were being practiced in Saiva and Buddhist contexts. This period has been referred to as the 'Tantric Age' by some scholars due to prevalence of Tantra.[145] Also by the 10th century, numerous tantric texts (variously called Agamas, Samhitas and Tantras) had been written, particularly in Kashmir, Nepal and Bengal.[146] By this time, Tantric texts had also been translated into regional languages such as Tamil, and Tantric practices had spread across South Asia.[147] Tantra also spread into Tibet, Indonesia and China. Gavin Flood describes the Tantric age as follows:

> Tantrism has been so pervasive that all of Hinduism after the eleventh century, perhaps with the exception of the vedic Srauta tradition, is influenced by it. All forms of Saiva, Vaisnava and Smarta religion, even those forms which wanted to distance themselves from Tantrism, absorbed elements derived from the Tantras.[147]

Though the whole northern and Himalayan part of India was involved in the development of tantra, Kashmir was a particularly important center, both Saiva and Buddhist and numerous key tantric texts were written there according to Padoux.[148] According to Alexis Sanderson, the Śaiva Tantra traditions of medieval Kashmir were mainly divided between the dualistic Śaiva Siddhanta and the non-dualist theology found in Śakta lineages like the Trika, Krama and Kaula. The non-dualists generally accepted and made use of sexual and transgressive practices, while the dualists mostly rejected them.[149] Saiva tantra was especially successful because it managed to forge strong ties with South Asian kings who valued the power (shakti) of fierce deities like the warrior goddess Durga as a way to increase their own royal power. These kings took part in royal rituals led by Saiva "royal gurus" in which they were symbolically married to tantric deities and thus became the earthly representative of male gods like Shiva. Saiva tantra could also employ a variety of protection and destruction rituals which could be used for the benefit of the kingdom and the king.[150] Tantric Shaivism was adopted by the kings of Kashmir, as well as by the Somavamshis of Odisha, the Kalachuris, and the Chandelas of Jejakabhukti (in Bundelkhand).[151] There is also evidence of state support from the Cambodian Khmer Empire.[152] As noted by Samuel, in spite of the increased depiction of female goddesses, these tantric traditions all seemed to have been mostly "male-directed and male-controlled."[153]

During the Tantric Age, Buddhist Tantra was embraced by the Mahayana Buddhist mainstream and was studied at the great universities such as Nalanda and Vikramashila, from which it spread to Tibet and to the East Asian states of China, Korea, and Japan. This new Tantric Buddhism was supported by the Pala Dynasty (8th–12th century) which supported these centers of learning and also built grand tantric temples and monasteries such as Somapura Mahavihara and Odantapuri while establishing good relations with the Tibetan Empire and Srivijaya Empire where the Buddhist Mahasiddhas of the Vajrayana tradition spread their influence via songs of realization like those collected in the Charyapada which were orally transmitted in various lineages and translated into many different languages over time.[154][155] The later Khmer kings and the Indonesian Srivijaya kingdom also supported tantric Buddhism. According to Samuel, while the sexual and transgressive practices were mostly undertaken in symbolic form (or through visualization) in later Tibetan Buddhist monastic contexts, it seems that in the eighth to tenth century Indian context, they were actually performed.[156]

In the 10th and 11th centuries, both Shaiva and Buddhist tantra evolved into more tame, philosophical, and liberation-oriented religions. This transformation saw a move from external and transgressive rituals towards a more internalized yogic practice focused on attaining spiritual insight. This recasting also made tantric religions much less open to attack by other groups. In Shaivism, this development is often associated with the Kashmiri master Abhinavagupta (c. 950 – 1016 CE) and his followers, as well the movements which were influenced by their work, like the Sri Vidya tradition (which spread as far as South India, and has been referred to as "high" tantra).[157]

In Buddhism, this taming of tantra is associated with the adoption of tantra by Buddhist monastics who sought to incorporate it within the Buddhist Mahayana scholastic framework. Buddhist tantras were written down and scholars like Abhayakaragupta wrote commentaries on them. Another important figure, the Bengali teacher Atisha, wrote a treatise which placed tantra as the culmination of a graduated Mahayana path to awakening, the Bodhipathapradīpa. In his view, one needed to first begin practicing non-tantric Mahayana, and then later one might be ready for tantra. This system became the model for tantric practice among some Tibetan Buddhist schools, like the Gelug. In Tibet, the transgressive and sexual practices of tantra became much less central and tantric practice was seen as suitable only for a small elite group.[158] New tantras continued to be composed during this later period as well, such as the Kalachakra (c. 11th century), which seems to be concerned with converting Buddhists and non-Buddhists alike, and uniting them together against Islam. The Kalachakra teaches sexual yoga, but also warns not to introduce the practice of ingesting impure substances to beginners, since this is only for advanced yogis. This tantra also seems to want to minimize the impact of the transgressive practices, since it advises tantrikas to outwardly follow the customs of their country.[159]

Another influential development during this period was the codification of tantric yogic techniques that would later become the separate movement known as Hatha Yoga. According to James Mallinson, the original "source text" for Hatha Yoga is the Vajrayana Buddhist Amṛtasiddhi (11th century CE) attributed to the mahasiddha Virupa. This text was later adopted by Saiva yogic traditions (such as the Naths) and is quoted in their texts.[160][161]

Another tradition of Hindu Tantra developed among the Vaishnavas, this was called the Pāñcarātra Agama tradition. This tradition avoided the transgressive and sexual elements that were embraced by the Saivas and the Buddhists.[127] There is also a smaller tantric tradition associated with Surya, the sun god. Jainism also seems to have developed a substantial Tantra corpus based on the Saura tradition, with rituals based on yakshas and yakshinis. However, this Jain tantrism was mainly used for pragmatic purposes like protection, and was not used to attain liberation. Complete manuscripts of these Jain tantras have not survived.[162][163] The Jains also seem to have adopted some of the subtle body practices of tantra, but not sexual yoga.[129] The Svetambara thinker Hemacandra (c. 1089–1172) discusses tantric practices extensively, such as internal meditations on chakras, which betray Kaula and Nath influences.[164]

Reception and later developments

Tantric goddess Bhairavi and her consort Shiva depicted as Kāpālika ascetics, sitting in a charnel ground. Painting by Payāg from a 17th-century manuscript (c. 1630–1635), Metropolitan Museum of Art, New York City.
There seems to have been some debate regarding the appropriateness of tantra. Among the Hindus, those belonging to the more orthodox Vedic traditions rejected the Tantras. Meanwhile, tantrikas incorporated Vedic ideas within their own systems, while considering the Tantras as the higher, more refined understanding.[162] Meanwhile, some Tantrikas considered the Tantras to be superior to the Vedas, while others considered them complementary such as Umapati, who is quoted as stating: "The Veda is the cow, the true Agama its milk."[165]

According to Samuel, the great Advaita philosopher Shankara (9th century) "is portrayed in his biography, the Sankaravijaya, as condemning the approaches of various kinds of Tantric practitioners and defeating them through argument or spiritual power." He also is said to have encouraged the replacement of fierce goddesses with benign female deities, and thus to have promoted the Sri Vidya tradition (which worships a peaceful and sweet goddess, Tripura Sundari). Though it is far from certain that Shankara actually campaigned against tantra, he is traditionally seen as someone who purified Hinduism from transgressive and antinomian tantric practices.[166]

The 14th-century Indian scholar Mādhavācārya (in Sarva-Darsana-Sangraha) wrote copious commentaries on then existing major schools of Indian philosophies and practices, and cited the works of the 10th century Abhinavagupta, who was considered a major and influential Tantra scholar.[167] However, Madhavacarya does not mention Tantra as a separate, distinct religious or ritual-driven practice. The early 20th-century Indian scholar Pandurang Vaman Kane conjectured that Madhavacharya ignored Tantra because it may have been considered scandalous. In contrast, Padoux suggests that Tantra may have been so pervasive by the 13th century that "it was not regarded as being a distinct system."[167]

Hindu tantra, while practiced by some of the general lay population, was eventually overshadowed by the more popular Bhakti movements that swept throughout India from the 15th century onwards. According to Samuel, "these new devotional styles of religion, with their emphasis on emotional submission to a supreme saviour-deity, whether Saivite or Vaisnavite, were better adapted, perhaps, to the subaltern role of non-Muslim groups under Muslim rule."[168] Saiva tantra did remain an important practice among most Saiva ascetics however.[169] Tantric traditions also survived in certain regions, such as among the Naths of Rajasthan, in the Sri Vidya tradition of South India and in the Bengali Bauls.[168]

In Buddhism, while tantra became accepted in the great Mahayana establishments of Nalanda and Vikramashila and spread to the Himalayan regions, it also experienced serious setbacks in other regions, particularly Southeast Asia. In Burma, for example, King Anawratha (1044–1077) is said to have disbanded tantric "Ari" monks. As Theravada Buddhism became dominant in South East Asian states, tantric religions became marginalised in those regions.[170] In Sri Lanka, tantric Buddhism also suffered debilitating setbacks. Initially the large Abhayagiri Monastery was a place where the practice of Vajrayana seems to have flourished during the 8th century. However, Abhayagiri was disbanded and forced to convert to the orthodox Mahāvihāra sect during the reign of Parakramabahu I (1153–1186).[171]

Regarding the reception of tantra during the period of Hindu modernism in the 19th and 20th centuries, Samuel writes that this period saw "a radical reframing of yogic practices away from the Tantric context." Samuel notes that while Hindu Hatha yoga had its origins in a Saiva tantric context,

Given the extremely negative views of Tantra and its sexual and magical practices which prevailed in middle-class India in the late nineteenth and twentieth centuries, and still largely prevail today, this was an embarrassing heritage. Much effort was given by people such as Swami Vivekananda into reconstructing yoga, generally in terms of a selective Vedantic reading of Patañjali's Yogasutra (de Michelis 2004). The effort was largely successful, and many modern Western practitioners of yoga for health and relaxation have little or no knowledge of its original function as a preparation for the internal sexual practices of the Nath tradition.[169]

Buddhist tantra has survived in modern Indo-Tibetan Buddhism, in various Japanese traditions such as Shingon, and in the Newar Buddhism of the Kathmandu Valley.[172] There are also magical quasi-tantric traditions in Southeast Asia, sometimes termed

Esoteric Southern Buddhism, though they are not called "tantric" and have been marginalised by state supported modernist forms of Theravada Buddhism.[173]

Tantric traditions

Hindu tantra

Within Hinduism, the word tantra often refers to a text, which may or may not be "tantric." Conversely, various tantric texts are actually not always called tantras (instead they may be called āgama, jñāna, saṃhitā, siddhānta, vidyā).[84][174] There are also tantric Upanishads, which are late Upanishads as well as tantric Puranas (and Puranas influenced by tantric ideas).[175] Besides these types of texts, there are also various types of tantric "śastras" (treatises) which may be "commentaries, digests, compilations, monographs, collections of hymns or of names of deities, and mantras and works on mantras." Though much of this vast body of tantric literature is in Sanskrit, others have also been written in Indian vernacular languages. As noted by Padoux, the largest portion of these tantric works are Shaiva texts.[176]

Tantric texts and practitioners ("tantrikas" and "tantrinis") are often contrasted with Vedic texts and those who practice Vedic religion ("Vaidikas"). This non-Vedic path was often termed Mantramarga ("The way of mantras") or Tantrasastra ("Tantra teaching"). One of the most well known comments on this dichotomy is Kulluka Bhatta's statement in his 15th-century commentary to the Manusmriti which states that revelation (sruti) is twofold – Vedic and Tantric.[174] Hindu tantric teachings are generally seen as revelations from a divine being (such as Śiva, or the Goddess) which are considered by tantrikas to be superior to the Vedas in leading beings to liberation. They are also considered to be more effective during the Kali Yuga, a time of much passion (kama). However, tantric thinkers like Abhinavagupta, while considering tantra as superior, do not totally reject Vedic teachings, and instead consider them valid on a lower level since they also derive from the same source, the supreme Godhead.[84][177]

There are various Hindu tantric traditions within Shaivism, Shaktism and Vaishnavism.[178] There are numerous tantric texts for these different traditions with different philosophical points of view, ranging from theistic dualism to absolute monism.[note 5][179] According to David B. Gray, "one of the most important tropes in the history of the dissemination of tantric traditions is that of lineage, the transmission of teachings along an uninterrupted lineage, from master to disciple, the so-called guruparaṃparā."[84] These various traditions also differ among themselves on how heterodox and transgressive they are (vis a vis the Vedic tradition). Since tantric rituals became so widespread, certain forms of tantra were eventually accepted by many orthodox Vedic thinkers such as Jayanta Bhatta and Yamunacarya as long as they did not contradict Vedic teaching and social rules.[180] Tantric scriptures such as the Kali centered Jayadrathayamala also state that tantrikas can follow the Vedic social rules out of convenience and for the benefit of their clan and guru.[181] However, not all Vedic thinkers accepted tantra. For example, Kumarila Bhatta wrote that one should have no contact with tantrikas nor speak to them.[182]

Śaiva Tantra is called the Mantramārga, and is often seen as being a separate teaching than the ascetic "Atimārga" tradition (which includes the Pāśupatas and Kāpālikas).[84][183] There are various doctrines, textual classes and schools of Shaiva Tantra, which often overlap with the Shakta tradition in different ways.

The Śaiva Siddhānta tradition is the earliest Śaiva Tantra school and was characterized by public rituals performed by priests. Some of their texts, like the Niśvāsatattvasaṃhitā have been dated to the fifth century.[84] Their scriptures (the Śaiva Agamas) and basic doctrines are also shared by the other traditions as a common Śaiva doctrine and many of their rites are also used in other schools of Shaiva Tantra.[183] The prescriptions and rituals of the Śaiva Siddhānta Agamas are generally followed by Śaiva temples in South India and they are mostly compatible with orthodox Brahmanism, lacking terrifying deities and animal sacrifice.[184]

The Mantrapīṭha tradition on the other hand, worships Svacchanda Bhairava, a terrifying form of Shiva also known as "Aghora" ("not fearsome"). This tradition promotes the Skull observance (Kapalavrata), that is, carrying a skull, a skull staff (khatavanga) and worshipping in cremation grounds.[185] One contemporary group of Kapalika ascetics are the Aghoris.

There are also various traditions who are classified as "Vidyāpīṭha". The texts of this tradition focus on worshipping goddesses known as Yoginīs or Ḍākinīs and include antinomian practices dealing with charnel grounds and sexuality.[84] These goddess centered traditions of the Śākta tantras are mostly of the "left" current (vamachara) and are thus considered more heterodox.[186]

There are various Vidyāpīṭha traditions, which focus on a bipolar, bisexual divinity that is equal parts male and female, Śaiva and Śākta.[84][186] The Yamalatantras worship Bhairava along with Kapalini, the goddess of the skull. The Goddess centered traditions are known as the Kulamārga (Path of the Clans), referring to the clans of the goddesses and their Shakti tantras, which may have been established around the 9th century. It includes sexual rituals, sanguinary practices, the ritual consumption of liquor and the importance of spirit possession. It includes various sub-traditions the developed in different regions of India, such as the Trika lineage (which worships a trio of deities: Parā, Parāparā, and Aparā), the tradition of the fierce goddess Guhyakālī, Krama tradition, focusing on the goddess Kālī, the Kubjikā cult, and the southern tradition which worships the beautiful goddess Kāmeśvarī or Tripurasundarī.[84][186]

During the 10th century, the syncretic nondual tradition of Kashmir Śaivism developed. According to Alexis Sanderson, this tradition arose out of the confrontation between the dualistic and more orthodox Śaiva Siddhānta and the nondual transgressive traditions of the Trika and Krama. According to David B. Gray, this school integrated elements from both of these traditions, "the end result was a nondualistic system in which the transgressive elements were internalized and hence rendered less offensive to the orthodox."[84]

The philosophers of Kashmir Śaivism, especially Abhinavagupta (c. 975–1025 ce) and his student Jayaratha, are some of the most influential philosophers who wrote on Hindu tantra.[187] These thinkers synthesized the various goddess and Śaiva lineages and philosophies into a comprehensive and influential religious system. According to David White, Abhinavagupta "sublimates, cosmeticizes, and semanticizes many of its practices into a type of meditative asceticism whose aim is to realize a transcendent subjectivity".[84] Thus, his work domesticated the radically antinomian practices of Vidyāpīṭha lineages into meditative exercises.[84]

In Nepal, the Sarvamnaya tantra system evolved as a tantrik tradition which drew upon the āmnāya system. Amnaya is often translated as 'transmission'. This system serves as the guiding source for the tradition of worship of deities that emanate from the five different aspects of Lord Śiva. At its core, the concept of Āmnāya revolves around the idea that Śiva, with his five faces, (referred to as Sadashiva), imparts the secret Tantric teachings to the goddess through her corresponding five emanations. Scholarly work on Sarvamnaya can be found in the article, "The transmission of all powers: Sarvāmnāya Śākta Tantra and the semiotics of power in Nepāla-maṇḍala" by Jeffrey S. Lidke.[188]

The last major Śaiva tantric tradition is that of the Nāth or "Split-Ear" Kānphaṭa tradition, which emerged in the 12th or 13th century. They produced various Haṭhayoga texts which draw on tantric yogas.[84][189]

While the Śākta traditions continued to develop in different ways, sometimes in a more popular and devotional direction, many of them retain various tantric elements today. The two most important and popular Śākta tantra traditions today are the Southern Kaula transmission, which focus on the beautiful goddess Śrī (śrīkula) or Lalitā Tripurasundarī and the Northern and Eastern transmission, focusing on the ferocious goddess Kālī (kālīkula).[84] The southern transmission gave rise to the Śrī Vidyā tradition, an important tantric religion in South India. Though it takes much of its philosophical and doctrinal system from Kashmir Shaivism, it generally avoids the transgressive elements and is orthodox or "right handed". Bhaskararaya (18th century) is considered a key thinker of this tradition.[84][187] The Kālīkula tradition is particularly important in East and South India and Kālī remains a popular goddess in India, a focus of much devotion.[84]

Vaiṣṇava

The main Vaiṣṇava tradition that is associated with tantra is the Pañcharatra. This tradition produced a number of tantric texts including Lakshmi tantra, but most of the other tantras are lost. However, this sect does not identify itself as "tantric".[84] The worship and ritual of most of the Vaiṣṇava temples in South India follow this tradition, which is ritually similar to the Shaiva Siddhanta. According to Padoux, "from the doctrinal point of view, they are nearer to brahmanical orthodoxy (proudly asserted by some of their affiliates) and their mantras are indeed often Vedic."[190]

According to David B. Gray,

During the medieval period another tantric Vaiṣṇava tradition emerged in Bengal. Known as the Sahajiyā tradition, it flourished in Bengal around the 16th through 19th centuries. It taught that each individual is a divinity, embodying the divine couple Kṛṣṇa and his consort Rādhā. This tradition integrated earlier Hindu and Buddhist tantric practices within a Vaiṣṇava theological framework.[84]

Buddhist tantra

There are various Buddhist tantric traditions with the goal of attaining Enlightenment which are called by different names such as Vajrayana, Secret Mantra, Mantrayana and so on.[191][note 6][192] The Indo-Tibetan Buddhist tradition has been dominant in Tibet and the Himalayan regions.[191] It first spread to Tibet in the 8th century and quickly rose to prominence.[84] The Tibetan Buddhist tantric teachings have recently been spread to the Western world by the Tibetan diaspora. Nepalese Newar Buddhism meanwhile is still practiced in the Kathmandu Valley by the Newar people. The tradition maintains a canon of Sanskrit texts, the only Buddhist tantric tradition to still do so.

Buddhist Tantric practices and texts which developed from the 5th to the 8th centuries were translated into Chinese and are preserved in the Chinese Buddhist canon as well as in the Dunhuang manuscripts.[191][193] Tantric materials involving the use of mantras and dharanis began to appear in China during the fifth century period, and Buddhist masters such as Zhiyi developed proto-tantric rituals based on esoteric texts.[194] Chinese Esoteric Buddhism became especially influential in China in the Tang dynasty period with the arrival of esoteric masters such as Vajrabodhi and Amoghavajra to the capital city of Chang'an.[195] The succeeding Song dynasty saw an influx of new esoteric texts being transmitted by monks from Central Asia.[196] Chinese Esoteric Buddhist rituals were also noted to be particularly popular in the Liao dynasty, which contended with the Song for control of northern China.[197] Due to the highly eclectic nature of Chinese Buddhism where sectarian denominations were not strictly drawn between the various Buddhist schools (even during the Tang dynasty), and where most Buddhist masters mixed practices from the different traditions, Chinese Esoteric Buddhist practices were absorbed by lineages from the other Buddhist traditions such as Chan and Tiantai.[198][199] For example, the Northern School of Chan even became known for its esoteric practices of dhāraṇīs and mantras.[200] During the Yuan and Ming dynasty periods, certain esoteric elements from Tibetan Buddhism were also adapted and incorporated into general Chinese Buddhist practices and rituals. In modern Chinese Buddhism, the esoteric traditions continue to be passed on and practiced through numerous tantric rituals such as the Shuilu Fahui ceremony and the Yujia Yankou rite, which involve practices like deity yoga and mandala offerings, as well as the recitation of tantric mantras such as the Cundī Dhāraṇī, the Hundred Syllable Mantra of Vajrasattva, the Mahācakravidyārāja Dhāraṇī and the Shurangama Mantra.[198][199] Esoteric practices also spread to Korea and to Japan, where it exists as an independent tradition called Shingon.[84]

Other religions

The Hindu and Buddhist Tantric traditions significantly influenced other religions such as Jainism, Sikhism, the Tibetan Bön tradition, Daoism, Shintō, Sufi Islam, and the Western New Age movement.[201][202][203]

In the Sikh literature, the ideas related to Shakti and goddess reverence attributed to Guru Gobind Singh, particularly in the Dasam Granth, are related to tantra ideas found in Buddhism and Hinduism.[204]

The Jain worship methods, states Ellen Gough, were likely influenced by Shaktism ideas, and this is attested by the tantric diagrams of the Rishi-mandala where the

Tirthankaras are portrayed.[205] The Tantric traditions within Jainism use verbal spells or mantra, and rituals that are believed to accrue merit for rebirth realms.[206]

Practices

One of the main elements of the Tantric literature is rituals.[207] Rather than one coherent system, Tantra is an accumulation of practices and ideas from different sources. As Samuel writes, the tantric traditions are "a confluence of a variety of different factors and components." These elements include: mandalas, mantras, internal sexual yogic practices, fierce male and female deities, cremation ground symbolism, as well as concepts from Indian Philosophy.[208]

André Padoux notes that there is no consensus among scholars as to which elements are characteristic for Tantra, nor is there any text that contains all those elements.[209] Also, most of those elements can also be found in non-Tantric traditions.[209] Because of the wide range of communities covered by the term, it is problematic to describe tantric practices definitively. However, there are sets of practices and elements which are shared by numerous tantric traditions, and thus a family resemblance relationship can be established among them.

Different scholars give different main features of tantra. For example, David N. Lorenzen writes that tantra shares various "shamanic and yogic" practices, worship of goddesses, association with specific schools like the Kaulas and Kapalikas, as well as tantric texts.[67] Christopher Wallis meanwhile, basing himself on the definition given the tantric scholar Rāmakaṇṭha, gives four main features of tantra: "1) concern with ritual modes of manipulation (of the environment or one's own awareness), 2) requirement for esoteric initiation (to receive access to the scriptural teachings and practices), 3) a twofold goal of practice: the soteriological and supramundane one of liberation (variously conceived) and/or the mundane one of extraordinary power over other beings and one's environment, and 4) the claim that these three are explicated in scriptures that are the word of God (āgama) or the Buddha (buddhavacana)."[210]

According to Anthony Tribe, a scholar of Buddhist Tantra, Tantra has the following defining features:[211]

Centrality of ritual, especially the worship of deities
Centrality of mantras
Visualisation of and identification with a deity
Need for initiation, esotericism and secrecy
Importance of a teacher (guru, acharya)
Ritual use of mandalas (maṇḍala)
Transgressive or antinomian acts
Revaluation of the body
Revaluation of the status and role of women
Analogical thinking (including microcosmic or macrocosmic correlation)
Revaluation of negative mental states

There are a wide array of Tantric techniques or spiritual practices (sadhana) such as:[212]

Dakshina: Donation or gift to one's teacher
Diksha or Abhiseka: Initiation ritual which may include shaktipat
Ganachakra: A ritual feast during which a sacramental meal is offered
Guru yoga and Guru devotion (bhakti)
Mandalas and Yantras, symbolic diagrams of forces at work in the universe
Mantras: reciting syllables, words, and phrases
Mudras, or hand gestures
Nyasa, installing mantras on the body
Prāyaścitta - an expiation ritual performed if a puja has been performed wrongly
Puja (worship ritual) and other forms of bhakti
Ritual music and dance
Ritual purification (of idols, of one's body, etc.)
Ritual sacrifice, including animal sacrifice
Singing of hymns of praise (stava)
Sexual yoga: ritual sexual union (with an actual physical consort or an imagined deity)
The acquisition and use of siddhis or supernormal powers. Associated with vamachara ('left-hand path')
Use of taboo substances such as alcohol, cannabis, meat and other entheogens.
Visualization of deities and Identification these deities in meditation (deity yoga)
Vrata and Samaya: vows or pledges, sometimes to do ascetic practices like fasting
Yatra: pilgrimage, processions
Yoga, including breathing techniques (pranayama) and postures (asana), is employed to balance the energies in the body/mind.
Worship and ritual

A Pujari in front of a Ganesha statue, Brihadishwara Shiva Temple
Worship or puja in Hindu Tantra differs from Vedic forms somewhat. While in the Vedic practice of yajna there are no idols, shrines, and symbolic art, in tantra they are important means of worship.[213]

Rituals are particularly important in the dualistic Śaiva Siddhānta which according to Padoux "is typically characterized by an overabundance of rituals, which are necessarily accompanied by mantras. These rituals are not so much a succession of actions as a play of mentally visualized and experienced images, a situation common to all Tantric traditions, where rites, meditation, and yoga are exercises in creative identifying imagination." The theory behind these rituals is the idea that all humans have a fundamental impurity (mala) that binds them to rebirth. This impurity can be removed by ritual action (along with proper knowledge). The initial step in this path is the ritual of initiation (diksa), which opens to door to future liberation at death.[214]

In the non-dualistic and transgressive (or "left hand") traditions like the Kali cults and the Trika school, rituals and pujas can include certain left hand path elements that are not found in the more orthodox traditions. These transgressive elements include the use of skulls and other human bone implements (as part of the Kapalika vow), fierce deities like Bhairava, Kubjika and Kali which were used as part of meditative visualizations, ritual possession by the deities (avesa), sexual rites and offering the deity (as well as consuming) certain impure substances like meat, alcohol and sexual fluids.[215] Padoux explains the transgressive practices as follows:

On the ritual and mental plane, transgression was an essential trait by which the nondualistic Tantric traditions set themselves apart from other traditions – so much so that they used the term "nondualistic practice" (advaitacara) to refer to the Kaula transgressive practices as a rejection of the duality (dvaita) of pure and impure in brahmanical society. Let us also note that for the nondualistic Saiva systems, the Yoginis were not active merely in the world of spirits; they were also powers present in humans – mistresses of their senses, governing their affects, which acquired an intensity and super-natural dimension through this divinization. This led adepts to an identification of their individual consciousness with the infinite divine Consciousness, thus also helping them transcend the sexual plane.[216]

In both the Buddhist and Saiva contexts, the sexual practices are often seen as a way to expand one's consciousness through the use of bliss.[216]

There is also a fundamental philosophical disagreement between Śaiva Siddhānta and the non-dualistic schools like the Trika regarding ritual. In Śaiva Siddhānta, only ritual can do away with "innate impurities" (anavamala) that bind individual Selfs, though the ritual must be performed with an understanding of their nature and purpose as well as with devotion. In the view of the Trika school (especially in the work of Abhinavagupta), only knowledge (jñana) which is a "recognition" (pratyabhijña) of our true nature, leads to liberation. According to Padoux, "this is also, with nuances, the position of the Pñcaratra and of other Vaisnava Tantric traditions."[217]

Yoga, mantra, meditation

A meditating Shiva is visited by Parvati
Tantric yoga is first and foremost an embodied practice, which is seen as having a divine esoteric structure. As noted by Padoux, tantric yoga makes use of a "mystic physiology" which includes various psychosomatic elements known as the subtle body. This imaginary inner structure includes chakras ("wheels"), nadis ("channels"), and energies (like Kundalini, Chandali, different pranas and vital winds, etc.). The tantric body is also held to be a microcosmic reflection of the universe, and is thus seen as containing gods and goddesses.[218] According to Padoux, the "internalized image of the yogic body" is a fundamental element for nearly all meditative and tantric ritual practices.[219]

The use of mantras is one of the most common and widespread elements of tantric practice. They are used in rituals as well as during various meditative and yogic practices. Mantra recitation (japa) is often practiced along with nyasa ("depositing" the mantra), mudras ("seals", i.e. hand gestures) and complex visualizations involving divine symbols, mandalas and deities. Nyasa involves touching various parts of the body while reciting mantra, which is thought to connect the deity with the yogis body and transform the body into that of the deity.[220]

Mantras are also often visualized as being located within the yogi's body as part of tantric meditations. For example, in the "Yogini Heart" tantra, a Śrī Vidyā text, the yogi is instructed to imagine the five syllables (HA SA KA LA HRIM) of the deity's mantra in the muladhara chakra. The next set of five syllables (HA SA KA HA LA HRIM) is visualized in the heart chakra and the third cluster (SA KA LA HRIM) in the cakra between the eyebrows. The yogi is further instructed to lengthen the enunciation of the M sound at the end of the HRIM syllable, a practice called nada (phonic vibration). This practice goes through various increasingly subtle stages until it dissolves into the silence of the Absolute.[221]

Another common element found in tantric yoga is the use of visionary meditations in which tantrikas focus on a vision or image of the deity (or deities), and in some cases imagine themselves as being the deity and their own body as the body of the deity.[222] The practitioner may use visualizations, identifying with a deity to the degree that the aspirant becomes the Ishta-deva (or meditational deity). In other meditations, the deities are visualized as being inside the tantrika's body. For example, in Abhinavagupta's Tantraloka (chapter 15), the Trika trinity of goddesses (Parā, Parāparā, and Aparā) are visualized on the ends of the three prongs of a trident (located above the head). The rest of the trident is imagined positioned along the central axis of the yogi's body, with the blazing corpse of Shiva visualized in the head.[223]

Mandalas and yantras

Sri Yantra diagram with the Ten Mahavidyas. The triangles represent Shiva and Shakti; the snake represents Spanda and Kundalini.

Yantra are mystical diagrams which are used in tantric meditation and ritual. They are usually associated with specific Hindu deities such as Shiva, Shakti, or Kali. Similarly, a puja may involve focusing on a yantra or mandala associated with a deity.[224]

According to David Gordon White, geometrical mandalas are a key element of Tantra.[225] They are used to represent numerous tantric ideas and concepts as well as used for meditative focus. Mandalas symbolically communicate the correspondences between the "transcendent-yet-immanent" macrocosm and the microcosm of mundane human experience.[225] The godhead (or principal Buddha) is often depicted at the center of the mandala, while all other beings, including the practitioner, are located at various distances from this center.[225] Mandalas also reflected the medieval feudal system, with the king at its centre.[226]

Mandalas and Yantras may be depicted in various ways, on paintings, cloth, in three dimensional form, made out of colored sand or powders, etc. Tantric yoga also often involves the mental visualization of a mandala or yantra. This is usually combined with mantra recitation and other ritual actions as part of a tantric sadhana (practice).

Sex and eroticism

See also: Tantric sex

While tantra involves a wide range of ideas and practices which are not always of a sexual nature, Flood and Padoux both note that in the West, Tantra is most often thought of as a kind of ritualized sex or a spiritualized yogic sexuality.[227][228][229] According to Padoux, "this is a misunderstanding, for though the place of sex in Tantra is ideologically essential, it is not always so in action and ritual." Padoux further notes that while sexual practices do exist and were used by certain tantric groups, they "lost their prevalence when Tantra spread to other larger social groups."[229]

In the tantric traditions which do use sex as part of spiritual practice (this refers mainly to the Kaulas, and also Tibetan Buddhism), sex and desire are often seen as a means of transcendence that is used to reach the Absolute. Thus, sex and desire are not seen as ends in themselves. Because these practices transgress orthodox Hindu ideas of ritual purity, they have often given tantra a bad image in India, where it is often condemned by the orthodox. According to Padoux, even among the traditions which accept these practices, they are far from prominent and practiced only by a "few initiated and fully qualified adepts".[230]

Western scholarly research

Three-dimensional triangular symbol

The Sri Yantra (shown here in the three-dimensional projection known as Sri Meru or Maha Meru, used primarily by Srividya Shakta sects)

John Woodroffe

The first Western scholar to seriously study Tantra was John Woodroffe (1865–1936), who wrote about Tantra under the pen name Arthur Avalon and is known as the "founding father of Tantric studies".[231] Unlike previous Western scholars Woodroffe advocated for Tantra, defending and presenting it as an ethical and philosophical system in accord with the Vedas and Vedanta.[232] Woodroffe practised Tantra and, while trying to maintain scholastic objectivity, was a student of Hindu Tantra (the Shiva-Shakta tradition).[233][234][235]

Further development

Following Woodroffe, a number of scholars began investigating Tantric teachings, including scholars of comparative religion and Indology such as Agehananda Bharati, Mircea Eliade, Julius Evola, Carl Jung, Alexandra David-Néel, Giuseppe Tucci and Heinrich Zimmer.[236] According to Hugh Urban, Zimmer, Evola and Eliade viewed Tantra as "the culmination of all Indian thought: the most radical form of spirituality and the archaic heart of aboriginal India", regarding it as the ideal religion for the modern era. All three saw Tantra as "the most transgressive and violent path to the sacred".[237]

From Wikipedia, the free encyclopedia
Llewellyn Vaughan-Lee

Born	1953 (age 71–72) London, England
Occupations	lecturer, author

Llewellyn Vaughan-Lee (born 1953, in London) is a Sufi mystic and lineage successor in the Naqshbandiyya-Mujaddidiyya Sufi Order. He is an extensive lecturer and author of several books about Sufism, mysticism, dreamwork and spirituality.

Life and education

Llewellyn Vaughan-Lee was born in London in 1953. He began following the Naqshbandiyya-Mujaddidiyya Sufi path at the age of 19, after meeting Irina Tweedie, author of Daughter of Fire: A Diary of a Spiritual Training with a Sufi Master. He became Irina Tweedie's successor and a teacher in the Naqshbandiyya Sufi Order.

He initially trained as an English high school teacher and taught for six years, before completing a Ph.D. on Jungian Psychology and Shakespeare.[1] In 1991 he moved to Northern California and founded The Golden Sufi Center to help make available the teachings of this Sufi lineage. He currently lives in California.[2][3][4]

Works

Author of several books, Llewellyn Vaughan-Lee has lectured extensively throughout the United States, Canada, and Europe on Sufism, mysticism, Jungian psychology and dreamwork. He has also specialised in the area of dreamwork, integrating the ancient Sufi approach to dreams with the insights of Jungian psychology. Since 2000 the focus of his writing and teaching has been on spiritual responsibility in our present time of transition, and an awakening global consciousness of oneness. More recently he has written about the feminine, the world soul, the anima mundi, and the emerging field of spiritual ecology. He has also hosted a number of Sufi conferences bringing together different Sufi orders in North America.

His initial work from 1990 to 2000, including his first eleven books,[5] was to make the Sufi path more accessible to the Western seeker. The second series of books, starting from the year 2000 with The Signs of God, are focused on a spiritual teachings about oneness and how to bring them into contemporary life, with the final book in this series being Alchemy of Light. He is editor and contributor to the 2013 anthology Spiritual Ecology: The Cry of the Earth[6] (Summer 2013, new edition Fall 2016), which was followed the same year with the publication of his work Darkening of the Light: Witnessing the End of an Era.[7] His most recent books are Seasons of the Sacred: Reconnecting to the Wisdom Within Nature and the Soul[8] and Words from the Water's Edge: Mystical Writings of Llewellyn Vaughan-Lee.[9] In Autumn of 2022 he began a podcast series, "Stories for a Living Future" [10] about the need to reconnect our consciousness to the living Earth, what he terms "a deep ecology of consciousness."

Llewellyn has been featured in two films, One the Movie and Wake Up. He has also been featured in the television series Global Spirit and in August 2012, he was interviewed by Oprah Winfrey as a part of her Super Soul Sunday series.[11] A regular contributor to Sufi magazine, Parabola, and other periodicals and websites, he also wrote a series of blogs between 2010 and 2017 on the Huffington Post.[12] In Fall 2015, Parabola magazine featured a comprehensive interview with Llewellyn Vaughan-Lee on his life and work, Part of an Ancient Story: A Conversation with Llewellyn Vaughan-Lee.[13] In 2019 he was interviewed by Bjork for her Cornucopia Tour Book [14]

View all
Angel sigils are mystical symbols, intricate geometric designs representing specific angels (like Archangels Michael, Gabriel, Raphael) used for invocation, protection, or guidance, acting as keys to access their divine energy, often through meditation, prayer, or placed on altars for focused spiritual work, drawing from ancient grimoires like The Lesser Key of Solomon and The Grimoire of Armadel. They function as visual shortcuts to channel angelic power, with each unique symbol holding the essence of the angel it represents for specific intentions like courage, healing, wisdom, or protection.

What They Are
Seals/Glyphs: Unique coded symbols, often geometric, encapsulating an angel's name or essence.
Invocation Tools: Act as magical keys to call upon an angel's specific powers.
Historical Roots: Found in grimoires (like Armadel, Lesser Key of Solomon) and ancient texts, evolving from medieval magic.
Common Examples & Meanings
Archangel Michael: Protection, courage, strength.
Archangel Gabriel: Wisdom, communication, prophecy, vision.
Archangel Raphael: Healing, guidance.
Archangel Raziel: Psychic abilities, divine secrets, breaking patterns.
Metatron's Cube (or Enoch Sigil): A powerful symbol for concealment or connecting to higher realms.
How to Use Them
Identify Your Need: Determine which angel corresponds to your goal (love, money, healing, etc.).
Find the Sigil: Locate the specific sigil for that angel.
Set Intent: Focus your intention (e.g., "I need courage").
Invoke: Meditate on the sigil, draw it, or place it on an altar while saying prayers or secret words associated with the angel.
Create Connection: The sigil helps focus your mind and energy, making instant contact possible for the angel to hear you.
Types of Angelic Magic
Invocation: Calling angels for help.
Protection: Warding off negative energies or even other angels (Enochian sigils).
Manifestation: Using sigils for love, wealth, understanding, and healing.

A sigil (/ˈsɪdʒɪl/)[1] is a type of symbol used in magic. The term usually refers to a pictorial signature of a spirit (such as an angel, demon, or deity). In modern usage, especially in the context of chaos magic, a sigil refers to a symbolic representation of the practitioner's desired outcome.

History

72 seals from The Lesser Key of Solomon
The term sigil derives from the Latin sigillum (pl. sigilla), meaning "seal".[2] In medieval magic, the term sigil was commonly used to refer to occult signs which represented various angels and demons which the practitioner might summon.[2]

The Lesser Key of Solomon
Further information: List of sigils of demons
Magical training books called grimoires often listed pages of such sigils. A particularly well-known list is in The Lesser Key of Solomon, in which the sigils of the 72 princes of the hierarchy of hell are given for the magician's use. Such sigils are considered by some to be the equivalent of the true name of the spirit and thus granted the magician a measure of control over the beings.[3]

Methods of construction
A common method of creating the sigils of certain spirits was to use kameas, a special use case of magic squares—the names of the spirits were converted to numbers, which were then located on the magic square. The locations were then connected by lines, forming an abstract figure.[4]

The word sigil [...] has a long history in Western magic. The members of the Golden Dawn were perfectly familiar with it ("combining the letters, the colours, the attributions and their Synthesis, thou mayest build up a telesmatic Image of a Force. The Sigil shall then serve thee for the tracing of a Current which shall call into action a certain

Elemental Force") and it was used in the making of talismans. The sigil was like a signature or sign of an occult entity.[5]

Austin Osman Spare

English artist and occultist Austin Osman Spare (1886–1956) developed his own unique method of creating and using sigils, which has had a lasting effect on modern occultism. Spare did not agree with medieval practice of using these, arguing that such supernatural beings were simply complexes in the unconscious, and could be actively created through the process of sigilization.[6][5]

Spare's technique became a cornerstone of chaos magic.[7] It also influenced artist Brion Gysin, who experimented with combining Spare's sigil method with the traditional form of magic squares:

Calligraphic magick squares were one of the techniques most commonly applied by Gysin. He would reduce a name or an idea to a "glyph" and then write across the paper from right to left, turn the paper and do the same again, and so on, turning the paper around and around to create a multidimensional grid... The same techniques and consciously driven functional intention also permeated his paintings. In a very real sense, everything he created was an act of sorcery.[8]

Chaos magic

A modern personal sigil

In chaos magic, following Spare, sigils are commonly created in a well-ordered fashion by writing an intention, then condensing the letters of the statement down to form a monogram. The chaos magician then uses the gnostic state to "launch" or "charge" the sigil—essentially bypassing the conscious mind to implant the desire in the unconscious.[9][7] To quote Ray Sherwin:

The magician acknowledges a desire, he lists the appropriate symbols and arranges them into an easily visualised glyph. Using any of the gnostic techniques he reifies the sigil and then, by force of will, hurls it into his subconscious from where the sigil can begin to work unencumbered by desire.[9]

After charging the sigil, it is considered necessary to repress all memory of it. In the words of Spare, there should be "a deliberate striving to forget it".[6]

In modern chaos magic, when a complex of thoughts, desires, and intentions gains such a level of sophistication that it appears to operate autonomously from the magician's consciousness, as if it were an independent being, then such a complex is referred to as a servitor.[10] When such a being becomes large enough that it exists independently of any one individual, as a form of "group mind", then it is referred to as an egregore.[11][12]

Later chaos magicians have expanded on the basic sigilization technique. Grant Morrison coined the term hypersigil to refer to an extended work of art with magical meaning and willpower, created using adapted processes of sigilization. Their comic book series The Invisibles was intended as such a hypersigil.[7] Morrison has also argued that modern corporate logos like "the McDonald's Golden Arches, the Nike swoosh and the Virgin autograph" are a form of viral sigil:

> Corporate sigils are super-breeders. They attack unbranded imaginative space. They invade Red Square, they infest the cranky streets of Tibet, they etch themselves into hairstyles. They breed across clothing, turning people into advertising hoardings... The logo or brand, like any sigil, is a condensation, a compressed, symbolic summoning up of the world of desire which the corporation intends to represent... Walt Disney died long ago but his sigil, that familiar, cartoonish signature, persists, carrying its own vast weight of meanings, associations, nostalgia and significance.[7]

This article contains runic characters. Without proper rendering support, you may see question marks, boxes, or other symbols instead of runes.
History of the alphabet
Runes are the letters in a set of related alphabets, known as runic rows, runic alphabets or futharks (also, see futhark vs runic alphabet), native to the Germanic peoples. Runes were primarily used to represent a sound value (a phoneme) but they were also used to represent the concepts after which they are named (ideographic runes). Runology is the academic study of the runic alphabets, runic inscriptions, runestones, and their history. Runology forms a specialised branch of Germanic philology.

The earliest secure runic inscriptions date from at latest AD 150, with a possible earlier inscription dating to AD 50 and Tacitus's possible description of rune use from around AD 98. The Hole Runestone dates from between BC 50 and AD 275. Runes were generally replaced by the Latin alphabet as the cultures that had used runes underwent Christianisation, by approximately AD 700 in central Europe and 1100 in northern Europe. However, the use of runes persisted for specialized purposes beyond this period. Up until the early 20th century, runes were still used in rural Sweden for decorative purposes in Dalarna and on runic calendars.

The three best-known runic alphabets are the Elder Futhark (c. AD 150–800), the Anglo-Saxon Futhorc (400–1100), and the Younger Futhark (800–1100). The Younger Futhark is divided further into the long-branch runes (also called Danish, although they were also used in Norway, Sweden, and Frisia); short-branch, or Rök, runes (also called Swedish–Norwegian, although they were also used in Denmark); and the stavlösa, or Hälsinge, runes (staveless runes). The Younger Futhark developed further into the medieval runes (1100–1500), and the Dalecarlian runes (c. 1500–1800).

The exact development of the early runic alphabet remains unclear but the script ultimately stems from the Phoenician alphabet. Early runes may have developed from the Raetic, Venetic, Etruscan, or Old Latin as candidates. At the time, all of these scripts had the same angular letter shapes suited for epigraphy, which would become characteristic of the runes and related scripts in the region.

The process of transmission of the script is unknown. The oldest clear inscriptions are found in Denmark and northern Germany. A "West Germanic hypothesis" suggests transmission via Elbe Germanic groups, while a "Gothic hypothesis" presumes transmission via East Germanic expansion. Runes continue to be used in a wide variety of ways in modern popular culture.

Name
Etymology

The inscription on the Einang stone (AD 350–400), reading [Ek go]ðagastiz runo faihido

("[I, Go]dguest painted/wrote this runic inscription"),[3] is the earliest Germanic epigraphic attestation of the term.[4]
The name stems from a Proto-Germanic form reconstructed as *rūnō, which may be translated as 'secret, mystery; secret conversation; rune'. It is the source of Gothic rūna (𐍂𐌿𐌽𐌰, 'secret, mystery, counsel'), Old English rūn ('whisper, mystery, secret, rune'), Old Saxon rūna ('secret counsel, confidential talk'), Middle Dutch rūne ('id'), Old High German rūna ('secret, mystery'), and Old Norse rún ('secret, mystery, rune').[5][6] The earliest Germanic epigraphic attestation is the Primitive Norse rūnō (accusative singular), found on the Einang stone (AD 350–400) and the Noleby stone (AD 450).[4]

The term is related to Proto-Celtic *rūna ('secret, magic'), which is attested in Old Irish rún ('mystery, secret'), Middle Welsh rin ('mystery, charm'), Middle Breton rin ('secret wisdom'), and possibly in the ancient Gaulish Cobrunus (< *com-rūnos 'confident'; cf. Middle Welsh cyfrin, Middle Breton queffrin, Middle Irish comrún 'shared secret, confidence') and Sacruna (< *sacro-runa 'sacred secret'), as well as in Lepontic Runatis (< *runo-ātis 'belonging to the secret'). However, it is difficult to tell whether they are cognates (linguistic siblings from a common origin), or if the Proto-Germanic form reflects an early borrowing from Celtic.[7][8] Various connections have been proposed with other Indo-European terms (for example: Sanskrit ráuti रौति 'roar', Latin rūmor 'noise, rumor'; Ancient Greek eréō ρἐω 'ask' and ereunáō ρευνάω 'investigate'),[9] although linguist Ranko Matasović finds them difficult to justify for semantic or linguistic reasons.[7] Because of this, some scholars have speculated that the Germanic and Celtic words may have been a shared religious term borrowed from an unknown non-Indo-European language.[4][7]

Related terms
In early Germanic, a rune could also be referred to as *rūna-stabaz, a compound of *rūnō and *stabaz ('staff; letter'). It is attested in Old Norse rúna-stafr, Old English rún-stæf, and Old High German rūn-stab.[10] Other Germanic terms derived from *rūnō include *runōn ('counsellor'), *rūnjan and *ga-rūnjan ('secret, mystery'), *raunō ('trial, inquiry, experiment'), *hugi-rūnō ('secret of the mind, magical rune'), and *halja-rūnō ('witch, sorceress'; literally '[possessor of the] Hel-secret').[11] It is also often part of personal names, including Gothic Runilo (𐍂𐌿𐌽𐌹𐌻𐍉), Frankish Rúnfrid, Old Norse Alfrún, Dagrún, Guðrún, Sigrún, Irún, Old English Ælfrún, and Lombardic Goderūna.[9]

The Finnish word runo, meaning 'poem', is an early borrowing from Proto-Germanic,[12] and the source of the term for rune, riimukirjain, meaning 'scratched letter'.[13] The root may also be found in the Baltic languages, where Lithuanian runoti means both 'to cut (with a knife)' and 'to speak'.[14]

The Old English form rún survived into the early modern period as roun, which is now obsolete. The modern English rune is a later formation that is partly derived from Late Latin runa, Old Norse rún, and Danish rune.[6]

History and use

An inscription using cipher runes, the Elder Futhark, and the Younger Futhark, on the 9th-century Rök runestone in Sweden

A Younger Futhark inscription on the 12th-century Vaksala Runestone in Sweden
The runes were in use among the Germanic peoples from the 1st or 2nd century AD.[a] This period corresponds to the late Common Germanic stage linguistically, with a continuum of dialects not yet clearly separated into the three branches of later centuries: North Germanic, West Germanic, and East Germanic.

No distinction is made in surviving runic inscriptions between long and short vowels, although such a distinction was certainly present phonologically in the spoken languages of the time. Similarly, there are no signs for labiovelars in the Elder Futhark (such signs were introduced in both the Anglo-Saxon futhorc and the Gothic alphabet as variants of p; see peorð.)

Origins

Main article: Elder Futhark
The formation of the Elder Futhark was complete by the early 5th century, with the Kylver Stone being the first evidence of the futhark ordering as well as of the p rune.

Specifically, the Rhaetic alphabet of Bolzano is often advanced as a candidate for the origin of the runes, with only five Elder Futhark runes (ᛖ e, ᛇ ï, ᛃ j, ᛜ ŋ, ᛈ p) having no counterpart in the Bolzano alphabet.[16] Scandinavian scholars tend to favor derivation from the Latin alphabet itself over Rhaetic candidates.[17][18][19] A "North Etruscan" thesis is supported by the inscription on the Negau helmet B dating to the 2nd century BC.[20] This is in a northern Etruscan alphabet but features a Germanic name, Harigast. Giuliano and Larissa Bonfante suggest that runes derived from some North Italic alphabet, specifically Venetic: But since Romans conquered Veneto after 200 BC, and then the Latin alphabet became prominent and Venetic culture diminished in importance, Germanic people could have adopted the Venetic alphabet within the 3rd century BC or even earlier.[21]

The angular shapes of the runes are shared with most contemporary alphabets of the period that were used for carving in wood or stone. There are no horizontal strokes: when carving a message on a flat staff or stick, it would be along the grain, thus both less legible and more likely to split the wood.[22] This characteristic is also shared by other alphabets, such as the early form of the Latin alphabet used for the Duenos inscription, but it is not universal, especially among early runic inscriptions, which frequently have variant rune shapes, including horizontal strokes. Runic manuscripts (that is written rather than carved runes, such as Codex Runicus) also show horizontal strokes.

The "West Germanic hypothesis" speculates on an introduction by West Germanic tribes. This hypothesis is based on claiming that the earliest inscriptions of the 2nd and 3rd centuries, found in bogs and graves around Jutland (the Vimose inscriptions), exhibit word endings that, being interpreted by Scandinavian scholars to be Proto-Norse, are considered unresolved and long having been the subject of discussion.[b] In the early Runic period, differences between Germanic languages are generally presumed to be small. Another theory presumes a Northwest Germanic unity preceding the emergence of Proto-Norse proper from roughly the 5th century.[c][d] An alternative suggestion explaining the impossibility of classifying the earliest inscriptions as either North or West Germanic is forwarded by È. A. Makaev, who presumes a "special runic koine", an early "literary Germanic" employed by the entire Late Common Germanic linguistic community after the separation of Gothic (2nd to 5th centuries), while the spoken dialects may already have been more diverse.[28]

The Meldorf fibula and Tacitus's Germania

With the potential exception of the Meldorf fibula, a possible runic inscription found in Schleswig-Holstein dating to around 50 AD, the earliest reference to runes (and runic divination) may occur in Roman Senator Tacitus's ethnographic Germania.[29] Dating from around 98 CE, Tacitus describes the Germanic peoples as utilizing a divination practice involving rune-like inscriptions:

For divination and casting lots they have the highest possible regard. Their procedure for casting lots is uniform: They break off the branch of a fruit tree and slice into strips; they mark these by certain signs and throw them, as random chance will have it, on to a white cloth. Then a state priest, if the consultation is a public one, or the father of the family, if it is private, prays to the gods and, gazing to the heavens, picks up three separate strips and reads their meaning from the marks scored on them. If the lots forbid an enterprise, there can be no further consultation about it that day; if they allow it, further confirmation by divination is required.[30]

As Victoria Symons summarizes, "If the inscriptions made on the lots that Tacitus refers to are understood to be letters, rather than other kinds of notations or symbols, then they would necessarily have been runes, since no other writing system was available to Germanic tribes at this time."[29]

Early inscriptions

Ring of Pietroassa (c. 250–400 AD) by Henri Trenk, 1875

Runic inscriptions from the 400-year period 150–550 AD are described as "Period I". These inscriptions are generally in Elder Futhark, but the set of letter shapes and bindrunes employed is far from standardized. Notably the j, s, and ŋ runes undergo considerable modifications, while others, such as p and ï, remain unattested altogether prior to the first full futhark row on the Kylver Stone (c. 400 AD).

Artifacts such as spear heads or shield mounts have been found that bear runic marking that may be dated to 200 AD, as evidenced by artifacts found across northern Europe in Schleswig (North Germany), Funen, Zealand, Jutland (Denmark), and Scania (Sweden). Earlier—but less reliable—artifacts have been found in Meldorf, Süderdithmarschen (de), in northern Germany; these include brooches and combs found in graves, most notably the Meldorf fibula, and are supposed to have the earliest markings resembling runic inscriptions.

Magical or divinatory use

Main article: Runic magic

An illustration of the Gummarp Runestone (500–700 AD) from Blekinge, Sweden

Closeup of the runic inscription found on the 6th- or 7th-century Björketorp Runestone located in Blekinge, Sweden

The stanza 157 of Hávamál attribute to runes the power to bring that which is dead back to life. In this stanza, Odin recounts a spell:

Þat kann ek it tolfta,
ef ek sé á tré uppi
váfa virgilná,:
svá ek ríst ok í rúnum fák,
at sá gengr gumi
ok mælir við mik.[31]

Translation:
I know a twelfth one
if I see up in a tree,
a dangling corpse in a noose,
I can so carve and colour the runes,
that the man walks
and talks with me.[32]

The earliest runic inscriptions found on artifacts give the name of either the craftsman or the proprietor, or sometimes, remain a linguistic mystery. Due to this, it is possible that the early runes were not used so much as a simple writing system, but rather as magical signs to be used for charms. Although some say the runes were used for divination, there is no direct evidence to suggest they were ever used in this way. The name rune itself, taken to mean "secret, something hidden", seems to indicate that knowledge of the runes was originally considered esoteric, or restricted to an elite.[citation needed] The 6th-century Björketorp Runestone warns in Proto-Norse using the word rune in both senses:

Haidzruno runu, falahak haidera, ginnarunaz. Arageu haeramalausz uti az. Weladaude, sa'z þat barutz. Uþarba spa.

I, master of the runes(?) conceal here runes of power. Incessantly (plagued by) maleficence, (doomed to) insidious death (is) he who breaks this (monument). I prophesy destruction / prophecy of destruction.[33]

—Björketorp Runestone
The same curse and use of the word, rune, is also found on the Stentoften Runestone. There also are some inscriptions suggesting a medieval belief in the magical significance of runes, such as the Franks Casket (AD 700) panel.

Charm words, such as auja, laþu, laukaʀ, and most commonly, alu,[34] appear on a number of Migration period Elder Futhark inscriptions as well as variants and abbreviations of them. Much speculation and study has been produced on the potential meaning of these inscriptions. Rhyming groups appear on some early bracteates that also may be magical in purpose, such as salusalu and luwatuwa. Further, an inscription on the Gummarp Runestone (500–700 AD) gives a cryptic inscription describing the use of three runic letters followed by the Elder Futhark f-rune written three times in succession.[35]

Nevertheless, it has proven difficult to find unambiguous traces of runic "oracles": although Norse literature is full of references to runes, it nowhere contains specific instructions on divination. There are at least three sources on divination with rather vague descriptions that may, or may not, refer to runes: Tacitus's 1st-century Germania, Snorri Sturluson's 13th-century Ynglinga saga, and Rimbert's 9th-century Vita Ansgari.

The first source, Tacitus's Germania,[36] describes "signs" chosen in groups of three and cut from "a nut-bearing tree", although the runes do not seem to have been in use at the time of Tacitus' writings. A second source is the Ynglinga saga, where Granmar, the king of Södermanland, goes to Uppsala for the blót. There, the "chips" fell in a way that said that he would not live long (Féll honum þá svo spánn sem hann mundi eigi lengi lifa). These "chips", however, are easily explainable as a blótspánn (sacrificial chip), which was "marked, possibly with sacrificial blood, shaken, and thrown down like dice, and their positive or negative significance then decided."[37][page needed]

The third source is Rimbert's Vita Ansgari, where there are three accounts of what some believe to be the use of runes for divination, but Rimbert calls it "drawing lots". One of these accounts is the description of how a renegade Swedish king, Anund Uppsale, first brings a Danish fleet to Birka, but then changes his mind and asks the Danes to "draw lots". According to the story, this "drawing of lots" was quite informative, telling them that attacking Birka would bring bad luck and that they should attack a Slavic town instead. The tool in the "drawing of lots", however, is easily explainable as a hlautlein (lot-twig), which according to Foote and Wilson[38] would be used in the same manner as a blótspánn.

The lack of extensive knowledge on historical use of the runes has not stopped modern authors from extrapolating entire systems of divination from what few specifics exist, usually loosely based on the reconstructed names of the runes and additional outside influence.

Medieval use

Codex Runicus, a vellum manuscript from approximately 1300 AD containing one of the oldest and best preserved texts of the Scanian Law, is written entirely in runes.

As Proto-Germanic evolved into its later language groups, the words assigned to the runes and the sounds represented by the runes themselves began to diverge somewhat and each culture would create new runes, rename or rearrange its rune names slightly, or stop using obsolete runes completely, to accommodate these changes. Thus, the Anglo-Saxon futhorc has several runes peculiar to itself to represent diphthongs unique to (or at least prevalent in) Old English.

Some later runic finds are on monuments (runestones), which often contain solemn inscriptions about people who died or performed great deeds. For a long time it was presumed that this kind of grand inscription was the primary use of runes, and that their use was associated with a certain societal class of rune carvers.

In the mid-1950s, however, approximately 670 inscriptions, known as the Bryggen inscriptions, were found in Bergen.[39] These inscriptions were made on wood and bone, often in the shape of sticks of various sizes, and contained information of an everyday nature—ranging from name tags, prayers (often in Latin), personal messages, business letters, and expressions of affection, to bawdy phrases of a profane and sometimes even of a vulgar nature. Following this find, it is nowadays commonly presumed that, at least in late use, Runic was a widespread and common writing system.

17th-century clog almanac collected by Sir Hans Sloane, now in the collection of the British Museum
In the later Middle Ages, runes also were used in the clog almanacs (sometimes called Runic staff, Prim, or Scandinavian calendar) of Sweden and Estonia. The authenticity of some monuments bearing Runic inscriptions found in Northern America is disputed; most of them have been dated to modern times.

Runes in Eddic poetry

In Norse mythology, the runic alphabet is attested to a divine origin (Old Norse: reginkunnr). This is attested as early as on the Noleby Runestone from c. 600 AD that reads Runo fahi raginakundo toj[e'k]a..., meaning "I prepare the suitable divine rune..."[40] and in an attestation from the 9th century on the Sparlösa Runestone, which reads Ok rað runaʀ þaʀ rægi[n]kundu, meaning "And interpret the runes of divine origin".[41] In the Poetic Edda poem Hávamál, Stanza 80, the runes also are described as reginkunnr:

Þat er þá reynt,
er þú at rúnum spyrr
inum reginkunnum,
þeim er gerðu ginnregin
ok fáði fimbulþulr,
þá hefir hann bazt, ef hann þegir.[31]

Translation:
That is now proved,
what you asked of the runes,
of the potent famous ones,
which the great gods made,
and the mighty sage stained,
that it is best for him if he stays silent.[42]

The poem Hávamál explains that the originator of the runes was the major deity, Odin. Stanza 138 describes how Odin received the runes through self-sacrifice:

Veit ek at ek hekk vindga meiði a
netr allar nío,
geiri vndaþr ok gefinn Oðni,
sialfr sialfom mer,
a þeim meiþi, er mangi veit, hvers hann af rótom renn.

Translation:
I know that I hung on a windy tree
nine long nights,
wounded with a spear, dedicated to Odin,
myself to myself,
on that tree of which no man knows from where its roots run.[43]

In stanza 139, Odin continues:

Við hleifi mik seldo ne viþ hornigi,
nysta ek niþr,
nam ek vp rvnar,

opandi nam,
fell ek aptr þaðan.

Translation:
No bread did they give me nor a drink from a horn,
downwards I peered;
I took up the runes,
screaming I took them,
then I fell back from there.[43]

In the Poetic Edda poem Rígsþula another origin is related of how the runic alphabet became known to humans. The poem relates how Ríg, identified as Heimdall in the introduction, sired three sons—Thrall (slave), Churl (freeman), and Jarl (noble)—by human women. These sons became the ancestors of the three classes of humans indicated by their names. When Jarl reached an age when he began to handle weapons and show other signs of nobility, Ríg returned and, having claimed him as a son, taught him the runes. In 1555, the exiled Swedish archbishop Olaus Magnus recorded a tradition that a man named Kettil Runske had stolen three rune staffs from Odin and learned the runes and their magic.

Futharks

"Futhark" redirects here. For the programming language, see Futhark (programming language).
Futhark is a collective term in runology used to describe all runic rows which follows the Germanic alphabetical order of F, U, Þ, A, R, K.. etc (compare § Runic alphabets). In English, it is also common to call each futhark after its regional composition, since the original A-rune and K-rune shifted regionally through time: "Futhark" (ᚠᚢᚦᚨᚱᚲ) can specify the Elder runic row, "Futhorc" (ᚠᚢᚦᚩᚱᚳ) can specify the Anglo-Frisian runic row, and "Futhork" (ᚠᚢᚦᚬᚱᚴ) can specify the Younger runic row. The younger can further be divided into "Futhąrk" and "Futhork" based on the early and late transliteration of the younger Óss-rune (ᚬ).

Elder Futhark (2nd to 8th centuries)

Main article: Elder Futhark

Detail of the Elder Futhark inscription on a replica of one of the 5th-century AD Golden Horns of Gallehus found on Jutland, now Denmark
The Elder Futhark, used for writing Proto-Norse, consists of 24 runes that often are arranged in three groups of eight; each group is referred to as an ætt (Old Norse, meaning 'clan, group'). The earliest known sequential listing of the full set of 24 runes dates to approximately AD 400 and is found on the Kylver Stone in Gotland, Sweden.

Each rune most likely had a name which was chosen to represent the sound of the rune itself. The names are, however, not directly attested for the Elder Futhark themselves. Germanic philologists reconstruct names in Proto-Germanic based on the names given for the runes in the later alphabets attested in the rune poems and the linked names of the letters of the Gothic alphabet. For example, the letter /a/ was named from the runic letter   called Ansuz. An asterisk before the rune names means that they are unattested reconstructions. The 24 Elder Futhark runes are the following:[44]

Rune	UCS	Trans.	IPA	Proto-Germanic name	Meaning
f	ᚠ	f	/ɸ/, /f/	*fehu	"chattel, wealth"
u	ᚢ	u	/u(ː)/	?*ūruz	"aurochs", Wild ox (or *ûram "water/slag"?)
th,þ	ᚦ	þ	/θ/, /ð/	?*þurisaz	"Thurs" (see Jötunn) or *þunraz ("the god Thunraz")
a	ᚨ	a	/a(ː)/	*ansuz	"god"
r	ᚱ	r	/r/	*raidō	"ride, journey"
k	ᚲ	k (c)	/k/	?*kaunan	"ulcer"? (or *kenaz "torch"?)
g	ᚷ	g	/ɡ/	*gebō	"gift"
w	ᚹ	w	/w/	*wunjō	"joy"
h h	ᚺ ᚻ	h	/h/	*hagalaz	"hail" (the precipitation)
n	ᚾ	n	/n/	*naudiz	"need"
i	ᛁ	i	/i(ː)/	*īsaz	"ice"
j	ᛃ	j	/j/	*jēra-	"year, good year, harvest"
ï,ei	ᛇ	ï (æ)	?/æː/[45]	*ī(h)waz	"yew-tree"
p	ᛈ	p	/p/	?*perþ-	meaning unknown; possibly "pear-tree".

Anglo-Saxon runes (5th to 11th centuries)

Main article: Anglo-Saxon runes

The Anglo-Saxon Futhorc

The Anglo-Saxon runes, also known as the futhorc (sometimes written fuþorc), are an extended alphabet, consisting of 29, and later 33, characters. It was probably used from the 5th century onwards. There are competing theories as to the origins of the Anglo-Saxon (also called Anglo-Frisian) Futhorc. One theory proposes that it was developed in Frisia and later spread to England,[citation needed] while another holds that Scandinavians introduced runes to England, where the futhorc was modified and exported to Frisia.[citation needed] Some examples of futhorc inscriptions are found on the Thames scramasax, in the Vienna Codex, in Cotton Otho B.x (Anglo-Saxon rune poem) and on the Ruthwell Cross.

The Anglo-Saxon rune poem gives the following characters and names: ᚠ feoh, ᚢ ur, ᚦ þorn, ᚩ os, ᚱ rad, ᚳ cen, ᚷ gyfu, ᚹ ƿynn, ᚻ hægl, ᚾ nyd, ᛁ is, ᛄ ger, ᛇ eoh, ᛈ peorð, ᛉ eolh, ᛋ sigel, ᛏ tir, ᛒ beorc, ᛖ eh, ᛗ mann, ᛚ lagu, ᛝ ing, ᛟ œthel, ᛞ dæg, ᚪ ac, ᚫ æsc, ᚣ yr, ᛡ ior, ear.

Extra runes attested to outside of the rune poem include ᛢ cweorð, ᛣ calc, ᚸ gar, and ᛥ stan. Some of these additional letters have only been found in manuscripts. Feoh, þorn, and sigel stood for [f], [θ], and [s] in most environments, but voiced to [v], [ð], and [z] between vowels or voiced consonants. Gyfu and wynn stood for the letters yogh and wynn, which became [g] and [w] in Middle English.

"Marcomannic runes" (8th to 9th centuries)

Marcomannic runes
A runic alphabet consisting of a mixture of Elder Futhark with Anglo-Saxon futhorc is recorded in a treatise called De Inventione Litterarum, ascribed to Hrabanus Maurus and preserved in 8th- and 9th-century manuscripts mainly from the southern part of the Carolingian Empire (Alemannia, Bavaria). The manuscript text attributes the runes to the Marcomanni, quos nos Nordmannos vocamus, and hence traditionally, the alphabet is called "Marcomannic runes", but it has no connection with the Marcomanni, and rather is an attempt by Carolingian scholars to represent all letters of the Latin alphabets with runic equivalents.

Wilhelm Grimm discussed these runes in 1821.[47]

Younger Futhark (8th to 11th centuries)

Main article: Younger Futhark

The Younger Futhark: long-branch runes and short-twig runes
The Younger Futhark, also called Scandinavian Futhark, is a reduced form of the Elder Futhark, consisting of only 16 characters. The reduction correlates with phonetic changes when Proto-Norse evolved into Old Norse. They are found in Scandinavia and Viking Age settlements abroad, probably in use from the 8th century onward. They are divided into long-branch (Danish) and short-twig (Swedish and Norwegian) runes. The difference between the two versions is a matter of controversy. A general opinion is that the difference between them was functional (viz., the long-branch runes were used for documentation on stone, whereas the short-twig runes were in everyday use for private or official messages on wood).

While also featuring a runic inscription detailing the erection of a bridge for a loved one, the 11th-century Ramsung carving is a Sigurd stone that depicts the legend of Sigurd.
Runic alphabets
"Runic alphabet" redirects here. For runic alphabets following the futhark order, see § Futhark.

The term Runic alphabet is sometimes used in runology to describe runic rows following the Latin alphabetical order of A, B, C, D, etc. (compare § Futhark).

Medieval runes (12th to 15th centuries)

Main article: Medieval runes

Medieval runes

The Saleby church bell (sv), Västergötland, Sweden, including a runic inscription from 1228 AD

In the Middle Ages, the Younger Futhark in Scandinavia was expanded, so that it once more contained one sign for each phoneme of the Old Norse language. Dotted variants of voiceless signs were introduced to denote the corresponding voiced consonants, or vice versa, voiceless variants of voiced consonants, and several new runes also appeared for vowel sounds. Inscriptions in medieval Scandinavian runes show a large number of variant rune forms, and some letters, such as s, c, and z often were used interchangeably.[48][49]

Medieval runes were in use until the 15th century. Of the total number of Norwegian runic inscriptions preserved today, most are medieval runes. Notably, more than 600 inscriptions using these runes have been discovered in Bergen since the 1950s, mostly on wooden sticks (the so-called Bryggen inscriptions). This indicates that runes were in common use side by side with the Latin alphabet for several centuries. Indeed, some of the medieval runic inscriptions are written in Latin.

Dalecarlian runes (16th to 19th centuries)

Main article: Dalecarlian runes

Dalecarlian runes

According to Carl-Gustav Werner, "In the isolated province of Dalarna in Sweden a mix of runes and Latin letters developed."[50] The Dalecarlian runes came into use in the early 16th century and remained in some use up to the 20th century.[51] Some discussion remains on whether their use was an unbroken tradition throughout this period or whether people in the 19th and 20th centuries learned runes from books written on the subject. The character inventory was used mainly for transcribing Swedish in areas where Elfdalian was predominant.

The Dalecarlian runes attracted interest of Johannes Bureus and his exploration of them was one of the first ground stones of the science which later became known as runology, despite the fact that Bureus saw runes equal to Hebrew as a sacred alphabet having magical force.

Other Swedish post-Reformation runes

Runes in Sweden in the 19th century were also used in areas on its northern coast, such as in Medelpad, Hassela and Haverö, but they were very different from those used in Dalarna.

Similarly to Norway, runes were sometimes used in magic books in Sweden.[52]

Norwegian post-Reformation runes

Some examples of Norwegian post-reformation runes according to James Knirk (nb), Eilert Støren and Jonas Nordby.
Approximately two hundred runic inscriptions made by Norwegian farmers in 17th-20th centuries across the whole of Norway are attested, but origins of this runic tradition are uncertain. During the 15th and 16th centuries runes were known to many farmers in Gotland and Iceland, and to educated people in Sweden, Denmark and Norway, like Bent Bille, Jacob de la Gardie, Ole Worm, Arild Huitfeldt and Mogens Gyldenstierne. But the runes, which were used by Norwegian farmers, are attested only from the 17th century, mainly in Hardanger, Telemark and south-western Trøndelag. These runes were used for personal names and Roman numerals on different objects, sometimes in combination with rosemåling, and also used in magic books, on musical instruments, and on gravestones.[53][54][55]

This runic tradition seems to be of newer origin, and brought to the farmers by priests (like Gert Miltzow, Peder Alfssøn (nb) and Hans Jacob Wille (nb)) and other educated people, since there is no good evidence of the use of runes in Norway by farmers in the 15th and 16th centuries, with very few inscriptions perhaps dating from the 16th century.[53]

Differences from Roman script

While Roman script would ultimately replace runes in most contexts, it differed significantly from runic script. For example, on the differences between the use of Anglo-Saxon runes and the Latin script that would come to replace them, runologist Victoria Symons says:

> As well as being distinguished from the roman alphabet in visual appearance and letter order, the fuþorc is further set apart by the fact that, unlike their roman counterparts, runic letters are often associated not only with sound values but also with names. These names are often nouns and, in almost all instances, they begin with the sound value represented by the associated letter. ... The fact that each rune represents [both] a sound value and a word gives this writing system a multivalent quality that further distinguishes it from roman script. A roman letter simply represents its sound value. When used, for example, for the purpose of pagination, such letters can assume added significance, but this is localised to the context of an individual manuscript. Runic letters, on the other hand, are inherently multivalent; they can, and often do, represent several different kinds of information simultaneously. This aspect of runic letters is one that is frequently employed and exploited by writers and scribes who include them in their manuscripts.[56]

Ideographic runes

Main article: Ideographic rune

The Younger Futhark inscription Ög43 with the Elder Futhark rune ᛞ (early Old Norse: *dagʀ, "day") used as an ideographic rune for the writers name.
In addition to their historic use as letters, runes were also used to represent their names as ideographs. Such instances are sometimes referred to by way of the modern German loanword Begriffsrunen, meaning 'concept-runes' (singular Begriffsrune), but the descriptive term "ideographic runes" is also used.[57]

Such were used throughout the 1st millennium and into the Medieval Period, utilized by both Norse and Anglo-Saxon runic writers.

Runology

Main article: Runology
The modern study of runes was initiated during the Renaissance, by Johannes Bureus (1568–1652). Bureus viewed runes as holy or magical in a kabbalistic sense.[58] The study of runes was continued by Olof Rudbeck Sr (1630–1702) and presented in his collection Atlantica. Anders Celsius (1701–1744) further extended the science of runes and travelled around the whole of Sweden to examine the runstenar. From the "golden age of philology" in the 19th century, runology formed a specialized branch of Germanic linguistics.

Body of inscriptions

Main article: Runic inscriptions

The Vimose Comb from the island of Funen, Denmark, features the earliest known runic inscription (AD 150 to 200) and simply reads, ᚺᚨᚱᛃᚨ "Harja", a male name.[59]
The largest group of surviving Runic inscription are Viking Age Younger Futhark runestones, commonly found in Denmark and Sweden.[60] Another large group are medieval runes, most commonly found on small objects, often wooden sticks. The largest concentration of runic inscriptions are the Bryggen inscriptions found in Bergen, more than 650 in total. Elder Futhark inscriptions number around 350, about 260 of which are from Scandinavia, of which about half are on bracteates. Anglo-Saxon futhorc inscriptions number around 100 items.

Modern use

Main article: Modern runic writing
Runic alphabets have seen numerous uses since the 18th-century Viking revival, in Scandinavian Romantic nationalism (Gothicismus) and Germanic occultism in the 19th century, and in the context of the Fantasy genre and of modern Germanic paganism in the 20th century.[citation needed]

Esotericism

Germanic mysticism and Nazi Germany

Further information: Armanen runes, Wiligut runes, and Runengymnastik

Runic script on an 1886 gravestone in Parkend, England

From 1933, the Schutzstaffel unit insignia comprised two sig runes, which derive from the Armanen Futhark, invented in the 19th century by völkisch author Guido von List. The pioneer of the Armanist branch of Ariosophy and one of the more important figures in esotericism in Germany and Austria in the late 19th and early 20th century was the Austrian occultist, mysticist, and völkisch author, Guido von List. In 1908, he published in Das Geheimnis der Runen ("The Secret of the Runes") a set of eighteen so-called, "Armanen runes", based on the Younger Futhark and runes of List's own introduction, which allegedly were revealed to him in a state of temporary blindness after cataract operations on both eyes in 1902. The use of runes in Germanic mysticism, notably List's "Armanen runes" and the derived "Wiligut runes" by Karl Maria Wiligut, played a certain role in Nazi symbolism. The fascination with runic symbolism was mostly limited to Heinrich Himmler, and not shared by the other members of the Nazi top echelon. Consequently, runes appear mostly in insignia associated with the Schutzstaffel ("SS"), the paramilitary organization led by Himmler. Wiligut is credited with designing the SS-Ehrenring, which displays a number of "Wiligut runes".[citation needed]

Modern paganism and esotericism

Runes are popular in New Age esotericism, modern Germanic paganism, and to a lesser extent in other forms of modern paganism. Various systems of Runic divination have been published since the 1980s, notably by Ralph Blum (1982), Stephen Flowers (1984, onward), Stephan Grundy (1990), and Nigel Pennick (1995).[citation needed]

The Uthark theory originally was proposed as a scholarly hypothesis by Sigurd Agrell in 1932. In 2002, Swedish esotericist Thomas Karlsson popularized this "Uthark" runic row, which he refers to as, the "night side of the runes", in the context of modern occultism.[citation needed]

Bluetooth

Bluetooth logo with the initials of Harald Bluetooth

The Bluetooth logo is a bind rune (a ligature) of two runes of the Younger Futhark, ᚼ hagall and ᛒ bjarkan, equivalent to the letters H and B, that are the initials of Harald Bluetooth, who was a king of Denmark from the Viking Age.[61]

Fantasy literature

See also: Cirth § Runes from The Hobbit

Runes play an important role in the horror story "Casting the Runes," by the academic Medievalist and ghost story author M. R. James, first published in his 1911 collection "More Ghost Stories of an Antiquary." In J. R. R. Tolkien's novel The Hobbit (1937), the Anglo-Saxon runes are used on a map and on the title page to emphasize its connection to the Dwarves. They also were used in the initial drafts of The Lord of the Rings, but later were replaced by the Cirth rune-like alphabet invented by Tolkien, used to write the language of the Dwarves, Khuzdul. Following Tolkien, historical and fictional runes appear commonly in modern popular culture, particularly in fantasy literature, like in J. K. Rowling's Harry Potter, where Runes is a subject taught at Hogwarts, also in the 7th book Harry Potter and the Deathly Hallows, Dumbledore gave Hermione a children's book called The Tales of Beedle the Bard which is written in runes.[citation needed]

Video, board and role-playing games

Runes feature extensively in many video games that incorporate themes from early Germanic cultures, including Ultima (series), Hellblade: Senua's Sacrifice, Jøtun, Northgard and God of War. They are used for a range of purposes including puzzles, names, symbols, decoration and on runestones that provide information about Nordic mythology and background for the game's narrative.[62][63][64]

The 1992 video game Heimdall used runes as "magical symbols" associated with unnatural forces. Role-playing games, such as the Ultima series, use a runic font for in-game signs and printed maps and booklets, and Metagaming's The Fantasy Trip used rune-based cipher for clues and jokes throughout its publications.[citation needed]

Unicode

Main article: Runic (Unicode block)

Runic steel stamps, Elder Futhark

Runic alphabets were added to the Unicode Standard in September, 1999 with the release of version 3.0.

The Unicode block for Runic alphabets is U+16A0–U+16FF. It is intended to encode the letters of the Elder Futhark, the Anglo-Frisian runes, and the Younger Futhark long-branch and short-twig (but not the staveless) variants, in cases where cognate letters have the same shape resorting to "unification".

The block as of Unicode 3.0 contained 81 symbols: 75 runic letters (U+16A0–U+16EA), 3 punctuation marks (Runic Single Punctuation U+16EB ᛫, Runic Multiple Punctuation U+16EC ᛬ and Runic Cross Punctuation U+16ED ᛭), and three runic symbols that are used in early modern runic calendar staves ("Golden number Runes", Runic Arlaug Symbol U+16EE ᛮ, Runic Tvimadur Symbol U+16EF ᛯ, Runic Belgthor Symbol U+16F0 ᛰ). As of Unicode 7.0 (2014), eight characters were added, three representing J. R. R. Tolkien's mode of writing Modern English in Anglo-Saxon runes, and five for the "cryptogrammic" vowel symbols used in an inscription on the Franks Casket.

Footnotes

The oldest known runic inscription dates to around AD 150 and is found on a comb discovered in the bog of Vimose, Funen, Denmark.[15] The inscription reads harja; a disputed candidate for a 1st-century inscription is on the Meldorf fibula in southern Jutland.

Inscriptions such as wagnija, niþijo, and harija are supposed to represent tribe names, tentatively proposed to be Vangiones, the Nidensis, and the Harii tribes located in the Rhineland.[23] Since names ending in -io reflect Germanic morphology representing the Latin ending -ius, and the suffix -inius was reflected by Germanic -inio-,[24][25] the question of the problematic ending -ijo in masculine Proto-Norse would be resolved by assuming Roman (Rhineland) influences, while "the awkward ending -a of laguþewa[26] may be solved by accepting the fact that the name may indeed be West Germanic".[23]

Penzl & Hall 1994a assume a period of "Proto-Nordic-Westgermanic" unity down to the 5th century and the Gallehus horns inscription.[27]

The division between Northwest Germanic and Proto-Norse is somewhat arbitrary.[28]

Icelandic magical staves

Tools

From Wikipedia, the free encyclopedia

Icelandic magical staves (Icelandic: galdrastafir, roughly "incantation staves", lit. 'galdr staves') are sigils that were credited with supposed magical effect preserved in various Icelandic grimoires, such as the Galdrabók, dating from the 17th century and later.[1]

Table of magical staves

Icelandic name	Manuscript description	Image
Að fá stúlku	“To get a girl”, this magical stave is used by a man in love to gain the affections of the object of his desires.[2]	
Ægishjálmur	Helm of Awe (or Helm of Terror); to induce fear, protect the warrior, and prevail in battle.[2]	
Angurgapi	Carved on the ends of barrels to prevent leaking.[citation needed]	
Brýnslustafir	For use on whetstones.[3]	
Draumstafir	To dream of unfulfilled desires.[3]	
Dreprún	To kill an enemy's cattle.[4]	
Feingur	A fertility symbol.[3]	
Gapaldur	Two staves, kept in the shoes, gapaldur under the heel of the right foot and ginfaxi under the toes of the left foot, to magically ensure victory in bouts of Icelandic wrestling (glíma).[2]	
Ginfaxi		
Hólastafur	To open hills.[2]	
Kaupaloki	To prosper in trade and business.[2]	
Lásabrjótur	To open a lock without a key.	
Lukkustafir	Whoever carries this symbol with them encounters no evil, neither on the sea nor on the land.[5]	
Máladeilan	To win in court.[6]	
Nábrókarstafur	A stave used when making necropants (nábrók), a pair of trousers made from the skin of a dead man that are capable of producing an endless supply of money.[7]	
Skelkunarstafur	To make your enemies afraid.[8] (A similar looking stave is titled Óttastafur in the Huld Manuscript.)	
Rosahringur minni	A lesser circle of protection.[2]	
Smjörhnútur	Butterknot, to find out if butter was made using milk stolen by a Tilberi.[9]	
Stafur gegn galdri	Staves against witchcraft.[10]	
Stafur til að vekja upp draug	To raise the dead and drive away evil spirits.[2]	
Þjófastafur	For use against thieves.[11]	
Tóustefna	To ward off foxes.[12]	
Varnarstafur Valdemars	Valdemar's Protection Stave; increases favor and happiness.	
Vatnahlífir	Protection against drowning.	
Vegvísir	To guide people through rough weather.[3]	
Veiðistafur	For luck in fishing.

My Brain on Muse, the Tech Meditation Headset — The Revealer

EEG/BCI meditation tools like Muse and OpenBCI headsets use sensors to read brainwaves (EEG) and provide neurofeedback (audio cues) to guide users into focused or relaxed states, enhancing meditation, focus training, and self-awareness, which indirectly supports spiritual practices by refining mental control, though direct "spirit contact" is beyond their scope, focusing on internal brain states instead. Popular options include Muse for guided experiences and OpenBCI for DIY exploration, helping you achieve deeper states like alpha/theta waves linked to meditation, but they measure brain activity, not external entities.

Popular EEG/BCI Tools for Meditation

Muse (Muse 2, Muse S): Headbands that use EEG sensors to convert brain activity into calming or alerting sounds (nature, ambient music) via headphones, training focus and relaxation for mindfulness.

NeuroSky MindWave Mobile 2: A single-sensor headset that powers brainwave-controlled games and wellness apps, tracking focus for learning and mood.

OpenBCI: A more advanced, open-source platform with various EEG headsets (like the Headband Kit) allowing detailed frontal, temporal, and parietal brainwave measurement for deeper research or custom projects.

How They Work for Meditation

Neurofeedback: Devices read EEG signals (voltage changes on the scalp) and provide real-time auditory feedback.

Brainwave States: They help you recognize and cultivate brainwave patterns associated with deep focus (Alpha, Theta waves) and relaxation, beneficial for mindfulness and spiritual practices.

Training: You learn to mentally control the feedback (e.g., quiet sounds for focus, nature sounds for calm), training your brain to enter desired states more easily.

Regarding "Spirit Contact"

These tools are scientifically grounded in measuring your brain's electrical activity, not communicating with external spiritual entities.

They help achieve profound internal states, which many spiritual traditions link to higher awareness, but the "contact" is interpreted as enhanced self-awareness and mental control rather than external communication.

Who Should Use Them?

Beginners: Muse provides guided, user-friendly experiences for basic meditation.

Enthusiasts/Researchers: OpenBCI offers deep customization for exploring brain states.

Anyone: Seeking to improve focus, reduce stress, and gain objective insight into their meditation practice.

View all

Folk magic is practical, community-based magic rooted in local traditions, using everyday items like herbs, stones, and household objects for tangible results like healing, protection, or luck, differing from formal ceremonial magic by its accessibility and focus on common needs rather than complex dogma, often practiced by "cunning folk" or healers for their communities. It's organic, intuitive, and varies by culture, drawing from nature and personal experience rather than strict religious texts, though it can incorporate elements from various spiritual beliefs.

Key Characteristics

Practical & Community-Focused: Addresses everyday problems for individuals and communities, such as mending ailments, finding lost items, or ensuring good harvests.

Accessible Materials: Utilizes common, easily found items like plants, water, salt, candles, twine, and sometimes personal items.

Local & Cultural: Deeply tied to specific regions, folklore, and the natural environment, like Appalachian "granny magic" or sailor's charms.

Intuitive: Relies on personal intuition and connection, often with simple rituals like tying knots, reciting prayers, or marking paths.

Not Formal Witchcraft: Generally distinct from "witchcraft" as conceived in formal, ceremonial traditions, though related; folk practitioners (cunning folk) were often seen as helpful, not evil.

Examples of Practices

Using plants and herbs for healing and blessings (e.g., Appalachian magic).
Creating charms with nails, stones, or cloth for protection or love.
Performing simple divinations, like reading omens or using water.
Incorporating religious elements, like reciting specific prayers (Lord's Prayer, Apostle's Creed).

Modern Relevance

Modern practitioners often explore folk magic to build personal, meaningful practices rooted in history, combining traditional methods with contemporary intuition and local lore.

Witches & Witchcraft | My Jewish Learning
Witchcraft refers to the practice of magic or supernatural powers, historically associated with causing harm (maleficium) and often linked to evil spirits or the Devil, leading to

accusations and witch hunts, but today also encompasses modern, nature-based spiritual paths like Wicca, which use magic for healing, guidance, and personal growth, emphasizing benevolent intent, reverence for nature, and individual spiritual paths.
Historical & Traditional Views
Harmful Magic: In many cultures, witchcraft was seen as using occult powers to bring misfortune to others, often stemming from social tensions or disputes.
Religious Connection: The medieval Church linked witchcraft to heresy, apostasy, and pacts with the Devil, leading to severe persecution.
Accusations as Social Control: Accusations served as a cultural tool to punish non-conformity, with the accused often targeted due to jealousy or community conflicts, not actual malicious magic.
Modern & Contemporary Views (Wicca & Neo-Paganism)
Nature-Based Spirituality: Modern witchcraft (like Wicca) is a spiritual path focused on reverence for the Earth, natural cycles, and deities (often a God and Goddess).
Benevolent Magic: Practices focus on beneficial magic for healing, guidance, divination, and self-improvement, rejecting the idea of harming others due to principles like karma (the "threefold law").
Personal & Diverse: Practices vary widely, involving rituals, herbs, crystals, and tools like wands, with emphasis on personal energy, self-honoring, and unique paths.
Key Distinctions
Intent: Traditional witchcraft (in accusation) was seen as evil and harmful; modern witchcraft is largely benevolent.
Belief System: Modern witchcraft is a religion or spirituality, distinct from historical beliefs about witches communing with demons.
Practice: Modern practitioners engage in personal spiritual development, unlike the fearful stereotypes.

Witchcraft is the use of magic by a person called a witch. Traditionally, "witchcraft" means the use of magic to inflict supernatural harm or misfortune on others, and this remains the most common and widespread meaning.[1] Though the idea of witchcraft is largely imaginary, it has nevertheless served in many cultures as a way to explain the presence of evil.[2] The belief in witches has been found throughout history in a great number of societies worldwide. Most of these societies have used protective magic or counter-magic against witchcraft, and have shunned, banished, imprisoned, physically punished or killed alleged witches. Anthropologists use the term "witchcraft" for similar beliefs about harmful occult practices in different cultures, and these societies often use the term when speaking in English.[3][4][5]

Belief in witchcraft as malevolent magic is attested from ancient Mesopotamia, and in Europe, belief in witches traces back to classical antiquity. In medieval and early modern Europe, accused witches were usually women[6] who were believed to have secretly used black magic (maleficium) against their own community. Usually, accusations of witchcraft were made by neighbors of accused witches, and followed from social tensions. Witches were sometimes said to have communed with demons or with the Devil, though such accusations were mainly made against perceived opponents of the

Church.[7] It was thought witchcraft could be thwarted by white magic, provided by 'cunning folk' or 'wise people'. Suspected witches were often prosecuted and punished, if found guilty or simply believed to be guilty. European witch-hunts and witch trials in the early modern period led to tens of thousands of executions. While magical healers and midwives were sometimes accused of witchcraft,[8][4][9][10] they made up a minority of those accused. European belief in witchcraft gradually dwindled during and after the Age of Enlightenment.

Many indigenous belief systems that include the concept of witchcraft likewise define witches as malevolent, and seek healers (such as medicine people and witch doctors) to ward off and undo bewitchment.[11][12] Some African and Melanesian peoples believe witches are driven by an evil spirit or substance inside them. Modern witch-hunting takes place in parts of Africa and Asia.

Since the 1930s, followers of certain kinds of modern paganism identify as witches and redefine the term "witchcraft" as part of their neopagan beliefs and practices.[13][14][15] Other neo-pagans avoid the term due to its negative connotations.[16]

Concept

The Witches by Hans Baldung (woodcut), 1508

The most common meaning of "witchcraft" worldwide is the use of harmful magic.[17] Belief in malevolent magic and the concept of witchcraft has lasted throughout recorded history and has been found in cultures worldwide, regardless of development.[3][18] Most societies have feared an ability by some individuals to cause supernatural harm and misfortune to others. This may come from mankind's tendency "to want to assign occurrences of remarkable good or bad luck to agency, either human or superhuman".[19] Historians and anthropologists see the concept of "witchcraft" as one of the ways humans have tried to explain strange misfortune.[19][20] Some cultures have feared witchcraft much less than others because they tend to have other explanations for strange misfortune.[19] For example, the Gaels of Ireland and the Scottish Highlands historically held a strong belief in fairy folk, who could cause supernatural harm, and witch-hunting was very rare in these regions compared to other regions of the British Isles.[21]

Historian Ronald Hutton outlined five key characteristics ascribed to witches and witchcraft by most cultures that believe in this concept: the use of magic to cause harm or misfortune to others; it was used by the witch against their own community; powers of witchcraft were believed to have been acquired through inheritance or initiation; it was seen as immoral and often thought to involve communion with evil beings; and witchcraft could be thwarted by defensive magic, persuasion, intimidation or physical punishment of the alleged witch.[17]

A common belief worldwide is that witches use objects, words, and gestures to cause supernatural harm, or that they simply have an innate power to do so. Hutton notes that both kinds of practitioners are often believed to exist in the same culture and that the two often overlap, in that someone with an inborn power could wield that power through material objects.[22]

One of the most influential works on witchcraft and concepts of magic was E. E. Evans-Pritchard's Witchcraft, Oracles and Magic Among the Azande, a study of Azande witchcraft beliefs published in 1937. This provided definitions for witchcraft which became a convention in anthropology.[20] However, some researchers argue that the general adoption of Evans-Pritchard's definitions constrained discussion of witchcraft beliefs, and even broader discussion of magic and religion, in ways that his work does not support.[23] Evans-Pritchard reserved the term "witchcraft" for the actions of those who inflict harm by their inborn power and used "sorcery" for those who needed tools to do so.[24] Historians found these definitions difficult to apply to European witchcraft, where witches were believed to use physical techniques, as well as some who were believed to cause harm by thought alone.[25][26] The distinction "has now largely been abandoned, although some anthropologists still sometimes find it relevant to the particular societies with which they are concerned".[22]

While most cultures believe witchcraft to be something willful, some Indigenous peoples in Africa and Melanesia believe witches have a substance or an evil spirit in their bodies that drives them to do harm.[22] Such substances may be believed to act on their own while the witch is sleeping or unaware.[23] The Dobu people believe women work harmful magic in their sleep while men work it while awake.[27] Further, in cultures where substances within the body are believed to grant supernatural powers, the substance may be good, bad, or morally neutral.[28][29] Hutton draws a distinction between those who unwittingly cast the evil eye and those who deliberately do so, describing only the latter as witches.[19]

The universal or cross-cultural validity of the terms "witch" and "witchcraft" are debated.[20] Hutton states:

> [Malevolent magic] is, however, only one current usage of the word. In fact, Anglo-American senses of it now take at least four different forms, although the one discussed above seems still to be the most widespread and frequent. The others define the witch figure as any person who uses magic ... or as the practitioner of nature-based Pagan religion; or as a symbol of independent female authority and resistance to male domination. All have validity in the present.[19]

According to the United Nations Special Rapporteur on Extrajudicial, Summary or Arbitrary Executions there is "difficulty of defining 'witches' and 'witchcraft' across cultures—terms that, quite apart from their connotations in popular culture, may include an array of traditional or faith healing practices".[30]

Anthropologist Fiona Bowie notes that the terms "witchcraft" and "witch" are used differently by scholars and the general public in at least four ways.[20] Neopagan writer

Isaac Bonewits proposed dividing witches into even more distinct types including, but not limited to: Neopagan, Feminist, Neogothic, Neoclassical, Classical, Family Traditions, Immigrant Traditions, and Ethnic.[31]

Etymology

Further information: Witch (word)

The word "witchcraft" is over a thousand years old: Old English formed the compound wiccecræft from wicce ('witch') and cræft ('craft').[32] The masculine form was wicca ('male sorcerer').[33]

According to the Oxford English Dictionary, wicce and wicca were probably derived from the Old English verb wiccian, meaning 'to practice witchcraft'.[34] Wiccian has a cognate in Middle Low German wicken (attested from the 13th century). The further etymology of this word is problematic. It has no clear cognates in other Germanic languages outside of English and Low German, and there are numerous possibilities for the Indo-European root from which it may have derived.

Another Old English word for 'witch' was hægtes or hægtesse, which became the modern English word "hag" and is linked to the word "hex". In most other Germanic languages, their word for 'witch' comes from the same root as these; for example German Hexe and Dutch heks.[35]

In colloquial modern English, the word witch is particularly used for women.[36] A male practitioner of magic or witchcraft is more commonly called a 'wizard', or sometimes, 'warlock'. When the word witch is used to refer to a member of a neo-pagan tradition or religion (such as Wicca), it can refer to a person of any gender.[37]

Beliefs about practices

Preparation for the Witches' Sabbath by David Teniers the Younger. It shows a witch brewing a potion overlooked by her familiar spirit or a demon; items on the floor for casting a spell; and another witch reading from a grimoire while anointing the buttocks of a young witch about to fly upon an inverted besom.

Witches are commonly believed to cast curses; a spell or set of magical words and gestures intended to inflict supernatural harm.[38] Cursing could also involve inscribing runes or sigils on an object to give that object magical powers; burning or binding a wax or clay image (a poppet) of a person to affect them magically; or using herbs, animal parts and other substances to make potions or poisons.[39][40][41][22] Witchcraft has been blamed for many kinds of misfortune. In Europe, by far the most common kind of harm attributed to witchcraft was illness or death suffered by adults, their children, or their animals. "Certain ailments, like impotence in men, infertility in women, and lack of milk in cows, were particularly associated with witchcraft". Illnesses that were poorly understood were more likely to be blamed on witchcraft. Edward Bever writes: "Witchcraft was particularly likely to be suspected when a disease came on unusually swiftly, lingered unusually long, could not be diagnosed clearly, or presented some other unusual symptoms".[42]

A common belief in cultures worldwide is that witches tend to use something from their target's body to work magic against them; for example hair, nail clippings, clothing, or bodily waste.[22] Such beliefs are found in Europe, Africa, South Asia, Polynesia, Melanesia, and North America.[22] Another widespread belief among Indigenous peoples in Africa and North America is that witches cause harm by introducing cursed magical objects into their victim's body; such as small bones or ashes.[22] James George Frazer described this kind of magic as imitative.[a]

In some cultures, witches are believed to use human body parts in magic,[22] and they are commonly believed to murder children for this purpose. In Europe, "cases in which women did undoubtedly kill their children, because of what today would be called postpartum psychosis, were often interpreted as yielding to diabolical temptation".[44]

Witches are believed to work in secret, sometimes alone and sometimes with other witches. Hutton writes: "Across most of the world, witches have been thought to gather at night, when normal humans are inactive, and also at their most vulnerable in sleep".[22] In most cultures, witches at these gatherings are thought to transgress social norms by engaging in cannibalism, incest and open nudity.[22]

Witches around the world commonly have associations with animals.[45] Rodney Needham identified this as a defining feature of the witch archetype.[46] In some parts of the world, it is believed witches can shapeshift into animals,[47] or that the witch's spirit travels apart from their body and takes an animal form, an activity often associated with shamanism.[47] Another widespread belief is that witches have an animal helper.[47] In English these are often called "familiars", and meant an evil spirit or demon that had taken an animal form.[47] As researchers examined traditions in other regions, they widened the term to servant spirit-animals which are described as a part of the witch's own soul.[48]

Necromancy is the practice of conjuring the spirits of the dead for divination or prophecy, although the term has also been applied to raising the dead for other purposes. The biblical Witch of Endor performed it (1 Samuel 28th chapter), and it is among the witchcraft practices condemned by Ælfric of Eynsham:[49][50][51] "Witches still go to cross-roads and to heathen burials with their delusive magic and call to the devil; and he comes to them in the likeness of the man that is buried there, as if he arises from death."[52]

J.D. Krige argues that belief in witchcraft also serves various functions. One such function, he notes, is psychological: it enables people to account for failures not as a result of any fault of their own but due to the doings of others or other external malevolent forces. In this way, people can "compensate for their inadequacy and continue to feel that they are masters of their own fate".[53]

Witchcraft and folk healers

Main article: Cunning folk

Diorama of a cunning woman or wise woman in the Museum of Witchcraft and Magic

Most societies that have believed in harmful or black magic have also believed in helpful or white magic.[54] Where belief in harmful magic is common, it is typically forbidden by law as well as hated and feared by the general populace, while helpful or apotropaic (protective) magic is tolerated or accepted by the population, even if the orthodox establishment opposes it.[55]

In these societies, practitioners of helpful magic provide (or provided) services such as breaking the effects of witchcraft, healing, divination, finding lost or stolen goods, and love magic.[56] In Britain, and some other parts of Europe, they were commonly known as 'cunning folk' or 'wise people'.[56] Alan Macfarlane wrote that while cunning folk is the usual name, some are also known as 'blessers' or 'wizards', but might also be known as 'white', 'good', or 'unbinding witches'.[57] Historian Owen Davies says the term "white witch" was rarely used before the 20th century.[58] Ronald Hutton uses the general term "service magicians".[56] Often these people were involved in identifying alleged witches.[54]

Such helpful magic-workers "were normally contrasted with the witch who practiced maleficium—that is, magic used for harmful ends".[59] In the early years of the European witch hunts "the cunning folk were widely tolerated by church, state and general populace".[59] Some of the more hostile churchmen and secular authorities tried to smear folk-healers and magic-workers by falsely branding them 'witches' and associating them with harmful 'witchcraft',[56] but generally the masses did not accept this and continued to make use of their services.[60] The English MP and skeptic Reginald Scot sought to disprove magic and witchcraft altogether, writing in The Discoverie of Witchcraft (1584), "At this day, it is indifferent to say in the English tongue, 'she is a witch' or 'she is a wise woman'".[61] Historian Keith Thomas adds "Nevertheless, it is possible to isolate that kind of 'witchcraft' which involved the employment (or presumed employment) of some occult means of doing harm to other people in a way which was generally disapproved of. In this sense the belief in witchcraft can be defined as the attribution of misfortune to occult human agency".[4]

Emma Wilby says folk magicians in Europe were viewed ambivalently by communities, and were considered as capable of harming as of healing,[62] which could lead to their being accused as malevolent witches. She suggests some English "witches" convicted of consorting with demons may have been cunning folk whose supposed fairy familiars had been demonised.[63]

Hutton says that magical healers "were sometimes denounced as witches, but seem to have made up a minority of the accused in any area studied".[54] Likewise, Davies says "relatively few cunning-folk were prosecuted under secular statutes for witchcraft" and were dealt with more leniently than alleged witches. The Constitutio Criminalis Carolina

(1532) of the Holy Roman Empire, and the Danish Witchcraft Act of 1617, stated that workers of folk magic should be dealt with differently from witches.[64] It was suggested by Richard Horsley that 'diviner-healers' (devins-guerisseurs) made up a significant proportion of those tried for witchcraft in France and Switzerland, but more recent surveys conclude that they made up less than 2% of the accused.[65] However, Éva Pócs says that half the accused witches in Hungary seem to have been healers,[66] and Kathleen Stokker says the "vast majority" of Norway's accused witches were folk healers.[67]

Witch-hunts and thwarting witchcraft

A witch bottle, used as counter-magic against witchcraft
Societies that believe (or believed) in witchcraft may also believe that it can be thwarted in various ways. One common way is to use protective magic or counter-magic, often with the help of magical healers such as cunning folk or witch-doctors.[54] This includes performing rituals, reciting charms, or the use of talismans, amulets, anti-witch marks, witch bottles, witch balls, and burying objects such as horse skulls inside the walls of buildings.[68] Another believed cure for bewitchment is to persuade or force the alleged witch to lift their spell.[54] Often, people have attempted to thwart the witchcraft by physically punishing the alleged witch, such as by banishing, wounding, torturing or killing them. Hutton wrote that "In most societies, however, a formal and legal remedy was preferred to this sort of private action", whereby the alleged witch would be prosecuted and then formally punished if found guilty.[54]

Accusations of witchcraft

The torture used against accused witches, 1577
Throughout the world, accusations of witchcraft are often linked to social and economic tensions. Females are most often accused, especially in more male-dominated societies like 16th-century America.[69] However, in some cultures it was mostly males, such as in 17th-century Iceland.[70] In many societies, accusations are directed mainly against the elderly, but in others age is not a factor, and in some cultures it is mainly adolescents who are accused.[71]

Éva Pócs writes that reasons for accusations of witchcraft fall into four general categories. The first three of which were proposed by Richard Kieckhefer, and the fourth added by Christina Larner:[72]

A person was caught in the act of positive or negative sorcery
A well-meaning sorcerer or healer lost their clients' or the authorities' trust

A person did nothing more than gain the enmity of their neighbors
A person was reputed to be a witch and surrounded with an aura of witch-beliefs or occultism.

Modern witch-hunts

Main articles: Witch-hunt, Witch trials in the early modern period, and Modern witch-hunts

Witch-hunts, scapegoating, and the shunning or murder of suspected witches still occurs.[73] Many cultures worldwide continue to have a belief in the concept of "witchcraft" or malevolent magic.[74]

Apart from extrajudicial violence, state-sanctioned execution also occurs in some jurisdictions. For instance, in Saudi Arabia practicing witchcraft and sorcery is a crime punishable by death and the country has executed people for this crime as recently as 2014.[75][76][77]

Witchcraft-related violence is often discussed as a serious issue in the broader context of violence against women.[78][79][80][81][82] In Tanzania, an estimated 500 older women are murdered each year following accusations of witchcraft or accusations of being a witch, according to a 2014 World Health Organization report.[83]

Children who live in some regions of the world, such as parts of Africa, are also vulnerable to violence stemming from witchcraft accusations.[84][85][86][87] Such incidents have also occurred in immigrant communities in Britain, including the much publicized case of the murder of Victoria Climbié.[88][89]

Religious perspectives

Ancient Mesopotamian religion

A clay tablet from the Maqlû, outlining an ancient Akkadian anti-witchcraft ritual

Main article: Witchcraft in the Middle East

Magic was an important part of ancient Mesopotamian religion and society, which distinguished between 'good' (helpful) and 'bad' (harmful) rites.[90] In ancient Mesopotamia, practitioners mainly used counter-magic against witchcraft (kišpū[91]); the law codes also prescribed the death penalty for those found guilty of witchcraft.[90] According to Tzvi Abusch, ancient Mesopotamian ideas about witches and witchcraft shifted over time, and the early stages were "comparable to the archaic shamanistic stage of European witchcraft".[92] In this early stage, witches were not necessarily considered evil, but took 'white' and 'black' forms, could help others using magic and medical knowledge, generally lived in rural areas, and sometimes exhibited ecstatic behavior.[92]

In ancient Mesopotamia, a witch (m. kaššāpu, f. kaššāptu, from kašāpu ['to bewitch'][91]) was "usually regarded as an anti-social and illegitimate practitioner of destructive magic ... whose activities were motivated by malice and evil intent and who was opposed by the ašipu, an exorcist or incantation-priest".[92] These ašipu were predominantly male representatives of the state religion, whose main role was to work magic against harmful supernatural forces such as demons.[92] The stereotypical witch mentioned in the sources tended to be those of low status who were weak or otherwise marginalized, including women, foreigners, actors, and peddlers.[90]

The Code of Hammurabi (18th century BCE) allowed someone accused of harmful magic-practice to undergo trial by ordeal—by jumping into a holy river. If they drowned, they were deemed guilty, and the accuser inherited the guilty person's estate. If they survived, the accuser's estate was handed over instead.[90]

The Maqlû ("burning") is an ancient Akkadian text written early in the first millennium BCE, which sets out a Mesopotamian anti-witchcraft ritual.[93] This lengthy ritual includes invoking various gods, burning an effigy of the witch, then dousing and disposing of the remains.[94]

Abrahamic religions

The historical development of witchcraft in the Middle East shows a multi-stage process shaped by culture, spirituality, and societal norms. Ancient witchcraft in the Middle East intertwined mysticism with nature through rituals and incantations aligned with local beliefs. The position of magic among ancient Jews and within Judaism was complex, with some forms accepted as mysticism and others disapproved of as heresy.[95][96] The medieval Middle East experienced shifting perceptions of witchcraft under Islamic and Christian influences, sometimes revered for healing and other times condemned as heresy.

Jewish

See also: Witchcraft and divination in the Hebrew Bible

Jewish attitudes toward witchcraft were rooted in its association with idolatry and necromancy, and some rabbis even practiced forms of magic themselves.[97][98] References to witchcraft in the Hebrew Bible highlighted strong condemnations rooted in the "abomination" of magical practices. Christianity later similarly condemned witchcraft, considering it an abomination and using select verses to justify witch hunting during the early modern period.

Christian

Illustration by Martin van Maële of a Witches' Sabbath and Black Mass overseen by a horned Devil, in the 1911 edition of La Sorcière, by Jules Michelet

Main article: Christian views on magic

Historically, the Christian concept of witchcraft derives from Old Testament laws against it. In medieval and early-modern Europe, many Christians believed in magic. As opposed to the helpful magic of the cunning folk, witchcraft was seen as evil and associated with Satan and devil worship. This often resulted in deaths, torture and scapegoating (casting blame for misfortune),[99][100] and many years of large-scale witch trials and witch hunts, especially in Protestant Europe, before largely ending during the Age of Enlightenment. Christian views are diverse, ranging from intense belief and opposition (especially by Christian fundamentalists) to non-belief. During the Age of Colonialism, many cultures were exposed to the Western world via colonialism, usually accompanied by intensive Christian missionary activity (see Christianization). In these cultures, beliefs about witchcraft were partly influenced by the prevailing Western concepts of the time.

In Christianity, sorcery came to be associated with heresy and apostasy and was viewed as evil. Among Catholics, Protestants, and the secular leadership of late-medieval/early-modern Europe, fears about witchcraft rose to a fever pitch and sometimes led to large-scale witch hunts. The fifteenth century saw a dramatic rise in awareness and terror of witchcraft. Tens of thousands of people were executed, and others were imprisoned, tortured, banished, and had lands and possessions confiscated. The majority of those accused were women, though in some regions the majority were men.[101][102]:23 In Scots, the word warlock came to be used as the male equivalent of witch (which can be male or female, but is used predominantly for females).[103][104]

The Malleus Maleficarum (Hammer of the Witches) was a witch-hunting manual written in 1486 by German monk-inquisitors Heinrich Kramer and Jacob Sprenger. It was used by both Catholics and Protestants[105] for several hundred years, outlining how to identify a witch, what makes a woman more likely than a man to be a witch, how to put a witch on trial, and how to punish a witch. The book defines a witch as evil and typically female. It became the handbook for secular courts throughout Europe, but was not used by the Inquisition, which even cautioned against relying on it.[106] It was the most sold book in Europe for over 100 years (after the Christian Bible).[107]

Islamic

Main article: Islam and magic

Islamic perspectives on magic encompass a wide range of practices,[108] with belief in black magic and the evil eye coexisting alongside strict prohibitions against its practice.[109] The Quran acknowledges the existence of magic and seeks protection from its harm. Islam's stance is against the practice of magic, considering it forbidden, and emphasizes miracles rather than magic or witchcraft.[110] The historical continuity of witchcraft in the Middle East underlines the complex interaction between spiritual beliefs and societal norms across different cultures and epochs.

Modern paganism

The sorceress Ceridwen of Welsh mythology is considered a Goddess in Modern paganism and Wicca.[111]

Main articles: Neopagan witchcraft and Semitic neopaganism

During the 20th century, interest in witchcraft rose in English-speaking and European countries. From the 1920s, Margaret Murray popularized the 'witch-cult hypothesis': the idea that those persecuted as 'witches' in early modern Europe were followers of a benevolent pagan religion that had survived the Christianization of Europe. This has been discredited by further historical research.[112][113][114][115][116]

From the 1930s, occult neopagan groups began to emerge who called their religion a kind of 'witchcraft'. They were initiatory secret societies inspired by Murray's 'witch cult' theory, ceremonial magic, Aleister Crowley's Thelema, and historical paganism.[117][118][119] The biggest religious movement to emerge from this is Wicca. Today, some Wiccans and members of related traditions self-identify as "witches" and use the term "witchcraft" for their magico-religious beliefs and practices, primarily in Western anglophone countries.[13]

Regional perspectives

Prevalence of belief in witchcraft by country[120]

Socio-demographic correlates of witchcraft beliefs[120]

A 2022 study found that belief in witchcraft, as in the use of malevolent magic or powers, is still widespread in some parts of the world. It found that belief in witchcraft varied from 9% of people in some countries to 90% in others, and was linked to cultural and socioeconomic factors. Stronger belief in witchcraft correlated with poorer economic development, weak institutions, lower levels of education, lower life expectancy, lower life satisfaction, and high religiosity.[121][120]

It contrasted two hypotheses about future changes in witchcraft belief:[120]

witchcraft beliefs should decline "in the process of development due to improved security and health, lower exposure to shocks, spread of education and scientific approach to explaining life events" according to standard modernization theory

"some aspects of development, namely rising inequality, globalization, technological change, and migration, may instead revive witchcraft beliefs by disrupting established social order" according to literature largely inspired by observations from Sub-Saharan Africa.

Africa

Main article: Witchcraft in Africa

African witchcraft encompasses various beliefs and practices. These beliefs often play a significant role in shaping social dynamics and can influence how communities address challenges and seek spiritual assistance. Much of what "witchcraft" represents in Africa has been susceptible to misunderstandings and confusion, due to a tendency among western scholars to approach the subject through a comparative lens vis-a-vis European witchcraft.[122] For example, the Maka people of Cameroon believe in an occult force known as djambe, that dwells inside a person. It is often translated as "witchcraft" or "sorcery", but it has a broader meaning that encompasses supernatural harm, healing and shapeshifting; this highlights the problem of using European terms for African concepts.[123]

While some 19th–20th century European colonialists tried to stamp out witch-hunting in Africa by introducing laws banning accusations of witchcraft, some former African colonies introduced laws banning witchcraft after they gained independence. This has produced an environment that encourages persecution of suspected witches.[124]

In the Central African Republic, hundreds of people are convicted of witchcraft yearly, with reports of violence against accused women.[125] The Democratic Republic of the Congo witnessed a disturbing trend of child witchcraft accusations in Kinshasa, leading to abuse and exorcisms supervised by self-styled pastors.[126] In Ghana, there are several "witch camps", where women accused of witchcraft can seek refuge, though the government plans to close them.[127]

In west Kenya, there have been cases of accused witches being burned to death in their homes by mobs.[128] Malawi faces a similar issue of child witchcraft accusations, with traditional healers and some Christian counterparts involved in exorcisms, causing abandonment and abuse of children.[129] In Nigeria, Pentecostal pastors have intertwined Christianity with witchcraft beliefs for profit, leading to the torture and killing of accused children.[130] Sierra Leone's Mende people see witchcraft convictions as beneficial, as the accused receive support and care from the community.[131]

Lastly, in Zulu culture, healers known as sangomas protect people from witchcraft and evil spirits through divination, rituals and mediumship.[132] However, concerns arise regarding the training and authenticity of some sangomas.

In parts of Africa, beliefs about illness being caused by witchcraft continue to fuel suspicion of modern medicine, with serious healthcare consequences. HIV/AIDS[133] and Ebola[134] are two examples of often-lethal infectious disease epidemics whose medical care and containment has been severely hampered by regional beliefs in witchcraft. Other severe medical conditions whose treatment is hampered in this way include tuberculosis, leprosy, epilepsy and the common severe bacterial Buruli ulcer.[135][136]

Americas

North America

Main article: Witchcraft in North America

North America hosts a diverse array of beliefs about witchcraft, some of which have evolved through interactions between cultures.[137][138]

Native American peoples such as the Cherokee,[139] Hopi,[140] the Navajo[5] among others,[141] believed in malevolent "witch" figures who could harm their communities by supernatural means; this was often punished harshly, including by execution.[142] In these communities, medicine people were healers and protectors against witchcraft.[139][140]

The term "witchcraft" arrived with European colonists, along with European views on witchcraft.[137] This term would be adopted by many Indigenous communities for their own beliefs about harmful magic and harmful supernatural powers. Witch hunts took place among Christian European settlers in colonial America and the United States, most infamously the Salem witch trials in Massachusetts. These trials led to the execution of numerous individuals accused of practicing witchcraft. Despite changes in laws and perspectives over time, accusations of witchcraft persisted into the 19th century in some regions, such as Tennessee, where prosecutions occurred as late as 1833.

Some North American witchcraft beliefs were influenced by beliefs about witchcraft in Latin America, and by African witchcraft beliefs through the slave trade.[143][144][138] Native American cultures adopted the term for their own witchcraft beliefs.[145] Neopagan witchcraft practices such as Wicca then emerged in the mid-20th century.[137][138]

Latin America

Main article: Witchcraft in Latin America

Witchcraft beliefs in Latin America are influenced by Spanish Catholic, Indigenous, and African beliefs. In Colonial Mexico, the Mexican Inquisition showed little concern for witchcraft; the Spanish Inquisitors treated witchcraft accusations as a "religious problem that could be resolved through confession and absolution". Anthropologist Ruth Behar writes that Mexican Inquisition cases "hint at a fascinating conjecture of sexuality, witchcraft, and religion, in which Spanish, indigenous, and African cultures converged".[146] There are cases where European women and Indigenous women were accused of collaborating to work "love magic" or "sexual witchcraft" against men in colonial Mexico.[147] According to anthropology professor Laura Lewis, "witchcraft" in colonial Mexico represented an "affirmation of hegemony" for women and especially Indigenous women over their white male counterparts in the casta system.[148]

Belief in witchcraft is a constant in the history of colonial Brazil, for example the several denunciations and confessions given to the Congregation for the Doctrine of the Faith of Bahia (1591–1593), Pernambuco and Paraíba (1593–1595).[149]

Brujería, often called a Latin American form of witchcraft, is a syncretic Afro-Caribbean tradition that combines Indigenous religious and magical practices from the Caribbean, together with Catholicism, and European witchcraft.[150] The tradition and terminology is considered to encompass both helpful and harmful practices.[151] A male practitioner is called a brujo, a female practitioner, a bruja.[151] Healers may be further distinguished by the terms kurioso or kuradó, a man or woman who performs trabou chikí ("little works") and trabou grandi ("large treatments") to promote or restore health, bring fortune or misfortune, deal with unrequited love, and more serious concerns. Sorcery usually involves reference to an entity referred to as the almasola or homber chiki.[152]

Asia

Main article: Asian witchcraft

Okabe – The cat witch, by Utagawa Kuniyoshi

East Asia

In Chinese culture, the practice of Gong Tau involves black magic for purposes such as revenge and financial assistance.[citation needed] Japanese folklore features witch figures who employ foxes as familiars. Korean history includes instances of individuals being condemned for using spells. The Philippines has its own tradition of Philippine witches, distinct from Western portrayals, with their practices often countered by indigenous Philippine shamans.[citation needed]

Middle East

Main article: Witchcraft in the Middle East

Witchcraft beliefs in the Middle East have a long history, and magic was a part of the ancient cultures and religions of the region.[153]

In ancient Mesopotamia (Sumeria, Assyria, Babylonia), a witch (m. kaššāpu, f. kaššāptu) was "usually regarded as an anti-social and illegitimate practitioner of destructive magic ... motivated by malice and evil intent".[92] Ancient Mesopotamian societies mainly used counter-magic against witchcraft (kišpū), but the law codes also prescribed the death penalty for those found guilty of witchcraft.[90]

For the ancient Hittites, magic could only be sanctioned by the state, and accusations of witchcraft were often used to control political enemies.[154]

As the ancient Hebrews focused on their worship on Yahweh, Judaism clearly distinguished between forms of magic and mystical practices which were accepted, and those which were viewed as forbidden or heretical, and thus "witchcraft".[155]

In the medieval Middle East, under Islamic and Christian influences, witchcraft's perception fluctuated between healing and heresy, revered by some and condemned by others.[citation needed] In the present day diverse witchcraft communities have emerged.[citation needed]

Europe

Main article: European witchcraft

Ancient Roman world

Main article: European witchcraft § Antiquity

Caius Furius Cressinus Accused of Sorcery, Jean-Pierre Saint-Ours, 1792

European belief in witchcraft can be traced back to classical antiquity, when concepts of magic and religion were closely related. During the pagan era of ancient Rome, there were laws against harmful magic.[156] According to Pliny, the 5th century BCE laws of the Twelve Tables laid down penalties for uttering harmful incantations and for stealing the fruitfulness of someone else's crops by magic.[156] The only recorded trial involving this law was that of Gaius Furius Cresimus.[156]

The Classical Latin word veneficium meant both poisoning and causing harm by magic (such as magic potions), although ancient people would not have distinguished between the two.[157] In 331 BCE, a deadly epidemic hit Rome and at least 170 women were executed for causing it by veneficium. In 184–180 BCE, another epidemic hit Italy, and about 5,000 were executed for veneficium.[157] If the reports are accurate, writes Hutton, "then the Republican Romans hunted witches on a scale unknown anywhere else in the ancient world".[157]

Under the Lex Cornelia de sicariis et veneficis of 81 BCE, killing by veneficium carried the death penalty. During the early Imperial era, the Lex Cornelia began to be used more broadly against other kinds of magic,[157] including sacrifices made for evil purposes. The magicians were to be burnt at the stake.[156]

Witch characters—women who work powerful evil magic—appear in ancient Roman literature from the first century BCE onward. They are typically hags who chant harmful incantations; make poisonous potions from herbs and the body parts of animals and humans; sacrifice children; raise the dead; can control the natural world; can shapeshift themselves and others into animals; and invoke underworld deities and spirits. They include Lucan's Erichtho, Horace's Canidia, Ovid's Dipsas, and Apuleius's Meroe.[157]

Early modern and contemporary Europe

By the early modern period, major witch hunts and witch trials began to take place in Europe, partly fueled by religious tensions, societal anxieties, and economic upheaval. One influential text was the Malleus Maleficarum, a 1486 treatise that provided a framework for identifying, prosecuting, and punishing witches. Witches were typically seen as people who caused harm or misfortune through black magic, and were sometimes believed to have made a pact with the Devil.[158] Usually, accusations of witchcraft were made by neighbors and followed from social tensions. Accusations were often made against marginalized individuals, women, the elderly, and those who did not conform to societal norms. Women made accusations as often as men. The common people believed that magical healers (called 'cunning folk' or 'wise people') could undo bewitchment. Hutton says that magical healers were sometimes denounced as witches themselves, "but seem to have made up a minority of the accused in any area studied".[54] The witch-craze reached its peak between the 16th and 17th centuries, resulting in the execution of tens of thousands of people. This dark period of history reflects the

confluence of superstition, fear, and authority, as well as the societal tendency to find scapegoats for complex problems. A feminist interpretation of the witch trials is that misogynist views led to the association of women and malevolent witchcraft.[158]

During the 16th century and mid 18th century Scotland had 4000-6000 prosecutions against accused witches, a much higher rate then the European average.[159][160]

Russia also experienced its own iteration of witchcraft trials during the 17th century. Witches were often accused of sorcery and engaging in supernatural activities, leading to their excommunication and execution. The blending of ecclesiastical and secular jurisdictions in Russia's approach to witchcraft trials highlighted the intertwined nature of religious and political power during that time. As the 17th century progressed, the fear of witches shifted from mere superstition to a tool for political manipulation, with accusations used to target individuals who posed threats to the ruling elite.[161]

Since the 1940s, neopagan witchcraft movements have emerged in Europe, seeking to revive and reinterpret ancient pagan and mystical practices. Wicca, pioneered by Gerald Gardner, is the most influential. Drawing inspiration from ceremonial magic, historical paganism, and the now-discredited witch-cult theory, Wicca emphasizes a connection to nature, the divine, and personal growth. Similarly, Stregheria in Italy reflects a desire to reconnect with the country's pagan past. Many of these neopagans self-identify as "witches". Neopagan witchcraft in Europe encompasses a wide range of traditions. [citation needed]

Oceania

[icon]

Beliefs in witchcraft and sorcery are widespread across Oceania, where traditional spiritual systems often coexist with introduced religions such as Christianity. In many societies, witchcraft serves as an explanation for illness, death, or misfortune, and may be associated with social tensions or unresolved conflicts.

In the Cook Islands, the Māori term for black magic is purepure.[162] Practitioners known as taʻunga historically served as priests, healers, and spiritual advisors. They were believed to possess sacred knowledge and were responsible for conducting rituals, healing the sick, and maintaining spiritual balance within the community.[163]

In Papua New Guinea, belief in witchcraft—often referred to locally as sanguma—remains deeply ingrained in many communities, particularly in the Highlands region. Sorcery is commonly blamed for unexplained deaths, illness, crop failure, or other misfortunes. It is estimated that 50 to 150 people are killed each year in the country as a result of witchcraft accusations.[164] In 2008, reports indicated that more than fifty individuals were killed in two Highlands provinces alone for allegedly practicing sorcery.

[165] Victims are often women, and attacks may involve torture, public shaming, or execution. Although the government repealed the Sorcery Act in 2013, which previously allowed sorcery as a defense in murder cases, enforcement of protective laws remains inconsistent, and community-led violence continues.

In Milne Bay Province, including the Samarai Islands, witchcraft beliefs persist, but violence against the accused is significantly lower compared to the Highlands. Anthropological research suggests that local interpretations of witchcraft in these areas are less associated with malevolence and more integrated into broader spiritual and cultural practices. This has been linked to greater social standing for women and fewer gender-based witchcraft accusations.[166]

Other parts of Oceania, including Fiji, Tonga, and Samoa, also maintain traditions involving spiritual power and magical influence. In Fiji, for example, concepts such as valavala vakalou (spiritual acts) and traditional healing practices are still recognized in some rural areas. However, the influence of Christianity and formal legal systems has reduced the prevalence of witchcraft-related violence. In many Pacific Island societies today, witchcraft is viewed through a cultural or religious lens rather than a criminal one, and cases involving supernatural claims are more likely to be addressed through customary dispute resolution or church-based mediation.

Witches in art and literature

Further information: Witch (archetype) § In art and literature, and List of fictional witches

Albrecht Dürer c. 1500: Witch riding backwards on a goat

Witches have a long history of being depicted in art, although most of their earliest artistic depictions seem to originate in Early Modern Europe, particularly the Medieval and Renaissance periods. Many scholars attribute their manifestation in art as inspired by texts such as Canon Episcopi, a demonology-centered work of literature, and Malleus Maleficarum, a "witch-craze" manual published in 1487, by Heinrich Kramer and Jacob Sprenger.[167] Witches in fiction span a wide array of characterizations. They are typically, but not always, female, and generally depicted as either villains or heroines.[168]

Notes

"If we analyze the principles of thought on which magic is based, they will probably be found to resolve themselves into two: first, that like produces like, or that an effect resembles its cause; and, second, that things which have once been in contact with each other continue to act on each other at a distance after the physical contact has been severed. The former principle may be called the Law of Similarity, the latter the Law of Contact or Contagion. From the first of these principles, namely the Law of Similarity, the magician infers that he can produce any effect he desires merely by imitating it: from the second he infers that whatever he does to a material object will affect equally the person with whom the object was once in contact, whether it formed part of his body or not."[43]

Russell, Jeffrey Burton; Lewis, Ioan M. (2023). "Witchcraft". Encyclopedia Britannica. Archived from the original on 28 June 2023. Retrieved 28 July 2023. Although defined differently in disparate historical and cultural contexts, witchcraft has often been seen, especially in the West, as the work of crones who meet secretly at night, indulge in cannibalism and orgiastic rites with the Devil, or Satan, and perform black magic. Witchcraft thus defined exists more in the imagination of contemporaries than in any objective reality. Yet this stereotype has a long history and has constituted for many cultures a viable explanation of evil in the world.

Book of Shadows

From Wikipedia, the free encyclopedia
This article is about the Wiccan book. For other uses, see Book of Shadows (disambiguation).

One of Gerald Gardner's earliest Books of Shadows
A Book of Shadows is a book containing religious text and instructions for magical

rituals found within the Neopagan religion of Wicca. Since its conception, it has made its way into many pagan practices and paths. The most famous Book of Shadows was created by the pioneering Wiccan Gerald Gardner sometime in the late 1940s or early 1950s, and which he utilised first in his Bricket Wood coven and then in other covens which he founded in following decades. The Book of Shadows is also used by other Wiccan traditions, such as Alexandrian Wicca and Mohsianism, and with the rise of books teaching people how to begin following non-initiatory Wicca in the 1970s onward, the idea of the Book of Shadows was then further propagated amongst solitary practitioners unconnected to earlier, initiatory traditions.

Initially, when Wicca was still dominated by covens, "only one copy [of the Book] existed for an entire coven, kept by the high priestess or high priest. That rule has proved unfeasible, and it is [now] commonplace for all Witches to have their own copies."[1] In the various traditions that make up British Traditional Wicca, copies of the original Book composed by Gerald Gardner with the aid of his High Priestess Doreen Valiente, along with alterations and additions that have been made since then, is followed by adherents. Though originally a secret text only given to initiates of Wicca, many initiate and non-initiates alike have gone on to print various Books of Shadows. These figures include Charles Cardell, Lady Sheba, and Janet and Stewart Farrar to name a few. In other Wiccan traditions and amongst a number of solitary practitioners, alternate versions of the Book of Shadows have been written, which are independent of Gardner's original.

Numerous associations and traditions have since grown up around the Book of Shadows. Traditionally, "a Witch's book of shadows is destroyed upon death."[2] It can be an experimental practice, everyday ritual works, or a record of magic. This is also a book of inspiration and can be used in future rituals. The concept of the Book of Shadows has subsequently appeared in popular culture, for instance being used in the American television series Charmed, which popularised the Book of Shadows.

History

Origins

Gerald Gardner, the "father of Wicca", first introduced the Book of Shadows to people that he had initiated into the craft through his Bricket Wood coven in the 1950s. He claimed that it was a personal cookbook of spells that have worked for the owner; they could copy from his own book and add material as they saw fit. He said that the practice of Witches keeping such a book was ancient, and was practised by the Witch-cult throughout history. According to tradition, Gardner claimed that the Book of Shadows was burned after a person died, so that it would not be discovered that they had been a witch.

Gerald Gardner did not mention any such thing as a "Book of Shadows" in his fictitious 1949 novel about mediaeval witchcraft, High Magic's Aid. High Priestess Doreen Valiente claimed that this was because at the time, Gardner had not yet conceived of the idea, and only invented it after writing his novel.

Valiente made the claim that Gardner found the term "Book of Shadows" from a 1949 edition (Volume I, Number 3) of a magazine known as The Occult Observer. In this edition, she claimed, was an advertisement for Gardner's novel, High Magic's Aid, which was opposite an article titled "The Book of Shadows" written by the palmist Mir Bashir. The article in question was about an allegedly ancient Sanskrit divination manual which explained how to foretell things based upon the length of a person's shadow.[3] Valiente theorised that Gardner then adopted this term for his Witches' grimoire. She maintained that "It was a good name, and it is a good name still, wherever Gardner found it".[3]

A typescript from a page of Ye Booke of Ye Art Magical

A leather bound manuscript written in Gardner's handwriting that was titled Ye Bok of Ye Art Magical was later found amongst his papers from the Museum after his death by Aidan Kelly[4] and was later obtained by Richard and Tamarra James of the Wiccan Church of Canada.[5] It appeared to be a first draft of Gardner's Book of Shadows, and featured sections based upon the rituals of Ordo Templi Orientis which had been devised by the occultist Aleister Crowley.[6] Gardner had gained access to these rituals in 1946, when he had purchased a charter from Crowley giving him permission to perform the OTO rituals.

Some people have taken this as evidence that Gardner invented the idea of a Witches' Grimoire, perhaps sometime between 1946 (when he finished his novel High Magic's Aid), and 1949, and had named it Ye Bok of Ye Art Magical. In 1949, he had renamed it to the Book of Shadows, and soon began to make use of it with his Bricket Wood Coven.

Adding weight to the evidence indicating Gardner invented the Book was that other Neo-pagan witches of the time, such as Robert Cochrane, never made use of such a book. [7]

Valiente's rewriting

In 1953, Doreen Valiente joined Gardner's Bricket Wood coven, and soon rose to become its High Priestess. She noticed how much of the material in his Book of Shadows was taken not from ancient sources as Gardner had initially claimed, but from the works of the occultist Aleister Crowley, from Aradia, or the Gospel of the Witches, from the Key of Solomon and also from the rituals of Freemasonry.[8] She confronted Gardner with this, who admitted that the text he had received from the New Forest coven had been fragmentary and he had had to fill much of it using various sources. He also stated that "well, if you think you can do any better, go ahead",[9] and Valiente thought that she could, later stating that:

I accepted the challenge and set out to rewrite the Book of Shadows, cutting out the Crowleyanity as much as I could and trying to bring it back to what I felt was, if not so elaborate as Crowley's phraseology, at least our own and in our own words.[9]

Valiente rewrote much of it, cutting out a lot of sections that had come from Crowley (whose negative reputation she feared), though retaining parts that originated with Aradia, or the Gospel of the Witches, which she felt was genuine witchcraft practice. Valiente dramatically rewrote sections such as the Charge of the Goddess and also wrote several poems for the book, such as The Witches Rune. She also helped to create a poem to include the Wiccan Rede within it.[10]

Valiente also noticed that a chant in one ritual in the book was based upon the poem "A Tree Song" from Puck of Pook's Hill by Rudyard Kipling, which she had enjoyed as a child.[11] The chant in question stated that:

Oh, do not tell the priest our plight,
Or he would call it sin;
But - we have been in the woods all night,
A-conjuring summer in !
And we bring you news by word of mouth -
Good news for cattle and corn -
Now is the Sun come up from the South,
With Oak, and Ash, and Thorn![12]
(These eight lines are exactly the final stanza of "A Tree Song".)

This version of the ritual, written by both Gardner and Valiente, but containing sections adopted from various sources, such as Aleister Crowley, Aradia, or the Gospel of the Witches, and even Rudyard Kipling, went on to become the traditional text for Gardnerian Wicca.

In British Traditional Wicca
Main article: British Traditional Wicca
In forms of British Traditional Wicca, which include Gardnerian Wicca, Alexandrian Wicca and Algard Wicca, the Book of Shadows used by adherents is based upon that written by Gardner and Valiente.

Although his own book had been put together with the help of Doreen Valiente and included material from a variety of modern sources, (notably from Aradia, or the Gospel of the Witches and the writings of Aleister Crowley) it also included sections written in an antique (or mock-antique) style, including advice for witches brought to trial and tortured. Gardner claimed that these sections were genuinely historical in origin, and that witches had not been allowed to write anything down until recently, to avoid incrimination; when at last Books of Shadows were allowed, the rituals and spells had to be written in a jumbled manner to prevent any non-initiate from using them.[13] More recent scholars however have doubted their authenticity.

It seems likely that Gardner told his three subsequent initiatory lines that the book should be copied word for word, and Wiccans descended from Eleanor Bone, Patricia Crowther and Monique Wilson have widely believed that the book was of ancient provenance.[13][14]

Contemporary usage

There sometimes exist two Books of Shadows kept by more traditional Wiccans, one being a coven book of core rituals and practises which remains unchanged and from which new initiates copy, and the second, intended for personal use, which differs from witch to witch and contains magical material collected by the initiate, such as astrology, herbal lore, and information regarding divination.[15]

Publication

After Gardner's death, his rival, Charles Cardell, published much of the material from the Gardnerian Book of Shadows. In the 1970s, the then Alexandrians Janet Farrar and Stewart Farrar decided, with the consent of Doreen Valiente, that much of the Gardnerian book should be published in its true form. Much of it was published by the Farrars in their 1984 book The Witches' Way.

In Eclectic Wicca

In non-traditional or "eclectic" forms of Wiccan or Neo-pagan practice, the term Book of Shadows is more often used to describe a personal journal, rather than a traditional text. This journal records rituals, spells, and their results, as well as other magical information. This can be either an individual or coven text, and is not normally passed from teacher to student. In many cases, this kind of Book of Shadows is an electronic document (disk or website) instead of a hand-written one. Some reserve the Book of Shadows for recording spells and keep a separate book, sometimes called the "Book of Mirrors", to contain thoughts, feelings and experiences.[16]

Other traditions

Not all traditions of Wicca utilize the term "Book of Shadows". In Seax-Wica, a tradition founded by Raymond Buckland, the Book of Shadows is called "The Tree", and in Devotional Wicca, the book is titled "The Book of Ways"; many traditions refer to their Books of Shadows as simply "The Book".

In popular culture

The television fantasy series Charmed features a fictional Book of Shadows which contains spells and arcane law, and has a supernatural ability to defend itself from harm. In the 1996 film The Craft, which some critics saw as a major influence on the series Charmed,[17][18] the Book of Shadows was referred to as an object in which a witch keeps her "power thoughts".

The 2000 sequel to The Blair Witch Project was titled Book of Shadows: Blair Witch 2 and featured a Wiccan character, despite there being no mention of a "Book of Shadows", during the film. But in the film's teaser trailer, reveals the "Book of Shadows" itself but never appeared in the film. In the trailer, the "Book of Shadows" was found by a half-naked woman with a twana symbol behind her back, at the woods of Black Hills, until she was attacked by an unknown man.[19] The title was seen as an attempt to capitalise on the Charmed series' established market.[20]

In the 2011 television series The Secret Circle, each family is shown to have their own "Book of Shadows", with each book containing unique spells. As the book is passed down from generation to generation, each generation appears to write their own spells or notes, as indicated by Cassie's recognition of her mother's handwriting in her own family's "Book of Shadows".

The Japanese horror adventure game Corpse Party: Book of Shadows deals with the eponymous book during its final chapter, in which it is revealed to be an actual Book of Shadows very much in keeping with the description in this article (albeit in the game, there is only one Book of Shadows that exists, containing a complete chronicle of all spells that exist in the entire world, be they Wiccan or not). The Book of Shadows returns in Corpse Party: Blood Drive where it becomes a key element to the story throughout the game.

In the Australian television series Nowhere Boys two characters are known to possess a Book of Shadows. One being one of the protagonists, Felix Ferne, and one being an antagonist, Alice Hartley. Felix's book was first thought to be his diary as he tried to hide its true existence from his friends, and Alice's book was thought to be her sister's.

In the fifth edition of roleplaying game Dungeons & Dragons, members of the warlock class can gain a Book of Shadows, which enables them to learn extra spells and rituals regardless of whether or not such magic is ordinarily accessible through the warlock class.

In the roguelike video game Binding of Isaac, the Book of Shadows is featured as an active item the player can find. When used, it grants the player invulnerability which lasts for 10 seconds. It can be used multiple times as long as the player can recharge it by clearing hostile rooms/waves or by manually charging the item by other means.

What Is Chaos Magic? MCU's Strongest Powers Explained
Chaos magic is a modern, pragmatic occult system from the 1970s that treats belief as a tool, allowing practitioners (Chaos Magicians) to use any method—from ancient rituals to pop culture icons—to achieve results, focusing on what works rather than adhering to rigid dogma or deities, emphasizing personal power, adaptability, and belief as a malleable force.
Core Concepts
Belief as a Tool (Belief Flexibility): The central idea is that beliefs aren't fixed truths but tools to shape reality; a Chaos Magician can adopt any belief system (or none) temporarily to achieve a goal.
Pragmatism & Results-Oriented: Focuses on practical outcomes. If a technique, symbol, or deity from any system (shamanism, ceremonial magic, sci-fi) works, it's used.
Gnosis: An altered state of consciousness (trance, ecstasy, intense focus) where the conscious mind is quieted, allowing magical intent to bypass mental filters and manifest.
Sigils: Symbols created by the practitioner, charged with intent during gnosis, and then forgotten, allowing the subconscious to work on the goal.
Eclecticism: Blends diverse traditions (witchcraft, psychology, science, shamanism, pop culture) and creates new systems without strict hierarchies or complex rituals.
How it Works
Define Intent: Clearly state the desired outcome (e.g., finding a job, improving health).
Choose a Method: Select symbols, deities, or systems that resonate or seem effective (e.g., a Norse rune, a Gnostic angel, a made-up deity from a movie).
Achieve Gnosis: Enter an altered state, often through intense focus (chanting, drumming, meditation).
Charge the Sigil/Ritual: While in gnosis, activate the chosen symbol or perform the ritual, focusing energy on the intent.
Forget: Once charged, the symbol or ritual is deliberately forgotten (banned from the conscious mind) to allow the subconscious to work.
Observe Results: The belief in the method is discarded once the goal is met, allowing for new beliefs and techniques to be used next time.
Key Figures & Influences
Founders: Peter Carroll and Ray Sherwin (Illuminates of Thanateros - IOT).
Influences: Aleister Crowley, Austin Osman Spare, quantum physics, psychology, and various world religions.

Can you feel the shift in your energy when you start casting? This phenomenon is also refered to as the gnostic state or gnosis. In chaos magick theory, gnosis is how you disseminate your magick This flow state is different from your everyday mundane disposition and helps you access different parts of yourself and the divine It helps you focus on your will and allowing your desire to pour out of it into your spellwork materia Before I start a spell or ritual I will take a few minutes and settle into this gnosic state— I usually do this through dance and music But you can access it through breathwork, meditation, prayer, gentle movement, or focus It’s kind of like spellwork foreplay and it helps you have a truly elevated experience that will translate in the spellwork results

Do you think magic is real? I do. Not as fantasy, but as probability, attention, and intention shaping reality. Chaos magic is a modern, experimental approach rooted in science, psychology, and ritual. This post is my attempt to explain a bit about it. Curious what you think - would you try it? . Drop the comment “CHAOS” below if you’re interested in learning more about the upcoming “Chaos Magic for Chaotic Times” online course.

I've been a big fan of @fivefoldlaw's writing style for a long time over at his blog and it's great to see he's finally written a book, which I've long expected and anticipated. The Chaos Apple is a brilliantly irreverent crash course in making magic strange again. Thumper Forge brings the prankster spirit of Eris to life with sharp insight, grounded technique, and a clear understanding of Chaos Magic, Discordianism, and witchcraft. His writing is a joy; clever, candid, and disarmingly wise, making even the wildest concepts feel inviting and accessible. This book dares you to rethink and rewire your practice with purpose, play, and just the right dose of absurdity that garner real results. A really nice touch throughout the book are his "Discordian Dance Breaks" where those sections are printed upside down, which adds a nice touch to the book's overall vibe. A must-read for any witch ready to laugh, learn, and let go.

Chaos magic, also spelled chaos magick,[1][2] is a modern tradition of magic.[3] Emerging in England in the 1970s as part of the wider neo-pagan and esoteric subculture,[4] it drew heavily from the occult beliefs of artist Austin Osman Spare, expressed several decades earlier.[3] It has been characterised as an invented religion,[5] with some commentators drawing similarities between the movement and Discordianism.[6] Magical organizations within this tradition include the Illuminates of Thanateros and Thee Temple ov Psychick Youth.

The founding figures of chaos magic believed that other occult traditions had become too religious in character.[7] They attempted to strip away the symbolic, ritualistic, theological, or otherwise ornamental aspects of these occult traditions, to leave behind a set of basic techniques that they believed to be the basis of magic.[8]

Chaos magic teaches that the essence of magic is that perceptions are conditioned by beliefs, and that the world as it is normally perceived can be changed by deliberately changing those beliefs.[9] Chaos magicians subsequently treat belief as a tool, often creating their own idiosyncratic magical systems and blending such different things as "practical magic, quantum physics, chaos theory, and anarchism."[10]

Scholar Hugh Urban has described chaos magic as a union of traditional occult techniques and applied postmodernism[11] – particularly a postmodernist skepticism concerning the existence or knowability of objective truth,[12] positing that chaos magic rejects the existence of absolute truth, and views all occult systems as arbitrary symbol-systems that are only effective because of the belief of the practitioner.[12]

History

Origins and influences (1900–1982)

Further information: Austin Osman Spare

Austin Osman Spare in 1904. His ideas formed the basis of chaos magic.
Austin Osman Spare's work in the early to mid 1900s is largely the source of chaos magical theory and practice.[13] Specifically, Spare developed the use of sigils and the use of gnosis to empower them.[14][15] Although Spare died before chaos magic emerged, he has been described as the "grandfather of chaos magic".[16] Working during much the same period as Spare, Aleister Crowley's publications also provided a marginal yet early and ongoing influence, particularly for his syncretic approach to magic and his emphasis on experimentation and deconditioning.[17] Later, concurrent with the growth of religions such as Wicca in the 1950s and 1960s, different forms of magic became more common, some of which came in "explicitly disorganized, radically individualized, and often quite 'chaotic' forms".[18] In the 1960s and the decade that followed, Discordianism, the punk movement, postmodernism and the writings of Robert Anton Wilson emerged, and they were to become significant influences on the form that chaos magic would take.[19][20]

During the mid-1970s chaos magic appeared as "one of the first postmodern manifestations of occultism",[14] built on the rejection of a need to adhere to a "single, systematized convention",[21] and aimed at distilling magical practices down to a result-oriented approach rather than following specific practices based on tradition.[22] An oft quoted line from Peter Carroll is "Magic will not free itself from occultism until we have strangled the last astrologer with the guts of the last spiritual master."[23]

Peter J. Carroll and Ray Sherwin are considered to be the founders of chaos magic,[10] although Phil Hine points out that there were others "lurking in the background, such as the Stoke Newington Sorcerors".[24] Carroll was a regular contributor to The New Equinox, a magazine edited by Sherwin, and thus the two became acquainted.[24][25]

In 1976-77 the first chaos magic organization Illuminates of Thanateros (IOT) was announced.[26] The following year, 1978, was a seminal year in the origin of chaos magic, seeing the publication of both Liber Null by Carroll and The Book of Results by Sherwin – the first published books on chaos magic.[27][28]

According to Carroll, "When stripped of local symbolism and terminology, all systems show a remarkable uniformity of method. This is because all systems ultimately derive from the tradition of Shamanism. It is toward an elucidation of this tradition that the following chapters are devoted."[29]

Development and spread (1982–1994)

New chaos magic groups emerged in the early 1980s – at first, located in Yorkshire, where both Sherwin and Carroll were living. The early scene was focused on a shop in Leeds called The Sorceror's Apprentice, owned by Chris Bray. Bray also published a magazine called The Lamp of Thoth, which published articles on chaos magic, and his Sorceror's Apprentice Press re-released both Liber Null and The Book of Results, as well as issuing Psychonaut and The Theatre of Magic.[30] The "short-lived" Circle of Chaos, which included Dave Lee, was formed in 1982.[31] The rituals of this group were published by Paula Pagani as The Cardinal Rites of Chaos in 1985.[32]

Ralph Tegtmeier (Frater U∴D∴), who ran a bookshop in Germany and was already practicing his own brand of "ice magick", translated Liber Null into German.[31] Tegtmeier was inducted into the IOT in the mid-1980s, and later established the German section of the order.[31]

As chaos magic spread, people from outside Carroll and Sherwin's circle began publishing on the topic. Phil Hine, along with Julian Wilde and Joel Biroco, published a number of books on the subject that were particularly influential in spreading chaos magic techniques via the internet.[33]

In 1981, Genesis P-Orridge established Thee Temple ov Psychick Youth (TOPY).[34] P-Orridge had studied magic under William S. Burroughs and Brion Gysin in the 1970s, and was also influenced by Aleister Crowley and Austin Osman Spare, as well as the psychedelic movement.[35][33] TOPY practiced chaos magic alongside their other activities, and helped raise awareness of chaos magic in subcultures like the Acid house and Industrial music scenes.[36] Along with being an influence on P-Orridge, Burroughs was himself inducted into the IOT in the early 1990s.[37]

Pop culture: (1994–2000s)

From the beginning, chaos magic has had a tendency to draw on the symbolism of pop culture in addition to that of traditional magical systems; the rationale being that all symbol systems are equally arbitrary, and thus equally valid – the belief invested in them being the thing that matters.[38] The symbol of chaos, for example, was lifted from the fantasy novels of Michael Moorcock.[39]

Preluded by Kenneth Grant – who had studied with both Crowley and Spare, and who had introduced elements of H.P. Lovecraft's fictional Cthulhu mythos into his own magical writings[40] – there was a trend for chaos magicians to perform rituals invoking or otherwise dealing with entities from Lovecraft's work, such as the Great Old Ones. Hine, for example, published The Pseudonomicon (1994), a book of Lovecraftian rites. [14]

From 1994 to 2000, Grant Morrison wrote The Invisibles for DC Comics' Vertigo imprint, which has been described by Morrison as a "hypersigil": "a dynamic miniature model of the magician's universe, a hologram, microcosm or 'voodoo doll' which can be manipulated in real time to produce changes in the macrocosmic environment of 'real' life."[41] Both The Invisibles and the activities of Morrison themself were responsible for bringing chaos magic to a much wider audience in the late 1990s and early 2000s, with the writer outlining their views on chaos magic in the "Pop Magic!" chapter of A Book of Lies (2003)[38] and a Disinfo Convention talk.[42]

Morrison's particular take on chaos magic exemplified the irreverent, pop cultural elements of the tradition, with Morrison arguing that the deities of different religions (Hermes, Mercury, Thoth, Ganesh, etc.) are nothing more than different cultural "glosses" for more universal "big ideas"[41] – and are therefore interchangeable: both with each other, and with other pop culture icons like The Flash, Metron, and Madonna. [41]

Post-chaos magic: 2010s

Alan Chapman – whilst praising chaos magic for "breathing new life" into Western occultism, thereby saving it from "being lost behind a wall of overly complex symbolism and antiquated morality" – has also criticised chaos magic for its lack of "initiatory knowledge": i.e., "teachings that cannot be learned from books, but must be transmitted orally, or demonstrated", present in all traditional schools of magic.[43] Innovations continue into the 2020s, as found in social media, fandoms, and webcomics.[44]

Beliefs, core concepts, and practices

Belief as a tool

The central defining tenet of chaos magic is arguably the idea that belief is a tool for achieving effects.[45] In chaos magic, complex symbol systems like Qabalah, the Enochian system, astrology or the I Ching are treated as maps or "symbolic and linguistic constructs" that can be manipulated to achieve certain ends but that have no absolute or objective truth value in themselves. Religious scholar Hugh Urban notes that chaos magic's "rejection of all fixed models of reality" reflects one of its central tenets: "nothing is true everything is permitted".[12]

Both Urban and religious scholar Bernd-Christian Otto trace this position to the influence of postmodernism on contemporary occultism.[12][46] Another influence comes from Spare, who believed that belief itself was a form of psychic energy that became locked up in rigid belief structures, and that could be released by breaking down those structures. This "free belief" could then be directed towards new aims.[citation needed] Otto has argued that chaos magic "filed away the whole issue of truth, thus liberating and instrumentalising individual belief as a mere tool of ritual practice."[47]

Magical paradigm shifting

Peter J. Carroll suggested assigning different worldviews to the sides of a dice, and then inhabiting the associated particular random paradigm for a set length of time when its number is rolled. For example, 1 might be paganism, 2 might be monotheism, 3 might be atheism, and so on.[12]

Phil Hine has stated that the primary task here is "to thoroughly decondition" the aspiring magician from "the mesh of beliefs, attitudes and fictions about self, society, and the world" that his or her ego associates with:

Our ego is a fiction of stable self-hood which maintains itself by perpetuating the distinctions of "what I am/what I am not, what I like/what I don't like", beliefs about ones politics, religion, gender preference, degree of free will, race, subculture etc all help maintain a stable sense of self.[48]

Cut-up technique

The cut-up technique is an aleatory literary technique in which a written text is cut up and rearranged, often at random, to create a new text. The technique can also be applied to other media such as film, photography, and audio recordings. It was pioneered by Brion Gysin and William S. Burroughs.[49]

Burroughs – who practiced chaos magic, and was inducted into the Illuminates of Thanateros in the early 1990s – was adamant that the technique had a magical function, stating, "the cut-ups are not for artistic purposes".[50] Burroughs used his cut-ups for "political warfare, scientific research, personal therapy, magical divination, and conjuration"[50] – the essential idea being that the cut-ups allowed the user to "break down the barriers that surround consciousness".[51] Burroughs stated:

I would say that my most interesting experience with the earlier techniques was the realization that when you make cut-ups you do not get simply random juxtapositions of words, that they do mean something, and often that these meanings refer to some future event. I've made many cut-ups and then later recognized that the cut-up referred to something that I read later in a newspaper or a book, or something that happened... Perhaps events are pre-written and pre-recorded and when you cut word lines the future leaks out.[51]

David Bowie compared the randomness of the cut-up technique to the randomness inherent in traditional divinatory systems, like the I Ching or tarot.[52]

Genesis P-Orridge, who studied under Burroughs[53] described it as a way to "identify and short-circuit control, life being a stream of cut-ups on every level. They are a means to describe and reveal reality and the multi-faceted individual in which/from which reality is generated."[54]

The Shikhshit Talks · YouTube
Life coach & motivational speaker

Everything you want already exists for you in possibility. You don’t need someone else to bring it to you, you can claim it through your own imagination. When you imagine yourself already having what you desire and feel it as real, you bring it into your life. Once you truly accept the end result as done, you stop worrying about whether it will work or fail, because you know it's already yours. Neville Goddard (February 19, 1905 – October 1, 1972) was a Barbadian writer, speaker and mystic. He grew up in Barbados and moved to the United States as a young adult. He taught various self-help methods for testing his own claim that the human imagination is omnificent, therefore God. He achieved popularity by reinterpreting the Bible and the poetry of William Blake.

Early life

Neville Lancelot Goddard was born in Fontabelle, Saint Michael, Barbados, on February 19, 1905, to Joseph Nathaniel Goddard, a merchant, and Wilhelmina Goddard (née Hinkson). Neville was the fourth of ten children. He was also the older brother to cricketer and businessman John Goddard.[1] At age 17, emigrated to New York City in 1922 to study drama and began his theatrical career as a dancer at the Hippodrome in New York City in 1925.[2][3]

Between 1929 and 1936, he was mentored by an Ethiopian Jew named Abdullah in New York. During this time, Abdullah introduced him to Kabbalah and taught him Hebrew.[3] New Thought author Joseph Murphy also acknowledged Abdullah as his teacher.[4]

In 1942, at the age of 37, Neville Goddard was drafted into the army and stationed at Camp Polk, Louisiana, in the 11th Armored Division. After serving just 9 months, he was granted an honorable discharge from his Battalion Commanding Officer Colonel Theodore Bilbough Jr. It was after this brief stint in the Army[5] that he was naturalized as a United States citizen, having been a British citizen up to this point.

Career

Goddard's earliest known career was as a professional dancer. While touring with his dance company in the UK, he developed an interest in metaphysics after he met Arthur Begbie, a Scotsman who introduced him to the world of psychical research, giving Neville his first taste of the spiritualistic seance. When he returned to New York he became associated with a Rosicrucian body.[2] In February 1938, he began lecturing in Old Actor's Church in New York.[2]

After traveling extensively throughout the United States, Neville eventually made his home in Los Angeles in 1952. In the early 1950s, Goddard lectured at The Town Hall on religious topics.[5] In his 1931 lecture "Imagination plus Faith", he spoke of his brief career in television, “I did just what I am doing now, they gave me a lectern, I simply sat at a desk and spoke”. It was during the mid-1950s that he began his short stint on television. Broadcast in L.A. on channel 11 he had 26 half-hour shows which went on air between 2 pm and 2:30 pm every Sunday. The shows were simple in production, consisting of Goddard speaking extemporaneously to the television audience on biblical esotericism. The program averaged viewing audiences in excess of 300,000 on a weekly basis. The show was eventually cancelled when Channel 11 Studios were unable to secure advertisers suitable to the audience. In 1954, Goddard was reportedly planning a "metaphysical telefilm show", though it is unclear if the project came to fruition.[6] In the 1960s and early 1970s, he confined most of his lectures to Los Angeles, San Francisco, and Miami.

Legacy

Jonathan L. Walton has contended that Frederick Eikerenkoetter, best known as

Reverend Ike, in particular adopted theories and teachings rooted in Goddard's ideas.[7] Rhonda Byrne and Wayne Dyer have noted that Goddard shaped their views.[8] Margaret Runyan Castaneda, ex-wife and later biographer of Carlos Castaneda, was interested in Goddard's work and introduced Castaneda to Goddard's ideas.[9]

Personal life

Goddard married Mildrid Mary Hughes in 1923. Hughes was born on March 29, 1901, in Lancaster and Blackburn, England, and died on November 9, 1979, in New York City. Goddard had one child with Hughes, a son named Joseph Neville Goddard, who was born on May 19, 1924 and died in March 1, 1986.[10]

In 1942, Goddard married Catherine Willa Van Schmus. Van Schmus was born on February 2, 1907, in New Jersey, and died on January 1, 1975, in Los Angeles, California. They had a daughter, Victoria Goddard, born on June 28, 1942,[11] and died on September 25, 2024 in Santa Monica, California.[12]

Death

Goddard died on October 1, 1972, aged 67, from an esophageal rupture. In 2022, historian Mitch Horowitz corrected the record of Neville's death, previously misattributed to a heart attack;[13] the author's death certificate cites the esophageal rupture.[14] He had been a resident of Los Angeles for roughly 20 years.[15]

AI Overview
Nei Dan – Internal Alchemy – Sacred Path Medicine
Qigong and Neidan (Internal Alchemy) are intertwined Taoist practices for cultivating life energy (Qi), but Neidan is a more advanced, systematic path using Qigong as a foundation to transform Jing (essence), Qi, and Shen (spirit) into an internal elixir for spiritual immortality and union with the Tao, moving beyond basic health benefits to profound spiritual transformation. While Qigong focuses on circulation and physical health, Neidan uses deep meditation, visualization, and specific breathwork to refine these inner treasures, creating a higher-level internal substance.
Qigong (Qi Gong)
Focus: Moving and circulating Qi for health, balance, emotional control, and physical vitality.
Methods: Gentle movements, breathwork, and focused intention to open meridians and strengthen the body.
Goal: General well-being, healing, and building a strong energetic base.
Neidan (Inner Alchemy)
Focus: Cultivating and refining the "Three Treasures" (Jing, Qi, Shen) within the body to form an internal elixir.
Methods: More complex meditations, visualizations (like the Microcosmic Orbit), and specific energy work to transmute lower energies into higher spiritual states.
Goal: Spiritual realization, longevity, and becoming one with the Tao (immortality).
The Relationship: Qigong as Foundation for Neidan
Preparation: Qigong exercises are often the essential preparation for Neidan, clearing channels and building up Qi.
Progression: Neidan builds upon Qigong, taking the cultivated energy and consciousness to a deeper, more transformative level.
Differentiation: Think of Qigong as learning to use the tools, while Neidan is the systematic process of using those tools to create something profound.
Key Concepts in Neidan
The Three Treasures:
Jing (Essence): The fundamental life force, a person's inherited vitality.
Qi (Energy/Vitality): The dynamic life energy that flows through the body.
Shen (Spirit/Mind): Consciousness and spiritual awareness.
Microcosmic Orbit (Xiao Zhou Tian): Circulating Qi up the Governing Vessel (Du) and down the Conception Vessel (Ren).
Macrocosmic Orbit (Da Zhou Tian): Activating all eight extraordinary vessels, linking the entire meridian system.

AI Overview
Vipassana and Pranayama are distinct practices, while the declassified CIA "Gateway Process" paper is an analysis of a system that incorporates elements similar to both, using techniques like focused breathing to achieve altered states of consciousness.
Vipassana Meditation
Vipassana, meaning "to see things as they really are," is an ancient Buddhist meditation technique focused on insight and self-observation.
Techniques: Practitioners observe their natural breath and the physical sensations throughout their body in a non-judgmental way, without trying to change them. The goal is to notice the impermanence of all phenomena (thoughts, feelings, sensations).
Goal: To purify the mind, develop equanimity, and gain insight into the true nature of reality to achieve liberation from suffering.
Approach: It emphasizes passive, non-interfering observation of the present moment.
Pranayama (Yogic Breathing Techniques)
Pranayama is a set of yogic practices focused on the control and manipulation of the breath or "life force" (prana).
Techniques: Unlike Vipassana's passive observation, Pranayama involves actively regulating the breath using specific methods such as alternate nostril breathing (Nadhi Sodhana), forceful exhalations (Kapalabhati), or the "ocean breath" (Ujjayi).
Goal: To balance energy, clear the mind, and create physical and mental benefits by influencing the nervous system (e.g., activating the relaxation response).
Approach: It is an active, tool-based method for harmonizing energy flow and preparing the mind for deeper yogic meditation.
The CIA Paper on the Gateway Process
The declassified 1983 CIA report, titled "Analysis and Assessment of the Gateway Process", is an analysis of a training system from the Monroe Institute designed to alter consciousness and potentially enable applications like intelligence gathering or "remote viewing".
Techniques: The system uses a combination of methods, including:
Focused breathing and muscle relaxation to convert physical energy into mental energy.
Hemi-Sync (hemispheric synchronization), an audio technique using binaural beats to synchronize the left and right brain hemispheres and induce specific brainwave patterns

(like theta and delta waves) associated with deep meditation and trance states.
Visualization and affirmation exercises to expand awareness and achieve "out-of-body" states, thereby transcending the limitations of time and space.
Goal: To boost brain power and facilitate a state of consciousness where the individual's awareness can be separated from physical reality and explore alternate dimensions or gather information non-locally.
Approach: The report attempts to provide a scientific framework, referencing quantum mechanics and holographic theory, to explain how these meditation-like practices could achieve such results. The document is available in the CIA's declassified reading room.
Summary of Relationship
The Gateway Process incorporates techniques that resemble elements of both Vipassana (focused internal awareness/body scan) and Pranayama (conscious manipulation of breath and energy) but frames them within a unique, scientifically speculative military/intelligence context focused on achieving extraordinary states of consciousness and psychic abilities, which is distinct from the traditional spiritual and psychological goals of the other two practices.

AI Overview
Sadhus Men Sadhus are ascetic men in Hindu tradition who ...
Sadhu and Sanyasi traditions involve ascetic life, renouncing worldly ties for spiritual realization through severe discipline, meditation, and detachment, characterized by distinctive appearances (saffron robes, ash), vows (celibacy, non-possession), and practices like wandering (Bahudaka), living in solitude (Kutichaka), or extreme austerities (Naga Sadhus), all focused on achieving moksha (liberation). They are revered but distinct from priests, representing a life beyond family and society, often undertaking intense tapas (austerities) and adhering to strict vows, says this Facebook post.
Core Principles & Vows
Renunciation: Abandoning family, possessions, and societal norms (marriage, career) for spiritual pursuit.
Austerity (Tapas): Extreme self-discipline, meditation, and practices to control senses.
Celibacy (Brahmacharya): Strict abstention from sexual activity.
Non-Possession (Aparigraha): Minimizing or renouncing material wants.
Truthfulness & Non-violence (Ahimsa): Key ethical guidelines.
Appearance & Lifestyle

Clothing/Body: Often wear saffron robes, smear ash (symbolizing death to the world), or go naked (Naga Sadhus).
Possessions: Carry minimal items, like a begging bowl, staff, or water pot, says this Facebook post.
Lifestyle: Can be itinerant (Bahudaka), solitary (Kutichaka), or deeply ascetic (Paramahamsa), focusing on self-realization (Brahman).
Paths & Orders
Vedic Progression: Some follow stages of life, while others choose outright renunciation.
Initiation: Involves name changes, dedication to a deity (Shiva, Vishnu), and learning from a guru.
Types: Includes diverse orders like Shaivite (trident bearers) and Vaishnavite, with specific groups like Naga Sadhus performing extreme rituals (e.g., at Kumbh Mela).
Role in Society
Spiritual Guides: Offer teachings, spiritual merit, and a path to liberation.
Ambivalence: While respected, they represent detachment, making them inauspicious at events like weddings, notes this Religion Facts article.

vte
Sannyasa (Sanskrit: संन्यास, romanized: saṃnyāsa), sometimes spelled sanyasa, is the fourth stage within the Hindu system of four life stages known as ashramas, the first three being brahmacharya (celibate student), grihastha (householder) and vanaprastha (forest dweller, retired).[1] Sannyasa is traditionally conceptualized for men or women in the last years of their life, but young brahmacharis have the choice to skip the householder and retirement stages, renounce worldly and materialistic pursuits and dedicate their lives to spiritual pursuits.

Sannyasa, a form of asceticism marked by renunciation of material desires and prejudices, is characterized by a state of uninterest in and detachment from material life, with the purpose of spending one's life in peaceful, spiritual pursuits.[2][3] An individual in Sanyasa is known as a sannyasi (male) or sannyasini (female) in Hinduism.[note 1] Sannyasa shares similarities with the Sadhu and Sadhvi traditions of Jain monasticism, and the sannyasi and sannyasini share similarity with the bhikkhus and bhikkhunis of Buddhism.[5]

Sannyasa has historically been a stage of renunciation, ahimsa (non-violence), a peaceful and simple life and spiritual pursuit in Indian traditions. However, this has not always been the case. After the invasions and establishment of Muslim rule in India, from the 12th century through the British Raj, parts of the Shaiva (Gossain) and Vaishnava (Bairagi) ascetics metamorphosed into a military order, where they developed martial arts, created military strategies, and engaged in guerrilla warfare.[6] These warrior sanyasi (ascetics) played an important role in helping European colonial powers establish themselves in the Indian subcontinent.[7]

Etymology and synonyms

Saṃnyāsa: in Sanskrit nyasa means 'purification', sannyasa means "Purification of Everything".[8] It is a composite word of saṃ- which means "together, all", ni- which means "down" and āsa from the root as, meaning "to throw" or "to put".[9] A literal translation of Sannyāsa is thus "to put down everything, all of it". Sannyasa is sometimes spelled as Sanyasa.[9]

The term Saṃnyasa makes appearance in the Samhitas, Aranyakas and Brahmanas, the earliest layers of Vedic literature (2nd millennium BCE), but it is rare.[10] It is not found in ancient Buddhist or Jaina vocabularies, and only appears in Hindu texts of the 1st millennium BCE, in the context of those who have given up ritual activity and taken up non-ritualistic spiritual pursuits discussed in the Upanishads.[10] The term Sannyasa evolves into a rite of renunciation in ancient Sutra texts, and thereafter became a recognized, well discussed stage of life (Ashrama) by about the 3rd and 4th century CE.[10]

Sanyasis are also known as Bhiksu, Pravrajita/Pravrajitā,[11] Yati,[12] Sramana and Parivrajaka in Hindu texts.[10]

History

Adi Shankara, founder of Advaita Vedanta, with disciples, by Raja Ravi Varma (1904)

Jamison and Witzel state[13] early Vedic texts make no mention of Sannyasa, or Ashrama system, unlike the concepts of Brahmacharin and Grihastha which they do mention.[14] Instead, Rig Veda uses the term Antigriha (अन्तिगृह) in hymn 10.95.4, as still a part of the extended family, where older people lived in ancient India, with an outwardly role.[13] It is in later Vedic era and over time, that Sannyasa and other new concepts emerged, while older ideas evolved and expanded. A three-stage Ashrama concept, along with Vanaprastha, emerged about or after 7th Century BC, when sages such as Yājñavalkya left their homes and roamed around as spiritual recluses and pursued their Pravrajika (wanderer) lifestyle.[15] The explicit use of the four-stage Ashrama concept appeared a few centuries later.[13][16]

However, early Vedic literature from 2nd millennium BC mentions Muni (मुनि, monks, mendicants, holy men), with characteristics that mirror those found in later Sannyasins and Sannyasinis. For example, the Rig Veda, in Book 10 Chapter 136, mentions Munis as those with Kesin (केशिन्, long haired) and Mala clothes (मल, soil-colored, yellow, orange, saffron), engaged in the affairs of Mananat (mind, meditation).[17] The Rigveda, however, refers to these people as Muni and Vati (वति, monks who beg).

केश्यग्निं केशी विषं केशी बिभर्ति रोदसी । केशी विश्वं स्वर्दृशे केशीदं ज्योतिरुच्यते ॥१॥ मुनयो वातरशनाः पिशङ्गा वसते मला । वातस्यानु ध्राजिं यन्ति यद्देवासो अविक्षत ॥२॥

He with the long loose locks (of hair) supports Agni, and moisture, heaven, and earth; He is all sky to look upon: he with long hair is called this light. The Munis, girdled with the wind, wear garments of soil hue; They, following the wind's swift course, go where the Gods have gone before.

—Rig Veda, Hymn 10.CXXXVI.1-2[17]

These Munis, their lifestyle and spiritual pursuit, likely influenced the Sannyasa concept, as well as the ideas behind the ancient concept of Brahmacharya (bachelor student). One class of Munis were associated with Rudra.[18] Another were Vratyas.[citation needed]

Lifestyle and goals

A Hindu monk walking during sunrise in a mango garden in Dinajpur, Bangladesh

A Hindu Sannyasi. In ancient and medieval literature, they are usually associated with forests and remote hermitages in their spiritual, literary and philosophical pursuits. Hinduism has no formal demands nor requirements on the lifestyle or spiritual discipline, method or deity a Sanyasin or Sanyasini must pursue – it is left to the choice and preferences of the individual.[19] This freedom has led to diversity and significant differences in the lifestyle and goals of those who adopt Sannyasa. There are, however, some common themes. A person in Sannyasa lives a simple life, typically detached, itinerant, drifting from place to place, with no material possessions or emotional attachments. They may have a walking stick, a book, a container or vessel for food and drink, often wearing yellow, saffron, orange, ochre or soil colored clothes. They may have long hair and appear disheveled, and are usually vegetarians.[19] Some minor Upanishads as well as monastic orders consider women, children, students, fallen men (those with a criminal record) and others as not qualified to become Sannyasa; while other texts place no restrictions.[20] The dress, the equipage and lifestyle varies between groups. For example, Sannyasa Upanishad in verses 2.23 to 2.29, identifies six lifestyles for six types of renunciates.[21] One of them is described as living with the following possessions,[22]

Pot, drinking cup and flask – the three supports, a pair of shoes,
a patched robe giving protection – in heat and cold, a loin cloth,
bathing drawers and straining cloth, triple staff and coverlet.

—Sannyasa Upanishad, 1.4[22]

Those who enter Sannyasa may choose whether they join a group (similar to Christian mendicant orders). Some are anchorites, homeless mendicants preferring solitude and seclusion in remote parts, without affiliation.[23] Others are cenobites, living and traveling with kindred fellow-Sannyasi in the pursuit of their spiritual journey, sometimes in Ashramas or Matha/Sangha (a Hermitage, the practice of seclusion known generally as monasticism).[23]

Most Hindu ascetics adopt celibacy when they begin Sannyasa. However, there are exceptions, such as the Saiva Tantra school of asceticism where ritual sex is considered part of liberation process.[24] Sex is viewed by them as a transcendence from a personal, intimate act to something impersonal and ascetic.[24]

The goal

The goal of the Hindu Sannyasin is moksha (liberation).[25][26] The idea of what that means varies from tradition to tradition.

Who am I, and in what really do I consist? What is this cage of suffering?

—Jayakhya Samhita, Verse 5.7[24]

For the Bhakti (devotion) traditions, liberation consists of being an eternal servant to the Divine and release from Saṃsāra (rebirth in future life);[27] for Yoga traditions, liberation is the experience of the highest Samādhi (deep awareness in this life);[28] and for the Advaita tradition, liberation is jivanmukti – the awareness of the Supreme Reality (Brahman) and Self-realization in this life.[29][30] Sannyasa is a means and an end in itself. It is a means to decreasing and then ultimately ending all ties of any kind. It is a means to the soul and meaning, but not ego nor personalities. Sannyasa does not abandon the society, it abandons the ritual mores of the social world and one's attachment to all its other manifestations.[31] The end is a liberated, content, free and blissful existence.[32][33]

The behaviors and characteristics

The behavioral state of a person in Sannyasa is described by many ancient and medieval era Indian texts. Bhagavad Gita discusses it in many verses, for example:[34]

ज्ञेयः स नित्यसंन्यासी यो न द्वेष्टि न काङ् क्षति । निर्द्वन्द्वो हि महाबाहो सुखं बन्धात्प्रमुच्यते ॥५-३॥

He is known as a permanent Sannyasin who does not hate, does not desire, is without dualities (opposites). Truly, Mahabaho (Arjuna), he is liberated from bondage.

—Bhagavad Gita, Hymn 5.3[34]

Other behavioral characteristics, in addition to renunciation, during Sannyasa include: ahimsa (non-violence), akrodha (not become angry even if you are abused by others), disarmament (no weapons), chastity, bachelorhood (no marriage), avyati (non-desirous), amati (poverty), self-restraint, truthfulness, sarvabhutahita (kindness to all creatures), asteya (non-stealing), aparigraha (non-acceptance of gifts, non-possessiveness) and shaucha (purity of body, speech and mind).[35][36] Some Hindu monastic orders require the above behavior in form of a vow, before a renunciate can enter the order.[35] Tiwari notes that these virtues are not unique to Sannyasa, and other than renunciation, all of these virtues are revered in ancient texts for all four Ashrama (stage) of human life.[37]

Baudhayana Dharmasūtra, completed by about 7th century BC, states the following behavioral vows for a person in Sannyasa[38]

These are the vows a Sannyasi must keep –

Abstention from injuring living beings, truthfulness, abstention from appropriating the property of others, abstention from sex, liberality (kindness, gentleness) are the major vows. There are five minor vows: abstention from anger, obedience towards the guru, avoidance of rashness, cleanliness, and purity in eating. He should beg (for food) without annoying others, any food he gets he must compassionately share a portion with other living beings, sprinkling the remainder with water he should eat it as if it were a medicine.

—Baudhayana, Dharmasūtra, II.10.18.1-10[38]

Types

Ashrama Upanishad identified various types of Sannyasi renouncers based on their different goals:[39] Kutichaka – seeking atmospheric world; Bahudaka – seeking heavenly world; Hamsa – seeking penance world; Paramahamsa – seeking truth world; and Turiyatitas and Avadhutas seeking liberation in this life.

In some texts, such as Sannyasa Upanishad,[21] these were classified by the symbolic items the Sannyasins carried and their lifestyle. For example, Kutichaka sannyasis carried triple staffs, Hamsa sannyasis carried single staffs, while Paramahamsas went without them. This method of classification based on emblematic items became controversial, as anti-thematic to the idea of renunciation. Later texts, such as Naradaparivrajaka Upanishad stated that all renunciation is one, but people enter the state of Sannyasa for different reasons – for detachment and getting away from their routine meaningless world, to seek knowledge and meaning in life, to honor rites of Sannyasa they have undertaken, and because he already has liberating knowledge.[40]

Other classifications

There were many groups of Hindu, Jain and Buddhist Sannyasis co-existing in pre-Maurya Empire era, each classified by their attributes, such as:[41] Achelakas (Śvetāmbara Jainas without clothes), Ajivika, Aviruddhaka, Devadhammika, Eka-satakas (Śvetāmbara Jainas with 1 cloth), Gotamaka, Jatilaka, Magandika, Mundasavaka, Nigrantha (Śvetāmbara Jainas), Paribbajaka, Tedandikas, Titthiya, Santrottar (Śvetāmbara Jainas with 2 or more clothes) and others.

Literature

Swami Vivekananda (1894) was a sannyasi.
The Dharmasūtras and Dharmaśāstras, composed about mid 1st millennium BC and later, place increasing emphasis on all four stages of Ashrama system including Sannyasa.[42] The Baudhayana Dharmasūtra, in verses 2.11.9 to 2.11.12, describes the four Ashramas as "a fourfold division of Dharma".[42] The newer Dharmaśāstra vary widely in their discussion of Ashrama system .[43]

The Dharmasūtras and Dharmaśāstras give a number of detailed but widely divergent guidelines on renunciation. In all cases, Sannyasa was never mandatory and was one of the choices before an individual. Only a small percentage chose this path. Olivelle[43] posits that the older Dharmasūtras present the Ashramas including Sannyasa as four alternative ways of life and options available, but not as sequential stage that any individual must follow.[42] Olivelle also states that Sannyasa along with the Ashrama system gained mainstream scholarly acceptance about 2nd century BC.[44]

Ancient and medieval era texts of Hinduism consider Grihastha (householder) stage as the most important of all stages in sociological context, as human beings in this stage not only pursue a virtuous life, they produce food and wealth that sustains people in other stages of life, as well as the offspring that continues mankind.[1][45] However, an individual had the choice to renounce any time he or she wanted, including straight after student life.[46]

When can a person renounce?
Baudhayana Dharmasūtra,[47] in verse II.10.17.2 states that anyone who has finished Brahmacharya (student) life stage may become ascetic immediately, in II.10.17.3 that any childless couple may enter Sannyasa anytime they wish, while verse II.10.17.4 states that a widower may choose Sannyasa if desired, but in general, states verse II.10.17.5, Sannyasa is suited after the completion of age 70 and after one's children have been firmly settled.[47] Other texts suggest the age of 75.[48]

The Vasiṣṭha and Āpastamba Dharmasūtras, and the later Manusmṛti describe the āśramas as sequential stages which would allow one to pass from Vedic studentship to householder to forest-dwelling hermit to renouncer.[49] However, these texts differ with each other. Yājñavalkya Smṛti, for example, differs from Manusmṛti and states in verse 3.56 that one may skip Vanaprastha (forest dwelling, retired) stage and go straight from the Grihastha (householder) stage to Sannyasa.

Who may renounce?
The Jabala Upanishad mentions one who gets vairagya of any class or gender can renounce or take sanyasa.[50] Nevertheless, Dharmaśāstra texts document people of all castes as well as women, entered Sannyasa in practice.[51]

What happened to renouncers' property and human rights?
After renouncing the world, the ascetic's financial obligations and property were

adjudicated by the state, in the manner of a decedent's estate.[52] Viṣṇu Smriti in verse 6.27, for example, states that if a debtor takes Sannyasa, his sons or grandsons should settle his debts.[53] As to the little property a Sannyasin may collect or possess after renunciation, Book III Chapter XVI of Kautiliya's Arthashastra states that the property of hermits (vánaprastha), ascetics (yati, sannyasa), and student bachelors (Brahmachári) shall on their death be taken by their guru, disciples, their dharmabhratri (brother in the monastic order), or classmates in succession.[54]

Although a renouncer's practitioner's obligations and property rights were reassigned, he or she continued to enjoy basic human rights such as the protection from injury by others and the freedom to travel. Likewise, someone practicing Sannyasa was subject to the same laws as common citizens; stealing, harming, or killing a human being by a Sannyasi were all serious crimes in Kautiliya's Arthashastra.[55]

Renunciation in daily life

Later Indian literature debates whether the benefit of renunciation can be achieved (moksha, or liberation) without asceticism in the earlier stages of one's life. For example, Bhagavad Gita, Vidyaranya's Jivanmukti Viveka, and others believed that various alternate forms of yoga and the importance of yogic discipline could serve as paths to spirituality, and ultimately moksha.[56][57] Over time, four paths to liberating spirituality have emerged in Hinduism: Jñāna yoga, Bhakti yoga, Karma yoga and Rāja yoga.[58] Acting without greed or craving for results, in Karma yoga for example, is considered a form of detachment in daily life similar to Sannyasa. Sharma[59] states that, "the basic principle of Karma yoga is that it is not what one does, but how one does it that counts and if one has the know-how in this sense, one can become liberated by doing whatever it is one does", and "(one must do) whatever one does without attachment to the results, with efficiency and to the best of one's ability".[59]

Warrior ascetics

The Mughal Army commanded by Akbar attack members of the Sannyasa during the Battle of Thanesar, 1567

Ascetic life was historically a life of renunciation, non-violence and spiritual pursuit. However, in India, this has not always been the case. For example, after the Mongol and Persian Islamic invasions in the 12th century, and the establishment of Delhi Sultanate, the ensuing Hindu-Muslim conflicts provoked the creation of a military order of Hindu ascetics in India.[6][7] These warrior ascetics formed paramilitary groups called Akharas and they invented a range of martial arts.[6]

Nath Siddhas of the 12th century AD, may have been the earliest Hindu monks to resort to a military response after the Muslim conquest.[60] Ascetics, by tradition, led a nomadic and unattached lifestyle. As these ascetics dedicated themselves to rebellion, their groups sought stallions, developed techniques for spying and targeting, and they adopted strategies of war against Muslim nobles and the Sultanate state. Many of these groups were devotees of Hindu deity Mahadeva, and were called Mahants.[6] Other popular names for them was Sannyasis, Yogis, Nagas (followers of Shiva), Bairagis (followers of Vishnu) and Gosains from the 16th to the 19th centuries; in some cases, these Hindu monks cooperated with Muslim fakirs who were Sufi and also persecuted.[7]

Warrior monks continued their rebellion through the Mughal Empire, and became a political force during the early years of British Raj notably the Sannyasi rebellion (1763-1800). In some cases, these regiments of soldier monks shifted from guerrilla campaigns to war alliances, and these Hindu warrior monks played a key role in helping British establish themselves in India.[61] The significance of warrior ascetics rapidly declined with the consolidation of British Raj in late 19th century, and with the rise in non-violence movement by Mahatma Gandhi.[6]

Novetzke states that some of these Hindu warrior ascetics were treated as folk heroes, aided by villagers and townspeople, because they targeted figures of political and economic power in a discriminatory state, and some of these warriors paralleled Robin Hood's lifestyle.[62]

Upanishads

Sannyasa, or the renunciant way of life, is discussed in various Upanishads.

Major Upanishads

Among the thirteen major or Principal Upanishads, all from the ancient era, many include sections related to Sannyasa.[63] The Mundaka Upanishad discusses the path of Sannyasa as a means to attain spiritual knowledge and liberation. It emphasizes the renunciant's simple and austere lifestyle in pursuit of wisdom.[64] The motivations and state of a Sannyasi are mentioned in Maitrāyaṇi Upanishad, a classical major Upanishad that Robert Hume included among his list of "Thirteen Principal Upanishads" of Hinduism.[64] Maitrāyaṇi starts with the question, "given the nature of life, how is joy possible?" and "how can one achieve moksha (liberation)?"; in later sections it offers a debate on possible answers and its views on Sannyasa.[65]

In this body infected with passions, anger, greed, delusion, fright, despondency, grudge, separation from what is dear and desirable, attachment to what is not desirable, hunger, thirst, old age, death, illness, sorrow and the rest - how can one experience only joy? – Hymn I.3

The drying up of great oceans, the crumbling down of the mountains, the instability of the pole-star, the tearing of the wind-chords, the sinking down, the submergence of the earth, the tumbling down of the gods from their place - in a world in which such things occur, how can one experience only joy ?! – Hymn I.4

—Maitrayaniya Upanishad, Translated by Paul Deussen[66]

Dragged away and polluted by the river of the Gunas (personality), one becomes rootless, tottering, broken down, greedy, uncomposed and falling in the delusion of I-consciousness, he imagines: "I am this, this is mine" and binds himself, like a bird in the net. – Hymn VI.30

Just as the fire without fuel comes to rest in its place,
so also the passive mind comes to rest in its source;
When it (mind) is infatuated by the objects of sense, he falls away from truth and acts;
Mind alone is the Samsara, one should purify it with diligence;
You are what your mind is, a mystery, a perpetual one;
The mind which is serene, cancels all actions good and bad;
He, who, himself, serene, remains steadfast in himself - he attains imperishable happiness. – Hymn VI.34

—Maitrayaniya Upanishad, Translated by Paul Deussen[67]

Sannyasa Upanishads

Of the 108 Upanishads of the Muktika, the largest corpus is dedicated to Sannyasa and to Yoga, or about 20 each, with some overlap. The renunciation-related texts are called the Sannyasa Upanishads.[68] These are as follows:

Veda	Sannyāsa
Ṛigveda	Nirvāṇa
Samaveda	Āruṇeya, Maitreya, Sannyāsa, Kuṇḍika
Krishna Yajurveda	Brahma, Avadhūta,[69] See Kathashruti
Shukla Yajurveda	Jābāla, Paramahaṃsa, Advayatāraka, Bhikṣuka, Turīyātīta, Yājñavalkya, Śāṭyāyani
Atharvaveda	Ashrama,[70] Nāradaparivrājaka (Parivrāt), Paramahaṃsa parivrājaka, Parabrahma

Six of the Sannyasa Upanishads – Aruni, Kundika, Kathashruti, Paramahamsa, Jabala and Brahma – were composed before the 3rd-century CE, likely in the centuries before or after the start of the common era, states Sprockhoff; the Asrama Upanishad is dated to the 3rd-century, the Naradaparivrajaka and Satyayaniya Upanishads to around the 12th-century, and about ten of the remaining Sannyasa Upanishads are dated to have been composed in the 14th- to 15th-century CE well after the start of Islamic Sultanates period of South Asia in late 12th-century.[71][72]

The oldest Sannyasa Upanishads have a strong Advaita Vedanta outlook, and these pre-date Adi Shankara.[73] Most of the Sannyasa Upanishads present a Yoga and nondualism (Advaita) Vedanta philosophy.[74] This may be, states Patrick Olivelle, because major Hindu monasteries of early medieval period (1st millennium CE) belonged to the Advaita Vedanta tradition.[75] The 12th-century Shatyayaniya Upanishad is a significant exception, which presents qualified dualistic and Vaishnavism (Vishishtadvaita Vedanta) philosophy.[75][76]

Welcome to Mahayana Temple of New York
Mahayana, meaning "Great Vehicle," is a major branch of Buddhism emphasizing compassion and the path of the Bodhisattva (an enlightened being who delays nirvana to help others), aiming for universal liberation rather than just individual enlightenment, and includes diverse traditions like Zen, Tibetan, and Pure Land Buddhism, prevalent in East Asia, making it the largest form of Buddhism globally. It features "cosmic Buddhas" and bodhisattvas, extensive scriptures (sutras), and a focus on universal accessibility to awakening, contrasting with older schools that emphasized monasticism for personal

nirvana.
Core Concepts & Beliefs
Bodhisattva Ideal: The central goal is to become a Bodhisattva, delaying personal nirvana out of compassion to help all sentient beings achieve enlightenment.
Universal Salvation: Believes the "Great Vehicle" can carry all beings to awakening, not just monastics.
Buddha-Nature: A key teaching is that all beings possess innate Buddha-nature, the potential for enlightenment, symbolized by the white lotus.
Cosmic Buddhas: Recognizes many Buddhas and celestial beings (like the Dhyani-Buddhas) who help practitioners.
Key Traditions & Schools
Zen Buddhism: Focuses on meditation (zazen) and direct experience, strong in Japan, Korea, and Vietnam.
Tibetan Buddhism (Vajrayana): Often seen as a subset of Mahayana, using tantric practices and rituals.
Pure Land Buddhism: Focuses on faith in Amitabha Buddha and rebirth in his Pure Land.
Nichiren Buddhism, Huayan, Tiantai: Other significant schools originating in East Asia.
Practices & Texts
Practices: Include extended puja (rituals/offerings), meditation, chanting, and the cultivation of love, compassion, sympathetic joy, and equanimity (the Four Limitless Contemplations).
Scriptures: Utilizes a vast collection of sutras, including the Heart Sutra, Lotus Sutra, and Vimalakirti Sutra, expanding on earlier Buddhist teachings.
Geographic Reach
Prevalent in: China, Japan, Korea, Taiwan, Vietnam, Tibet, and Mongolia.

Mahayana vs. Theravada on Dependent Origination
Popular comment · They're not different. The teaching is essentially the same. Theravada study of the Pali Canon won't be quite the same, with the same emphases, as Mahayana training, but they contain the same basic teachings. The difference is more the context. In Mahayana, the shravaka teachings that Theravada regards as Buddhist scripture are regarded as only the first step of practice. With entrance into the specifically Mahayana teachings, such as the heart sutra, there's a radical change in View. The heart sutra presents the teaching on shunyata or emptiness. Pratityasamutpada says nothing exists on its own because all phenomena arise dependent on each other. A typical example is to look at a car. If you take off pieces, when does it cease to be a car? The fenders? The roof? The engine? The seats? What's the essence of carness? That's a kind of thought experiment that shows how we experience a charged projection rather than actual objects. It's a way to help reduce attachment to apparent solidity and to see how self is also a changeable composite. Shunyata is coming at it on a less dualistic level. It's pointing out that experience itself is ungraspable. Self and other are both empty of existence. Phenomena appear, yet have no substance. Form is empty and emptiness is also form. Vivid appearance yet ungraspable. In a way you could say it's the ultimate conclusion of pratityasamutpada's logic. So pratityasamutpada is looking at it in dualistic terms, ego's point of view. It's saying that what you think is solid actually isn't. Dualistic perception is the reference point. Mahayana schools teach the same thing, but then introduce shunyata as the view of post-realization. Shunyata is looking at it from the point of view of actually realizing emptiness. It's saying, "Look, you have to give up all reference points. That's the deal. There isn't even a self to lose. There isn't even loss. There's no samsara, no nirvana, no buddha, no enlightenment, nada. You don't get to have any bearings. No up or down, back or forward. That's dualistic mind. There's only the wisdom of seeing that." As it says in the heart sutra, "Since the bodhisattvas have no attainment, they abide by means of prajnaparamita." In Theravada, as I understand it, the word emptiness is used to refer to pratityasamutpada and Mahayana emptiness, shunyata, is not recognized at all. That can be a bit confusing. There are numerous shared terms that mean very different things in one school than they do in the other.

Back to Buddhism. At American Academy of Religion 2025, speaking on Maitreya in the Āgamas, Mahāyāna, and early Vajrayāna. Main points: Chinese Buddhist sources are useful for tracing out the evolution of Maitreya. There are unique texts preserved in Chinese that show us how Indian thinkers saw Maitreya. In the early Tantric tradition, Maitreya is reformulated into an aspect of awakening, rather than being the future buddha.

Mahayana[a] is the largest branch of Buddhism, followed by Theravada. It is a broad group of Buddhist traditions, texts, philosophies, and practices developed in ancient India (c. 1st century BCE onwards). Mahāyāna accepts the main scriptures and teachings of early Buddhism but also recognizes various doctrines and texts that are not accepted by Theravada Buddhism as original. These include the Mahāyāna sūtras and their emphasis on the bodhisattva path and Prajñāpāramitā.[1] Vajrayana or Mantra traditions are a subset of Mahāyāna which makes use of numerous Tantric methods Vajrayānists consider to help achieve Buddhahood.[2]

Mahāyāna also refers to the path of the bodhisattva striving to become a fully awakened Buddha for the benefit of all sentient beings, and is thus also called the "Bodhisattva Vehicle" (Bodhisattvayāna).[3][note 1] Mahāyāna Buddhism generally sees the goal of becoming a Buddha through the bodhisattva path as being available to all and sees the state of the arhat as incomplete.[4] Mahāyāna also includes numerous Buddhas and bodhisattvas that are not found in Theravada (such as Amitābha and Vairocana).[5] Mahāyāna Buddhist philosophy also promotes unique theories, such as the Madhyamaka theory of emptiness (śūnyatā), the Vijñānavāda ("the doctrine of consciousness" also called "mind-only"), and the Buddha-nature teaching.

While initially a small movement in India, Mahāyāna eventually grew to become an influential force in Indian Buddhism.[6] Large scholastic centers associated with Mahāyāna such as Nalanda and Vikramashila thrived between the 7th and 12th centuries.[6] In the course of its history, Mahāyāna Buddhism spread from South Asia to East Asia, Southeast Asia and the Himalayan regions. Various Mahāyāna traditions are the predominant forms of Buddhism found in China, Korea, Japan, Taiwan, Singapore, Vietnam, Philippines, Malaysia and Indonesia.[7] Since Vajrayana is a tantric form of Mahāyāna, Mahāyāna Buddhism is also dominant in Tibet, Mongolia, Bhutan, and other Himalayan regions. It has also been traditionally present elsewhere in Asia as a minority among Buddhist communities in Nepal, Malaysia, Indonesia and regions with Asian diaspora communities.

As of 2010, the Mahāyāna tradition was the largest major tradition of Buddhism, with 53% of Buddhists belonging to East Asian Mahāyāna and 6% to Vajrayana, compared to 36% to Theravada.[8]

Etymology

Original Sanskrit

The Five Tathāgatas in Shishoin Temple (Tokyo). A unique feature of Mahāyāna is the belief that there are multiple Buddhas which are currently teaching the Dharma.

Mahāyāna Buddhist triad, including Bodhisattva Maitreya, the Buddha, and Bodhisattva Avalokiteśvara. 2nd–3rd century CE, Gandhāra
According to Jan Nattier, the term Mahāyāna ("Great Vehicle") was originally an honorary synonym for Bodhisattvayāna ("Bodhisattva Vehicle"),[9] the vehicle of a bodhisattva seeking buddhahood for the benefit of all sentient beings.[3] The term Mahāyāna (which had earlier been used simply as an epithet for Buddhism itself) was therefore adopted at an early date as a synonym for the path and the teachings of the bodhisattvas. Since it was simply an honorary term for Bodhisattvayāna, the adoption of the term Mahāyāna and its application to Bodhisattvayāna did not represent a significant turning point in the development of a Mahāyāna tradition.[9]

The earliest Mahāyāna texts, such as the Lotus Sūtra, often use the term Mahāyāna as a synonym for Bodhisattvayāna, but the term Hīnayāna is comparatively rare in the earliest sources. The presumed dichotomy between Mahāyāna and Hīnayāna can be deceptive, as the two terms were not actually formed in relation to one another in the same era.[10]

Among the earliest and most important references to Mahāyāna are those that occur in the Lotus Sūtra (Skt. Saddharma Puṇḍarīka Sūtra) dating between the 1st century BCE and the 1st century CE.[11] Seishi Karashima has suggested that the term first used in an earlier Gandhāri Prakrit version of the Lotus Sūtra was not the term mahāyāna but the Prakrit word mahājāna in the sense of mahājñāna (great knowing).[12][13] At a later stage when the early Prakrit word was converted into Sanskrit, this mahājāna, being phonetically ambivalent, may have been converted into mahāyāna, possibly because of what may have been a double meaning in the famous Parable of the Burning House, which talks of three vehicles or carts (Skt: yāna).[note 2][12][14]

Chinese translation
In Chinese, Mahāyāna is called 大乘 (dàshèng, or dàchéng), which is a calque of maha (great 大) yana (vehicle 乘). There is also the transliteration 摩诃衍那.[15][16] The term appeared in some of the earliest Mahāyāna texts, including Emperor Ling of Han's translation of the Lotus Sutra.[17] It also appears in the Chinese Āgamas, though scholars like Yin Shun argue that this is a later addition.[18][19][20] Some Chinese scholars also argue that the meaning of the term in these earlier texts is different from later ideas of Mahāyāna Buddhism.[21]

History

Seated Avalokiteshvara bodhisattva. Gandharan, from Loriyan Tangai. Kushan period, 1st – 3rd century CE. Indian Museum, Calcutta

Cave complex associated with the Mahāsāṃghika sect. Karla Caves, Mahārāṣtra, India
Origin

The origins of Mahāyāna are still not completely understood and there are numerous competing theories.[22] The earliest Western views of Mahāyāna assumed that it existed as a separate school in competition with the so-called "Hīnayāna" schools. Some of the major theories about the origins of Mahāyāna include the following:

The lay origins theory was first proposed by Jean Przyluski and then defended by Étienne Lamotte and Akira Hirakawa. This view states that laypersons were particularly important in the development of Mahāyāna and is partly based on some texts like the Vimalakirti Sūtra, which praise lay figures at the expense of monastics.[23] This theory is no longer widely accepted since numerous early Mahāyāna works promote monasticism and asceticism.[24][25]

The Mahāsāṃghika origin theory, which argues that Mahāyāna developed within the Mahāsāṃghika tradition.[24] This is defended by scholars such as Hendrik Kern, A.K. Warder and Paul Williams who argue that at least some Mahāyāna elements developed among Mahāsāṃghika communities (from the 1st century BCE onwards), possibly in the area along the Kṛṣṇa River in the Āndhra region of southern India.[26][27][28][29] The Mahāsāṃghika doctrine of the supramundane (lokottara) nature of the Buddha is sometimes seen as a precursor to Mahāyāna views of the Buddha.[5] Some scholars also see Mahāyāna figures like Nāgārjuna, Dignaga, Candrakīrti, Āryadeva, and Bhāviveka as having ties to the Mahāsāṃghika tradition of Āndhra.[30] However, other scholars have also pointed to different regions as being important, such as Gandhara and northwest India.[31][note 3][32]

The Mahāsāṃghika origins theory has also slowly been shown to be problematic by scholarship that revealed how certain Mahāyāna sutras show traces of having developed among other nikāyas or monastic orders (such as the Dharmaguptaka).[33] Because of such evidence, scholars like Paul Harrison and Paul Williams argue that the movement was not sectarian and was possibly pan-buddhist.[24][34] There is no evidence that Mahāyāna ever referred to a separate formal school or sect of Buddhism, but rather that it existed as a certain set of ideals, and later doctrines, for aspiring bodhisattvas.[17]

The "forest hypothesis" meanwhile states that Mahāyāna arose mainly among "hard-core ascetics, members of the forest dwelling (aranyavasin) wing of the Buddhist Order", who were attempting to imitate the Buddha's forest living.[35] This has been defended by Paul Harrison, Jan Nattier and Reginald Ray. This theory is based on certain sutras like the Ugraparipṛcchā Sūtra and the Mahāyāna Rāṣṭrapālapaṛiprcchā which promote ascetic practice in the wilderness as a superior and elite path. These texts criticize monks who live in cities and denigrate the forest life.[17][36]

Jan Nattier's study of the Ugraparipṛcchā Sūtra, A few good men (2003) argues that this sutra represents the earliest form of Mahāyāna, which presents the bodhisattva path as a 'supremely difficult enterprise' of elite monastic forest asceticism.[24] Boucher's study on the Rāṣṭrapālaparipṛcchā-sūtra (2008) is another recent work on this subject.[37]

The cult of the book theory, defended by Gregory Schopen, states that Mahāyāna arose among a number of loosely connected book worshiping groups of monastics, who studied, memorized, copied and revered particular Mahāyāna sūtras. Schopen thinks they were inspired by cult shrines where Mahāyāna sutras were kept.[24] Schopen also argued that these groups mostly rejected stupa worship, or worshiping holy relics.

David Drewes has recently argued against all of the major theories outlined above. He points out that there is no actual evidence for the existence of book shrines, that the practice of sutra veneration was pan-Buddhist and not distinctly Mahāyāna. Furthermore, Drewes argues that "Mahāyāna sutras advocate mnemic/oral/aural practices more frequently than they do written ones."[24] Regarding the forest hypothesis, he points out that only a few Mahāyāna sutras directly advocate forest dwelling, while the others either do not mention it or see it as unhelpful, promoting easier practices such as "merely listening to the sutra, or thinking of particular Buddhas, that they claim can enable one to be reborn in special, luxurious 'pure lands' where one will be able to make easy and rapid progress on the bodhisattva path and attain Buddhahood after as little as one lifetime."[24]

Drewes states that the evidence merely shows that "Mahāyāna was primarily a textual movement, focused on the revelation, preaching, and dissemination of Mahāyāna sutras, that developed within, and never really departed from, traditional Buddhist social and institutional structures."[38] Drewes points out the importance of dharmabhāṇakas (preachers, reciters of these sutras) in the early Mahāyāna sutras. This figure is widely praised as someone who should be respected, obeyed ('as a slave serves his lord'), and donated to, and it is thus possible these people were the primary agents of the Mahāyāna movement.[38]

Early Mahayana came directly from "early Buddhist schools" and was a successor to them.[39][40]

Early Mahāyāna

Earliest Mahayana inscription

Inscribed pedestal with the first known occurrence of the name of "Amitabha Buddha" in the "year 26 of Huvishka" (153 CE)[41] In Brahmi script in the inscription:

"Bu-ddha-sya A-mi-tā-bha-sya"
"Of the Buddha Amitabha"[42]

The earliest textual evidence of "Mahāyāna" comes from sūtras ("discourses", scriptures) originating around the beginning of the common era. Jan Nattier has noted that some of the earliest Mahāyāna texts, such as the Ugraparipṛccha Sūtra use the term "Mahāyāna", yet there is no doctrinal difference between Mahāyāna in this context and the early schools. Instead, Nattier writes that in the earliest sources, "Mahāyāna" referred to the rigorous emulation of Gautama Buddha's path to Buddhahood.[17]

Some important evidence for early Mahāyāna Buddhism comes from the texts translated by the Indoscythian monk Lokakṣema in the 2nd century CE, who came to China from the kingdom of Gandhāra. These are some of the earliest known Mahāyāna texts.[43][44][note 4] Study of these texts by Paul Harrison and others show that they strongly promote monasticism (contra the lay origin theory), acknowledge the legitimacy of arhatship, and do not show any attempt to establish a new sect or order.[24] A few of these texts often emphasize ascetic practices, forest dwelling, and deep states of meditative concentration (samadhi).[45]

Indian Mahāyāna never had nor ever attempted to have a separate Vinaya or ordination lineage from the early schools of Buddhism, and therefore each bhikṣu or bhikṣuṇī adhering to the Mahāyāna formally belonged to one of the early Buddhist schools. Membership in these nikāyas, or monastic orders, continues today, with the Dharmaguptaka nikāya being used in East Asia, and the Mūlasarvāstivāda nikāya being used in Tibetan Buddhism. Therefore, Mahāyāna was never a separate monastic sect outside of the early schools.[46]

Paul Harrison clarifies that while monastic Mahāyānists belonged to a nikāya, not all members of a nikāya were Mahāyānists.[47] From Chinese monks visiting India, we now know that both Mahāyāna and non-Mahāyāna monks in India often lived in the same monasteries side by side.[48] It is also possible that, formally, Mahāyāna would have been understood as a group of monks or nuns within a larger monastery taking a vow together (known as a "kriyākarma") to memorize and study a Mahāyāna text or texts.[49]

The earliest stone inscription containing a recognizably Mahāyāna formulation and a mention of the Buddha Amitābha (an important Mahāyāna figure) was found in the Indian subcontinent in Mathura, and dated to around 180 CE. Remains of a statue of a Buddha bear the Brāhmī inscription: "Made in the year 28 of the reign of King Huviṣka, ... for the Blessed One, the Buddha Amitābha."[42] There is also some evidence that the Kushan Emperor Huviṣka himself was a follower of Mahāyāna. A Sanskrit manuscript fragment in the Schøyen Collection describes Huviṣka as having "set forth in the Mahāyāna."[50] Evidence of the name "Mahāyāna" in Indian inscriptions in the period before the 5th century is very limited in comparison to the multiplicity of Mahāyāna writings transmitted from Central Asia to China at that time.[note 5][note 6][note 7]

Based on archeological evidence, Gregory Schopen argues that Indian Mahāyāna remained "an extremely limited minority movement – if it remained at all – that attracted absolutely no documented public or popular support for at least two more centuries."[24] Likewise, Joseph Walser speaks of Mahāyāna's "virtual invisibility in the archaeological record until the fifth century".[51] Schopen also sees this movement as being in tension with other Buddhists, "struggling for recognition and acceptance".[52] Their "embattled mentality" may have led to certain elements found in Mahāyāna texts like Lotus sutra, such as a concern with preserving texts.[52]

Schopen, Harrison and Nattier also argue that these communities were probably not a single unified movement, but scattered groups based on different practices and sutras.[24] One reason for this view is that Mahāyāna sources are extremely diverse, advocating many different, often conflicting doctrines and positions, as Jan Nattier writes:[53]

Thus we find one scripture (the Aksobhya-vyuha) that advocates both srávaka and bodhisattva practices, propounds the possibility of rebirth in a pure land, and enthusiastically recommends the cult of the book, yet seems to know nothing of emptiness theory, the ten bhumis, or the trikaya, while another (the P'u-sa pen-yeh ching) propounds the ten bhumis and focuses exclusively on the path of the bodhisattva, but never discusses the paramitas. A Madhyamika treatise (Nagarjuna's Mulamadhyamika-karikas) may enthusiastically deploy the rhetoric of emptiness without ever mentioning the bodhisattva path, while a Yogacara treatise (Vasubandhu's Madhyanta-vibhaga-bhasya) may delve into the particulars of the trikaya doctrine while eschewing the doctrine of ekayana. We must be prepared, in other words, to encounter a multiplicity of Mahayanas flourishing even in India, not to mention those that developed in East Asia and Tibet.

In spite of being a minority in India, Indian Mahāyāna was an intellectually vibrant movement, which developed various schools of thought during what Jan Westerhoff has been called "The Golden Age of Indian Buddhist Philosophy" (from the beginning of the first millennium CE up to the 7th century).[54] Some major Mahāyāna traditions are Prajñāpāramitā, Mādhyamaka, Yogācāra, Buddha-nature (Tathāgatagarbha), and the school of Dignaga and Dharmakirti as the last and most recent.[55] Major early figures include Nagarjuna, Āryadeva, Aśvaghoṣa, Asanga, Vasubandhu, and Dignaga. Mahāyāna Buddhists seem to have been active in the Kushan Empire (30–375 CE), a period that saw great missionary and literary activities by Buddhists. This is supported by the works of the historian Taranatha.[56]

Growth

Buddhist expansion in Asia, from Buddhist heartland in northern India (dark orange) starting 5th century BCE, to Buddhist majority realm (orange) with the exception of

China, and historical extent of Buddhism influences (yellow). Mahāyāna (red arrow), Theravāda (green arrow), and Tantric-Vajrayāna (blue arrow). The overland and maritime "Silk Roads" were interlinked and complementary, forming what scholars have called the "great circle of Buddhism".[40]
The Mahāyāna movement (or movements) remained quite small until it experienced much growth in the fifth century. Very few manuscripts have been found before the fifth century (the exceptions are from Bamiyan). According to Walser, "the fifth and sixth centuries appear to have been a watershed for the production of Mahāyāna manuscripts."[57] Likewise it is only in the 4th and 5th centuries CE that epigraphic evidence shows some kind of popular support for Mahāyāna, including some possible royal support at the kingdom of Shan shan as well as in Bamiyan and Mathura.[58]

Still, even after the 5th century, the epigraphic evidence which uses the term Mahāyāna is still quite small and is notably mainly monastic, not lay.[58] By this time, Chinese pilgrims, such as Faxian (337–422 CE), Xuanzang (602–664), Yijing (635–713 CE) were traveling to India, and their writings do describe monasteries which they label 'Mahāyāna' as well as monasteries where both Mahāyāna monks and non-Mahāyāna monks lived together.[59]

After the fifth century, Mahāyāna Buddhism and its institutions slowly grew in influence. Some of the most influential institutions became massive monastic university complexes such as Nalanda (established by the 5th-century CE Gupta emperor, Kumaragupta I) and Vikramashila (established under Dharmapala c. 783 to 820) which were centers of various branches of scholarship, including Mahāyāna philosophy. The Nalanda complex eventually became the largest and most influential Buddhist center in India for centuries.[60] Even so, as noted by Paul Williams, "it seems that fewer than 50 percent of the monks encountered by Xuanzang (Hsüan-tsang; c. 600–664) on his visit to India actually were Mahāyānists."[61]

Expansion outside of India

Recreation of a cave mural from the Mogao Caves depicting the Buddha surrounded by bodhisattvas
Over time Indian Mahāyāna texts and philosophy reached Central Asia and China through trade routes like the Silk Road, later spreading throughout East Asia.[39] Over time, Central Asian Buddhism became heavily influenced by Mahāyāna and it was a major source for Chinese Buddhism. Mahāyāna works have also been found in Gandhāra, indicating the importance of this region for the spread of Mahāyāna. Central Asian Mahāyāna scholars were very important in the Silk Road Transmission of Buddhism.[62] They include translators like Lokakṣema (c. 167–186), Dharmarakṣa (c. 265–313), Kumārajīva (c. 401), and Dharmakṣema (385–433). The site of Dunhuang seems to have been a particularly important place for the study of Mahāyāna Buddhism.[56]

Mahāyāna spread from China to Korea, Vietnam, and Taiwan, which (along with Korea) would later spread it to Japan.[39][40] Mahāyāna also spread from India to Myanmar, and then Sumatra and Malaysia.[39][40] Mahāyāna spread from Sumatra to other Indonesian islands, including Java and Borneo, the Philippines, Cambodia, and eventually, Indonesian Mahāyāna traditions made it to China.[39][40]

By the fourth century, Chinese monks like Faxian (c. 337–422 CE) had also begun to travel to India (now dominated by the Guptas) to bring back Buddhist teachings, especially Mahāyāna works.[63] These figures also wrote about their experiences in India and their work remains invaluable for understanding Indian Buddhism. In some cases Indian Mahāyāna traditions were directly transplanted, as with the case of the East Asian Madhymaka (by Kumārajīva) and East Asian Yogacara (especially by Xuanzang). Later, new developments in Chinese Mahāyāna led to new Chinese Buddhist traditions like Tiantai, Huayen, Pure Land and Chan Buddhism (Zen). These traditions would then spread to Korea, Vietnam and Japan.

Forms of Mahāyāna Buddhism which are mainly based on the doctrines of Indian Mahāyāna sutras are still popular in East Asian Buddhism, which is mostly dominated by various branches of Mahāyāna Buddhism. Paul Williams has noted that in this tradition in the Far East, primacy has always been given to the study of the Mahāyāna sūtras.[64]

Later developments

The use of mandalas was one new feature of Tantric Buddhism, which also adopted new deities such as Chakrasamvara (pictured)

Beginning during the Gupta (c. 3rd century CE–575 CE) period a new movement began to develop which drew on previous Mahāyāna doctrine as well as new Pan-Indian tantric ideas. This came to be known by various names such as Vajrayāna (Tibetan: rdo rje theg pa), Mantrayāna, and Esoteric Buddhism or "Secret Mantra" (Guhyamantra). This new movement continued into the Pala era (8th century–12th century CE), during which it grew to dominate Indian Buddhism.[65] Possibly led by groups of wandering tantric yogis named mahasiddhas, this movement developed new tantric spiritual practices and also promoted new texts called the Buddhist Tantras.[66]

Philosophically, Vajrayāna Buddhist thought remained grounded in the Mahāyāna Buddhist ideas of Madhyamaka, Yogacara and Buddha-nature.[67][68] Tantric Buddhism generally deals with new forms of meditation and ritual which often makes use of the visualization of Buddhist deities (including Buddhas, bodhisattvas, dakinis, and fierce deities) and the use of mantras. Most of these practices are esoteric and require ritual initiation or introduction by a tantric master (vajracarya) or guru.[69]

The source and early origins of Vajrayāna remain a subject of debate among scholars. Some scholars like Alexis Sanderson argue that Vajrayāna derives its tantric content from Shaivism and that it developed as a result of royal courts sponsoring both Buddhism and Saivism. Sanderson argues that Vajrayāna works like the Samvara and

Guhyasamaja texts show direct borrowing from Shaiva tantric literature.[70][71] However, other scholars such as Ronald M. Davidson question the idea that Indian tantrism developed in Shaivism first and that it was then adopted into Buddhism. Davidson points to the difficulties of establishing a chronology for the Shaiva tantric literature and argues that both traditions developed side by side, drawing on each other as well as on local Indian tribal religion.[72]

Whatever the case, this new tantric form of Mahāyāna Buddhism became extremely influential in India, especially in Kashmir and in the lands of the Pala Empire. It eventually also spread north into Central Asia, the Tibetan plateau and to East Asia. Vajrayāna remains the dominant form of Buddhism in Tibet, in surrounding regions like Bhutan and in Mongolia. Esoteric elements are also an important part of East Asian Buddhism where it is referred to by various terms. These include: Zhēnyán (Chinese: 真言, literally "true word", referring to mantra), Mìjiao (Chinese: 密教; Esoteric Teaching), Mìzōng (密宗; "Esoteric Tradition") or Tángmì (唐密; "Tang (Dynasty) Esoterica") in Chinese and Shingon, Tomitsu, Mikkyo, and Taimitsu in Japanese.

Worldview

The female bodhisattva Prajñaparamita Devi
Few things can be said with certainty about Mahāyāna Buddhism in general other than that the Buddhism practiced in China, Indonesia, Vietnam, Korea, Tibet, Mongolia and Japan is Mahāyāna Buddhism.[note 8] Mahāyāna can be described as a loosely bound collection of many teachings and practices (some of which are seemingly contradictory).[note 9] Mahāyāna constitutes an inclusive and broad set of traditions characterized by plurality and the adoption of a vast number of new sutras, ideas and philosophical treatises in addition to the earlier Buddhist texts.

Broadly speaking, Mahāyāna Buddhists accept the classic Buddhist doctrines found in early Buddhism (i.e. the Nikāya and Āgamas), such as the Middle Way, Dependent origination, the Four Noble Truths, the Noble Eightfold Path, the Three Jewels, the Three marks of existence and the bodhipakṣadharmas (aids to awakening).[73] Mahāyāna Buddhism further accepts some of the ideas found in Buddhist Abhidharma thought. However, Mahāyāna also adds numerous Mahāyāna texts and doctrines, which are seen as definitive and in some cases superior teachings.[74][75] D.T. Suzuki described the broad range and doctrinal liberality of Mahāyāna as "a vast ocean where all kinds of living beings are allowed to thrive in a most generous manner, almost verging on a chaos".[76]

Paul Williams refers to the main impulse behind Mahāyāna as the vision which sees the motivation to achieve Buddhahood for sake of other beings as being the supreme religious motivation. This is the way that Atisha defines Mahāyāna in his

Bodhipathapradipa.[77] As such, according to Williams, "Mahāyāna is not as such an institutional identity. Rather, it is inner motivation and vision, and this inner vision can be found in anyone regardless of their institutional position."[78] Thus, instead of a specific school or sect, Mahāyāna is a "family term" or a religious tendency, which is united by "a vision of the ultimate goal of attaining full Buddhahood for the benefit of all sentient beings (the 'bodhisattva ideal') and also (or eventually) a belief that Buddhas are still around and can be contacted (hence the possibility of an ongoing revelation)."[79]

The Buddhas

The monumental sculpture of the Longmen Buddha Grottoes contains a giant statue of Vairocana Buddha

Buddhas and bodhisattvas (beings on their way to Buddhahood) are central elements of Mahāyāna. Mahāyāna has a vastly expanded cosmology and theology, with various Buddhas and powerful bodhisattvas residing in different worlds and buddha-fields (buddha kshetra).[5] Buddhas unique to Mahāyāna include the Buddhas Amitābha ("Infinite Light"), Akṣobhya ("the Imperturbable"), Bhaiṣajyaguru ("Medicine guru") and Vairocana ("the Illuminator"). In Mahāyāna, a Buddha is seen as a being that has achieved the highest kind of awakening due to his superior compassion and wish to help all beings.[80]

An important feature of Mahāyāna is the way that it understands the nature of a Buddha, which differs from non-Mahāyāna understandings. Mahāyāna texts not only often depict numerous Buddhas besides Sakyamuni, but see them as transcendental or supramundane (lokuttara) beings with great powers and huge lifetimes. The White Lotus Sutra famously describes the lifespan of the Buddha as immeasurable and states that he actually achieved Buddhahood countless of eons (kalpas) ago and has been teaching the Dharma through his numerous avatars for an unimaginable period of time.[81][82][83]

Furthermore, Buddhas are active in the world, constantly devising ways to teach and help all sentient beings. According to Paul Williams, in Mahāyāna, a Buddha is often seen as "a spiritual king, relating to and caring for the world", rather than simply a teacher who after his death "has completely 'gone beyond' the world and its cares".[84] Buddha Sakyamuni's life and death on earth are then usually understood docetically as a "mere appearance", his death is a show, while in actuality he remains out of compassion to help all sentient beings.[84] Similarly, Guang Xing describes the Buddha in Mahāyāna as an omnipotent and almighty divinity "endowed with numerous supernatural attributes and qualities".[85] Mahayana Buddhologies have often been compared to various types of theism (including pantheism) by different scholars, though there is disagreement among scholars regarding this issue as well on the general relationship between Buddhism and Theism.[86]

The idea that Buddhas remain accessible is extremely influential in Mahāyāna and also allows for the possibility of having a reciprocal relationship with a Buddha through prayer, visions, devotion and revelations.[87] Through the use of various practices, a Mahāyāna devotee can aspire to be reborn in a Buddha's pure land or buddha field (buddhakṣetra), where they can strive towards Buddhahood in the best possible conditions. Depending on the sect, liberation into a buddha-field can be obtained by faith, meditation, or sometimes even by the repetition of Buddha's name. Faith-based devotional practices focused on rebirth in pure lands are common in East Asia Pure Land Buddhism.[88]

The influential Mahāyāna concept of the three bodies (trikāya) of a Buddha developed to make sense of the transcendental nature of the Buddha. This doctrine holds that the "bodies of magical transformation" (nirmāṇakāyas) and the "enjoyment bodies" (saṃbhogakāya) are emanations from the ultimate Buddha body, the Dharmakaya, which is none other than the ultimate reality itself, i.e. emptiness or Thusness.[89]

The Bodhisattvas

Avalokiteśvara, the bodhisattva of compassion. Ajaṇṭā Caves, Maharashtra, India

The Mahāyāna bodhisattva path (mārga) or vehicle (yāna) is seen as being the superior spiritual path by Mahāyānists, over and above the paths of those who seek arhatship or "solitary buddhahood" for their own sake (Śrāvakayāna and Pratyekabuddhayāna).[90] Mahāyāna Buddhists generally hold that pursuing only the personal release from suffering i.e. nirvāṇa is a smaller or inferior aspiration (called "hinayana"), because it lacks the wish and resolve to liberate all other sentient beings from saṃsāra (the round of rebirth) by becoming a Buddha.[91][92][93]

This wish to help others by entering the Mahāyāna path is called bodhicitta and someone who engages in this path to complete buddhahood is a bodhisattva. High level bodhisattvas (with eons of practice) are seen as extremely powerful supramundane beings. They are objects of devotion and prayer throughout the Mahāyāna world.[94] Popular bodhisattvas which are revered across Mahāyāna include Avalokiteshvara, Manjushri, Tara and Maitreya. Bodhisattvas could reach the personal nirvana of the arhats, but they reject this goal and remain in saṃsāra to help others out of compassion.[95][96][94]

According to eighth-century Mahāyāna philosopher Haribhadra, the term "bodhisattva" can technically refer to those who follow any of the three vehicles, since all are working towards bodhi (awakening) and hence the technical term for a Mahāyāna bodhisattva is a mahāsattva (great being) bodhisattva.[97] According to Paul Williams, a Mahāyāna bodhisattva is best defined as:

> that being who has taken the vow to be reborn, no matter how many times this may be necessary, in order to attain the highest possible goal, that of Complete and Perfect Buddhahood. This is for the benefit of all sentient beings.[97]

There are two models for the nature of the bodhisattvas, which are seen in the various Mahāyāna texts. One is the idea that a bodhisattva must postpone their awakening until full Buddhahood is attained. This could take eons and in the meantime, they will help countless beings. After reaching Buddhahood, they do pass on to nirvāṇa (after which they do not return). The second model is the idea that there are two kinds of nirvāṇa, the nirvāṇa of an arhat and a superior type of nirvāṇa called apratiṣṭhita (non-abiding, not-established) that allows a Buddha to remain forever engaged in the world. As noted by Paul Williams, the idea of apratiṣṭhita nirvāṇa may have taken some time to develop and is not obvious in some of the early Mahāyāna literature.[96]

Illustrated Korean manuscript of the Lotus Sutra, Goryeo Dynasty, c. 1340. The three carts at the top which are symbolic of the three vehicles

Guanyin (Avalokiteśvara) with multiple arms symbolizing upaya and great compassion, Leshan, China

The Lotus, especially the puṇḍarīka (white lotus), is used in Mahāyāna to symbolize the nature of bodhisattvas. The lotus is rooted in the earthly mud and yet flowers above the water in the open air. Similarly, the bodhisattva lives in the world but remains unstained by it[98]

The Bodhisattva Path

In most classic Mahāyāna sources (as well as in non-Mahāyāna sources on the topic), the bodhisattva path is said to take three or four asaṃkheyyas ("incalculable eons"), requiring a huge number of lifetimes of practice to complete.[99][100] However, certain practices are sometimes held to provide shortcuts to Buddhahood (these vary widely by tradition). According to the Bodhipathapradīpa (A Lamp for the Path to Awakening) by the Indian master Atiśa, the central defining feature of a bodhisattva's path is the universal aspiration to end suffering for themselves and all other beings, i.e. bodhicitta.[101]

The bodhisattva's spiritual path is traditionally held to begin with the revolutionary event called the "arising of the Awakening Mind" (bodhicittotpāda), which is the wish to become a Buddha in order to help all beings.[100] This is achieved in different ways, such as the meditation taught by the Indian master Shantideva in his Bodhicaryavatara called "equalising self and others and exchanging self and others". Other Indian masters like Atisha and Kamalashila also teach a meditation in which we contemplate how all beings have been our close relatives or friends in past lives. This contemplation leads to the arising of deep love (maitrī) and compassion (karuṇā) for others, and thus bodhicitta is generated.[102] According to the Indian philosopher Shantideva, when great compassion and bodhicitta arises in a person's heart, they cease to be an ordinary person and become a "son or daughter of the Buddhas".[101]

The idea of the bodhisattva is not unique to Mahāyāna Buddhism and it is found in

Theravada and other early Buddhist schools. However, these schools held that becoming a bodhisattva required a prediction of one's future Buddhahood in the presence of a living Buddha.[103] In Mahāyāna, the term bodhisattva is applicable to any person from the moment they intend to become a Buddha (i.e. the moment in which bodhicitta arises in their mind) and without the requirement of a living Buddha being present.[103] Some Mahāyāna sūtras like the Lotus Sutra promote the bodhisattva path as being universal and open to everyone. Other texts disagree with this and state that only some beings have the capacity for Buddhahood.[104]

The generation of bodhicitta may then be followed by the taking of the bodhisattva vows (praṇidhāna) to "lead to Nirvana the whole immeasurable world of beings" as the Prajñaparamita sutras state. This compassionate commitment to help others is the central characteristic of the Mahāyāna bodhisattva.[105] These vows may be accompanied by certain ethical guidelines called bodhisattva precepts. Numerous sutras also state that a key part of the bodhisattva path is the practice of a set of virtues called pāramitās (transcendent or supreme virtues). Sometimes six are outlined: giving, ethical discipline, patient endurance, diligence, meditation and transcendent wisdom.[106][5]

Other sutras (like the Daśabhūmika) give a list of ten, with the addition of upāya (skillful means), praṇidhāna (vow, resolution), Bala (spiritual power) and Jñāna (knowledge).[107] Prajñā (transcendent knowledge or wisdom) is arguably the most important virtue of the bodhisattva. This refers to an understanding of the emptiness of all phenomena, arising from study, deep consideration and meditation.[105]

Bodhisattva levels

Amitābha Descending with Twenty-five Bodhisattvas (13th century), National Treasure, Chion-in, Kyoto, is regarded as a representative work of early Pure Land Buddhist art in Japan. In Japanese Buddhism, one of the Ten realms in which sentient beings aspire to be reborn is the Pure Land of Ultimate Bliss of Amitābha.
Various Mahāyāna Buddhist scriptures associate the beginning of the bodhisattva practice with what is called the "path of accumulation" or equipment (saṃbhāra-mārga), which is the first path of the classic five paths schema.[108]

The Daśabhūmika Sūtra as well as other texts also outline a series of bodhisattva levels or spiritual stages (bhūmis) on the path to Buddhahood. The various texts disagree on the number of stages however, the Daśabhūmika giving ten for example (and mapping each one to the ten paramitas), the Bodhisattvabhūmi giving seven and thirteen and the Avatamsaka outlining 40 stages.[107]

In later Mahāyāna scholasticism, such as in the work of Kamalashila and Atiśa, the five paths and ten bhūmi systems are merged and this is the progressive path model that is used in Tibetan Buddhism. According to Paul Williams, in these systems, the first bhūmi is reached once one attains "direct, nonconceptual and nondual insight into emptiness in meditative absorption", which is associated with the path of seeing (darśana-mārga).[108] At this point, a bodhisattva is considered an ārya (a noble being).[109]

Skillful means and the One Vehicle

Main article: upāya

Skillful means or Expedient techniques (Skt. upāya) is another important virtue and doctrine in Mahāyāna Buddhism.[110] The idea is most famously expounded in the White Lotus Sutra, and refers to any effective method or technique that is conducive to spiritual growth and leads beings to awakening and nirvana. This doctrine states that, out of compassion, the Buddha adapts his teaching to whomever he is teaching. Because of this, it is possible that the Buddha may teach seemingly contradictory things to different people. This idea is also used to explain the vast textual corpus found in Mahāyāna.[111]

A closely related teaching is the doctrine of the One Vehicle (ekayāna). This teaching states that even though the Buddha is said to have taught three vehicles (the disciples' vehicle, the vehicle of solitary Buddhas and the bodhisattva vehicle, which are accepted by all early Buddhist schools), these actually are all skillful means which lead to the same place: Buddhahood. Therefore, there really are not three vehicles in an ultimate sense, but one vehicle, the supreme vehicle of the Buddhas, which is taught in different ways depending on the faculties of individuals. Even those beings who think they have finished the path (i.e. the arhats) are actually not done, and they will eventually reach Buddhahood.[111]

This doctrine was not accepted in full by all Mahāyāna traditions. The Yogācāra school famously defended an alternative theory that held that not all beings could become Buddhas. This became a subject of much debate throughout Mahāyāna Buddhist history.[112]

Prajñāpāramitā (Transcendent Knowledge)

Prajñāpāramitā is often personified by a female deity in Buddhist art

Some of the key Mahāyāna teachings are found in the Prajñāpāramitā ("Transcendent Knowledge" or "Perfection of Wisdom") texts, which are some of the earliest Mahāyāna works.[113] Prajñāpāramitā is a deep knowledge of reality which Buddhas and bodhisattvas attain. It is a transcendent, non-conceptual and non-dual kind of knowledge into the true nature of things.[114] This wisdom is also associated with insight into the emptiness (śūnyatā) of dharmas (phenomena) and their illusory nature (māyā).[115] This amounts to the idea that all phenomena (dharmas) without exception have "no essential unchanging core" (i.e. they lack svabhāva, an essence or inherent nature), and therefore have "no fundamentally real existence".[116] These empty phenomena are also said to be conceptual constructions.[117]

Because of this, all dharmas (things, phenomena), even the Buddha's Teaching, the Buddha himself, Nirvāṇa and all living beings, are like "illusions" or "magic" (māyā) and "dreams" (svapna).[118][117] This emptiness or lack of real existence applies even to the apparent arising and ceasing of phenomena. Because of this, all phenomena are also described as unarisen (anutpāda), unborn (ajata), "beyond coming and going" in the Prajñāpāramitā literature.[119][120] Most famously, the Heart Sutra states that "all phenomena are empty, that is, without characteristic, unproduced, unceased, stainless, not stainless, undiminished, unfilled".[121] The Prajñāpāramitā texts also use various metaphors to describe the nature of things, for example, the Diamond Sutra compares phenomena to: "A shooting star, a clouding of the sight, a lamp, an illusion, a drop of dew, a bubble, a dream, a lightning's flash, a thunder cloud."[citation needed]

Prajñāpāramitā is also associated with not grasping, not taking a stand on or "not taking up" (aparigṛhīta) anything in the world. The Aṣṭasāhasrikā Prajñāpāramitā Sūtra explains it as "not grasping at form, not grasping at sensation, perception, volitions and cognition".[122] This includes not grasping or taking up even correct Buddhist ideas or mental signs (such as "not-self", "emptiness", bodhicitta, vows), since these things are ultimately all empty concepts as well.[123][117]

Attaining a state of fearless receptivity (ksanti) through the insight into the true nature of reality (Dharmatā) in an intuitive, non-conceptual manner is said to be the prajñāpāramitā, the highest spiritual wisdom. According to Edward Conze, the "patient acceptance of the non-arising of dharmas" (anutpattika-dharmakshanti) is "one of the most distinctive virtues of the Mahāyānistic saint."[124] The Prajñāpāramitā texts also claim that this training is not just for Mahāyānists, but for all Buddhists following any of the three vehicles.[125]

Madhyamaka (Centrism)

A statue of the Mahāyāna philosopher Nagarjuna, founder of the Madhyamaka school. Considered by some to be an Arya (noble) bodhisattva or even the "second Buddha"[126]
The Mahāyāna philosophical school termed Madhyamaka (Middle theory or Centrism, also known as śūnyavāda, 'the emptiness theory') was founded by the second-century figure of Nagarjuna. This philosophical tradition focuses on refuting all theories which

posit any kind of substance, inherent existence or intrinsic nature (svabhāva).[127]

In his writings, Nagarjuna attempts to show that any theory of intrinsic nature is contradicted by the Buddha's theory of dependent origination, since anything that has an independent existence cannot be dependently originated. The śūnyavāda philosophers were adamant that their denial of svabhāva is not a kind of nihilism (against protestations to the contrary by their opponents).[128]

Using the two truths theory, Madhyamaka claims that while one can speak of things existing in a conventional, relative sense, they do not exist inherently in an ultimate sense. Madhyamaka also argues that emptiness itself is also "empty", it does not have an absolute inherent existence of its own. It is also not to be understood as a transcendental absolute reality. Instead, the emptiness theory is merely a useful concept that should not be clung to. In fact, for Madhyamaka, since everything is empty of true existence, all things are just conceptualizations (prajñapti-matra), including the theory of emptiness, and all concepts must ultimately be abandoned in order to truly understand the nature of things.[128]

Vijñānavāda (The Consciousness doctrine)

Vijñānavāda ("the doctrine of consciousness", a.k.a. vijñapti-mātra, "perceptions only" and citta-mātra "mind only") is another important doctrine promoted by some Mahāyāna sutras which later became the central theory of a major philosophical movement which arose during the Gupta period called Yogācāra. The primary sutra associated with this school of thought is the Saṃdhinirmocana Sūtra, which claims that śūnyavāda is not the final definitive teaching (nītārtha) of the Buddha. Instead, the ultimate truth (paramārtha-satya) is said to be the view that all things (dharmas) are only mind (citta), consciousness (vijñāna) or perceptions (vijñapti) and that seemingly "external" objects (or "internal" subjects) do not really exist apart from the dependently originated flow of mental experiences.[129]

When this flow of mentality is seen as being empty of the subject-object duality we impose upon it, one reaches the non-dual cognition of "Thusness" (tathatā), which is nirvana. This doctrine is developed through various theories, the most important being the eight consciousnesses and the three natures.[130] The Saṃdhinirmocana calls its doctrine the 'third turning of the dharma wheel'. The Pratyutpanna sutra also mentions this doctrine, stating: "whatever belongs to this triple world is nothing but thought [citta-mātra]. Why is that? It is because however I imagine things, that is how they appear".[130]

The most influential thinkers in this tradition were the Indian brothers Asanga and Vasubandhu. Yogācāra philosophers developed their own interpretation of the doctrine of emptiness which also criticized Madhyamaka, in effect claiming it fell into nihilism.[131]

Buddha-nature

A Kamakura period reliquary topped with a cintamani (wish fulfilling jewel). Buddha nature texts often use the metaphor of a jewel (i.e. buddha-nature) which all beings have but are unaware of

Main article: Buddha-nature

The doctrine of Tathāgata embryo or Tathāgata womb (Tathāgatagarbha), also known as Buddha-nature, matrix or principle (Skt: Buddha-dhātu) is important in all modern Mahāyāna traditions, though it is interpreted in many different ways. Broadly speaking, Buddha-nature is concerned with explaining what allows sentient beings to become Buddhas.[132] The earliest sources for this idea may include the Tathāgatagarbha Sūtra and the Mahāyāna Mahāparinirvāṇa Sūtra.[133][132] The Mahāyāna Mahāparinirvāṇa refers to "a sacred nature that is the basis for [beings] becoming buddhas",[134] and it also describes it as the 'Self' (atman).[135]

David Seyfort Ruegg explains this concept as the base or support for the practice of the path, and thus it is the "cause" (hetu) for the fruit of Buddhahood.[132] The Tathāgatagarbha Sūtra states that within the defilements is found "the tathagata's wisdom, the tathagata's vision, and the tathagata's body...eternally unsullied, and...replete with virtues no different from my own...the tathagatagarbhas of all beings are eternal and unchanging".[136]

The ideas found in the Buddha-nature literature are a source of much debate and disagreement among Mahāyāna Buddhist philosophers as well as modern academics.[137] Some scholars have seen this as an influence from Brahmanic Hinduism, and some of these sutras admit that the use of the term 'Self' is partly done in order to win over non-Buddhist ascetics (in other words, it is a skillful means).[138][139] According to some scholars, the Buddha-nature discussed in some Mahāyāna sūtras does not represent a substantial self (ātman) which the Buddha critiqued; rather, it is a positive expression of emptiness (śūnyatā) and represents the potentiality to realize Buddhahood through Buddhist practices.[140] Similarly, Williams thinks that this doctrine was not originally dealing with ontological issues, but with "religious issues of realising one's spiritual potential, exhortation, and encouragement."[136]

The Buddha-nature genre of sūtras can be seen as an attempt to state Buddhist teachings using positive language while also maintaining the middle way, to prevent people from being turned away from Buddhism by a false impression of nihilism.[141] This is the position taken by the Laṅkāvatāra Sūtra, which states that the Buddhas teach the doctrine of tathāgatagarbha (which sounds similar to an atman) in order to help those beings who are attached to the idea of anatman. However, the sutra goes on to say that the tathāgatagarbha is empty and is not actually a substantial self.[142][143]

A different view is defended by various modern scholars like Michael Zimmermann. This view is the idea that Buddha-nature sutras such as the Mahāparinirvāṇa and the Tathāgatagarbha Sūtra teach an affirmative vision of an eternal, indestructible Buddhic Self.[135] Shenpen Hookham, a western scholar and lama sees Buddha-nature as a

True Self that is real and permanent.[144] Similarly, C. D. Sebastian understands the Ratnagotravibhāga's view of this topic as a transcendental self that is "the unique essence of the universe".[145]

Arguments for authenticity

Indian Mahāyāna Buddhists faced various criticisms from non-Mahāyānists regarding the authenticity of their teachings. The main critique they faced was that Mahāyāna teachings had not been taught by the Buddha, but were invented by later figures.[146][147] Numerous Mahāyāna texts discuss this issue and attempt to defend the truth and authenticity of Mahāyāna in various ways.[148]

One idea that Mahāyāna texts put forth is that Mahāyāna teachings were taught later because most people were unable to understand the Mahāyāna sūtras at the time of the Buddha and that people were ready to hear the Mahāyāna only in later times.[149] Certain traditional accounts state that Mahāyāna sutras were hidden away or kept safe by divine beings like Nagas or bodhisattvas until the time came for their dissemination.[150][151]

Similarly, some sources also state that Mahāyāna teachings were revealed by other Buddhas, bodhisattvas and devas to a select number of individuals (often through visions or dreams).[148] Some scholars have seen a connection between this idea and Mahāyāna meditation practices which involve the visualization of Buddhas and their Buddha-lands.[152]

Another argument that Indian Buddhists used in favor of the Mahāyāna is that its teachings are true and lead to awakening since they are in line with the Dharma. Because of this, they can be said to be "well said" (subhasita), and therefore, they can be said to be the word of the Buddha in this sense. This idea that whatever is "well spoken" is the Buddha's word can be traced to the earliest Buddhist texts, but it is interpreted more widely in Mahāyāna.[153] From the Mahāyāna point of view, a teaching is the "word of the Buddha" because it is in accord with the Dharma, not because it was spoken by a specific individual (i.e. Gautama).[154] This idea can be seen in the writings of Shantideva (8th century), who argues that an "inspired utterance" is the Buddha word if it is "connected with the truth", "connected with the Dharma", "brings about renunciation of kleshas, not their increase" and "it shows the laudable qualities of nirvana, not those of samsara".[155]

The modern Japanese Zen Buddhist scholar D. T. Suzuki similarly argued that while the Mahāyāna sūtras may not have been directly taught by the historical Buddha, the "spirit and central ideas" of Mahāyāna derive from the Buddha. According to Suzuki, Mahāyāna evolved and adapted itself to suit the times by developing new teachings and texts, while maintaining the spirit of the Buddha.[156]

Claims of superiority

Mahāyāna often sees itself as penetrating further and more profoundly into the

Buddha's Dharma. An Indian commentary on the Mahāyānasaṃgraha, gives a classification of teachings according to the capabilities of the audience:[157]

According to disciples' grades, the Dharma is classified as inferior and superior. For example, the inferior was taught to the merchants Trapuṣa and Ballika because they were ordinary men; the middle was taught to the group of five because they were at the stage of saints; the eightfold Prajñāpāramitās were taught to bodhisattvas, and [the Prajñāpāramitās] are superior in eliminating conceptually imagined forms. - Vivṛtaguhyārthapiṇḍavyākhyā

There is also a tendency in Mahāyāna sūtras to regard adherence to these sūtras as generating spiritual benefits greater than those that arise from being a follower of the non-Mahāyāna approaches. Thus the Śrīmālādevī Siṃhanāda Sūtra claims that the Buddha said that devotion to Mahāyāna is inherently superior in its virtues to following the śrāvaka or pratyekabuddha paths.[158]

The commentary on the Abhidharmasamuccaya gives the following seven reasons for the "greatness" of the Mahayana:[159]

Greatness of support (ālambana): the path of the bodhisatva is supported by the limitless teachings of the Perfection of Wisdom in One Hundred Thousand Verses and other texts;
Greatness of practice (pratipatti): the comprehensive practice for the benefit of self and others (sva-para-artha);
Greatness of understanding (jñāna): from understanding the absence of self in persons and phenomena (pudgala-dharma-nairātmya);
Greatness of energy (vīrya): from devotion to many hundreds of thousands of difficult tasks during three incalculable great aeons (mahākalpa);
Greatness of resourcefulness (upāyakauśalya): because of not taking a stand in Saṃsāra or Nirvāṇa;
Greatness of attainment (prāpti): because of the attainment of immeasurable and uncountable powers (bala), confidences (vaiśāradya), and dharmas unique to Buddhas (āveṇika-buddhadharma);
Greatness of deeds (karma): because of willing the performance of the deeds of a Buddha until the end of Saṃsāra by displaying awakening, etc.
Practice

Tibetan Buddhist prayer festival (monlam) at Bodh Gaya
Mahāyāna Buddhist practice is quite varied. A common set of virtues and practices which is shared by all Mahāyāna traditions are the six perfections or transcendent virtues (pāramitā). Another central practice advocated by numerous Mahāyāna sources is focused around "the acquisition of merit, the universal currency of the Buddhist world, a vast quantity of which was believed to be necessary for the attainment of Buddhahood".[160]

Devotion, ritual and meritorious practices

An elderly Tibetan woman with a prayer wheel inscribed with mantras

Devotees chanting before an image of Guanyin (a feminine form of Avalokiteshvara), at Longshan Temple, Taipei, Taiwan.
Indian Mahayana Buddhist practice included numerous elements of devotion and ritual, which were considered to generate much merit (punya) and to allow the devotee to obtain the power or spiritual blessings of the Buddhas and bodhisattvas. These elements remain a key part of Mahayana Buddhism today. Some key Mahayana practices in this vein include:

Devotion to Buddhas and Bodhisattvas: Mahayana bodhisattvas like Avalokiteśvara, Mañjuśrī, Tara and Amitābha Buddha are central objects of devotion. Practitioners may recite their names or mantras, bow in front of their statues and offer prayers and physical offerings like flowers and incense to receive their blessings, guidance, or assistance in achieving enlightenment or rebirth in a pure land.[161][162][163] In temples and monasteries, offering ceremonies (pūjās) are performed by monks in specific shrines with Buddha statues and other artwork. Donating or contributing money to the building of a Buddha statue or shrine is also another way to practice devotion to these figures.
Formally taking bodhisattva vows (praṇidhāna) which entails formally reciting several vows or resolutions to follow the bodhisattva path.[164]
Text focused practices: The reading, listening to, recitation, memorization, and study of Mahayana sutras, as well as the teaching of their content to others, was major practice in Indian Mahayana and remains influential today.[165] Furthermore, sutra copying, the handwriting of Mahayana sūtra manuscripts (or funding such a project) is also considered a very meritorious act.[166] Sūtra veneration was also practiced, with the physical text treated as a sacred object, often placed on altars, adorned with offerings and communally recited.[167]
Chanting: Buddhist chanting or recitation of sutras, prayers, mantras, and dhāraṇīs is another major ritual element in Mahayana.[168] One text which seems to have been popular in India was the Aspiration Prayer for Good Conduct (Bhadracaryā-praṇidhāna or Samantabhadra-caryā-praṇidhāna).[169] In East Asian Mahayana, one of the most widely chanted texts is the Heart Sutra.
Holy sites and temples: Indian Mahayana Buddhists often performed devotional practices in specific holy sites, which often included stupas, temples, shrines (chaitya) with Buddha statues and other shrines and Buddhist caves. Mahayana temples which focused on housing a central Buddha image became the norm during the Gupta period.[170] Pilgrims would often circumambulate the sites, make offerings of flowers, incense, and light, and engage in acts of reverence such as bowing or prostrating. Buddhist temples, stupas and shrines remain an important element of Mahayana Buddhism.
"Seven part worship" (saptāṇgapūjā or saptavidhā anuttarapūjā), an Indic Mahayana ritual formula which included: vandana (obeisance, bowing)   puja (worship), going for refuge, confession of bad deeds (papadesana), rejoicing in merit of all good deeds

(anumodana), prayer (adhyesana) and requesting Buddhas to teach (yacana), atmabhavadi-parityagah (surrender) and pariṇāmanā (the transfer of one's merit to others).[171] These ritual elements remain important in Mahayana Buddhist ritual practice. For example, these elements are incorporated into modern Tibetan Buddhist sadhanas (ritual recitions, meditation rituals) and they are also incorporated into East Asian Buddhist rituals (such as cofession rites, and refuge rituals).

The bodhisattva perfections

Mahāyāna sūtras, especially those of the Prajñāpāramitā genre, teach the practice of the six transcendent virtues or perfections (pāramitā) as part of the path to Buddhahood. Special attention is given to transcendent knowledge (prajñāpāramitā), which is seen as a primary virtue.[172] According to Donald S. Lopez Jr., the term pāramitā can mean "excellence" or "perfection" as well as "that which has gone beyond" or "transcendence".[173]

The Prajñapāramitā sūtras, and a large number of other Mahāyāna texts list six perfections:[174][175][160]

Dāna pāramitā: generosity, charity, giving
Śīla pāramitā: virtue, discipline, proper conduct (see also: Bodhisattva precepts)
Kṣānti pāramitā: patience, tolerance, forbearance, acceptance, endurance
Vīrya pāramitā: energy, diligence, vigour, effort
Dhyāna pāramitā: one-pointed concentration, contemplation, meditation
Prajñā pāramitā: transcendent wisdom, spiritual knowledge

This list is also mentioned by the Theravāda commentator Dhammapala, who describes it as a categorization of the same ten perfections of Theravada Buddhism. According to Dhammapala, Sacca is classified as both Śīla and Prajñā, Mettā and Upekkhā are classified as Dhyāna, and Adhiṭṭhāna falls under all six.[175] Bhikkhu Bodhi states that the correlations between the two sets show there was a shared core before the Theravada and Mahayana schools split.[176]

In the Ten Stages Sutra and the Mahāratnakūṭa Sūtra, four more pāramitās are listed:[107]

7. Upāya pāramitā: skillful means
8. Praṇidhāna pāramitā: vow, resolution, aspiration, determination, this related to the bodhisattva vows
9. Bala pāramitā: spiritual power
10. Jñāna pāramitā: knowledge

Meditation

Zen master Bodhidharma meditating, Ukiyo-e woodblock print by Tsukioka Yoshitoshi, 1887

Mahāyāna Buddhism teaches a vast array of meditation practices. These include meditations which are shared with the early Buddhist traditions, including mindfulness of breathing; mindfulness of the unattractivenes of the body; loving-kindness; the contemplation of dependent origination; and mindfulness of the Buddha.[177][178] In Chinese Buddhism, these five practices are known as the "five methods for stilling or pacifying the mind" and support the development of the stages of dhyana.[179]

The Yogācārabhūmi-Śāstra (compiled c. 4th century), which is the most comprehensive Indian treatise on Mahāyāna practice, discusses classic Buddhist numerous meditation methods and topics, including the four dhyānas, the different kinds of samādhi, the development of insight (vipaśyanā) and tranquility (śamatha), the four foundations of mindfulness (smṛtyupasthāna), the five hindrances (nivaraṇa), and classic Buddhist meditations such as the contemplation of unattractiveness, impermanence (anitya), suffering (duḥkha), and contemplation death (maraṇasaṃjñā).[180]

Other works of the Yogācāra school, such as Asaṅga's Abhidharmasamuccaya, and Vasubandhu's Madhyāntavibhāga-bhāsya also discuss meditation topics such as mindfulness, smṛtyupasthāna, the 37 wings to awakening, and samadhi.[181]

A very popular Mahāyāna practice from very early times involved the visualization of a Buddha while practicing mindfulness of a Buddha (buddhānusmṛti) along with their Pure Land. This practice could lead the meditator to feel that they were in the presence of the Buddha and in some cases it was held that it could lead to visions of the Buddhas, through which one could receive teachings from them.[182]

This meditation is taught in numerous Mahāyāna sūtras such as the Pure Land sutras, the Akṣobhya-vyūha and the Pratyutpanna Samādhi.[183][184] The Pratyutpanna states that through mindfulness of the Buddha meditation one may be able to meet this Buddha in a vision or a dream and learn from them.[185]

Similarly, the Samādhirāja Sūtra for states that:[186]

Those who, while walking, sitting, standing, or sleeping, recollect the moon-like Buddha, will always be in Buddha's presence and will attain the vast nirvāṇa. His pure body is the colour of gold, beautiful is the Protector of the World. Whoever visualizes him like this practises the meditation of the bodhisattvas.

An 18th century Mongolian miniature which depicts a monk generating a tantric visualization

In the case of Pure Land Buddhism, it is widely held that the practice of reciting the Buddha's name (called nianfo in Chinese and nembutsu in Japanese) can lead to rebirth in a Buddha's Pure Land, as well as other positive outcomes. In East Asian Buddhism, the most popular Buddha used for this practice is Amitabha.[182][187]

East Asian Mahāyāna Buddhism also teaches numerous unique meditation methods, including the Chan (Zen) practices of huatou, koan meditation, and silent illumination (Chinese: mòzhào, which developed into the Japanese shikantaza method). Indo-Tibetan Buddhism also includes numerous unique forms of Mahāyāna contemplations, such as tonglen ("sending and receiving"), lojong ("mind training") and samatha-vipasyana.

There are also numerous meditative practices that are generally considered to be part of a separate category rather than general or mainstream Mahāyāna meditation. These are the various practices associated with Vajrayāna (also termed Mantrayāna, Secret Mantra, Buddhist Tantra, and Esoteric Buddhism). This family of practices, which include such varied forms as Deity Yoga, Dzogchen, Mahamudra, the Six Dharmas of Nāropa, the recitation of mantras and dharanis, and the use of mudras and mandalas, are very important in Tibetan Buddhism as well as in some forms of East Asian Mantrayāna like Chinese Esoteric Buddhism, Shingon, and Tendai.

Scripture

Frontispiece of the Chinese Vajracchedikā Prajñāpāramitā Sūtra, the oldest known dated printed book in the world
Mahāyāna Buddhism takes the basic teachings of the Buddha as recorded in early scriptures as the starting point of its teachings, such as those concerning karma and rebirth, anātman, emptiness, dependent origination, and the Four Noble Truths. Mahāyāna Buddhists in East Asia have traditionally studied these teachings in the Āgamas preserved in the Chinese Buddhist canon. "Āgama" is the term used by those traditional Buddhist schools in India who employed Sanskrit for their basic canon. These correspond to the Nikāyas used by the Theravāda school.[188]

The surviving Āgamas in Chinese translation belong to at least two schools. Most of the Āgamas were never translated into the Tibetan canon, which according to Hirakawa, only contains a few translations of early sutras corresponding to the Nikāyas or Āgamas.[189] However, these basic doctrines are contained in Tibetan translations of later works such as the Abhidharmakośa and the Yogācārabhūmi-Śāstra.

Mahāyāna sutras

Main article: Mahayana sutras
In addition to accepting the essential scriptures of the early Buddhist schools as valid, Mahāyāna Buddhism maintains large collections of sūtras that are not recognized as authentic by the modern Theravāda school. The earliest of these sutras do not call themselves 'Mahāyāna', but use the terms vaipulya (extensive) sutras, or gambhira (profound) sutras.[38] These were also not recognized by some individuals in the early Buddhist schools. In other cases, Buddhist communities such as the Mahāsāṃghika school were divided along these doctrinal lines.[146]

In Mahāyāna Buddhism, the Mahāyāna sūtras are often given greater authority than the Āgamas. The first of these Mahāyāna-specific writings were written probably around the 1st century BCE or 1st-century CE.[190][191] Some influential Mahāyāna sutras are the Prajñaparamita sutras such as the Aṣṭasāhasrikā Prajñāpāramitā Sūtra, the Lotus Sutra, the Pure Land sutras, the Vimalakirti Sutra, the Golden Light Sutra, the Avatamsaka Sutra, the Sandhinirmocana Sutra and the Tathāgatagarbha sūtras.

According to David Drewes, Mahāyāna sutras contain several elements besides the promotion of the bodhisattva ideal, including "expanded cosmologies and mythical histories, ideas of purelands and great, 'celestial' Buddhas and bodhisattvas, descriptions of powerful new religious practices, new ideas on the nature of the Buddha, and a range of new philosophical perspectives."[38] These texts present stories of revelation in which the Buddha teaches Mahāyāna sutras to certain bodhisattvas who vow to teach and spread these sutras after the Buddha's death.[38]

Regarding religious praxis, David Drewes outlines the most commonly promoted practices in Mahāyāna sutras were seen as means to achieve Buddhahood quickly and easily and included "hearing the names of certain Buddhas or bodhisattvas, maintaining Buddhist precepts, and listening to, memorizing, and copying sutras, that they claim can enable rebirth in the pure lands Abhirati and Sukhavati, where it is said to be possible to easily acquire the merit and knowledge necessary to become a Buddha in as little as one lifetime."[38] Another widely recommended practice is anumodana, or rejoicing in the good deeds of Buddhas and Bodhisattvas.

The practice of meditation and visualization of Buddhas has been seen by some scholars as a possible explanation for the source of certain Mahāyāna sutras which are seen traditionally as direct visionary revelations from the Buddhas in their pure lands. Paul Harrison has also noted the importance of dream revelations in certain Mahāyāna sutras such as the Arya-svapna-nirdesa which lists and interprets 108 dream signs.[192]

As noted by Paul Williams, one feature of Mahāyāna sutras (especially earlier ones) is "the phenomenon of laudatory self-reference – the lengthy praise of the sutra itself, the immense merits to be obtained from treating even a verse of it with reverence, and the nasty penalties which will accrue in accordance with karma to those who denigrate the scripture."[193] Some Mahāyāna sutras also warn against the accusation that they are not the word of the Buddha (buddhavacana), such as the Astasāhasrikā (8,000 verse) Prajñāpāramitā, which states that such claims come from Mara (the evil tempter).[194] Some of these Mahāyāna sutras also warn those who would denigrate Mahāyāna sutras or those who preach it (i.e. the dharmabhanaka) that this action can lead to rebirth in hell.[195]

Another feature of some Mahāyāna sutras, especially later ones, is increasing sectarianism and animosity towards non-Mahāyāna practitioners (sometimes called sravakas, "hearers") which are sometimes depicted as being part of the 'hīnayāna' (the 'inferior way') who refuse to accept the 'superior way' of the Mahāyāna.[92][104] As noted by Paul Williams, earlier Mahāyāna sutras like the Ugraparipṛcchā Sūtra and the Ajitasena sutra do not present any antagonism towards the hearers or the ideal of arhatship like later sutras do.[104] Regarding the bodhisattva path, some Mahāyāna sutras promote it as a universal path for everyone, while others like the Ugraparipṛcchā see it as something for a small elite of hardcore ascetics.[104]

In the 4th-century Mahāyāna Abhidharma work Abhidharmasamuccaya, Asaṅga refers to the collection which contains the āgamas as the Śrāvakapiṭaka and associates it with the śrāvakas and pratyekabuddhas.[196] Asaṅga classifies the Mahāyāna sūtras as belonging to the Bodhisattvapiṭaka, which is designated as the collection of teachings for bodhisattvas.[196]

Other literature

Mahāyāna Buddhism also developed a massive commentarial and exegetical literature, many of which are called śāstra (treatises) or vrittis (commentaries). Philosophical texts were also written in verse form (karikās), such as in the case of the famous Mūlamadhyamika-karikā (Root Verses on the Middle Way) by Nagarjuna, the foundational text of Madhyamika philosophy. Numerous later Madhyamika philosophers like Candrakirti wrote commentaries on this work as well as their own verse works.

Mahāyāna Buddhist tradition also relies on numerous non-Mahayana commentaries (śāstra), a very influential one being the Abhidharmakosha of Vasubandhu, which is written from a non-Mahayana Sarvastivada–Sautrantika perspective.

Vasubandhu is also the author of various Mahāyāna Yogacara texts on the philosophical theory known as vijñapti-matra (conscious construction only). The Yogacara school philosopher Asanga is also credited with numerous highly influential commentaries. In East Asia, the Satyasiddhi śāstra was also influential.

Another influential tradition is that of Dignāga's Buddhist logic whose work focused on epistemology. He produced the Pramānasamuccaya, and later Dharmakirti wrote the Pramānavārttikā, which was a commentary and reworking of the Dignaga text.

Later Tibetan and Chinese Buddhists continued the tradition of writing commentaries.

Classifications

Dating back at least to the Saṃdhinirmocana Sūtra is a classification of the corpus of Buddhism into three categories, based on ways of understanding the nature of reality, known as the "Three Turnings of the Dharma Wheel". According to this view, there were three such "turnings":[197]

In the first turning, the Buddha taught the Four Noble Truths at Varanasi for those in the śravaka vehicle. It is described as marvelous and wonderful, but requires interpretation and occasioning controversy.[198] The doctrines of the first turning are exemplified in the Dharmacakra Pravartana Sūtra. This turning represents the earliest phase of the Buddhist teachings and the earliest period in the history of Buddhism.

In the second turning, the Buddha taught the Mahāyāna teachings to the bodhisattvas, teaching that all phenomena have no-essence, no arising, no passing away, are originally quiescent, and essentially in cessation. This turning is also described as marvelous and wonderful, but requiring interpretation and occasioning controversy.[198] Doctrine of the second turning is established in the Prajñāpāramitā teachings, first put into writing around 100 BCE. In Indian philosophical schools, it is exemplified by the Mādhyamaka school of Nāgārjuna.

In the third turning, the Buddha taught similar teachings to the second turning, but for everyone in the three vehicles, including all the śravakas, pratyekabuddhas, and bodhisattvas. These were meant to be completely explicit teachings in their entire detail, for which interpretations would not be necessary, and controversy would not occur.[198] These teachings were established by the Saṃdhinirmocana Sūtra as early as the 1st or 2nd century CE.[199] In the Indian philosophical schools, the third turning is exemplified by the Yogācāra school of Asaṅga and Vasubandhu.

Some traditions of Tibetan Buddhism consider the teachings of Esoteric Buddhism and Vajrayāna to be the third turning of the Dharma Wheel.[200] Tibetan teachers, particularly of the Gelugpa school, regard the second turning as the highest teaching, because of their particular interpretation of Yogācāra doctrine. The Buddha Nature teachings are normally included in the third turning of the wheel.[citation needed]

The different Chinese Buddhist traditions have different schemes of doctrinal periodization called panjiao which they use to organize the sometimes bewildering array of texts.

Relationship with the early texts

Scholars have noted that many key Mahāyāna ideas are closely connected to the earliest texts of Buddhism. The seminal work of Mahāyāna philosophy, Nāgārjuna's Mūlamadhyamakakārikā, mentions the canon's Katyāyana Sūtra (SA 301) by name, and may be an extended commentary on that work.[201] Nāgārjuna systematized the Mādhyamaka school of Mahāyāna philosophy. He may have arrived at his positions from a desire to achieve a consistent exegesis of the Buddha's doctrine as recorded in the canon. In his eyes, the Buddha was not merely a forerunner, but the very founder of the Mādhyamaka system.[202] Nāgārjuna also referred to a passage in the canon regarding "nirvanic consciousness" in two different works.[203]

Yogācāra, the other prominent Mahāyāna school in dialectic with the Mādhyamaka school, gave a special significance to the canon's Lesser Discourse on Emptiness (MA 190).[204] A passage there (which the discourse itself emphasizes) is often quoted in later Yogācāra texts as a true definition of emptiness.[205] According to Walpola Rahula, the thought presented in the Yogācāra school's Abhidharma-samuccaya is undeniably closer to that of the Pali Nikayas than is that of the Theravadin Abhidhamma.[206]

Both the Mādhyamikas and the Yogācārins saw themselves as preserving the Buddhist

Middle Way between the extremes of nihilism (everything as unreal) and substantialism (substantial entities existing). The Yogācārins criticized the Mādhyamikas for tending towards nihilism, while the Mādhyamikas criticized the Yogācārins for tending towards substantialism.[207]

Key Mahāyāna texts introducing the concepts of bodhicitta and Buddha nature also use language parallel to passages in the canon containing the Buddha's description of "luminous mind" and appear to have evolved from this idea.[208][209]

Contemporary forms of Mahāyāna Buddhism

Map showing the three major Buddhist divisions
The main contemporary traditions of Mahāyāna in Asia are:

The East Asian Mahāyāna traditions of China, Korea, Japan and Vietnam, also known as "Eastern Buddhism". Peter Harvey estimates that there are about 360 million Eastern Buddhists in Asia.[210]
The Indo-Tibetan tradition (Vajrayana Buddhism, mainly found in Tibet, Inner Mongolia and elsewhere in Western China, Mongolia, Bhutan, parts of India, Nepal and Russia, also known as "Northern Buddhism". According to Harvey "the number of people belonging to Northern Buddhism totals only around 18.2 million."[211]
There are also some minor Mahāyāna traditions practiced by minority groups, such as Newar Buddhism practiced by the Newar people (Nepal) and Azhaliism practiced by the Bai people (Yunnan).

Furthermore, there are also various new religious movements which either see themselves as Mahāyāna or are strongly influenced by Mahāyāna Buddhism. Examples of these include Hòa Hảo, Won Buddhism, Triratna Buddhist Community and Sōka Gakkai.

Lastly, there are various East Asian religious traditions which are strongly influenced by Mahāyāna Buddhism, though they may not be considered as being "Buddhist" per se. These include: Bon, Shugendo, Mongolian Yellow shamanism, Syncretized Shinto (shinbutsu-shūgō) and some of the Chinese salvationist religions.

Most of the major forms of contemporary Mahāyāna Buddhism are also practiced by Asian immigrant populations in the West and also by western convert Buddhists. For more on this topic see: Buddhism in the West.

Chinese

Fo Guang Shan Buddha Museum, Taiwan
Contemporary Han Chinese Buddhism is practiced through many varied forms, such as Chan (Zen), Pure land, Tiantai, Huayan and mantra practices. This group is the largest population of Buddhists in the world. There are between 228 and 239 million Mahāyāna

Buddhists in the People's Republic of China. This does not include the Tibetan and Mongolian Buddhists who practice Tibetan Buddhism.[210]

Harvey gives the East Asian Mahāyāna Buddhist population in other countries as follows: Taiwanese Buddhists, 8 million; Malaysian Buddhists, 5.5 million; Singaporean Buddhists, 1.5 million; Hong Kong, 0.7 million; Indonesian Buddhists, 4 million, The Philippines: 2.3 million.[210] Most of these are Han Chinese populations.

Chinese Buddhism can be divided into various different traditions (zong), such as Sanlun, Faxiang, Tiantai, Huayan, Pure Land, Chan, and Zhenyan. However, historically, most temples, institutions and Buddhist practitioners usually did not belong to any single "sect" (as is common in Japanese Buddhism), but draw from the various different elements of Chinese Buddhist thought and practice. This non-sectarian and eclectic aspect of Chinese Buddhism as a whole has persisted from its historical beginnings into its modern practice.[212][213]

The modern development of an ideology called Humanistic Buddhism (Chinese: 人間佛教; pinyin: rénjiān fójiào, more literally "Buddhism for the Human World") has also been influential on Chinese Buddhist leaders and institutions.[214] Chinese Buddhists may also practice some form of religious syncretism with other Chinese religions, such as Taoism.[215] In modern China, the reform and opening up period in the late 20th century saw a particularly significant increase in the number of converts to Chinese Buddhism, a growth which has been called "extraordinary".[216]

Korean

Korean Buddhism is dominated by the Korean Seon school (i.e. Zen), primarily represented by the Jogye Order and the Taego Order. Korean Seon also includes some Pure Land practice.[217] It is mainly practiced in South Korea, with a rough population of about 10.9 million Buddhists.[210] There are also some minor Korean schools, such as the Cheontae (i.e. Korean Tiantai), and the esoteric Jingak and Chinŏn schools.

While North Korea's totalitarian government remains repressive and ambivalent towards religion, at least 11 percent of the population is considered to be Buddhist according to Williams.[218]

Japanese

Japanese Buddhism is divided into numerous traditions which include various sects of Pure Land Buddhism (the largest being Shin and Jodo), Tendai, Nichiren Buddhism, Shingon and three major sects of Zen (Soto, Rinzai and Obaku). There are also various Mahāyāna oriented Japanese new religions that arose in the post-war period. Many of these new religions are lay movements like Sōka Gakkai, Risshō Kōsei Kai and Agon Shū.[219]

An estimate of the Japanese Mahāyāna Buddhist population is given by Harvey as 52 million and a recent 2018 survey puts the number at 84 million.[210][220] It should also be noted that many Japanese Buddhists also participate in Shinto practices, such as visiting shrines, collecting amulets and attending festivals.[221]

Vietnamese
Vietnamese Buddhism is strongly influenced by the Chinese tradition. It is a synthesis of numerous practices and ideas. Vietnamese Mahāyāna draws practices from Vietnamese Thiền (Chan/Zen), Tịnh độ (Pure Land), and Mật Tông (Mantrayana) and its philosophy from Hoa Nghiêm (Huayan) and Thiên Thai (Tiantai).[222] New Mahāyāna movements have also developed in the modern era, perhaps the most influential of which has been Thích Nhất Hạnh's Plum Village Tradition, which also draws from Theravada Buddhism.

Though Vietnamese Buddhism suffered extensively during the Vietnam war (1955–1975) and during subsequent communist takeover of the south, there has been a revival of the religion since the liberalization period following 1986. There are about 43 million Vietnamese Mahāyāna Buddhists.[210]

Tibetan

The 14th Dalai Lama Tenzin Gyatso with Desmond Tutu in 2004. Due to his charisma, the Dalai Lama has become the international face of contemporary Tibetan Buddhism[223]
Indo-Tibetan Buddhism, Tibetan Buddhism or "Northern" Buddhism derives from the Indian Vajrayana Buddhism that was adopted in medieval Tibet. Though it includes numerous tantric Buddhist practices not found in East Asian Mahāyāna, Northern Buddhism still considers itself as part of Mahāyāna Buddhism (albeit as one which also contains a more effective and distinct vehicle or yana).

Contemporary Northern Buddhism is traditionally practiced mainly in the Himalayan regions and in some regions of North Central Asia, including:[224]

The Tibet autonomous region (PRC): 5.4 million
North and North-east India (Sikkhim, Ladakh, West Bengal, Jammu and Kashmir): 0.4 million
Pakistan: 0.16 million
Nepal: 2.9 million
Bhutan: 0.49 million
Mongolia: 2.7 million
Inner Mongolia (PRC): 5 million
Buryatia, Tuva and Kalmykia (Russian Federation): 0.7 million
As with Eastern Buddhism, the practice of northern Buddhism declined in Tibet, China and Mongolia during the communist takeover of these regions (Mongolia: 1924, Tibet: 1959). Tibetan Buddhism continued to be practiced among the Tibetan diaspora population, as well as by other Himalayan peoples in Bhutan, Ladakh and Nepal. Post-1980s though, Northern Buddhism has seen a revival in both Tibet and Mongolia

due to more liberal government policies towards religious freedom.[225] Northern Buddhism is also now practiced in the Western world by western convert Buddhists.

Relationship to the Theravada school

Main article: Theravada

Role of the Bodhisattva

In the early Buddhist texts, and as taught by the modern Theravada school, the goal of becoming a teaching Buddha in a future life is viewed as the aim of a small group of individuals striving to benefit future generations after the current Buddha's teachings have been lost, but in the current age there is no need for most practitioners to aspire to this goal. Theravada texts do, however, hold that this is a more perfectly virtuous goal.[226]

Paul Williams writes that some modern Theravada meditation masters in Thailand are popularly regarded as bodhisattvas.[227]

Cholvijarn observes that prominent figures associated with the Self perspective in Thailand have often been famous outside scholarly circles as well, among the wider populace, as Buddhist meditation masters and sources of miracles and sacred amulets. Like perhaps some of the early Mahāyāna forest hermit monks, or the later Buddhist Tantrics, they have become people of power through their meditative achievements. They are widely revered, worshipped, and held to be arhats or (note!) bodhisattvas.

Theravāda and Hīnayāna

In the 7th century, the Chinese Buddhist monk Xuanzang describes the concurrent existence of the Mahāvihara and the Abhayagiri Vihara in Sri Lanka. He refers to the monks of the Mahāvihara as the "Hīnayāna Sthaviras" (Theras), and the monks of the Abhayagiri Vihara as the "Mahāyāna Sthaviras".[228] Xuanzang further writes:[229]

The Mahāvihāravāsins reject the Mahāyāna and practice the Hīnayāna, while the Abhayagirivihāravāsins study both Hīnayāna and Mahāyāna teachings and propagate the Tripiṭaka.

The modern Theravāda school is usually described as belonging to Hīnayāna.[230][231][232][233][234] Some authors have argued that it should not be considered such from the Mahāyāna perspective. Their view is based on a different understanding of the concept of Hīnayāna. Rather than regarding the term as referring to any school of Buddhism that has not accepted the Mahāyāna canon and doctrines, such as those pertaining to the role of the bodhisattva,[231][233] these authors argue that the classification of a school as "Hīnayāna" should be crucially dependent on the adherence to a specific phenomenological position. They point out that unlike the now-extinct Sarvāstivāda school, which was the primary object of Mahāyāna criticism, the Theravāda does not claim the existence of independent entities (dharmas); in this it maintains the attitude of early Buddhism.[235][236][237]

Adherents of Mahāyāna Buddhism disagreed with the substantialist thought of the Sarvāstivādins and Sautrāntikas, and in emphasizing the doctrine of emptiness, Kalupahana holds that they endeavored to preserve the early teaching.[238] The Theravādins too refuted the Sarvāstivādins and Sautrāntikas (and other schools) on the grounds that their theories were in conflict with the non-substantialism of the canon. The Theravāda arguments are preserved in the Kathāvatthu.[239]

Some contemporary Theravādin figures have indicated a sympathetic stance toward the Mahāyāna philosophy found in texts such as the Heart Sūtra (Skt. Prajñāpāramitā Hṛdaya) and Nāgārjuna's Fundamental Stanzas on the Middle Way (Skt. Mūlamadhyamakakārikā).[240][241]

Notes

Mahāyāna; /ˌmɑːhəˈjɑːnə/ MAH-hə-YAH-nə; Sanskrit: महायान, pronounced [mɐɦaːˈjaːnɐ], lit. 'Great Vehicle'; Chinese: 大乘; Vietnamese: Đại thừa

"The Mahayana, 'Great Vehicle' or 'Great Carriage' (for carrying all beings to nirvana), is also, and perhaps more correctly and accurately, known as the Bodhisattvayana, the bodhisattva's vehicle." Warder, A.K. (3rd edn. 1999). Indian Buddhism: p. 338

Karashima: "I have assumed that, in the earliest stage of the transmission of the Lotus Sūtra, the Middle Indic forn jāṇa or *jāna (Pkt < Skt jñāna, yāna) had stood in these places ... I have assumed, further, that the Mahāyānist terms buddha-yānā ("the Buddha-vehicle"), mahāyāna ("the great vehicle"), hīnayāna ("the inferior vehicle") meant originally buddha-jñāna ("buddha-knowledge"), mahājñāna ("great knowledge") and hīnajñāna ("inferior knowledge")." Karashima, Seishi (2001). Some features of the Language of the Saddharma-puṇḍarīka-sūtra, Indo-Iranian Journal 44: 207–230

Warder: "The sudden appearance of large numbers of (Mahayana) teachers and texts (in North India in the second century AD) would seem to require some previous preparation and development, and this we can look for in the South." Warder, A.K. (3rd edn. 1999). Indian Buddhism: p. 335.

"The most important evidence – in fact the only evidence – for situating the emergence of the Mahayana around the beginning of the common era was not Indian evidence at all, but came from China. Already by the last quarter of the 2nd century CE, there was a small, seemingly idiosyncratic collection of substantial Mahayana sutras translated into what Erik Zürcher calls 'broken Chinese' by an Indoscythian, whose Indian name has been reconstructed as Lokaksema." Macmillan Encyclopedia of Buddhism (2004): p. 492

"Certainly, we have for this period an extensive body of inscriptions from virtually all parts of India. ... But nowhere in this extensive body of material is there any reference, prior to the fifth century, to a named Mahāyāna.", Macmillan Encyclopedia of Buddhism (2004): p. 493

"What is particularly disconcerting here is the disconnect between expectation and reality: We know from Chinese translations that large numbers of Mahāyāna sutras were being composed in the period between the beginning of the common era and the fifth century. But outside of texts, at least in India, at exactly the same period, very different – in fact seemingly older – ideas and aspirations appear to be motivating actual behavior, and old and established Hinayana groups appear to be the only ones that are patronized and supported., Macmillan Encyclopedia of Buddhism (2004): p. 494

"In other words, once nontextual evidence is taken into account the picture changes dramatically. Rather than being datable to the beginning of the common era, this strand of Mahayana Buddhism, at least, appeared to have no visible impact on Indian Buddhist cult practice until the 2nd century, and even then what impact it had was extremely isolated and marginal, and had no lasting or long-term consequences – there were no further references to Amitabha in Indian image inscriptions. Almost exactly the same pattern occurs (concerning Mahayana) on an even broader scale when nontextual evidence is considered." Macmillan Encyclopedia of Buddhism (2004): p. 493

"There are, it seems, very few things that can be said with certainty about Mahayana Buddhism...But apart from the fact that it can be said with some certainty that the Buddhism embedded in China, Korea, Tibet, and Japan is Mahayana Buddhism, it is no longer clear what else can be said with certainty about Mahayana Buddhism itself, and especially about its earlier, and presumably formative, period in India.", Macmillan Encyclopedia of Buddhism (2004): p. 492

"It has become increasingly clear that Mahayana Buddhism was never one thing, but rather, it seems, a loosely bound bundle of many, and – like Walt Whitman – was large and could contain, in both senses of the term, contradictions, or at least antipodal elements." Macmillan Encyclopedia of Buddhism (2004): p. 492

"One of the most frequent assertions about the Mahayana is that it was a lay-influenced, or even lay-inspired and dominated, movement that arose in response to the increasingly closed, cold, and scholastic character of monastic Buddhism. This, however, now appears to be wrong on all counts...much of its [Hinayana's] program being in fact intended and designed to allow laymen and women and donors the opportunity and means to make religious merit."
